DATE: January 17, 2019  
TO: James Nagelvoort, Director, Public Works  
FROM: Claudia Abarca, Deputy Director, Public Works Contracts *Abarca*  
SUBJECT: Sole Source Agreement for Emergency Repairs at Florida Drive

---

Dept. Est. Total: \$1,300,000  
Contractor: Hazard Construction Company  
Expiration Date: December 31, 2020

Pursuant to SDMC §22.3108 (a), "Exceptions to Advertisement and Competitive Award of Public Works Contracts", this is to certify that a sole source agreement with the contractor named above is necessary and that strict compliance with a competitive process would be unavailing or would not produce an advantage, and soliciting bids or proposals would be undesirable, impractical or impossible for the following reasons:

JUSTIFICATION:

A report from the Storm Water Public Works Supervisor was received on January 4, 2019, reporting a storm drain pipe causing linear sinkholes along Florida Drive north of Pershing Drive in the Balboa Park Area. The storm drain pipe is a 126-inch diameter corrugated steel pipe (CSP) located underneath the brow ditch and west of the sidewalk of the southbound Florida Drive. The pipe begins from a headwall northwest of Florida Drive and Pershing Drive intersection and runs due north along the west side of Florida Drive terminating past Bob Wilson Drive where it transitions to an open channel.

Site investigations were conducted by the Transportation & Storm Water Department (TSWD), Storm Water Division on January 4, 2019, and again on January 10, 2019, to evaluate the condition of the pipe and the sinkhole which has formed to the west of the Florida Drive right-of-way.

Corrosion at the bottom of the CSP was observed throughout the entire length of the pipe. The pipe has a severe failure at the bottom and begins approximately 200 feet north of the headwall and is approximately 340 feet in length. This failure is causing multiple linear sinkholes undermining the existing brow ditch and sidewalk. These sinkholes vary in size from 3 to 25 feet wide, and from 3 to 10 feet deep. The sinkholes are now impacting the west lane of the southbound Florida Drive.

A follow-up investigation was conducted on January 11, 2019, by the Development Services Department (DSD), Public Works Department (PWD), and TSWD staff. All three departments have agreed that the storm drain failure is now impacting the nearby existing infrastructure.

As we are in the rainy season and further rain events are anticipated, new rainfall will cause the sinkholes to continue to grow at an alarming rate, cause further damage to nearby existing infrastructure, and create traffic hazards and risk to the public safety. The necessary repairs are beyond the capabilities of TSWD.

**AGREEMENT VALUE & DURATION:**

The total fee for these services shall not exceed the amount noted above and the term of the agreement will be in effect from date of the agreement execution, until the agreement is completed/closed, but will not exceed the above expiration date without issuance of a modification to duration of both the agreement and this sole source.

**ADVANCED METERING INFRASTRUCTURE (AMI) DEVICE PROTECTION**

## Protecting AMI Devices in Meter Boxes and on Street Lights

The Public Utilities Department (PUD) has begun the installation of the Advanced Metering Infrastructure (AMI) technology as a new tool to enhance water meter reading accuracy and efficiency, customer service and billing, and to be used by individual accounts to better manage the efficient use of water. **All AMI devices shall be protected per Section 5-2, "Protection", of the 2015 Whitebook.**

AMI technology allows water meters to be read electronically rather than through direct visual inspection by PUD field staff. This will assist PUD staff and customers in managing unusual consumption patterns which could indicate leaks or meter tampering on a customer's property.

Three of the main components of an AMI system are the:

- A. Endpoints, see Photo 1:

**Photo 1**

B. AMI Antenna attached to Endpoint (antenna not always required), see Photo 2:

**Photo 2**

Network Devices, see Photo 3:

**Photo 3**

AMI endpoints transmit meter information to the AMI system and will soon be on the vast majority of meters in San Diego. These AMI devices provide interval consumption data to the PUD's Customer Support Division. If these devices are damaged or communication is interrupted, this Division will be alerted of the situation. The endpoints are installed in water meter boxes, coffins, and vaults adjacent to the meter. A separate flat round antenna may also be installed through the meter box lid. This antenna is connected to the endpoint via cable. The following proper installation shall be implemented when removing the lid to avoid damaging the antenna, cable, and/or endpoint. Photo 4 below demonstrates a diagram of the connection:

**Photo 4**

The AMI device ERT/Endpoint/Transmitter shall be positioned and installed as discussed in this Appendix. If the ERT/Endpoint/Transmitter is disturbed, it shall be re-installed and returned to its original installation with the end points pointed upwards as shown below in Photo 5.

**The PUD's code compliance staff will issue citations and invoices to you for any damaged AMI devices that are not re-installed as discussed in the Contract Document**

Photo 5 below shows a typical installation of an AMI endpoint on a water meter.

**Photo 5**

Photo 6 below is an example of disturbance that shall be avoided:

**Photo 6**

**You are responsible when working in and around meter boxes.** If you encounter these endpoints, use proper care and do not disconnect them from the registers on top of the water meter. If the lid has an antenna drilled through, do not change or tamper with the lid and inform the Resident Engineer immediately about the location of that lid. Refer to Photo 7 below:

**Photo 7**

Another component of the AMI system are the Network Devices. The Network Devices are strategically placed units (mainly on street light poles) that collect interval meter reading data from multiple meters for transmission to the Department Control Computer. **If you come across any of these devices on street lights that will be removed or replaced (refer to Photos 8 and 9 below), notify AMI Project Manager Arwa Sayed at (619) 362-0121 immediately.**

Photo 8 shows an installed network device on a street light. On the back of each Network Device is a sticker with contact information. See Photo 9. **Call PUD Water Emergency Repairs at 619-515-3525 if your work will impact these street lights.** These are assets that belong to the City of San Diego and you shall be responsible for any costs of disruption of this network.

**Photo 9**

**If you encounter any bad installations, disconnected/broken/buried endpoints, or inadvertently damage any AMI devices or cables, notify the Resident Engineer immediately. The Resident Engineer will then immediately contact the AMI Project Manager, Arwa Sayed, at (619) 362-0121.**

**Project No. / WBS No.:** WBS B-19115.02.06

**Project Name:** Florida Storm Drain Emergency Replacement

**Project Location-Specific:** The project is located on Florida Drive north of 26<sup>th</sup> Street and Pershing Drive, in the Balboa Park Community Planning Area/Council District 3.

**Project Location-City/County:** San Diego/San Diego County

**Description of nature and purpose of the Project:** A 126-inch diameter corrugated metal storm drain pipe (CMP) has failed, creating multiple sinkholes along Florida Drive. The sinkholes have compromised the adjacent sidewalk and roadway. Immediate repair of the storm drain is necessary to prevent the expansion of the sinkholes, and protect public infrastructure. Repair work will include replacement of approximately 550 linear feet of deteriorated CMP, backfilling of sinkholes, and repair/replacement of impacted infrastructure. The project is located along the western edge of Florida Drive, partially within the developed right-of-way and partially within a vegetated slope. A biological and archeological monitor will be present during repair work to ensure impacts to environmental resources are avoided. Revegetation of areas disturbed by project work will be initiated within 90 days of project completion, and will be completed in accordance with the City's Landscape Standards.
