**AS-NEEDED AGREEMENT BETWEEN  
THE CITY OF SAN DIEGO  
AND RICK ENGINEERING  
FOR CONSULTANT SERVICES**

THIS Agreement is made and entered into between the City of San Diego, a municipal corporation [City], and Rick Engineering [Consultant] for the Consultant to provide Professional Services to the City for land surveying.

**RECITALS**

The City wants to retain the services of a professional land surveying firm to provide the Professional Services on an as-needed, hourly fee basis.

The Consultant represents that it has the expertise, experience and personnel necessary to provide the Professional Services on an as-needed, hourly fee basis.

The City and the Consultant [Parties] want to enter into an Agreement whereby the City will retain the Consultant to provide, and the Consultant shall provide, the Professional Services on an as-needed, hourly fee basis [Agreement].

In consideration of the above recitals and the mutual covenants and conditions set forth herein, and for good and valuable consideration, the sufficiency of which are hereby acknowledged, the Parties hereby set forth their mutual covenants and understandings as follows:

**ARTICLE I  
CONSULTANT SERVICES**

The above-listed recitals are true and correct and are hereby incorporated by reference.

**1.1 Scope of Services.** The scope of services will be determined by the City on an as-needed basis and presented to Consultant as an individual task [Task]. The Consultant shall perform the Professional Services at the direction of the City and as generally set forth in the Scope of Services [Exhibit A] and as more specifically described in each Task Order Authorization [Task Order] [Exhibit B].

**1.1.1 Task Order.** Prior to beginning performance in response to a Task Order, Consultant shall complete and execute the Task Order which must be approved in writing by the City. Each Task Order shall include a scope of Professional Services, a cost estimate, and the time for completion. The scope of Professional Services shall include all activities or work reasonably anticipated as necessary for successful completion of each Task presented by the City.

**1.1.2 Non-Exclusivity.** The Consultant agrees that this Agreement is non-exclusive and that the City may enter into agreements with other Consultants to perform substantially the same or similar Professional Services during the term of this Agreement.

**1.2 Task Administrator.** The Public Works Department is the task administrator for this Agreement. The Consultant shall provide the Professional Services under the direction of a designated representative of the Public Works Department. The City's designated representative will communicate with the Consultant on all matters related to the administration of this Agreement and the Consultant's performance of the Professional Services rendered hereunder. When this Agreement refers to communications to or with the City, those communications will be with the designated representative, unless the designated representative or the Agreement specifies otherwise. Further, when this Agreement refers to an act or approval to be performed by City, that act or approval shall be performed by the Mayor or designee, unless the Agreement specifies otherwise.

**1.3 City Modification of Scope of Services.** The City may, without invalidating this Agreement, order changes in any Task by altering, adding to or deducting from the Professional Services to be performed. All such changes shall be in writing and shall be performed in accordance with the provisions of this Agreement. If any such changes cause an increase or decrease in the Consultant's cost of, or the time required for, the performance of any of the Professional Services, the Consultant shall immediately notify the City. If the City deems it appropriate, an equitable adjustment to the Consultant's compensation may be made, provided that any adjustment must be approved by both Parties in writing in accordance with Section 9.1 of this Agreement.

**1.4 Written Authorization.** Prior to performing any Professional Services in connection with the Tasks, the Consultant shall obtain from the City a written authorization to proceed. Further, throughout the term of this Agreement, the Consultant shall immediately advise the City in writing of any anticipated changes to any Task, including any changes to the time for completion or the Compensation and Fee Schedule, and shall obtain the City's written consent to the change prior to making any changes. In no event shall the City's consent be construed to relieve the Consultant from its duty to render all Professional Services in accordance with applicable laws and accepted industry standards.

**1.5 Confidentiality of Services.** All Professional Services performed by the Consultant, including but not limited to all drafts, data, correspondence, proposals, reports, and estimates compiled or composed by the Consultant, pursuant to this Agreement, are for the sole use of the City, its agents and employees. Neither the documents nor their contents shall be released to any third party without the prior written consent of the City. This provision does not apply to information that (a) was publicly known, or otherwise known to the Consultant, at the time that it was disclosed to the Consultant by the City, (b) subsequently becomes publicly known through no act or omission of the Consultant, or (c) otherwise becomes known to the Consultant other than through disclosure by the City. Except for Subcontractors covered by Section 4.4, neither the documents nor their contents shall be released to any third party without the prior written consent of the City.

