SUMMARY OF EQUAL BENEFITS ORDINANCE REQUIREMENTS

The Equal Benefits Ordinance [EBO] requires the City to enter into contracts only with contractors who certify they will provide and maintain equal benefits as defined in SDMC §22.4302 for the duration of the contract. To comply:

- Contractor shall offer equal benefits to employees with spouses and employees with domestic partners.
 - Benefits include health, dental, vision insurance; pension/401(k) plans; bereavement, family, parental leave; discounts, child care; travel/relocation expenses; employee assistance programs; credit union membership; or any other benefit. CONTRACTOR EQUAL BENEFITS ORDINANCE CERTIFICATION

Please indicate your firm's compliance status with the EBO. The City may request supporting documentation.

I affirm compliance with the EBO because my firm (*contractor must select one reason*):

- Provides equal benefits to spouses and domestic partners.
- Provides no benefits to spouses or domestic partners.
- Has no employees.
- Has collective bargaining agreement(s) in place prior to January 1, 2011, that has not been renewed or expired.

I request the City's approval to pay affected employees a cash equivalent in lieu of equal benefits and verify my firm made a reasonable effort but is not able to provide equal benefits upon contract award. I agree to notify employees of the availability of a cash equivalent for benefits available to spouses but not domestic partners and to continue to make every reasonable effort to extend all available benefits to domestic partners.

It is unlawful for any contractor to knowingly submit any false information to the City regarding equal benefits or cash equivalent associated with the execution, award, amendment, or administration of any contract. [San Diego Municipal Code §22.4307(a)]

Under penalty of perjury under laws of the State of California, I certify the above information is true and correct. I further certify that my firm understands the requirements of the Equal Benefits Ordinance and will provide and maintain equal benefits for the duration of the contract or pay a cash equivalent if authorized by the City.

PROJECT NO.: **483881** PROJECT TITLE: **Soledad Creek Channel Emergency Maintenance (Maps 11 &12; Sorrento Valley Reaches 2&3)**

PROJECT LOCATION-SPECIFIC: This facility is an earthen- and concrete-lined storm water channel located between Roselle Street and Sorrento Valley Road. Sorrento Valley Blvd runs perpendicular over the channel in approximately the center of the proposed work area in the City of San Diego's *appealable area* of the Coastal Overlay Zone; Torrey Pines Community Planning Area; Council District 1; Peñasquitos watershed.

PROJECT LOCATION-CITY/COUNTY: City of San Diego/San Diego

DESCRIPTION OF NATURE AND PURPOSE OF THE PROJECT: A portion of the emergency maintenance is to remove vegetation and sediment from approximately 500 linear feet (LF) of concrete and earthen channel that includes roughly 300 LF of Reach 3 (63 feet wide) and about 200 LF of Reach 2 (approximately 49 feet wide). Work was completed at the transition area between Reach 2-3 prior to the anticipated storm event on March 6-7, 2016. 1240 tons of material was removed using a bulldozer, excavator, and loader, as well as a tracksteer/bobcat where necessary. This equipment removed an estimated 2,750-3,250 cubic yards of material debris within the transition area and loaded it into dump trucks to be hauled off for legal disposal. The trucks ingress/egress to the channel is via two established Access/Staging areas (Attachment 1 - Figures 3a&3b):

1. The vacant disturbed lot at 11025 Roselle Street
2. Adjacent disturbed parking area and paved street at 10749 Roselle Street

In addition to the 1240 tons of sediment and vegetation removed from within Reach 3, approximately 300 linear feet (0.43 acres) of concrete repair work will be conducted within the 63 foot wide concrete channel at the southeastern end of the Reach 3 (Attachment 1 - Figure 3) in order to ensure the integrity of the lining during heavy storms. Steel plates and a temporary access ramp will be installed from the southeastern Access/Staging area to the bottom of the channel to allow concrete repair equipment to enter the Reach 3 channel. The primary equipment necessary for this work will be concrete saw, backhoe, bulldozer, bobcat/tracksteer, excavator, concrete laser screed, concrete conveyor truck, and dump trucks. The existing reinforced concrete floor panels will be removed and new concrete forms will be set and wire mesh will be welded together in the new panel locations. New concrete panels will then be installed. Concrete slurry will also be used to backfill all voids behind the existing concrete slope walls, which were created by erosion from runoff from the adjacent parking lot. All equipment and debris will be removed from the channel following this work.

