EXECUTIVE SUMMARY

Viewpoint Development retained Apex Companies, LLC (Apex) to perform a Phase I Environmental Site Assessment (ESA) of Perry's Cafe located at 4620 Pacific Highway in San Diego, California (Site). The Phase I ESA was performed in general conformance with the scope and limitations of ASTM International (ASTM) Practice E1527-13 and additional terms and conditions outlined in Apex's proposal, dated February 5, 2021.

The Site consists of three parcels (Assessor's Parcel Numbers: 442-740-07, 442-740-06, and 442-740-03) totaling approximately 1.75 acres and is bordered by the I-5 Freeway and Pacific Highway. There is one, single-story building at the Site that is occupied by Perry's Café. The rest of the Site is composed of asphalt-paved parking areas.

Based on a review of historical sources, the Site appears to have been partially developed in the 1920's. Aerial photographs dating back to 1928 reveal that the Site may have been used to support neighboring agricultural operations during this decade, but large-scale agriculture use is not obvious. The Site and surrounding properties experienced significant development during the 1940's. The southern portion of the Site (APN 442-740-03) was occupied by a gasoline station from at least 1950 through the late 1980's. The northern portion of the Site (APNs 442-740-06 and 442-740-07) appeared to be occupied by two hotels from 1950 through the early 1960's. The Site was redeveloped in the mid 1960's with the current restaurant building and a gasoline station on the south end of the Site. The gasoline station was demolished in the late 1980's and replaced with asphalt-paved parking. Perry's Café has operated at the Site since 1985.

The findings and conclusions of our Phase I ESA are summarized below. This assessment has revealed evidence of recognized environmental conditions in connection with the Site. Please refer to the entire report and appropriate report sections for additional details regarding the findings and conclusions.

Report Section		De Minimis Condition	Business Environmental Risk (BER)	Recognized Environmental Condition (REC)	Historical REC (HREC)	Controlled REC (CREC)	Comments
3.0	User Provided Information	No	No	No	No	No	N/A
4.1	Standard Environmental Record Sources (Databases)	No	No	Yes	No	No	Discussed Below
4.4	Historical Use Information	No	No	Yes	No	No	Discussed Below
5.0	Site Reconnaissance	No	No	No	No	No	N/A
6.0	Interviews and Regulatory Agency Files	No	No	No	No	No	N/A
9.0	Non-ASTM Considerations	No	No	No	No	No	N/A

The Site was first developed in the 1920's and has been occupied by a gasoline station from at least 1950 through the late 1980's. The Site is located in a heavily industrial area that has been used to support military operations since the 1930's. Apex considers the age, location, and past uses of the Site to be a REC. The Site history is described in detail in **Section 4.4**.

The former, onsite gas station was involved in a leaking underground storage tank (LUST) cleanup case #H12810-001 in May 1988. The Site was issued a no-further action letter in May 1992, but the NFA letter noted that "an estimated 100 yards of gasoline contaminated soil was excavated, sampled, and analyzed and found to contain <100 mg/kg TPH. This soil was used to backfill the site excavations." Additionally, groundwater samples collected from the site revealed benzene concentrations that exceed current screening levels. This petroleum release is considered a REC and is described in detail in **Section 4.1**.

The Space and Naval Warfare Systems Center (SPAWAR) – Taylor Street Complex is located at 4635 Pacific Highway, east of the Site across Pacific Highway. The property is enrolled in a cleanup agreement with the Department of Toxic Substances Control (DTSC) under case #37970022. The Site was constructed in the late 1930's and was used for the manufacturing of B-24 bombers and the maintenance of aviation electronic parts. Previous environmental investigations have revealed groundwater and soil-gas contamination at the property. The SPAWAR facility is considered a REC and is described in detail in **Section 4.1**.

Vapor Migration

In general, USEPA does not regulate indoor air quality except to the extent that indoor air impacts are caused by releases of hazardous substances into subsurface soil or groundwater (vapor intrusion). ASTM E1527-13 defines "migrate" and "migration" as referring to the movement of hazardous substances or petroleum products in any form, including solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in Guide E2600 – Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transaction; however, nothing in ASTM E1527-13 should be construed to require application of the Guide E2600 standard to achieve compliance with all appropriate inquiries.

Subject to the limitations for vapor intrusion discussed in **Section 1.4** of this report, as part of Apex's evaluation of the Site for the presence of RECs, the potential presence of hazardous substances or petroleum products in any form, including soil vapor, was not evaluated. Based on the age, location, previous release associated with the former gas station, and resources evaluated as part of this Phase I ESA, the potential for a vapor migration condition to exist is moderate to high.

Data Gaps

The ASTM Standard requires that the report identify the following: 1) *obvious* uses of the Site since 1940 or first development, whichever is *earlier*; and 2) significant “data gaps” which affect the ability of the Environmental Professional to identify *recognized environmental conditions*. A data gap by itself is not inherently significant. The report is also to include information on the sources consulted to address the data gaps. Apex did not encounter any significant data gaps while preparing this report.

1.0 INTRODUCTION

1.1 Purpose

Viewpoint Development retained Apex Companies, LLC (Apex) to perform a Phase I Environmental Site Assessment (ESA) of Perry's Cafe located at 4620 Pacific Highway in San Diego, California. This Phase I ESA was performed in connection with a potential acquisition of the Site. The purpose of the Phase I ESA is to identify the potential for RECs existing at the Site.

1.2 Scope of Services

This Phase I ESA complies with the general scope and limitations of the ASTM Standard Practice for ESAs: The Phase I ESA Process, Designation E1527-13; the U.S. Environmental Protection Agency's Standards and Practices for All Appropriate Inquiries, 40 CFR Part 312; and ASTM E1903-11, Standard Practice for Environmental Site Assessments: Phase II Environmental Site Assessment Process. The Phase I ESA was conducted to provide a reasonable level of investigation to identify RECs. This term, as well as the associated terms Historical REC (HREC), Controlled REC (CREC), and de minimis condition, are defined by ASTM E1527-13 and these definitions are provided in **Section 10.0** of this report.

1.3 Significant Assumptions

Apex has performed the historical and environmental record searches in accordance with ASTM E1527-13 and current industry practice. The data, findings, and conclusions presented in this Phase I ESA are based upon a search, review, and analysis of documents and interviews in connection with the Site.

Conclusions reached regarding the conditions of the Site do not represent a warranty that all areas within the Site are of a similar quality as may be inferred from observable site conditions and available site history. As stated in the ASTM standard, no Phase I ESA can wholly eliminate uncertainty regarding the potential for environmental liability in connection with the Site. Apex's evaluation and analysis are intended to reduce, not eliminate, the potential for conditions that result in liability for the end user of this Phase I ESA.

1.4 Limitations and Exceptions

This report was prepared as a result of a contractual agreement that defined the approach and scope of services to be employed during the course of the investigation. The opinions and conclusions expressed in this study have been based strictly on the results of these contracted services. The scope of this Phase I ESA is intended to aid in the evaluation of RECs. Findings contained within this report are based on

information collected from observations made on the day(s) of the site reconnaissance and from reasonably ascertainable information obtained from certain public agencies and other referenced sources. The services provided by Apex should not be construed as a warranty or guarantee that no RECs exist at the Site or that all RECs have been uncovered. No conclusions are stated or implied concerning the suitability of the Site for its eventual use. This document is not intended for purposes other than those expressly set forth herein or for use by parties other than for whom it has been prepared.

