

**COUNCILMEMBER SEAN ELO-RIVERA  
NINTH COUNCIL DISTRICT**

**M E M O R A N D U M**

**DATE:** February 22, 2021

**TO:** Honorable Members of the Environment Committee

**FROM:** Councilmember Sean Elo-Rivera, Chair, Environment Committee

**SUBJECT:** 2021 Environment Committee Work Plan

---

Every person has a right to live in a clean and healthy neighborhood with access to nature and open spaces. Sadly, decades of discriminatory policies and practices in San Diego have resulted in serious environmental injustices while climate change has grown into a global crisis. Fortunately, with local action and global thinking, San Diego can improve the lives of our residents while becoming a global leader in climate action and ambition.

That is why I am proud to serve as chair of the Environment Committee and excited to share our 2021 Work Plan for the City of San Diego Environment Committee. The Work Plan is based in part on your policy priorities, which were promulgated via memo in response to my call memo dated December 23, 2020. The public also played a significant role in shaping the Work Plan. Community members shared their environmental policy priorities by submitting:

- 151 responses to a survey regarding 2021 Environment Committee priorities
- 26 comments on the City's public comment form for the Environment Committee meeting on January 28, 2021
- 17 public comments at the Environment Committee meeting on January 28, 2021
- 4 memos from community-based organizations

I deeply appreciate the many San Diegans who participated in the process to develop the 2021 Work Plan. As discussed in the Work Plan, public participation is a core principle of this year's agenda and I invite all members of the public to engage with the Environment Committee at and before each meeting.

Additionally, it should be noted that the District 9 office will place a heavy emphasis on the intentional inclusion of youth voices in the work of this Committee. Despite having the most at stake when environmental decisions are made, youth have been systemically disenfranchised from participating in the development of environmental policies. We intend to change that both through our practices this year and hope the committee can identify opportunities for the systemic inclusion of young San Diegans.

## Attachment – 2021 Environment Committee Work Plan

As per the municipal code, the Environment Committee's area of responsibility includes policy matters related to:

- Clean Water Program
- Water Management and Policy
- Energy (Solar, Property Assessed Clean Energy Programs, Green)
- Multiple Species Conservation Program
- Solid Waste Disposal
- Recycling
- Air Quality Standards
- Hazardous Waste
- Regional Parks
- Open Space
- Public Utilities
- Golf
- Utility Undergrounding
- Franchise Agreements
- Stormwater Management and Policy
- Climate Mitigation and Adaption Plan (CMAP)
- Wastewater Management and Policy
- Independent Rates Oversight Committee
- Indirect Potable Reuse/Direct Potable Reuse
- Recycled Water
- Graywater, referred to as Pure Water
- San Diego County Water Authority
- Wildlife Management
- Environmental Services
- Environmental Policy

District 9 staff reviewed each submission from the public and grouped them by themes, which are represented in the Work Plan. It then aligned the public's foremost priorities with those of the committee members to build a list of policy priorities. Not all priorities submitted by the public or committee members are reflected in the Work Plan, but the Work Plan is neither exhaustive nor binding. I welcome your and the public's feedback on its priorities throughout the year.

### **Racial equity and social justice**

Racial equity means the elimination of racial disparities, and social justice can be defined as equal rights and opportunities for all. We heard demands for racial equity and social justice from both community and committee members. These concepts are integral to developing fair and equitable environmental policy and were at the forefront when developing the list of Committee policy priorities.

The Work Plan discusses equity and justice—in this case, environmental justice—and highlights policies that explicitly address these demands, but it's critical that the Committee views all its work through an equity and environmental justice lens. Every policy can be assessed for its impact on marginalized communities. To support this goal, I've added resources on conducting racial equity analyses (Enclosure 1). These resources are not official tools of the City of San Diego, but they will help me assess policies brought before the Committee through a racial equity lens.

**Attachment – 2021 Environment Committee Work Plan**

I am extremely excited to serve with you on the Environment Committee. Your commitment to a more sustainable and equitable San Diego is inspiring and I look forward to what we can achieve in 2021.

