DATE: September 13, 2019
TO: James Nagelvoort, Director, Public Works
FROM: Claudia C. Abarca, Deputy Director, Public Works Contracts 
SUBJECT: Sole Source Authorization for Mechanical Pipeline Rehabilitation Services at 101 Ash Street Building

Dept. Est. Total: \$160,000.00
Contractor: Specialized Pipe Technologies
Expiration Date: November 30, 2019
Recommendation: Approve Sole Source

Pursuant to SDMC §22.3108 (a), "Exceptions to Advertisement and Competitive Award of Public Works Contracts", this is to certify that a sole source agreement with the contractor named above is necessary and that strict compliance with a competitive process would be unavailing or would not produce an advantage, and soliciting bids or proposals would be undesirable, impractical or impossible for the following reasons:

JUSTIFICATION:

The Chilled Water system is an essential mechanical component of the building located at 101 Ash Street's Heating Ventilation and Air Conditioning (HVAC) system. The system provides chilled water to condition the air from floors three (3) to nineteen (19). Pipelines in the HVAC system carry chilled water from the basement level of the building to the 20th floor, where the chilled water passes through a series of coils that condition the air and then through a supply fan duct which distributes the air to each floor.

During a routine maintenance inspection at the building located at 101 Ash Street, it was found that pipelines within the system have leaks, making the system inoperable. In order to have the system in working order, it is necessary to rehabilitate and epoxy-line the supply and return Chilled Water lines to restore its mechanical integrity.

Specialized Pipe Technologies is a pipeline contractor specializing in investigation, cleaning, and rehabilitation, and has the required level of technical expertise and resources to provide this work. Failure to enter into a sole source agreement would cause the system to remain inoperable, delaying the larger project's critical path schedule, and potentially create unsafe working conditions for employees working on tenant improvements to the building.

Additional justification can be found in the memorandum dated September 9, 2019.

AGREEMENT VALUE & DURATION:

The total fee for these services shall not exceed the amount noted above and the term of the agreement will be in effect from date of the agreement execution, until the agreement is completed/closed, but will not exceed the above expiration date without issuance of a modification to duration of both the agreement and this sole source authorization.

MEMORANDUM

DATE: September 9, 2019

TO: Claudia Abarca, Deputy Director, Public Works/Contracts

FROM: Julie Ballesteros, Assistant Deputy Director, CMFE Division

SUBJECT: Request for Sole Source Agreement with Specialized Pipe Technologies to provide mechanical pipeline rehabilitation services at 101 Ash Street Building.

This memorandum is to request authorization for a sole source contract to rehabilitate the Chilled Water system's pipelines using epoxy to line the interior two 8-inch steel pipelines, for a total of approximately 1,360 feet of pipe.

The Chilled Water system is an essential mechanical component of the building's integrated Heating Ventilation and Air Conditioning (HVAC) system. It provides Chilled Water to condition the air from floors 3 to 19. These pipelines carry chilled water from the basement level B to the 20th floor where the Chilled Water passes through a series of coils that condition the air; then, through a Supply Fan duct, the conditioned air is distributed to each floor. During a routine maintenance inspection, it was found that the pipelines have leaks and the system cannot be operated. It is imperative that these pipelines are epoxy-lined to restore the mechanical integrity.

Specialized Pipe Technologies (SPT) is a pipeline company specializing in investigation, cleaning, and rehabilitation, that has the required level of expertise and resources to provide rehabilitation through epoxy-lining the supply and return Chilled Water pipelines. Lining the two 8-inch steel pipes is essential for restoring the mechanical integrity of the pipelines and operating the Chilled Water system. If this work is not performed or is delayed, the HVAC system cannot properly be operated, directly impacting the Tenant Improvements project's critical path schedule, and thus cannot be occupied by the City of San Diego's employees by the allotted time.

Therefore, it is requested that a sole source contract in the amount not to exceed \$160,000.00 be awarded to Specialized Pipe Technologies for these services.