Additionally, unless specifically described in this report, Apex's scope of work explicitly excluded issues that are outside the scope of ASTM E1527-13 and may constitute a business environmental risk as defined by ASTM (see **Section 10.0**, Terminology). ASTM Standard Practice E1527-13 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

- **Uncertainty Not Eliminated** - No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs, and this practice recognizes reasonable limits of time and cost.
- **Not Exhaustive** - All Appropriate Inquiry does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained, or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions.
- **Level of Inquiry Is Variable** - Not every property will warrant the same level of assessment. Consistent with good commercial or customary practice, the appropriate level of environmental site assessment will be guided by the type of property, the expertise and risk tolerance of the user, and the information developed in the course of the inquiry.

In general, the USEPA does not regulate indoor air quality except to the extent that indoor air impacts are caused by releases of hazardous substances into subsurface soil or groundwater (vapor intrusion). ASTM E1527-13 defines "migrate" and "migration" as referring to the movement of hazardous substances or petroleum products in any form, including solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in Guide E2600 – Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transaction; however, nothing in ASTM E1527-13 requires application of the Guide E2600 standard to achieve compliance with all appropriate inquiries.

A Phase I ESA meeting or exceeding this practice and completed less than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction, is presumed to be valid. A Phase I ESA meeting or exceeding this practice and for which the information was collected or updated within one year prior to the date of the intended transaction may be used provided the following components of the Phase I ESA were conducted or updated within 180 days of the date of purchase or the date of the intended transaction:

- interviews with owners, operators, and occupants;
- searches for recorded environmental cleanup liens;
- reviews of federal, tribal, state, and local government records;
- visual inspections of the property and of adjoining properties; and,
- the declaration by the environmental professional responsible for the assessment or update.

1.5 Special Terms and Conditions

There are no other special terms or conditions concerning this project other than those specifically described in **Section 1.2**.

1.6 User Reliance

This report documents the Phase I ESA of the Site performed by Apex at the explicit request and direction of Viewpoint Development and in general accordance with ASTM 1527-13 and the US EPA Standards and Practices for All Appropriate Inquiries, 40 CFR 312. The findings, opinions, and conclusions of this Phase I ESA are for the confidential and exclusive use of Viewpoint Development. Reliance on this report for any use or by parties other than specifically stated is prohibited without the express written consent of Apex, and Viewpoint Development, and such use is at the sole risk of the user.

2.0 SITE DESCRIPTION

2.1 Site Location and Ownership

The Site is located at 4620 Pacific Highway in San Diego, California. The Site consists of 3 parcels that are owned by Georgakopoulos Family LLC. A Site Location Map is included as **Figure 1**. A Site Plan and Site and Surrounding Properties Map is included as **Figures 2 and 3**, respectively.

2.2 Site and Vicinity General Characteristics

The Site is located between the I-5 Freeway and Pacific Highway. The overall Site vicinity consists of mixed commercial, industrial, and transportation use. Details regarding adjoining properties are provided in **Section 2.4**. Photographs of the Site are included in **Appendix 2**.

2.3 Current Site Use and Improvements

The Site occupies approximately 1.75 acres and is comprised of one 6,500 square foot single-story structure that houses Perry's Café. The remaining areas of the Site are asphalt-paved parking areas. The Site is connected to public sewer, water, and electrical services.

2.4 Current Use of Adjoining Properties

Adjacent properties are defined as those sharing borders with the Site or separated only by a street, alley or other public right-of-way. A summary of adjacent land use as determined from aerial photographs and the site reconnaissance is as follows:

TABLE 2-1: Adjoining Property Information	
Direction	Properties
North	The Site is bordered to the north by the I-8 Freeway on-ramp. The E-Z 8 Motel is located north of the on-ramp.
East	The Site is bound to the east by Pacific Highway. The SPAWAR – Taylor Street Complex is located across Pacific Highway to the east of the Site.
South	The Site is bound to the south by Taylor Street and the I-5 Freeway. The Old Town Train Station is located across Taylor Street to the southeast.
West	The Site is bound to the west by the I-8 Freeway on-ramp and the I-5 Freeway.

Nearby properties of potential environmental concern are discussed further in **Section 4.0** of this report.

3.0 USER PROVIDED INFORMATION

ASTM E1527-13 defines “User” as the party seeking to use Practice E1527 to complete a Phase I ESA of the Site. Apex understands that the Client is the User as defined by ASTM E1527-13. ASTM E1527-13 specifies certain tasks associated with identifying potential RECs at the Site that should be performed by the User and provided to the Environmental Professional (i.e., User Responsibilities). Accordingly, Apex provided a User Questionnaire to Viewpoint Development requesting information specified in the table below. A copy of the completed User Questionnaire is included in **Appendix 3**. Information provided is summarized in **Table 3-1** and elsewhere in this report.

TABLE 3-1: User Provided Information	
Data Type	Information Provided
Environmental Liens, AUL, Title Records	The User is not aware of any reported AULs or environmental liens for the Site.
Specialized User Knowledge	The User indicated no specialized knowledge regarding the Site. General knowledge provided by the User is presented throughout this report.
Commonly Known or Reasonably Ascertainable Information	The User did not provide any commonly known or reasonably ascertainable information material to RECs at the Site.
Valuation Reduction for Environmental Issues	The User is not aware of any value reduction regarding the purchase price and fair market value of the Site.
Reason for Performing Phase I ESA	This Phase I ESA was performed at the request of Viewpoint Development, Inc. in anticipation of a potential acquisition of the Site.
Other User Provided Information	The User provided multiple marketing documents that detailed the future development plans of the Site.

The User provided marketing documents that summarize the initial development plans of a 4-story apartment complex with a single grade level parking structure. A copy of the documents are included in **Appendix 3**.

4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources

Consistent with ASTM E1527-13, Apex obtained and reviewed environmental databases and records to characterize the obvious and apparent uses of the Site. Apex retained Environmental Risk Information Services (ERIS) to provide a database and records search report. Apex has reviewed the listings provided by the database report and evaluated whether these listings should be considered RECs. A discussion of pertinent database listings pertaining to the Site and/or adjoining properties, or listings that are considered to be RECs, is provided in the sections below. Copies of the environmental records search reports are presented in **Appendix 4**.