**1.6 Competitive Bidding.** Any plans, specifications, studies, or reports required by the Scope of Services must allow for competitive bidding. The Consultant shall prepare such plans, specifications, studies, or reports so that procurement of services, labor or materials are not available from only one source, and shall not prepare plans, specifications, studies, or reports around a single or specific product, piece of major equipment or machinery, a specific patented design, or a proprietary process, unless required by principles of sound engineering practice and supported by a written justification that has been approved in writing by the City. The Consultant shall submit this written justification to the City prior to beginning work on such plans, specifications, studies, or reports. Whenever the Consultant recommends a specific product or equipment for competitive procurement, such recommendation shall include at least two brand names of products that are capable of meeting the functional requirements applicable to the Project.

## **ARTICLE II DURATION OF AGREEMENT**

**2.1 Term of Agreement.** This Agreement shall be effective on the date it is executed by the last Party to sign the Agreement, and approved by the City Attorney in accordance with San Diego Charter Section 40. Unless otherwise terminated, this Agreement shall be effective for issuing and completing Task Orders for no more than **60** months following the date of its execution by the City, unless said duration is modified in writing by an amendment to this Agreement. If required, the duration of this Agreement can be extended up to a maximum of sixty (60) months. Any extension beyond sixty (60) months will require City Council approval via Ordinance.

**2.2 Time of Essence.** Time is of the essence for each provision of this Agreement, unless otherwise specified in this Agreement. The time for performance of any Task shall be set forth in the Task Order and shall not exceed the contract duration.

**2.3 Notification of Delay.** The Consultant shall immediately notify the City in writing if Consultant experiences or anticipates experiencing a delay in performing the Professional Services within the time frames set forth in the Task Order. The written notice shall include an explanation of the cause for, and a reasonable estimate of the length of, the delay. If in the opinion of the City, the delay affects a material part of the Task, the City may exercise its rights under Sections 2.5-2.7 of this Agreement.

**2.4 Delay.** If delays in the performance of the Professional Services are caused by unforeseen events beyond the control of the Parties, such delay may entitle the Consultant to a reasonable extension of time, but such delay shall not entitle the Consultant to damages or additional compensation. Any such extension of time must be approved in writing by the City. The following conditions may constitute such a delay: war; changes in law or government regulation; labor disputes; strikes; fires, floods, adverse weather or other similar condition of the elements necessitating cessation of the Consultant's work; inability to obtain materials, equipment or labor; required additional Professional Services; or other specific reasons agreed to between the City and the Consultant; provided, however, that: (a) this provision shall not apply

to, and the Consultant shall not be entitled to an extension of time for, a delay caused by the acts or omissions of the Consultant; and (b) a delay caused by the inability to obtain materials, equipment, or labor shall not entitle the Consultant to an extension of time unless the Consultant furnishes the City, in a timely manner, documentary proof satisfactory to the City of the Consultant's inability to obtain materials, equipment, or labor.

**2.5 City's Right to Suspend for Convenience.** The City may, at its sole option and for its convenience, suspend all or any portion of the Consultant's performance of the Professional Services, for a reasonable period of time not to exceed six months. In accordance with the provisions of this Agreement, the City will give written notice to the Consultant of such suspension. In the event of such a suspension, in accordance with the provisions of Article III of this Agreement, the City shall pay to the Consultant a sum equivalent to the reasonable value of the Professional Services the Consultant has performed up to the date of suspension. Thereafter, the City may rescind such suspension by giving written notice of rescission to the Consultant. The City may then require the Consultant to resume performance of the Professional Services in compliance with the terms and conditions of this Agreement; provided, however, that the Consultant shall be entitled to an extension of time equal to the length of the suspension, unless otherwise agreed to in writing by the Parties.

**2.6 City's Right to Terminate for Convenience.** The City may, at its sole option and for its convenience, terminate all or any portion of the Professional Services agreed to pursuant to this Agreement by giving written notice of such termination to the Consultant. Such notice shall be delivered by certified mail with return receipt for delivery to the City. The termination of the Professional Services shall be effective upon receipt of the notice by the Consultant. After termination of this Agreement, the Consultant shall complete any and all additional work necessary for the orderly filing of documents and closing of the Consultant's Professional Services under this Agreement. For services rendered in completing the work, the Consultant shall be entitled to fair and reasonable compensation for the Professional Services performed by the Consultant before the effective date of termination. After filing of documents and completion of performance, the Consultant shall deliver to the City all drawings, plans, calculations, specifications and other documents or records related to the Consultant's Professional Services on all Task(s). By accepting payment for completion, filing and delivering documents as called for in this paragraph, the Consultant discharges the City of all of the City's payment obligations and liabilities under this Agreement.