Attachment: 2021 Environment Committee Work Plan

Enclosure: (1) Racial Equity resources  
(2) Summarized community survey results

CC: Angela Colton, Fiscal & Policy Analyst, Office of the Independent Budget Analyst

### 2021 Committee meeting information

#### **Meeting Dates**

<b>Date</b>	<b>Time</b>	<b>Type</b>
January 28	1:00 p.m.	Regular
February 25	1:00 p.m.	Regular
March 4	6:00 p.m.	Regular
March 18	1:00 p.m.	Regular
April 15	1:00 p.m.	Regular
May 28	9:00 a.m.	Regular
June 17	1:00 p.m.	Regular
July 15	1:00 p.m.	Regular
September 16	6:00 p.m.	Regular
October 7	1:00 p.m.	Regular
October 21	9:00 a.m.	Regular
November 18	1:00 p.m.	Regular

Note: additional meetings may be added to the legislative calendar. The public will be notified in accordance with Brown Act noticing requirements should meetings be added.

#### **Meeting participation**

##### Access

All City Council and committee meetings will be held virtually via Zoom Webinar until further notice due to the ongoing Covid-19 pandemic. Information for attending the meeting virtually or viewing the broadcast on CityTV can be found on the [City Clerk's website](#) and on each committee meeting agenda.

##### Non-agenda public comment

At each meeting, any member of the public can provide non-agenda public comment, which is held soon after the meeting begins. Non-agenda public comment is for offering remarks for any topic relevant to the Committee that is not being discussed as an agenda item. Speakers for non-agenda public comment will have 2 minutes to provide their remarks, although there will be no discussion among the committee members of the topics addressed during non-agenda public comment.

##### Public comment

Members of the public will have an opportunity to comment on each agenda item following staff presentations on the item. Depending on the number of speakers, each speaker will have 1-2 minutes to provide their remarks, which must be applicable to the item being heard. Following the conclusion of public comment, committee members will deliberate on the item.

Instructions for providing public comment are included on the meeting agenda and are promulgated at the meeting.

## **Guiding Values**

Informing the Environment Committee’s work and policy priorities is the following set of values.

### **Environmental justice**

As defined by State law, ‘environmental justice’ means “the fair treatment of people of all races, cultures, and incomes with respect to the development, adoption, implementation, and enforcement of environmental laws, regulations, and policies.”

Generations of racist and prejudiced government decisions have resulted in San Diego’s low-income communities of color being disproportionately impacted by pollution and associated health risks. Today, these communities are bearing the brunt of climate change.

Environmental justice represents the intentional action to correct these inequities and ensure the input of San Diegans most impacted by environmental injustices is considered in policies that affect them. Centering environmental justice is intended to eliminate disparities and provide opportunity for all.

### **Economic justice**

Like environmental justice, economic justice represents the action to correct the structural inequities that have led to the economic marginalization of working-class communities and San Diegans of color. Addressing climate change and investing in infrastructure presents unprecedented economic opportunities for the City of San Diego to deliver economic justice and usher in a just transition to a cleaner, healthier, more sustainable future.

### **Democracy**

Meaningful public participation and transparency are essential to building public trust and to developing and implementing impactful public policy. The Committee invites all members of the public to engage in Committee work. This can be through public comment at meetings to inform decision making and hold committee members accountable. It can also be through phone or email communication with committee members’ staff or the committee consultant in between meetings.

The Committee also has a responsibility to be transparent and, when feasible, explain in layperson’s terms the processes, policies, and decision making at the Committee. The public may not always agree with the outcomes, but the Committee is committed to increasing transparency and accountability. That starts with this Work Plan, in which the rationale for the goals and priorities are provided.

## **Committee goals**

Flowing from the committee’s principles are desired outcomes, which were identified by grouping community and committee members’ priorities by theme. Policies crafted and informed by the committee should result in improved quality of life for all San Diegans by:

- Advancing environmental and economic justice
- Taking effective climate action
- Preserving, creating, and expanding open space and natural habitat
- Investing in shared infrastructure and services
- Investing in water programs
- Aligning the City’s environmental and transportation policy

**2021 Environment Committee priorities**

The policy priorities below are designed to achieve the Committee’s goals and align with its guiding values.

**Advancing environmental and economic justice**

**Climate Equity Fund**

The Climate Equity Fund will be created to fund climate change adaptation and resiliency projects and programs in communities of concern that have been disproportionately affected by climate change and environmental pollutants. Staff should present to Committee the proposed revenue sources for the fund and project/program eligibility.

