

How-To Make a Chopstick Stand

by Christina Wainwright

Follow these simple steps to re-purpose the wrapper from a pair of disposable chopsticks, by folding it into a cute & functional holder for your chopsticks.

1. Tear off the end of the paper chopstick wrapper, to remove the pair of disposable chopsticks.
2. Wrap the paper around 2 fingers, so that you form an oblong ring.

3. Fold the tail (1-2 inches) at a 90° angle, then tuck it into the ring to lock it in place. This will prevent the ring from unspooling.

4. Fold down the edge of half of your ring. Repeat on the other half of your ring. Bend up the outer edges of your paper. This helps to lock the paper in place, and it also looks cute.

5. Voila! Your chopstick stand is ready to use.