**2.7 City's Right to Terminate for Default.** If the Consultant fails to perform or adequately perform any obligation required by this Agreement, the Consultant's failure constitutes a Default. A Default includes the Consultant's failure to complete the Professional Services within the time for completion as set forth in the Task Order. If the Consultant fails to satisfactorily cure a Default within ten calendar days of receiving written notice from the City specifying the nature of the Default, the City may immediately cancel and/or terminate this Agreement, and terminate each and every right of the Consultant, and any person claiming any rights by or through the Consultant under this Agreement. The rights and remedies of the City enumerated in this Section are cumulative and shall not limit, waive, or deny any of the City's rights under any other provision of this Agreement. Nor does this Section otherwise waive or

deny any right or remedy, at law or in equity, existing as of the date of this Agreement or hereinafter enacted or established, that may be available to the City against the Consultant.

### **ARTICLE III COMPENSATION**

**3.1 Amount of Compensation.** The City shall pay the Consultant for performance of all Professional Services rendered in accordance with this Agreement, including all reasonably related expenses, in an amount not to exceed \$ 2,000,000. The City agrees to issue at least one or more Task Orders with a minimum aggregate value of \$1,000.00 to the Consultant.

**3.2 Manner of Payment.** The City shall pay the Consultant in accordance with the Compensation and Fee Schedule [Exhibit C]. For the duration of this Agreement, the Consultant shall not be entitled to fees, including fees for expenses, that exceed the amounts specified in the Compensation and Fee Schedule. The Consultant shall submit one invoice per calendar month in a form acceptable to City in accordance with the Compensation and Fee Schedule. The Consultant shall include with each invoice a description of completed Professional Services, reasonably related expenses, if any, and all other information, including but not limited to: the progress percentage of the Scope of Services and/or deliverables completed prior to the invoice date, as required by the City. The City will pay undisputed portions of invoices within thirty calendar days of receipt.

**3.3 Additional Costs.** Additional Costs are those costs that can be reasonably determined to be related to the Consultant's errors or omissions, and may include Consultant, City, or Subcontractor overhead, construction, materials, demolition, and related costs. The Consultant shall not be paid for the Professional Services required due to the Consultant's errors or omissions, and the Consultant shall be responsible for any Additional Costs associated with such errors or omissions. These Additional Costs may be deducted from monies due, or that become due, the Consultant. Whether or not there are any monies due, or becoming due, the Consultant shall reimburse the City for Additional Costs due to the Consultant's errors or omissions.

**3.4 Eighty Percent Notification.** The Consultant shall promptly notify the City in writing of any potential cost overruns. Cost overruns include, but are not limited to the following: (1) where anticipated costs to be incurred in the next sixty calendar days, when added to all costs previously incurred, will exceed 80 percent of the maximum compensation for this Agreement or for any issued Task Order; or (2) where the total anticipated cost for performance of the Scope of Services may be greater than the maximum compensation for this Agreement or for any Task Order.

### **ARTICLE IV CONSULTANT'S OBLIGATIONS**

**4.1 Industry Standards.** The Consultant agrees that the Professional Services rendered under this Agreement shall be performed in accordance with the standards customarily adhered to by an experienced and competent land surveying firm using the degree of care and

skill ordinarily exercised by reputable professionals practicing in the same field of service in the State of California. Where approval by the City, the Mayor or his designee, or other representatives of the City is required, it is understood to be general approval only and does not relieve the Consultant of responsibility for complying with all applicable laws, codes, and good consulting practices.

## **4.2 Right to Audit.**

**4.2.1 Access.** The City retains the right to review and audit, and the reasonable right of access to Consultant's and any Subcontractor's premises to review and audit the Consultant's or Subcontractor's compliance with the provisions of this Agreement [City's Right]. **CONSTRUCTION SURVEYING SERVICES**

Constructability review and survey construction cost estimate

Attend Preconstruction meeting: Construction Staking Request Form, Monument Preservation request form

R.E. coordination, Contractor coordination

Request civil design Microstation CAD file from Resident Engineer, Project Manager, Civil Engineer, Traffic Engineer Architect, Landscape Architect

Digital civil design Microstation CAD file is archived in Projectwise

Perform data extraction and calculations from the civil design Microstation CAD file

Check signed and stamped hard copy Plan data

Perform quality control and quality assurance of construction plans by comparing the Microstation CAD file of the project design against the signed/sealed paper design plans. If discrepancies exist, the RE is notified immediately to resolve plan issues prior to beginning construction surveying tasks

Review construction plans and determine which improvements will be destroyed by construction activities and then perform survey records research for monument perpetuation tasks

The contractor completes the construction staking request form and sends it to the RE for review. The RE then forwards the construction staking request form to the supervising construction land surveyor

Construction survey crew performs layout staking services as requested and verifies the proposed location of design improvements agrees with existing site conditions. If plan and site conditions do not agree the RE is notified immediately. If redesign is necessary, plans are modified and sent to the RE and the supervising construction land surveyor for construction staking layout

Prior to demolition activities, perform measurements to all existing survey monuments in the demolition area, from reference points lying outside the demolition area

Prepare digital cut sheets documenting the surveying construction layout task(s). The RE receives via email and forwards a copy to the contractor for use in the field to construct the proposed improvements

Provide land surveying services and information in all phases of the construction project

Verify proposed improvements are within the right-of-way or easements granted to the City of San Diego

**Limits of work, Limits of Demolition**

Use Microstation CAD file from Resident Engineer, check orientation and digitize limits of work to be used for field staking.

