

From: Committee Member Jim Tomasulo

To: Franchise Compliance Review Committee

As part of franchise review committee presentations and meetings, we were given the opportunity to access the Undergrounding mapping information provided by the city's web portal below:

<https://webmaps.sandiego.gov/portal/apps/Cascade/index.html?appid=929e10afa0b64837a21e49e3df343149>

The portal provides information on the process of undergrounding and project level updates for active projects. The portal gives a color-coded map of the various neighborhoods and the phased approach to undergrounding projects.

**Recommendation:**

While the information given is helpful and provides a general overview of each neighborhood, including more details about currently under-construction streets and a master plan timeline for future location would be beneficial. This would give consumers a more accurate picture of upcoming projects, both in the near term and beyond. A 10-year master plan of projects is a typical approach to planning work. This allows for flexibility based on schedule and budgeting changes but identifies timelines and scoping.
