

Internship Testimonials SD

I have learned plenty in my two months with the Storm Water Pollution Prevention (SWPP) section. We monitor the beaches of San Diego from Pacific Beach to Torrey Pines and look are bacteria levels to keep everyone that visits safe. I am very fortunate to be interning with a group of amazing scientists!

-Transportation and Storm Water Intern

My time at EMTS has given me valuable, holistic experience in the field of environmental monitoring and compliance. This internship has taught me everything from practical life skills to faxing reports to learning about our government's court system. I would recommend this fabulous internship to anyone who wants to get involved with their city.

- Criminal Justice Department Intern

As an intern with the Energy and Sustainability Division of the Environmental Services Department, I have been developing important skills in data analysis, data manipulation, and web development. I have learned how to manipulate data frames and plot charts that visualize changes in the City's energy consumption. I think these are all really great skills that I can apply in the future so I'm really enjoying the internship.

- Environmental Sciences Department Intern