**Rough grade, Slope staking, Contour staking**

Use Microstation CAD file from Resident Engineer, check orientation and digitize property lines and centerline of streets. All grading, slope and contour stakes will be referenced to property or centerline of roadway.

**Site deformation monitoring**

Performed when site conditions warrant and this is determined by the project manager or the RE

Reference marks are placed on improvements for monitoring their position before during and post construction activities

**Blue tops**

Blue tops will be provided for sub-grade or finish grade whenever the City is contracted to provide verification of grade and material paid for. Along with Blue Tops comes a grade check certification letter to verify the contractor has provided the services in accordance with the green book and grading plan.

**Storm drain**

Use Microstation CAD file from Resident Engineer, check orientation and digitize locations of storm drain. Storm Drain is generally non-concentric to centerline and is not calculated from centerline of street. Storm Drain boxes are staked radial to centerline and require certification after the surveyor has staked it. It is important for field check before the final pour of concrete.

**Sewer lines**

Use Micro station CAD file from Resident Engineer, check orientation and digitize locations of sewer main or centerline of road. Sewer is generally concentric to centerline and staked accordingly.

Field verification of flow line join must be done prior to construction to avoid conflicts in the future.

Sewer generally runs down the center of the street, monument preservation in accordance with the green book will require research and fieldwork to preserve centerline survey monumentation.

Monuments will be reset in exact location after the job has been inspected and released.

**Water lines**

Use Micro station CAD file from Resident Engineer, check orientation and digitize locations of water main. Water main is generally non-concentric to centerline and is not calculated from centerline of street. Land survey monuments are present generally within 5 feet of the water service.

Monument preservation in accordance with the green book will require research and fieldwork to preserve curb and sidewalk survey monumentation.

Monuments will be reset in exact location after the job has been inspected and released.

**Dry utilities**

Gas and electric and street lights will need to be calculated using Micro station CAD file from Resident Engineer, check orientation and digitize all locations of electric hand holes and transformers. All street lights will need to be digitized or locations will be derived from radial stakeout from centerline alignments.

**Top of curb at face of curb**

Curb will be staked from centerline road profiles acquired through Micro station digitizing.

All curb returns and cul-de-sac returns will be digitized and have their own alignments.

Field verification for proper drainage will need to be field verified before any project and be constructed.

**Retaining and Sound Walls**

Use Micro station CAD file from Resident Engineer, check orientation and digitize locations of walls to be staked in the field. Research of property lines is key to avoid walls being staked on private land.

All wall stakes are referenced to face of wall (exposed face), and retaining walls should be accompanied by brow ditches to allow for proper drainage behind the wall and to avoid wall failure.

**Buildings**

Use Micro station CAD file from Resident Engineer, check orientation and digitize locations of the buildings to be staked in the field. Buildings are staked using grid lines and it is essential that boundary retracement and research is thorough to avoid conflict between building setback limits and adjoining property owners.

**Bridge abutments and bents**

Use Micro station CAD file from Resident Engineer, check orientation and digitize locations of the abutments and bents to be staked in the field. Bridge stakes are generally staked to the center of the columns. Bridge deck and form check is performed throughout the life of the project and generally needs an on call Land Surveyor. It is essential that boundary retracement and research is thorough to avoid conflict between property owners.

**Monument Perpetuation / Preservation**

Monument preservation in accordance with the green book will require research and fieldwork to preserve survey monumentation. Monuments can be anywhere; research for monuments should be done before and groundbreaking to avoid neighbor conflicts or negative feedback in the news.

**As-built existing project conditions before and after construction**

Surveyors protect the property interest of the City of San Diego and define the difference between private and public. While protecting our interest, it is essential that the Surveyor report what existing field conditions exist before construction. At this time, problems can be uncovered before design starts as opposed to design build. After construction, it is important to as built conditions for future records and to avoid encroachment on private property.

**Cut sheets**

The legal document and reference of the work performed in the field. This document is given to the client to clarify and verify the work that is in the field. A copy is also filed in the field folders for legal documentation to comply with the public records act. The cut sheet is also used to clarify faded paint in the field or lost survey stakes in the field. It is also the legal documentation of where our survey reference points are located geographically on the face of the earth. Cut sheets are the form of evidence to prove or disprove what a client has or has not done.