TABLE 4-1: Summary of ASTM Environmental Database Information			
Environmental Record	Search Distance (Miles)	No. of Facilities Listed	Site Listed?
Federal Brownfields Database (FED BROWNFIELDS)	0.5	0	No
Federal National Priorities List (NPL)	1.0	0	No
Federal Delisted NPL Facilities	0.5	0	No

Federal Institutional Control / Engineering Control Registries (IC/EC)	0.5	0	No
Federal Emergency Response Notification System (ERNS) List	Site	0	No
Federal Facility Registry Service/Facility Index (FINDS/FRS)	PO	2	Yes
Hazardous Waste Manifest Data (HAZNET)	PO	1	Yes
Delisted Environmental Reporting System (CERS) Hazardous Waste Sites	0.5	4	No
San Diego County – Hazardous Materials Management Division Database (SANDIEGO HAZ)	0.25	64	Yes
San Diego County - Local Oversight Program List (SANDIEGO LOP)	0.5	22	Yes
San Diego County – Site Assessment and Mitigation Investigation Sites (SANDIEGO SAM)	0.5	42	Yes

TABLE 4-1: Summary of ASTM Environmental Database Information

Environmental Record	Search Distance (Miles)	No. of Facilities Listed	Site Listed?
Statewide Environmental Evaluation and Planning System (UST SWEEPS)	0.25	17	Yes
State Drycleaners	0.25	2	No
State Historical Hazardous Waste Manifest Data	PO	1	Yes
State / Tribal-Equivalent NPL Facilities	1.0	0	No
State / Tribal-Equivalent Landfill and Solid Waste Disposal Facilities	0.5	1	No
State / Tribal-Equivalent Leaking Storage Tank (LUST) Facilities	0.5	26	Yes
State / Tribal Registered Storage Tank List	0.25	4	No
State / Tribal Institutional Control / Engineering Control Registries (IC/EC)	0.5	0	No
State / Tribal Voluntary Cleanup Facilities (SRP)	0.5	24	No

Although Apex has evaluated all the listings in the ERIS environmental database search report, Apex has limited its discussion of the listings to those for the Site, adjoining properties, and nearby properties that could potentially pose a REC to the Site. Pertinent listings are discussed as follows:

On-Site Listings

San Diego Truck & Savings Bank located at 4606 Pacific Highway is listed on multiple databases including the San Diego Local Oversight Program (LOP) database. The database listings are associated with the historical gas station operations at the Site from at least 1950 through the late 1980's.

On May 26, 1988 four underground storage tanks were removed from the Site. Two of the tanks were 5,000-gallon gasoline tanks, the third tank was an 8,000-gallon gasoline tank, and the final tank was a 500-gallon waste oil tank. During removal activities, the waste oil tank was observed damaged with visible holes. Additionally, groundwater with a slight sheen and gasoline odor was observed during removal activities. The release was reported to the County of San Diego Department of Environmental Health and the Site was enrolled in a leaking underground storage tank (LUST) cleanup case #H12810-001.

An estimated 100 yards of gasoline contaminated soil was excavated, sampled, and analyzed and found to contain <100 mg/kg total petroleum hydrocarbons (TPH). This soil was then used to backfill the tank excavations. Four monitoring wells were installed at the Site in the 1989, and samples were collected on a quarterly basis through 1991. Benzene was detected in groundwater at concentrations up to 9,200 µg/L in

MW-1, which was located down-gradient of the former storage tanks. This concentration exceeds the established Maximum Contaminant Level (MCL) of 1.0 µg/L for benzene.

The Site was issued a no-further action (NFA) letter on May 11, 1992. Even though the Site was issued a NFA letter, it is Apex's opinion that the 100 yards of petroleum contaminated soil used for backfill in this parcel will need to be screened and sampled during grading activities. Depending on the results of the sampling activities, this soil may need to be handled separately. The petroleum contaminated soil, and evidence of groundwater contamination from the UST release is considered a REC to the Site. Further investigation is recommended to horizontally and vertically assess the extent of petroleum contamination in the soil and groundwater near the former storage tanks.

Off-Site Listings

The Space and Naval Warfare Systems Center (SPAWAR) – Taylor Street Complex is located at 4635 Pacific Highway, east of the Site across Pacific Highway. This property is listed on multiple databases, including the Cleanup Sites database. The property is enrolled in a cleanup agreement with the Department of Toxic Substances Control (DTSC) under case #37970022.

The SPAWAR facility was constructed in the late 1930's and was historically used for the manufacturing and maintenance of aviation electronic parts. The property was originally owned by Consolidated Aircraft Company (Consair), but it was transferred to the United States Army Air Corps in 1941 and used to manufacture B-24 bombers during World War II. The property was transferred to the Navy in 1968, and it is currently used for light maintenance and administrative activities.

Environmental investigations dating back to 1997 have revealed potential contamination in the groundwater and soil-vapor beneath the Site. Perchlorate has been detected in groundwater at concentrations up to 12.0 µg/L, which exceeds the established MCL of 6.0 µg/L. PCE has been detected in soil-vapor at concentrations up to 160 µg/m³, which exceeds the calculated soil-vapor screening level of 67 µg/m³ using the recommended DTSC attenuation factor of 0.03.

Based on the historical use of the SPAWAR – Taylor Street Complex, and the concentrations of contaminants detected in groundwater and soil-vapor, this property is considered a REC to the Site. Although considered a REC, the United States Navy is the responsible party for the release, and it is actively being investigated under the supervision of the responsible regulatory agency.

Apex reviewed the remaining offsite listings in the ERIS databases. Based on location, distance from the Site, type of listing, or regulatory status, none of the other sites listed in the environmental databases are

considered an environmental concern.

4.2 Environmental Liens and AULs

Environmental liens and AULs can commonly be found within recorded land title records (e.g., County Recorder/Registry of Deeds). The types of title reports that may disclose environmental liens and AULs include Preliminary Title Reports, Title Commitments, Condition of Title, and Title Abstracts. Chain-of-title reports will not normally disclose environmental liens or AULs. Environmental liens and AULs that are imposed by judicial authorities may be recorded or filed in judicial records only. An environmental lien and AUL search was not included in the scope of work for this Phase I ESA.

4.3 Physical Setting Sources

Sources consulted to characterize the physical setting of the Site are identified herein. According to the USGS 7.5-minute topographic map of the area (La Jolla, CA; Point Loma, CA, 2015), the Site generally slopes to the southwest and is located at an elevation of 12.03 feet above mean sea level (MSL). Based on a groundwater monitoring reports from the former gasoline station at the Site, groundwater was encountered between 7-8 feet below ground surface (bgs).

According to the U.S. Fish and Wildlife Service (USFWS) National Wetlands Inventory wetlands mapper, no wetlands exist at the Site. According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM), the Site is located in Zone X-12: Area of Minimal Flood Hazard.

According to the U.S. Department of Agriculture Natural Resources Conservation Service (NCSS) Web Soil Survey, the Site is primarily underlain by quaternary alluvium and marine deposits.

4.4 Historical Use Information

Apex collected information from historical data sources consisting of aerial photographs and topographic maps for the Site and vicinity. Copies of historical resources are included in **Appendix 5**. A summary of the Site is presented in **Table 4-2** below.