*Est. Completion Date: May 2021*

**Develop Environmental Justice Element**

State Senate Bill 1000, signed into law in 2016, requires local jurisdictions to identify environmental justice communities (or, “disadvantaged communities”) in their jurisdiction and incorporate in their General Plans goals, policies, and objectives to address longstanding disparate impacts of environmental policy. City staff initiated the process to develop an Environmental Justice Element of the General Plan in late 2020 and in 2021 should present the draft plan to the Committee.

*Est. Completion Date: November 2021*

**Establish Youth Environmental/Recreation Corp**

The Committee should initiate the process to establish a program within or supported by the City that offers youth employment opportunities to support community food gardens, wildlife protection efforts, urban biodiversity initiatives, and other green efforts. Additional features of the program include scholarship opportunities that prioritize opportunity youth and youth eligible for Temporary Assistance for Needy Families (TANF), and outreach workers to disseminate info about youth programs, services, resources, and scholarships.

*Est. Completion Date: June 2021*

**Review People’s Ordinance inequities**

Due to a 1919 ballot measure known as the People’s Ordinance, the City does not charge fees for refuse collection services, unlike most cities in California. Changes to the law over time have resulted in free City-provided trash collection for single-family residences, while multifamily residences and businesses must pay private companies for refuse collection. The Committee should review the racial and socioeconomic disparities the Ordinance leads to and options for amending the Ordinance, to include a possible 2022 ballot measure.

*Est. Completion Date: September 2021*

**Update on San Diego Green New Deal Alliance**

Over 40 local community-based organizations, labor unions, and businesses have formed the San Diego Green New Deal Alliance. The Alliance developed a vision that would fight the climate crisis, center frontline communities, and build a just society with an economy that works for all. The committee should request a presentation from the Alliance about the community’s vision.

*Est. Completion Date: April 2021*

## Taking effective climate action

### Future of the City's gas and electric franchises

The City allows San Diego Gas & Electric (SDG&E) to use the public right of way to deliver gas and electricity throughout the city. The gas and electric 'franchise agreements' that give SDG&E this right expire in June 2021. The Committee will help the City engage the public on the gas and electric franchises and help determine the future of the City's franchises.

*Est. Completion Date: June 2021*

### Discussion on municipalization

Many members of the public have expressed their desires for the City to form a municipal utility provider. The Committee will hear a balanced discussion on the process, benefits, and drawbacks of forming a municipal utility.

*Est. Completion Date: February 2021*

### San Diego Community Power update

San Diego Community Power (SDCP), the recently established Community Choice Aggregation program, will play a pivotal role in San Diego's energy future. SDCP's mission is to procure reliable, affordable electricity from renewable sources for customers throughout San Diego. The Committee should request SDCP staff to provide an update on its rollout and operations.

*Est. Completion Date: November 2021*

### Climate Action Plan

The City's landmark Climate Action Plan (CAP), released in 2015, defines San Diego's climate and environmental goals. The Committee will oversee several aspects of the CAP in 2021.

- Review CAP Audit – the City Auditor conducted a Performance Audit of the CAP and is expected to present their findings to Committee.

*Est. Completion Date: March 2021*

- Inform CAP Update – the 2015 CAP included a commitment to update the CAP in 2020. The Committee will help shape the Updated CAP when presented by staff.

*Est. Completion Date: July 2021*

- Request Five-Year Outlook/Implementation Plan – as part of the Updated CAP, a set of strategies and policies should be outlined that will help the City achieve its climate and emissions goals. Along with these policies should be associated costs and an official Five-Year Outlook. The Committee should request such an Implementation Plan and Five-Year Outlook. Included in the Implementation Plan should be policies that result in eliminating building methane emissions.

*Est. Completion Date: July 2021*

- Review Climate Equity Index – City staff developed a Climate Equity Index to “measure the level of access to opportunity residents have within a census tract and

## Attachment – 2021 Environment Committee Work Plan

assess the degree of potential impact from climate change to these areas.” The Committee should request a presentation of the CEI to understand its data inputs, use cases, and how it will be integrated in the City’s many climate plans.

*Est. Completion Date: July 2021*

### Inform Climate Adaption and Resiliency Plan

Separate from the CAP, which is designed to mitigate future climate change, City staff is developing a Climate Adaptation and Resiliency Plan, which is designed to address known changes to climate and the environment. The Committee will review and inform the Plan when presented by staff.

*Est. Completion Date: November 2021*

### Review Municipal Energy Strategy

The Sustainability Department recently adopted a Municipal Energy Strategy, which outlines how the City will achieve its climate goals through City-owned assets. The Committee should request staff present on the policies that will be implemented to achieve the goals in the Municipal Energy Strategy.