**Volume calculations**

Performed when a discrepancy exists between the stated calculated plan earthen material volume, the RE approved truck count volume and the contractors stated export or import volume of material exists

Construction survey crew performs topographic surveying: preconstruction, at various stages of construction and post construction for calculation of export and import of earthen material Land survey staff perform volume calculation in the digital CAD environment by comparing topographic data for discrete phases of work. The RE is provided a detailed report

**RTK (Real Time Kinematic)**

Also known as Survey Grade GPS (Global Positioning System)

Is the backbone to the survey framework, it allows all jobs in the City of San Diego to remain on the same datum. Having the same datum allows all jobs to be combined with others.

Overlapping jobs will allow the use of common data sets to minimize the cost of future project costs. The more you build the more data you collect, the cheaper the future jobs in densified areas. It is essential that this framework

is protected now, and in the future. The VRS (virtual reference Station) is maintained by Survey staff to

allow the bridging of jobs and to help aide the survey community on the whole.

**Aerial Mapping Surveys:**

- Aerial Mapping Survey shall show the location and elevation of all public and private utilities, and planimetric features to include but not limited to water, fire hydrants, sewer manholes with invert elevations, gas valves, electric pull boxes and vaults, storm water, drainage manholes & inlets with invert elevations, telecommunications risers, pull boxes and vaults, traffic striping & controls, curb lines or edge of paving, driveways and building lines, a digital terrain model with breaklines and spot elevations, a digital rectified ortho photo, contact prints, digital scans and film negatives.
- Features are compared to the 2005 Citywide LiDAR data set for vertical and horizontal accuracy.
- The survey will include photography, contours, surface elevations or spot elevations at a scale in accordance with the scope established by the project manager and the National Standard for Spatial Data Accuracy.

- All 20' scale mapping with 1' contours, will be flown at a photo scale of not more than 1" = 200'.
- All 40' scale mapping with 1' contours, will be flown at a photo scale of not more than 1" = 300'.

The Aerial Consultant shall furnish the City:

1. Photography
  - a. Flight plan, including model layout, direction of flight, and location of premarks, (subject to City approval).
  - b. One (1) set of 9" x 9" contact prints. Contact prints shall be printed on color paper with gloss finish.

## EXHIBIT A

Scanning for these images shall be taken from the original negatives, and be scanned at 12 microns. All files shall be geo referenced.
  - g. A world file header shall also be delivered along with a tif image. The world file (.tfw) shall be named the same as each .tif image with the .tfw extension, i.e... [image 01.tif & image 01.tfw]
2. Mapping
- a. All mapping shall comply with City of San Diego Aerial Photogrammetric specifications.
  - b. The following data shall be included in the electronic mapping file: Name of consultant doing the project, Company Logo (if available), Name of project, Work order number, Date & Scale.
  - c. If analytical solution for mapping is used, the following parameters shall be met. Analytical measurements shall be made on analytical stereo-plotters or comparators having necessary precision to achieve nationally accepted x, y, and z accuracies. This work shall be performed in accordance with Section 72 of the San Diego County standard specifications, except that the last line of 72.30

shall be changed to read: "In no case shall the targeted points of basic control be farther apart than three (3) stereoscopic models."

d. May include terrestrial laser scanning or airborne LiDAR.

3. Digitizing

a. A digitized graphic data model called 'Mapping' of the topographic mapping for this project shall be in a V8 3-D ".DGN" format for Bentley Systems software, furnished on a recordable compact disc. The version of Microsoft Windows must be NT or higher. Compact Discs will be furnished with the check prints.

b. A Break-line/Spot elevation model called 'DTM' which contains all pertinent planimetric and topographic features necessary to create an accurate digital terrain model (DTM) of the aerial mapping area, also in the same Bentley V8 3D.DGN file format shall be provided.

The breaklines are not to cross but are to fall just short of the breakline of intersection within a tolerance prohibiting the triangulation through the breakline. The breakline should be constructed in such a manner that prohibits the triangulation through it. Also a breakline should not 'loop' back upon itself or have 'tails' at the ends of the breakline.

These breaklines shall be tested by the consultant to assure that no breakline crosses or touches another breakline.

**Breakline defined:**

A series of line segments which delineate and define the discontinuities of the terrain (model) surface (Improved and/or unimproved). Examples of breaklines are edges of roadways (paved or unpaved), crown of street, or manmade flowlines, drains, changes in slope gradient, edges of graded pads, tops and toes of slopes, tops and bases of retaining walls, steep cliff faces, retaining structures - such as bridge abutments, etc. Generally, breaklines can be loosely defined as the intersection of two planes and are

## EXHIBIT A

any linear terrain feature that delineates the ground surface (improved and/or unimproved), and therefore have a controlling effect on the definition and accuracy of the digital terrain model. These breaklines serve as a wall through which terrain triangles cannot pass.