TABLE 4-2: Site History Summary

Period	Source	Description
1900's– 1930's	1903 Topographic Map 1928 Aerial Photograph 1930 Topographic Map	The site is partially developed in the 1928 aerial photograph. Dirt roads provide access to the Site. It appears that there is some type of structure or storage area at the Site in the aerial photograph. This feature could be related to the agriculture operations west of the Site.
1940's	1940 Fire Insurance Map 1940 City Directory 1943 Topographic Map 1944 Aerial Photograph 1946 City Directory 1949 City Directory	The Site and surrounding areas experience significant development during the 1940's, in conjunction with World War 2 related efforts. The SPAWAR-Taylor Street Complex is fully developed across Pacific Highway east of the Site.
1950's	1950 Fire Insurance Map 1956 Fire Insurance Map 1958 Fire Insurance Map 1959 Fire Insurance Map 1954 City Directory 1953 Aerial Photograph 1956 Aerial Photograph 1953 Topographic Map	According to aerial photographs and fire insurance maps, the Site appears to be occupied by two motels on the northern half, and a gasoline station on the southern half. During this decade, the Site is bordered to the east by the SPAWAR-Taylor Street Complex and to the west by industrial and commercial development. Industrial businesses west of the Site include an aluminum foundry and sheet metal shop.
1960's	1965 Fire Insurance Map 1960 City Directory 1965 City Directory 1966 Aerial Photograph 1967 Topographic Map	In the 1966 aerial photograph, the Site is undergoing re-development. Both motels that previously occupied the northern half of the Site are demolished. The restaurant building is constructed during this decade, and a gas station continues to operate at the southern half of the Site. Several of the industrial and commercial businesses that bordered the Site to the west in the 1950's are also demolished to support the construction of the I-5 Freeway.
1970's	1972 Aerial Photograph 1974 Aerial Photograph 1979 Aerial Photograph 1970 City Directory 1975 City Directory 1975 Topographic Map	In the 1970 city directory, the restaurant building is addressed at 4610 Pacific Highway and is occupied by Sambo's Restaurants. The gas station is addressed at 4606 Pacific Highway and is occupied by American Oil Co. In 1975, the gas station is operated by Paul's Texaco Service. According to the aerial photos, the restaurant building is located in the center portion of the Site, and the gas station remains in the southern portion. The I-5 freeway is completely developed to the west of the Site during this decade.
1980's	1985 Aerial Photograph 1980 City Directory 1985 City Directory	In the 1980 city directory, the restaurant building is still occupied by Sambos Restaurant. Ital Automotive is listed as the gas station tenant in the 1980 and 1985 city directory. There is no tenant listing for the restaurant building in 1985, which is the year that Perry's Café took over operations.
1990's	1994 Aerial Photograph 1997 Aerial Photograph 1991-1992 City Directory 1995-1996 City Directory 1996 Topographic Map	In the 1994 aerial photograph, the gasoline station that occupied the southern portion of the Site is demolished and replaced with asphalt paved parking. Perry's Café is listed on the city directories during this decade at 4620 Pacific Highway. The surrounding areas remain largely unchanged during this decade.

TABLE 4-2: Site History Summary		
2000's	2002 Aerial Photograph 2005 Aerial Photograph 2009 Aerial Photograph 2000-2001 City Directory 2006 City Directory 2008 City Directory	The Site remains largely unchanged during this decade. Perry's Café is the only tenant listed on city directories.
2010's- 2022	2015 Topographic Map 2013 City Directory 2018 City Directory 2010 Aerial Photograph 2012 Aerial Photograph 2014 Aerial Photograph 2016 Aerial Photograph 2018 Aerial Photograph 2020 Aerial Photograph	The Site remains largely unchanged during this decade. Perry's Café is the only tenant listed on city directories.

Based on a review of historical sources, the Site appears to have been partially developed in the 1920's. Aerial photographs dating back to 1928 reveal that the Site may have been used to support neighboring agricultural operations during this decade, but large-scale agriculture use is not obvious. The southern portion of the Site was occupied by a gasoline station from at least 1950 through the late 1980's. The northern portion of the Site appeared to be occupied by two hotels from 1950 through the early 1960's. The Site was redeveloped in the mid 1960's with the current restaurant building and a gasoline station on the south end of the Site. The gasoline station was demolished in the late 1980's and replaced with asphalt-paved parking. Perry's Café has operated at the Site since 1985. Apex considers the age, location, and previous use of the Site as a gas station to be a REC.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

Mr. Tyler Steimel of Apex conducted a site reconnaissance at the Site on March 26, 2021. Mr. Steimel was accompanied by Mr. Patrick Eulmi with Perry's Cafe. Weather conditions at the time of the site reconnaissance were sunny with a temperature of approximately 75 degrees Fahrenheit. The site reconnaissance consisted of a walk-through of the Site and observations of surrounding properties from the boundaries of the Site. Photographs of the Site are provided in **Appendix 2**.

5.2 Observations

The following is a summary of site observations at the Site:

TABLE 5-1: Site Reconnaissance Summary			
Observation	Observed		Comments
	Yes	No	
Structures (existing)	X		Refer to Section 2.3
Structures (evidence of former)		X	
Aboveground Storage Tanks (ASTs)		X	
Underground Storage Tanks (USTs)		X	
Drums or Other Containers	X		Various cleaning and maintenance chemicals in retail-sized containers located in the restaurant supply closet.
Leaks, Spills, or Releases Around ASTs, USTs, and/or Chemical Storage Areas		X	
Stained or Corroded Floors, Walls, or Drains		X	
Pipes of Unknown Origin or Use		X	
Hydraulic Lifts or Elevators		X	
Transformers	X		One pad-mounted electric transformers was observed on the southern portion of the Site.
Hazardous Waste Disposal Areas		X	
Uncontained Debris Refuse or Unidentified Waste Materials		X	
Standing Water or Other Liquids		X	
Floor Drains or Sumps	X		No sumps observed, various floor drains observed in the kitchen and restroom areas of the restaurant.

TABLE 5-1: Site Reconnaissance Summary			
Observation	Observed		Comments
	Yes	No	
Catch Basins, Dry Wells, and Stormwater Drainage	X		There are no stormwater catch basins at the Site. Stormwater sheet flow is conveyed towards to the east into storm drains located along Pacific Avenue.
Pits/Ponds/Lagoons		X	
Waste or Wastewater Discharges		X	
Oil/Water Separators		X	
On-Site Septic System		X	
Unusual Odors		X	
Stressed Vegetation/Stained Soil		X	
Fill Material		X	
Wells		X	
Other Observations	X		Grease Interceptor / Grease Trap located northwest of the restaurant.

Drums or Other Containers

Miscellaneous quantities of maintenance and cleaning products were observed in a storage closet inside the restaurant. The storage of these products is not considered a REC.

Transformers – Polychlorinated Biphenyls (PCBs)

Apex observed one pad-mounted electric transformers south of the restaurant building. No evidence of leaks or staining was observed in the vicinity of the transformers. As a result, the transformers are not considered a REC.

Floor Drains

Multiple floor drains were observed inside of the kitchen and restroom areas of the restaurant. The drains appeared to be in good condition.

Catch Basins, Dry Wells, and Stormwater Drainage

Stormwater sheet flow is naturally conveyed to the east towards Pacific Highway. Stormwater flows offsite and enters storm drains located along Pacific Highway.

Other Observations

Apex observed a grease interceptor / grease trap northwest of the restaurant. The unit captures grease generated by Perry's Café. The unit does not represent a REC, but it will need to be maintained on a regular basis or removed prior to redevelopment activities.

6.0 INTERVIEWS AND REGULATORY AGENCY FILE REVIEWS _____

Apex completed the following interviews (see **Table 6-1** below) and information requests to obtain additional information regarding the Site and potential RECs. Pertinent information is discussed below or in other sections of this report.

TABLE 6-1: Interview Summary				
Role	Name	Title/Company	Years Assoc. With Property	Interview Type
Site Representative	Mr. Patrick Eulmi	Manager / Perry's Cafe	20	In Person
Regulatory Agency	N/A	County of San Diego Department of Environmental Health (DEH)	N/A	Email

Mr. Patrick Eulmi, Manager with Perry's Café was interviewed in person on March 26, 2021. Mr. Eulmi has been associated with the property for his entire life and reported that his family has owned and operated Perry's Café since 1985. Mr. Eulmi was not aware of any major environmental concerns or impacts associated with the Site.