*Est. Completion Date: September 2021*

### Opt-up City utility accounts to San Diego Community Power’s Power100 program

On March 1, 2021, San Diego Community Power will officially launch operations. The launch will occur over three phases, with the first phase focused on servicing municipal accounts. The Committee should bring forward a resolution to ‘opt-up’ the City’s utility accounts to SDCP’s Power100 program, which provides 100% renewable energy to customers.

*Est. Completion Date: April 2021*

### Review Tijuana River mitigation/restoration progress

The air and water pollution in and around the Tijuana River Valley have resulted in an ecological disaster, which the County of San Diego recently declared public health crisis. While the United States–Mexico–Canada (USMCA) Trade Agreement resulted in \$300 million for preventative measures and cleanup efforts, it’s important the City continue to monitor the Tijuana River Valley and ensure accountability. The Committee should request City, County, and federal government staff to provide an update on the efforts to improve air and water quality in the Tijuana River Valley.

*Est. Completion Date: July 2021*

### Discuss opportunities for off-site modular construction facility

Off-site modular construction is an innovative method for building construction. Off-site facilities, like those in the Bay Area, can provide good union jobs, cheaper and faster construction, and greenhouse gas emission reductions due to fewer transportation requirements. The Committee should invite stakeholders to a discussion about opportunities to bring off-site modular construction facilities to San Diego.

*Est. Completion Date: June 2021*

**Preserving, creating, and expanding open space and natural habitat**

Review brush management programs and policies

Climate change is resulting in more frequent and intense wildfires. It is more important than ever that the City take preventative measures like proactively clearing brush from open spaces, park land, and canyons to ensure the safety of the City and its residents. The Committee should request Parks & Recreation and Public Utilities Department staff present on its brush management policies and programs.

*Est. Completion Date: June 2021*

Review tree canopy and greenery programs and policies

Urban tree canopy is an important tool in mitigating the effects of climate change and is now an equity issue. The Committee should request staff to present on funding, programs, and policies to increase the urban tree canopy, especially in communities of concern.

*Est. Completion Date: October 2021*

Review land uses of and access to regional parks

The City's regional parks include Balboa Park, Mission Bay Park, Presidio Park, and Shoreline Parks. These are some of the finest public spaces in the region yet many of the popular attractions within them are difficult to access without single-occupancy vehicles. The Committee should invite staff to a discussion regarding how to make the City's regional parks more accessible, equitable, and sustainable.

*Est. Completion Date: October 2021*

**Investing in shared infrastructure and services**

Storm water infrastructure investment

Storm water infrastructure funding is one of the City's most pressing issues. An analysis conducted by Transportation and Storm Water staff found that, at current revenue levels, the City's storm water infrastructure will have a roughly \$225 million annual funding gap for the next twenty years. As such, staff is exploring options for a long-term permanent funding mechanism. The Committee should request that staff provide regular updates on its progress and findings, as well as outline how short-term needs will be addressed.

*Est. Completion Date: June 2021*

Progress toward City's Zero Waste goals

Food waste in landfills is a major source of methane emissions, and 15% of all landfilled material in the City is food scraps. City's Zero Waste Plan called for 75% of trash to be diverted from landfills, with all trash diverted by 2040. Many factors made advancing toward these goals difficult. The Committee should request Environmental Services Department staff to provide an update on the City's refuse collection goals and outline the policies to achieve the City's Zero Waste and methane reduction goals.

*Est Completion Date: September 2021*

Follow up on Performance Audit of the Transportation and Stormwater Department's Street Sweeping Section

The City Auditor presented a Performance Audit of the City's street sweeping operation in February 2021. Street sweeping plays a crucial role in preventing trash and pollutants from entering our waterways. The Committee should request Transportation and Storm Water Department present its progress toward improving its operations in line with the audit's findings.

*Est. Completion Date: November 2021*

**Investing in water programs**

Receive Pure Water update

Pure Water San Diego, which will provide about a third of the city's drinking water, is the single largest infrastructure project in the history of the City. The multi-phase project is expected to be completed in 2035. The Committee will receive an update on Phase 1 of the Pure Water Project.

*Est. Completion Date: February 2021*

Industrial Wastewater Control Program improvements

Two performance audits by the City Auditor, in 2013 and 2020, found several deficiencies in the administration of the City's Industrial Wastewater Control Program. The Committee should request staff to present a progress report on its action to correct program deficiencies.