Additionally, for further definition and accuracy of the DTM, spot or "regular" surface points should be added to the DTM (surface model) to further define and "fill-in" the surface. The more severe the discontinuities in the surface, the greater the need for increased density in point collection. The spots, used to define the gradient change, needs to be dense enough to prevent unwanted flattening in the surface according to the contour interval. As a general rule of thumb, these points should be collected at a density of 1/2" at the plotted scale.

The use of a good engineering font, capital x or +, with a center/center justification shall be used for point symbology.

### Spots defined:

A raised or depressed point defining a surface where a break line could not define that surface. Examples are tops of mounds, mountains, hills, raises, peaks, and raised cones or bottom of depressions, ditches, craters, holes and depressed cones.

The contours shown in 3.a above shall be generated solely from this DTM data.

**The contours produced from the DTM data shall meet or exceed ASPRS 90 standards where 68% (1Φ) of the contours tested fall within 1/3 contour interval. Any point tested that is more than 3Φ out shall be regarded as blunderous. These standards closely parallel the familiar National Map Accuracy Standards.**

- c. The appropriate City of San Diego cell library (V8 City Existing.cel), font resource file (V8 City Font.rsc), color table (V8 City color.tbl), line style (V8 City Line Style.rsc), level scheme, and seed file parameters are to be used for placement of all elements in the design files, with strict adherence to "Working

Units" and seed file "Global Origin". Base map level schemes are attached. A diskette containing the most current version of the above seed files, cell libraries and font resource files will be provided to the aerial contractor, if needed, upon request.

- d. All graphic elements within the Project Design File shall adhere to appropriate Microstation element definitions to allow for error free translation of design files from 3d to 2d. If the Design file is observed to have incorrect element definitions which produce errors related to either the above 3d to 2d file translations, or produce errors when used with other Bentley Applications software, the aerial contractor shall be responsible for the correction of any errors or deficiencies in the design file related to incorrect graphic element definitions, etc.
- e. Intergraph Design file working units shall be the Survey Foot: I.E., Feet, 10th's of a foot, and 1000th's of a foot. Use a (sf) symbol for foot annotations, and (su) for tenths annotations in working units tutorial.  $1200/3937 \text{ sf} = 1.0 \text{ m}$  and  $1200/393700 \text{ se} = 1.0 \text{ cm}$ .

(Note: Above parameters are provided in V8 nad83 3d.dgn).

**NOTE:** To prevent project delays related to item d. above, it is recommended that each design file be reviewed using an appropriate file checking software, (i.e. 'Axiom File Fixer', Etc.). This will help to identify and correct any element definition, and/or design file format error(s) prior to receipt of said files by the City of San Diego.

#### 4. Field Verification

To ensure accuracy and completeness of aerial mapping, Aerial vendor shall provide 'field verification' of check-prints prior to submission to the City. This will require on-site verification by vendor that marked-out utilities, or other pertinent surface features, which might have been missed or not originally compiled, shall be shown on the check prints. These additional features, (if any) shall be located and plotted within two (2) feet of actual location. This additional information (if any)

shall be incorporated into the design file. Arrangements shall be made through Diana Bergen for meeting with her or other designated engineer on site.

#### ADDITIONAL REQUIREMENTS

Survey control for this project will be established using the Global Positioning System (GPS), and all digitizing will be based on the California Coordinate System, Zone 6, and NAD83 Coordinate Base. Bentley Design files shall have a Global Origin of:

$x = -6165251.6353$ ,  $y = -1772251.6353$  and  $z = +214748.3648$ , to allow for the NAD '83 coordinate values. It is the intent of the City to have all underground utilities and surface features, i.e. sewer manholes, gate valves, etc., premarked with paint, and color coded per utility. For this reason, all photography will be done in color, and the appropriate City of San Diego color / symbology tables will be used. All mapping and digitizing will reflect this information.

On all strip mapping, or other mapping as shown or deemed necessary, an additional exposure shall be taken at each end of the requested mapping area.

#### **SPECIAL NOTE:**

As of June 1, 2000, on all projects, where street, alley/easements are defined, mapping areas will cover the street or alley/easement width **PLUS** an additional fifty (50) foot distance back of property, alley or easement Right of Way. This will be the standard unless otherwise stated or shown on an individual project basis.