Per ASTM E1527-13, if the property or any of the adjoining properties is identified on one or more of the standard environmental record sources, pertinent regulatory files and/or records associated with the listing should be reviewed in order to obtain sufficient information to assist in determining if a REC, CREC, HREC, or a de minimis condition exists at the property in connection with the listing. If, in the environmental professional's opinion, such a review is not warranted, the justification for not conducting the regulatory file review must be provided. As an alternative, files/records from an alternative source(s) (for example, on-site records, user provided records, records from local government agencies, interviews with regulatory officials or other individuals knowledgeable about the environmental conditions that resulted in the standard environmental record source listing, etc.) may be reviewed.

Apex contacted the County of San Diego Department of Environmental Health (DEH) to obtain additional records related to the Site. Apex was able to obtain previous hazardous waste compliance inspections, monitoring well applications, and previous environmental investigations conducted at the Site. Apex reviewed these documents, and they are related to the database listings discussed in **Section 4.0**.

7.0 OPINIONS, CONCLUSIONS, AND DATA GAPS

Viewpoint Development retained Apex Companies, LLC (Apex) to perform a Phase I Environmental Site Assessment (ESA) of Perry's Cafe located at 4620 Pacific Highway. The Phase I ESA was performed in general conformance with the scope and limitations of ASTM International (ASTM) Practice E1527-13 and additional terms and conditions outlined in Apex's proposal, dated February 5, 2021.

This assessment has revealed evidence of recognized environmental conditions in connection with the Site.

The petroleum release from the previous onsite gas station discussed in **Section 4.1** will require further investigation to vertically and horizontally assess the extent of contamination. The 100 yards of contaminated soil used to backfill the excavation to be screened and sampled during grading activities. Depending on the results of the sampling activities, this soil may need to be handled separately. It is also recommended that additional groundwater samples are collected around the former tank storage area to assess remaining petroleum contamination that may exist at the Site.

The SPAWAR – Taylor Street Complex located across Pacific Highway east of the Site is currently enrolled in a cleanup agreement with DTSC. In order to confirm that there are no current offsite impacts originating from the SPAWAR facility, Apex recommends collecting additional soil, soil-gas, and groundwater samples at the Site prior to redevelopment activities.

Data Gaps

The ASTM Standard requires that the report identify the following: 1) *obvious* uses of the Site since 1940 or first development, whichever is *earlier*; and 2) significant "data gaps" which affect the ability of the Environmental Professional to identify *recognized environmental conditions*. A data gap by itself is not inherently significant. The report is also to include information on the sources consulted to address the data gaps.

Apex did not encounter any significant data gaps while preparing this report.

8.0 SIGNATURES AND EP STATEMENT

8.1 Statement of Responsible Environmental Professional

We declare, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 part of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the Site. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Tyler Steimel E.P.
Staff Scientist
Site Assessor

Ronald J. Kofron, CEG 1527
Program Manager
Senior Reviewer

8.2 Qualifications of Environmental Professional

Mr. Tyler Steimel was the environmental professional responsible for completion of this Phase I ESA. Mr. Steimel has a Bachelor of Science Degree in Biology, has been performing environmental assessments of commercial real estate for over five years, and is an environmental professional as defined in § 312.10 of 40 CFR Part 312.

Mr. Kofron is the Senior Project Manager in the San Diego office of Apex and has primary responsibility for managing all Phase I, Phase II site assessments and remediation projects. Mr. Kofron's experience ranges from comprehensive environmental due diligence on real estate transactions and development projects to environmental investigations ranging from small spills to Superfund Remedial Investigations and Feasibility Studies and the remediation of contaminated sites. Mr. Kofron has B.S. and M.S. Degrees in Geology and is a Professional Geologist and a Certified Engineering Geologist in the state of California. Mr. Kofron has 36 years of experience as a consultant, and is an environmental professional as defined in § 312.10 of 40 CFR Part 312. Qualifications of the responsible environmental professionals can be found in **Appendix 8**.

9.0 TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E1527-13. The Standard Practice should be referenced for further detail (such as the precise wording), related definitions or additional explanation regarding the meaning of terms.

Recognized Environmental Condition (REC) – The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that indicate pose a material threat of a future release to the environment. *De minimis* conditions are not RECs.

De minimis condition – A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not RECs or CRECs.

Controlled Recognized Environmental Condition - A REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). For example, if a leaking underground storage tank has been cleaned up to a commercial use standard, but does not meet unrestricted residential cleanup criteria, this would be considered a controlled recognized environmental condition. The "control" is represented by the restriction that the property remains commercial. A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I ESA report, and as a recognized environmental condition in the conclusions section of the Phase I ESA report. NOTE: A condition identified as a CREC does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

Historical Recognized Environmental Condition (HREC) – A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling

the past release a HREC, the environmental professional must determine whether the past release is a REC at the time the Phase I ESA is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC.

Material Threat – A physically observable or *obvious* threat which is reasonably likely to lead to a release that, in the opinion of the *environmental professional*, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank (AST) system that contains a *hazardous substance* and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