The following properties are specifically at risk due to their proximity to clogged sections of the channel, visual evidence and reports of flooding in the recent past, and location at a low elevation in comparison to the channel: 11010-11080 Roselle Street and 3483 and 3560 Dunhill Street. The purpose of the project would be to reduce the risk of flooding to these properties.

Land cover and vegetation impacts are expected to be limited to 0.75 acres of developed concrete-lined channel, 0.08 acres of disturbed freshwater marsh (earthen bottom), 0.28 acres of freshwater marsh (concrete-lined), 0.02 acres of open water (earthen bottom), 0.004 acres of natural flood channel, and 0.08

acres of riparian scrub (southern willow scrub, earthen bottom). This channel is a part of the Master Storm Water System Maintenance Program (MMP). The proposed work area is not located in The City of San Diego's Multi-Habitat Planning Area (MHPA). The impacts within Reaches 2 and 3 are within areas previously authorized for maintenance, where mitigation has been required and either has been successfully implemented (for Reach 2) or is in the process of being implemented (Reach 3). All vegetation will be removed in the 15-foot area upstream of Reach 3 to allow the installation of a diversion berm for replacement of the cut-off wall. All emergency and post-emergency work in this area requires biological. Archaeological and Native American monitoring is specifically required during any emergency work activities with the area of Reach 2. Monitoring requirements are consistent with the City's MMP MMRP. This emergency activity will require subsequent permit review pursuant to the modified Substantial Conformance Review Procedures as described in Chapter 7 of the Master Storm Water System Maintenance Program (MMP); the City of San Diego's Land Development Code (LDC) §143.0126 Emergency Authorization to Impact Environmentally Sensitive Lands; and LDC §126.0718 Procedures for Emergency Coastal Development Permits. The application shall be submitted within 60 days of completion of the emergency work.

- CATEGORICAL EXEMPTION: (Sec. 15301)
- STATUTORY EXEMPTIONS: (Sec. 15269(b)(c))

REASONS WHY PROJECT IS EXEMPT: This emergency exemption is based on the expert opinion and findings by the Transportation & Storm Water Department. This emergency activity meets the criteria set forth in section 21080(b)(4) of the Public Resources Code and CEQA Guidelines section 15269(c) which allow for specific actions necessary to prevent or mitigate an emergency. The work will also include emergency repairs to public service facilities necessary to maintain service, which are exempt under Public Resources Code §21080(b)(2) and §15269(b) of the CEQA guidelines. The risk of flooding in this channel is considered extremely high posing an immediate threat to adjacent properties due to sediment constricting the downstream flow capacity and the accumulation of vegetation which precludes the flow of storm water through the channel. The National Weather Service forecast for March 2, 2016 indicated two storm events occurring the weekend of March 6-7, 2016 with total precipitation of 0.75 to 1.5 inches in coastal and valley areas. Based on the forecasted El Niño-influenced weather patterns bringing heavier than normal rainfall to the San Diego region during the winter of 2015-2016, existing channel conditions, accounts and video capture of recent flooding, and visual evidence of broken concrete lining and damage to adjacent infrastructure and properties, T&SW has concluded there is an imminent threat to public health and safety from vegetation and debris within Reaches 2&3. The buildup of sediment and vegetation have obstructed storm water flows within the channel during rains earlier this year, causing recent flooding of adjacent roadways and properties. The excavation of no more than 3,250 cubic yards of sediment and debris is the minimum necessary to prevent and mitigate the emergency and will have no more than a minimal and temporary effect on the aquatic environment.