#### **"The CITY of SAN DIEGO" CADD Level Documentation**

##### LEVELS:

The design seed file consists of some 500+ levels. These are like transparencies overlaying each other. Elements may be placed or manipulated on any of these levels. Although any combination of levels may be viewed at one time, you can draw design elements only on one level, the "Active Level".

II. **Nondiscrimination in Contracting Ordinance.** All Consultants doing business with the City, and their Subcontractors, must comply with requirements of the City’s *Nondiscrimination in Contracting Ordinance*, San Diego Municipal Code Sections 22.3501 through 22.3517.

- C. Contract Disclosure Requirements. Upon the City's request, Consultant agrees to provide to the City, within sixty (60) calendar days, a truthful and complete list of the names of all Subcontractors, vendors, and suppliers that Consultant has used in the past five (5) years on any of its contracts that were undertaken within County of San Diego, including the total dollar amount paid by Consultant for each subcontract or supply contract. Contractor shall provide equal opportunity in all employment practices. Consultants shall ensure that their subcontractors comply with this program. Nothing in this Section shall be interpreted to hold a Consultant liable for any discriminatory practice of its subcontractors.
- B. Work Force Report. If based on a review of the Work Force Report (Attachment BB) submitted an EOCP staff Work Force Analysis determines there are under representations when compared to County Labor Force Availability data, then the Consultant will also be required to submit an Equal Employment Opportunity (EEO) Plan to the Program Manager of the City of San Diego Equal Opportunity Contracting Program (EOCP) for approval.

2. All professional services contracts valued over \$50,000 or more have a voluntary SLBE/ELBE goal of 20%. A maximum of 13 additional points will be awarded based on consideration of these four factors. Points awarded based on Consultants demonstrated commitment to equal opportunity will be in addition to any points awarded for SLBE or ELBE participation as described in Section IV.

VI. **Definitions.**

**Commercially Useful Function:** an SLBE/ELBE performs a commercially useful function when it is responsible for execution of the work and is carrying out its responsibilities by actually performing, managing, and supervising the work involved. To perform a commercially useful function, the

SLBE/ELBE shall also be responsible, with respect to materials and supplies used on the contract, for negotiating price, determining quantity and quality, ordering the material, and installing (where applicable) and paying for the material itself.

To determine whether an SLBE/ELBE is performing a commercially useful function, an evaluation will be performed of the amount of work subcontracted, normal industry practices, whether the amount the SLBE/ELBE firm is to be paid under the contract is commensurate with the work it is actually performing and the SLBE/ELBE credit claimed for its performance of the work, and other relevant factors. Specifically, an SLBE/ELBE does not perform a commercially useful function if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of meaningful and useful SLBE/ELBE participation, when in similar transactions in which SLBE-ELBE firms do not participate, there is no such role performed.

# CITY OF SAN DIEGO WORK FORCE REPORT – ADMINISTRATIVE

## HISTORY

The Work Force Report (WFR) is the document that allows the City of San Diego to analyze the work forces of all firms wishing to do business with the City. We are able to compare the firm’s work force data to County Labor Force Availability (CLFA) data derived from the United States Census. CLFA data is a compilation of lists of occupations and includes the percentage of each ethnicity we track (Black, Hispanic, Asian, American Indian, Filipino) for each occupation. Currently, our CLFA data is taken from the 2010 Census. In order to compare one firm to another, it is important that the data we receive from the consultant firm is accurate and organized in the manner that allows for this fair comparison.

## WORK FORCE & BRANCH WORK FORCE REPORTS

When submitting a WFR, especially if the WFR is for a specific project or activity, we would like to have information about the firm’s work force that is actually participating in the project or activity. That is, if the project is in San Diego and the work force is from San Diego, we want a San Diego County Work Force Report.<sup>1</sup> By the same token, if the project is in San Diego, but the work force is from another county, such as Orange or Riverside County, we want a Work Force Report from that county.<sup>2</sup> If participation in a San Diego project is by work forces from San Diego County and, for

example, from Los Angeles County and from Sacramento County, we ask for separate Work Force Reports representing your firm from each of the three counties.<sup>1</sup>

## MANAGING OFFICE WORK FORCE

Equal Opportunity Contracting may occasionally ask for a Managing Office Work Force (MOWF) Report. This may occur in an instance where the firm involved is a large national or international firm but the San Diego or other local work force is very small. In this case, we may ask for both a local and a MOWF Report.<sup>1,3</sup> In another case, when work is done only by the Managing Office, only the MOWF Report may be necessary.<sup>3</sup>

## TYPES OF WORK FORCE REPORTS

Please note, throughout the preceding text of this page, the superscript numbers one <sup>1</sup>, two <sup>2</sup> & three <sup>3</sup>. These numbers coincide with the types of work force report required in the example. See below:

- <sup>1</sup> One San Diego County (or Most Local County) Work Force – Mandatory in most cases
- <sup>2</sup> Branch Work Force \*
- <sup>3</sup> Managing Office Work Force

*\*Submit a separate Work Force Report for all participating branches. Combine WFRs if more than one branch per county*

**DEFINITION OF “CONSULTANT”**

2 California Code of Regulations defines a “consultant” as an individual who, pursuant to a contract with a state or local government agency:

- (A) Makes a governmental decision whether to:
1. Approve a rate, rule or regulation;
  2. Adopt or enforce a law;
  3. Issue, deny, suspend, or revoke any permit, license, application, certificate, approval, order, or similar authorization or entitlement;
  4. Authorize the City to enter into, modify, or renew a contract provided it is the type of contract that requires City approval;
  5. Grant City approval to a contract that requires City approval and to which the City is a party, or to the specifications for such a contract;
  6. Grant City approval to a plan, design, report, study, or similar item;
  7. Adopt, or grant City approval of, policies, standards, or guidelines for the City, or for any subdivision thereof; or
- (B) Serves in a staff capacity with the City and in that capacity participates in making a governmental decision as defined in Regulation 18702.2 or performs the same or substantially all the same duties for the City that would otherwise be performed by an individual holding a position specified in the City’s Conflict of Interest Code.

An individual “serves in a staff capacity” if he or she performs substantially all the same tasks that normally would be performed by staff member of a governmental entity. In most cases, individuals who work on only one project or a limited range of projects for an agency are not considered to be working in a “staff capacity.” The length of the individual’s service to the agency is relevant. Also, the tasks over the relevant period of time must be substantially the same as a position that is or should be specified in the City’s conflict of interest code.

An individual “participates in making a governmental decision” if he or she: (1) negotiates, without substantive review, with a governmental entity or private person regarding the decision; or (2) advises or makes recommendations to the decision-maker, by conducting research or an investigation, preparing or presenting a report, analysis or opinion which requires the exercise of judgment on the part of the individual and the individual is attempting to influence the decision.

- Has no employees.
- Has collective bargaining agreement(s) in place prior to January 1, 2011, that has not been renewed or expired.

I request the City's approval to pay affected employees a **cash equivalent** in lieu of equal benefits and verify my firm made a reasonable effort but is not able to provide equal benefits upon contract award. I agree to notify employees of the availability of a cash equivalent for benefits available to spouses but not domestic partners and to continue to make every reasonable effort to extend all available benefits to domestic partners.

It is unlawful for any contractor to knowingly submit any false information to the City regarding equal benefits or cash equivalent associated with the execution, award, amendment, or administration of any contract. [San Diego Municipal Code §22.4307(a)]

Under penalty of perjury under laws of the State of California, I certify the above information is true and correct. I further certify that my firm understands the requirements of the Equal Benefits Ordinance and will provide and maintain equal benefits for the duration of the contract or pay a cash equivalent if authorized by the City.

**REGARDING INFORMATION REQUESTED UNDER THE  
CALIFORNIA PUBLIC RECORDS ACT**

The undersigned duly authorized representative, on behalf of the named Contractor declares and acknowledges the following:

**The contents of this contract and any documents pertaining to the performance of the contract requirements/Scope of Services resulting from this contract are public records, and therefore subject to disclosure unless a specific exemption in the California Public Records Act applies.**

If a Contractor submits information **clearly marked** confidential or proprietary, the City of San Diego (City) may protect such information and treat it with confidentiality only to the extent permitted by law. However, it will be the **responsibility of the Contractor** to provide to the City the specific legal grounds on which the City can rely in withholding information requested under the California Public Records Act, should the City choose to withhold such information.

General references to sections of the California Public Records Act will not suffice. Rather, the Contractor must provide a **specific and detailed legal basis, including applicable case law that clearly establishes** the requested information is exempt from the disclosure requirements of the California Public Records Act.

If the Contractor does not provide a specific and detailed legal basis for withholding the requested information within a time specified by the City, the City will release the information as required by the California Public Records Act and the **Contractor will hold the City harmless** for release of this information.

It will be the **Contractor's obligation to defend**, at Contractor's expense, any legal actions or challenges seeking to obtain from the City any information requested under the California Public Records Act withheld by the City at the Contractor's request. Furthermore, the Contractor shall **indemnify** the City and **hold it harmless** for any claim or liability, and **defend any action** brought against the City, resulting from the City's refusal to release information requested under the Public Records Act withheld at Contractor's request.

Nothing in this Agreement creates any obligation for the City to notify the Contractor or obtain the Contractor's approval or consent before releasing information subject to disclosure under the California Public Records Act.