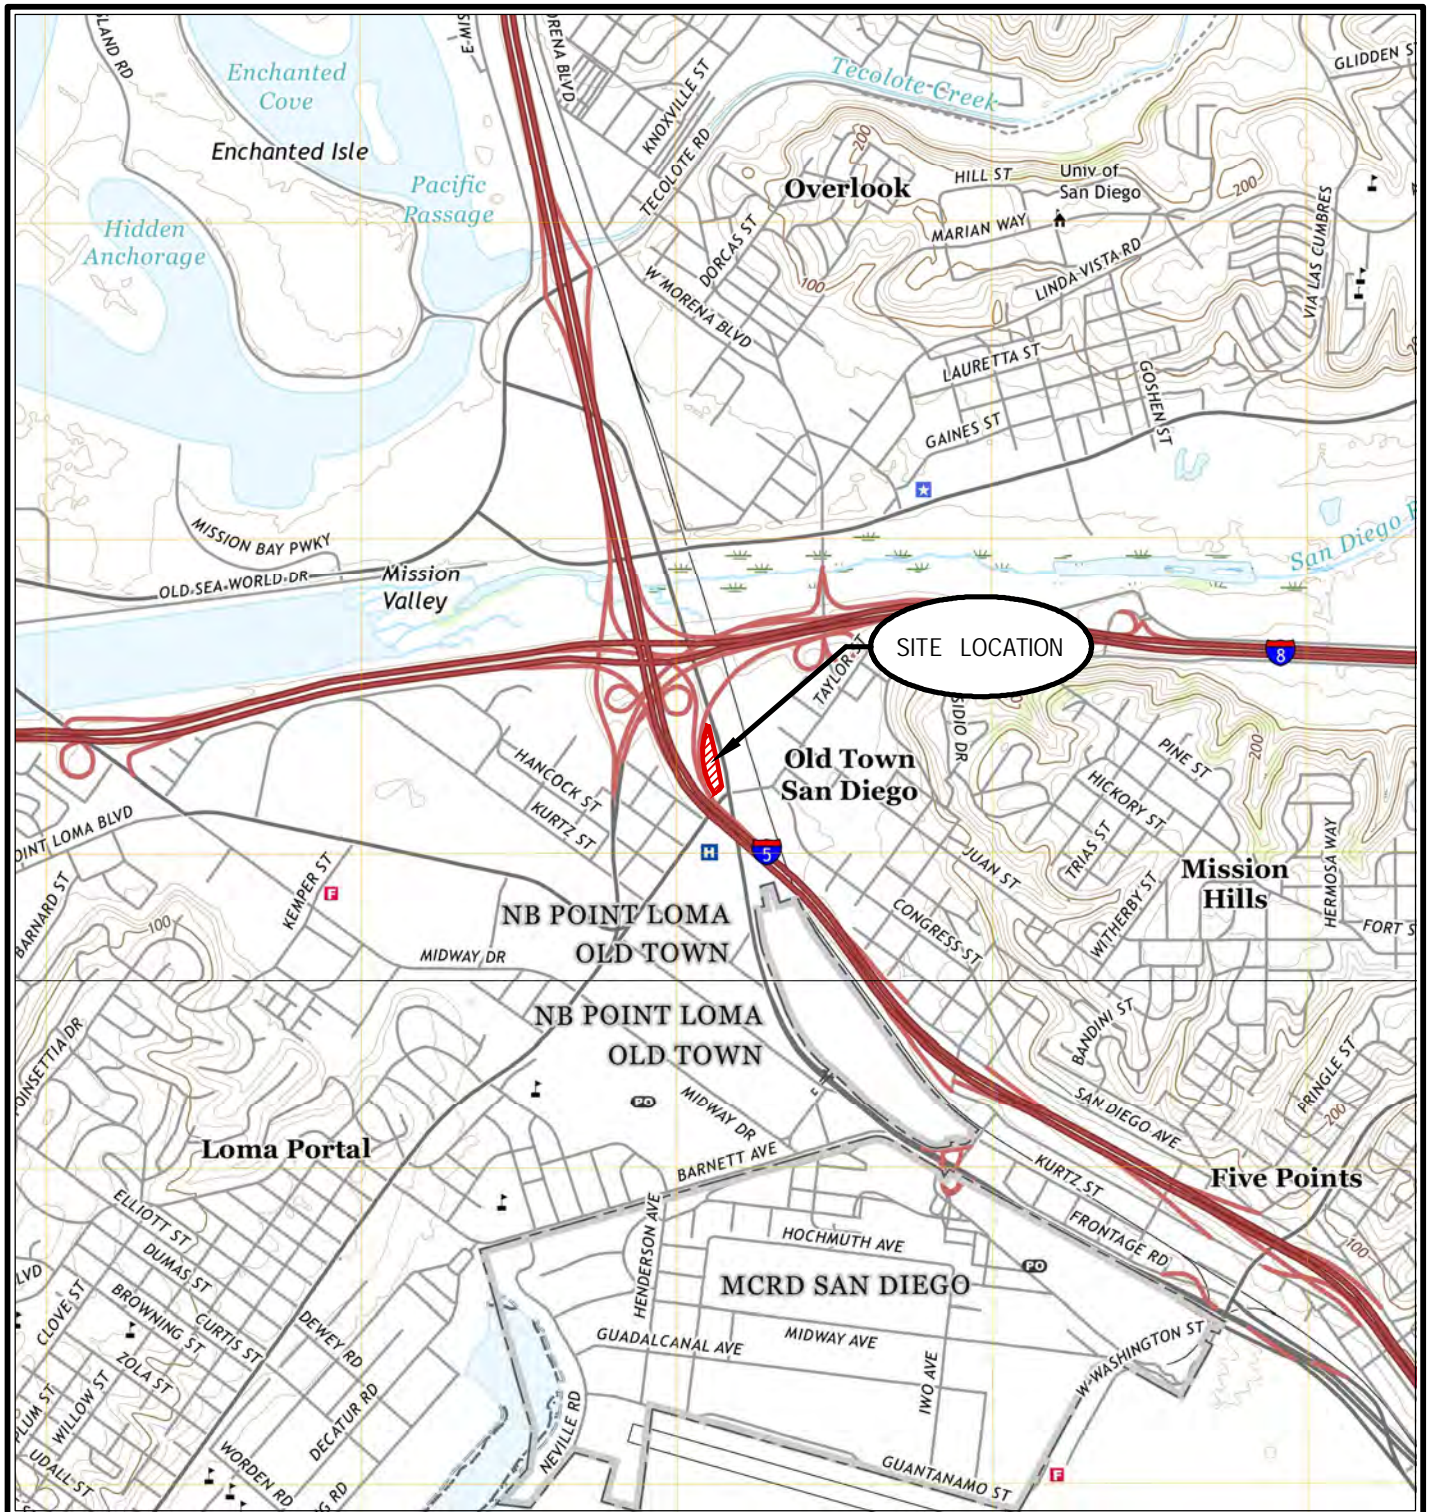

Migrate/migration – Refers to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.

Data Gap – A lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site reconnaissance), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.). The report shall identify and comment on significant data gaps that affect the ability of the EP to identify RECs and identify the sources of information that were consulted to address the data gaps. A data gap by itself is not inherently significant.

Business Environmental Risk – Risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations, some of which are identified in Section 13 of ASTM E1527-13 and include, but are not limited to, Asbestos-Containing Building Materials; Biological agents; Cultural and historic resources; Ecological resources; Endangered species; Health and safety; Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment; Industrial hygiene; Lead-Based Paint; Lead in Drinking Water; Mold; Radon; Regulatory compliance; and Wetlands.

APPENDIX 3

User-Provided Documentation

ASTM E1527-13 USER QUESTIONNAIRE

Site Name: Perry's Café 4620 Pacific Highway, San Diego, California

Site Address: 4620 Pacific Hwy, San Diego, California
San Diego County Parcel Nos. 442-740-07, 442-740-06, and
442-740-03

Respondent Name: Rosemary Cooper

Respondent Title/Company: Viewpoint Development

Date: 22 MAR 21

For Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments", 40 CFR Part 312), the user **must** provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete, and the environmental professional may identify a "data gap" which could impact the Phase I ESA report findings.

Question:	Yes	No
1. Environmental Liens Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?		X
2. Activity and Land Use Limitations (AULs) Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? Check the box as appropriate.		X

ASTM E1527-13 PHASE I ESA
 ALL APPROPRIATE INQUIRY
 USER QUESTIONNAIRE

Question:	Yes	No
3. Specialized Knowledge or Experience Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?		X
4. Purchase Price vs. Fair Market Value Does the purchase price being paid for this property reflect any adjustments from the fair market value of the property? (If you conclude that the value is lower than the fair market price, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?)		X
5. Commonly Known or Reasonably Ascertainable Information Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?		X
5a. Do you know the past uses of the property? <i>restaurant</i>	X	
5b. Do you know of specific chemicals that are present or were once were present at the property?		X
5c. Do you know of spills or other chemical releases that have taken place at the property?		X
5d. Do you know of any environmental cleanups that have taken place at the property?		X
6. Obviousness of the Presence or Likely Presence of Contamination Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?		X

PLEASE PROVIDE EXPLANATION FOR ALL "YES" ANSWERS, OR ATTACH SUPPORTING DOCUMENTS.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Executive Summary

Property Information:

Project Property: *Perry's Cafe Phase I
4620 Pacific Highway (Perry's Cafe) San Diego CA 92110*

Project No: *3621-A4002-001*

Coordinates:

Latitude: *32.75608348*
Longitude: *-117.20165245*
UTM Northing: *3,624,264.85*
UTM Easting: *481,110.79*
UTM Zone: *UTM Zone 11S*

Elevation: *12 FT*

Order Information:

Order No: *21032200517*
Date Requested: *March 22, 2021*
Requested by: *Apex Companies, LLC*
Report Type: *Database Report*

Historicals/Products:

Aerial Photographs *Historical Aerials (Boundaries)*
City Directory Search *CD - 2 Street Search*
ERIS Xplorer [*ERIS Xplorer*](#)
Excel Add-On *Excel Add-On*
Fire Insurance Maps *US Fire Insurance Maps*
Physical Setting Report (PSR) *Physical Setting Report (PSR)*
Topographic Map *Topographic Maps*

DWR GW Subbasin Name:	Mission Valley (9-014)		
Disadvantaged Community:	Disadvantaged Community		
Site History:			

Constructed during World War II, the facility was previously owned by Reuben H. Fleet Company. The company manufactured B-24 bombers. In 1941, ownership was transferred to the U.S. Air Force, and then to the U.S. Navy in 1968. The Air Force and the Navy reportedly utilized the facility for electronics maintenance, testing, and evaluation. Contractors have also been associated with the facility, including General Dynamics Corporation, Martin Marietta, Lockheed, and AMEX Systems. Naval Electronics Engineering Command (NAVELEX) occupied the facility in 1967. NAVELEX became Naval Inservice Engineering West (NISE WEST) in 1992. NISE WEST became part of the Naval Research and Development (NraD) in March 1999. There were originally 8 buildings in the area that make up the Taylor Street Compound (TSC). Buildings 1 through 4 are currently situated at the facility. Buildings 5 through 8, and a portion of Building 3, and storage units have been removed. The facility is largely developed, paved with asphalt, and has little vegetation. Based on a 1996 study conducted by PWC, activities largely located in and near Buildings, 1, 2, 4, 5, 6, 7, and 8 may have contributed to the release of hazardous substances to the soil and/or groundwater. In addition, hazardous waste storage areas were located at the northeastern and northwestern portions of the facility; hazardous waste accumulation and hazardous material storage areas and sheds were also located throughout the facility.

Violations

Violation Date: 03/12/2019 **Violation Source:** CERS
Violation Program: HW **Violation Division:** San Diego County Department of Env Health
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Notes:

Returned to compliance on 04/04/2019. Inspection Sequence ID:6111694

Violation Description:

Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.

Violations

Violation Date: 03/12/2019 **Violation Source:** CERS
Violation Program: HW **Violation Division:** San Diego County Department of Env Health
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Notes:

Returned to compliance on 11/07/2019. Inspection Sequence ID:6111694

Violation Description:

Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violations

Violation Date: 03/12/2019 **Violation Source:** CERS
Violation Program: HW **Violation Division:** San Diego County Department of Env Health
Citation: 22 CCR 15 66262.41 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66262.41
Violation Notes:

Returned to compliance on 04/17/2019. Inspection Sequence ID:6111694

Violation Description:

Failure of a large quantity RCRA generator to prepare the Biennial report (Form 8700), and submit to DTSC by March 1st on even numbered years ; and maintain it onsite for three years.

Local Case No: H21148-002 **How Discovered:** Tank Closure
Begin Date: 8/8/1986 **Stop Method:**
Lead Agency: SAN DIEGO RWQCB (REGION 9) **Stop Description:**
Local Agency: **Case Worker:**
CUF Case: YES **File Location:**
Potential Media of Concern: Soil

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Violations

Violation Date: 09/09/2016 **Violation Source:** CERS
Violation Program: UST **Violation Division:** San Diego County Department of Env Health
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Notes:

Returned to compliance on 09/09/2016. Inspection Sequence ID:5492667;Tank ID:26683,26686;Violation Description:(RP) Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion. 23 CCR 2635(b), 2665

Violation Description:

Failure to comply with one or more of the following:

Failure to install or maintain a liquid-tight spill bucket.

Have a minimum capacity of five gallons.

Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container.

Be resistant to galvanic corrosion.

Violations

Violation Date: 09/16/2015 **Violation Source:** CERS
Violation Program: UST **Violation Division:** San Diego County Department of Env Health
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Notes:

Returned to compliance on 09/16/2015.

Violation Description:

Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion.

Violations

Violation Date: 09/16/2015 **Violation Source:** CERS
Violation Program: UST **Violation Division:** San Diego County Department of Env Health
Citation: 23 CCR 16 2666(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2666(c)
Violation Notes:

Returned to compliance on 09/16/2015.

Violation Description:

Failure of line leak detector to detect a leak and/or failure of audible and visual alarm.

Site History:			

IR Site 11, Sewer Line Break, is located in Building 3, where a former sanitary sewer line break occurred beneath the northeastern area of the building. Processes within the building may have generated waste oil, paint sludge, spent acids, plating materials, degreasing solvents, and Oakite cleaners. Building 3, constructed in 1940, has been utilized until the present as the main manufacturing and subassembly building on the site. The building currently utilizes a small dye-penetrant station and X-ray laboratory. Building 3 is currently operated and supervised by Lockheed-Martin. From 1941 to 1948, the site produced B-24 airplanes. From 1948 to 1951, moving and storage companies used the site. From 1951 to the present, the site has been used to produce aircraft, rockets and missiles.

Site History:

IR Site 11, Sewer Line Break, is located in Building 3, where a former sanitary sewer line break occurred beneath the northeastern area of the building. Processes within the building may have generated waste oil, paint sludge, spent acids, plating materials, degreasing solvents, and Oakite cleaners.

Building 3, constructed in 1940, has been utilized until the present as the main manufacturing and subassembly building on the site. The building currently utilizes a small dye-penetrant station and X-ray laboratory. Building 3 is currently operated and supervised by Lockheed-Martin. From 1941 to 1948, the site produced B-24 airplanes. From 1948 to 1951, moving and storage companies used the site. From 1951 to the present, the site has been used to produce aircraft, rockets and missiles.

IR Site 10, Liquid Sludge, is located in Building 33. Prior to the demolition of the building in 2002, a reinforced concrete bunker, previously used for the storage of pyrotechnics and munitions, was discovered. A one-foot by one-foot sump and pump were reportedly present in the southwest corner of the bunker. This partially belowground bunker, constructed in 1940, was used for the storage of pyrotechnics and munitions. This structure was closed in the 1980s. Sludge appears to be seeping through concrete floor cracks. Building 33 was demolished in 2002. The area is currently being used as a parking lot.

Site History:

IR Site 10, Liquid Sludge, is located in Building 33. Prior to the demolition of the building in 2002, a reinforced concrete bunker, previously used for the storage of pyrotechnics and munitions, was discovered. A one-foot by one-foot sump and pump were reportedly present in the southwest corner of the bunker.

This partially belowground bunker, constructed in 1940, was used for the storage of pyrotechnics and munitions. This structure was closed in the 1980s. Sludge appears to be seeping through concrete floor cracks. Building 33 was demolished in 2002. The area is currently being used as a parking lot.

Site History:

The Burke Company (Burke) site is located in a mixed commercial and light industrial area of the city of San Diego, San Diego County, California (Figure 1).

Burke leased the site from Contractors Equipment Company (CEC) from approximately 1965 until November 1985. During this time, Burke operated the facility as a warehousing and distribution center for chemicals used in the concrete construction industry (1,2).

CEC currently operates the facility as its construction equipment storage yard and rental office. The site has been owned by Mr. H.L. Wells, one of CEC's principals, since 1971.