*Est. Completion Date: March 2021*

Receive update on San Diego County Water Authority

The City is the largest purchaser of water from the San Diego County Water Authority (SDWCA). The Committee should request a presentation from SDCWA staff about its relationship with the City and the Metropolitan Water District of Southern California to better understand its delivery systems, financial conditions, and capital outlooks.

*Est. Completion Date: May 2021*

Receive update on San Diego Integrated Regional Water Management (IWRM)

The San Diego IRWM Program was established in 2005 by the San Diego Regional Water Management Group (RWMG), which consists of the San Diego County Water Authority (Water Authority), the City of San Diego (City), and the County of San Diego (County). In 2019, IWRM Plan Update presents an integrated approach for addressing water management issues within the Region. The Committee should request RWMG staff present on the IWRM and discuss how it integrates with other water entities, programs, and projects.

*Est. Completion Date: October 2021*

**Aligning the City’s environmental and transportation policies**

Consider updates to Transportation Alternatives Program (TAP)

Through its Transportation Alternatives Program (TAP), the City subsidizes the cost of monthly transit passes, but only to employees who work a minimum of 12 days per month and use public transit to commute to and from their current work location at least three (3) days per week. Additionally, mileage reimbursements are available for work travel by car, but not by public transit. The City should request staff to consider more flexible program options, as well as more robust reimbursement rules for public transit use. Such changes would incentivize public transit use, as well as serve as a more equitable program design.

*Est. Completion Date: October 2021*

Explore telecommuting programs and incentives

The Covid-19 pandemic has changed the way many people work and commute. While some commuting and work patterns are likely temporary, and many services and workers should return to in-person when it’s safe, the City should consider establishing permanent programs or incentives for some of its workforce, as well as for San Diego businesses who have shifted to telecommuting during the pandemic. This would contribute to the City’s climate goals, as well as help alleviate car traffic. The Committee should request staff to study possible telecommuting programs or incentives.

*Est. Completion Date: April 2021*

**Attachment – 2021 Environment Committee Work Plan**

**2021 Work Plan summary**

<b>Month</b>	<b>Priorities</b>
January	Gas and electric franchises
February	Public power discussion Pure Water update
March	Gas and electric franchises IWCP improvements Climate Action Plan Audit
April	Power100 opt-up for municipal utility accounts Telecommuting incentives San Diego Green New Deal Alliance
May	Climate Equity Fund San Diego County Water Authority update
June	Youth Environmental Corps Brush management policy Storm water infrastructure Off-site modular construction
July	Climate Action Plan Update and Five-Year Outlook Climate Equity Index Tijuana River Valley
September	People’s Ordinance Municipal Energy Strategy Zero Waste Plan
October	Tree canopy and urban greenery Integrated Regional Water Management Transportation Alternatives Program Regional parks - equitable access and sustainable land use
November	Environmental Justice Element San Diego Community Power Climate Resiliency and Adaption Plan Street sweeping

**2021 Environment Committee Survey Results**

The 2021 Environment Committee Survey, open to the public from December 26, 2020 to January 26, 2021, allowed respondents to provide open-ended recommendations to inform the Committee’s policy priorities. The open-ended nature of this section allowed for residents to express in their own words their thoughts. There were 151 responses to this survey.

For the purpose of documentation, responses have been abbreviated, consolidated into themes—which are used as the Work Plans goal—and tabulated. Single submissions with multiple policy suggestions were counted individually, so the number of tallies exceeds the number of submissions. Numbers in parenthesis indicate how many times a specific topic was suggested.

Note: Committee member priorities, public comment at the January 28, 2021 Environment Committee meeting, and the online comment submissions for that hearing also informed the Work Plan. However, they are not reproduced here since committee member memos and online comments are publicly available on the January 28 agenda, and public comment was recorded and posted on the City’s website.

Advancing environmental and economic justice

Air Quality Improvements & Expand Monitoring (27)

Climate Equity Fund + Utilize / Improve CEI for Equitable Investments (18)

More Trees & Parks / Green Space (6)

Expand Public Transit in EJ Communities (3)

Green Energy / EV Stations (2)

Reduce Cross-Border Pollution / EV Trucks at Port & Border (2)

Low/No-Cost Event Permitting of Park Space for CBOs & Non-Profits

Support EJ Element of City of San Diego’s General Plan

Prioritize Transportation & Mobility State Grant Funding for EJ Communities

Reduce Impact of Industrial Facilities Near Residential Communities

Taking effective climate action

Public Power Feasibility Study / Municipalization of Gas & Electricity Utilities (61)

Support CAP Goals / Set Higher CAP Targets (20)

More Renewable & Clean Energy Citywide (20)

Support Micro-Grids / Open Market Energy Exchange / Building Electrification (11)

Lower Utility Rates / “Better” Franchise Agreements (9)

## Enclosure 2 – community survey results

Support Utility Worker Wages & Benefits / Quality Green Jobs (7)  
Robust and Transparent Public Process (6)  
Support / Re-Envision / Fill Vacancies Environmental Advisory Boards – CFAB & SEAB (6)  
Improve Accessibility / Transparency of Environment Committee Hearings (5)  
Assessment of the Value of the Gas & Electricity Franchises (5)  
Certify that CAP Includes Creation of Local Green Jobs & Affordable Transit – GND (5)  
Create Climate Task Force with Experts and Advocates (4)  
Free Public Utilities  
Review Utility Franchises for Appropriate ROW Infrastructure & Permitting Fees  
Support Municipal Energy Strategy  
Short-Term Agreement  
Expanded Pandemic Related Relief for Ratepayers  
Property-Assessed Clean Energy Programs  
Establish Long-Range Plan for Carbon Neutrality by 2045  
Increase Urban Canopy  
Address Threat of Disaster from Nuclear Power Plants  
Support Regenerative Agriculture Programs  
Support Historic Preservation as an Environmental Issue

### Preserving, creating, and expanding open space and natural habitat

Improve Wildlife Management and Conservation / MSCP (7)  
More Parks & Recreational Areas (6)  
Replace City-Owned Golf Courses with Parks (3)  
Open Space Preservation – Wetlands, Sensitive Habitats (3)  
Prohibit Vendors / Buskers / Sidewalk Vending in Parks & Beaches (2)  
Remediate Sewage and Toxic Waste from Tijuana River (2)  
Fully Fund Facilities & Historic Features at Balboa Park / Support Accessibility (2)  
Establish Chollas Creek Regional Park & Support Watershed (2)  
Expand Weed & Canyon Landscaping  
Native Species Renewal in City Parks & Open Space

## Enclosure 2 – community survey results

Support ReWild Mission Bay

Park Maintenance Housing Model Pilot Project – Kumeyaay Campground, EcoLab

Ban Use of Roundup & Harmful Pesticides on City Land

Address Bluff Erosion

Authorize San Diego Lifeguards Patrol of Marine Protected Areas (MPAs)

Explore Joint-Use Park Opportunities with Del Mar Union School District

Discontinue Ranger Assignment on Point La Jolla

Begin Community-Led Design for Emerald Hills Park

### Investing in shared infrastructure and services

Ban on Non-Recyclable Single Use Products / Penalties on Plastic Use (10)

Expand Composting Programs (8)

Upgrade Storm Water Infrastructure / Fund Backlog (7)

Ban Gas Infrastructure in New Buildings & Major Retrofits (7)

Support for CMAP & Decarbonization in Land Use & Mobility Planning (7)

Solar Energy Options – Incentives & Support for Apartments (6)

More Frequent Waste & Recycling Collection (5)

Solid Waste Disposal Improvements (4)

Improve Green Waste Collection (3)

Improve Recycling Education & Outreach (2)

Repeal the People’s Ordinance (2)

Electrify Transportation – Mass Transit and Vehicles

Pathway to Permit Onsite Water Reuse Treatment Systems

Cooling Facilities During Heat Waves

Drop Bin Vendors for a Sturdier Option

Expand Large Item Waste Collection

Car Wash Water Recycling Mandates

Zero Waste Plan Update

Cleaner Streets & Sidewalks

Utilities Undergrounded in Bird Rock Neighborhoods

## Enclosure 2 – community survey results

### Investing in water programs

Non-Potable Water / Grey Water for Landscaping (6)

Improve Water Quality (4)

Evaluate SDCWA Spending, Water Management & Policies (4)

Water-Use Reduction Policies for Businesses & Apartments (2)

Support Pure Water Program

### Aligning the City's environmental and transportation policy

Access for Youth Transit Opportunity Passes (8)

Healthy Commuter Incentive Program