Apparent Problem:

Burke was first added to the State's Abandoned Site List in 1983. Staff of the Abandoned Site Program conducted a drive-by inspection and determined

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

that Burke was the site operator. Staff observed a large paved lot containing many new drums. A small rivulet of undetermined fluid was observed running offsite (3), No more action was taken by DHS until February 1987, when an initial site screening determined that a preliminary assessment was necessary to thoroughly evaluate the site (4).

DHS conducted another drive-by inspection in June, 1988 to determine the current status of the site. No signs of any on-site waste disposal or storage were noted. The entire site is paved with only minor oil staining noted where equipment has been parked. No signs of past discharges or runoff were noted (5).

Status: NO FURTHER ACTION
A2 Program Type: HISTORICAL
CalEnviroScreen Score: 56-60%

APN:	NONE SPECIFIED		
Cleanup Status:	ACTIVE AS OF 7/31/2018		
Cleanup Oversight Agencies:	DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY;RWQCB 9 - SAN DIEGO		
Site Type:	OPEN BASE		
Office:	CLEANUP CYPRESS		
Past Use that Caused Contam:	AIRCRAFT MAINTENANCE, ENGINE TESTING/REPAIR, EQUIPMENT/INSTRUMENT REPAIR, MACHINE SHOP, MANUFACTURING - ELECTRONIC, MANUFACTURING - OTHER, RESEARCH - WEAPONS		
Potential Media Affected:	INDOOR AIR, OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL, SOIL VAPOR		

Potential Contaminant of Concern:

DDT, LEAD, PETROLEUM, POLYCHLORINATED BIPHENYLS (PCBS), POLYFLUORINATED ALKYLATED SUBSTANCES (PFAS), VOLATILE ORGANICS (8260B VOCS)

Site History:

Space and Naval Warfare Systems Center, Old Town Campus (SPAWAR- OTC), an active satellite of SPAWAR Point Loma, is located north of the Marine Corps Recruit Depot and the San Diego International Airport. It encompasses approximately 60 acres and is 95% covered by buildings or pavement. Occupied by Lockheed-Martin and the Navy, the base has been utilized for various aircraft, rocket, and missile assembly and manufacturing. The contamination resulted from past waste handling practices is encountered at various locations inside and outside of the buildings. Known or suspected contaminants in soil and groundwater include heavy metals, polychlorinated biphenyls (PCB), volatile and semi-volatile organic compounds (VOC and SVOC), and petroleum products.

Remedial investigation has been on-going at SPAWAR-OTC since early 2000. Remedial investigation has been completed for IR Sites 2, 3, 4, 5, 7 and 9 in year 2009 and 2010. As of 2018, Installation Restoration (IR) Site I (PCB removal) and IR Sites 10 and 11 (VOCs in soil, groundwater, indoor air in Building 3) are still under remedial investigation and monitoring. Navy also plans to re-open the Taylor Street Site in 2019 with additional monitoring and investigation to seek for the closure of the site. Below is a summary of the project status of the active sites:

- IR Site 1 – The site is an approximately 2.2-acre area located along the entire eastern edge of the SPAWAR campus. It was historically used for railroad shipping and receiving a variety of raw material and finished products. Throughout the investigation in past years, PCBs, specifically Aroclor-1260 was identified as the primary contamination of concerns. In October 2016, soil excavation and off-site disposal were conducted and completed. A Draft Remedial Action Completion Report has been submitted to DTSC in July 2017. DTSC is currently resolving pending concerns with the Navy before providing concurrence the closure of the project.
- IR Sites 10 and 11 – The 60-acre Facility is located at 4297 Pacific Highway, alongside the Interstate 5 Freeway, approximately 3 miles north of the San Diego International Airport. It was a heavily VOC contaminated site with elevated trichloroethylene (TCE) and vinyl chloride detected in soil and shallow groundwater. Vapor intrusion with TCE exceeding the United States Environmental Protection Agency Region 9 Accelerated Response Action Level (ARAL) inside the office in Building 3 has been reported in 2014. The Navy has employed extensive cleanup procedure with soil vapor extraction and enhanced anaerobic bioremediation near the source area throughout last several years. In addition, efforts to block the VOC entry points of pathways and conduct a controlled depressurization to mitigate the indoor air intrusion has been applied. The Navy has submitted a Data Gap Investigation Work Plan and Sampling Plan to determine whether additional remedial actions are necessary to achieve remedial objectives. Soil vapor, groundwater monitoring and indoor air quality will be continuous monitoring.
- IR Site 100 (Taylor Street Site) – The Taylor Street Site is located at 4635 Pacific Highway in San Diego, CA. The site has four warehouse type structures. A site inspection (SI) was conducted in 2008 and followed with an extended site inspection (ESI) done in 2014. Only two rounds of groundwater sampling were conducted during the ESI, perchlorate concentrations were detected at 12.0 ug/L and 6.30 ug/L. DTSC has recommended additional site investigation to address data gaps and reduce uncertainties in site characterization and risk assessment. The Navy has indicated they would secure additional funding in next years to conduct additional investigation to fulfill DTSC and the San Diego Regional Water Quality Control Board's requests to complete the investigation.

Document Type:		Preliminary Endangerment Assessment Report				
Date Completed:		2/13/1997				
Comments:		A Preliminary Assessment/Site Inspection was performed at Site 4 in 1996. Field work was conducted in July 1996 using "Site Characterization and Analysis Penetrometer System (SCAPS), developed by NCCOSC. SCAPS used a 2 inch cone penetrometer housing a laser-induced fluorescence (LIF) detection device and capable of grabbing soils and water samples. After drilling four 6-inch cores through the concrete, the SCAPS was pushed to groundwater. LIF measurements, soil samples and water samples were performed.

Site Type:	OPEN BASE	County:	SAN DIEGO
Address Description:	4297 PACIFIC COAST HIGHWAY	Latitude:	32.7507110867131
Office:	CLEANUP CYPRESS	Longitude:	-117.198561094096
Special Program:	NAVY	Acres:	60 ACRES
Funding:	DERA	Supervisor:	EILEEN MANANIAN

Cleanup Status: ACTIVE AS OF 7/31/2018
Cleanup Oversight Agencies: DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY;RWQCB 9 - SAN DIEGO

School District:
Past Use that Caused Contam: AIRCRAFT MAINTENANCE, ENGINE TESTING/REPAIR, EQUIPMENT/INSTRUMENT REPAIR, MACHINE SHOP, MANUFACTURING - ELECTRONIC, MANUFACTURING - OTHER, RESEARCH - WEAPONS
Potential Media Affected: INDOOR AIR, OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL, SOIL VAPOR

Potential Contaminant of Concern:

DDT, LEAD, PETROLEUM, POLYCHLORINATED BIPHENYLS (PCBS), POLYFLUORINATED ALKYLATED SUBSTANCES (PFAS), VOLATILE ORGANICS (8260B VOCS)

Site History:

Space and Naval Warfare Systems Center, Old Town Campus (SPAWAR- OTC), an active satellite of SPAWAR Point Loma, is located north of the Marine Corps Recruit Depot and the San Diego International Airport. It encompasses approximately 60 acres and is 95% covered by buildings or pavement. Occupied by Lockheed-Martin and the Navy, the base has been utilized for various aircraft, rocket, and missile assembly and manufacturing. The contamination resulted from past waste handling practices is encountered at various locations inside and outside of the buildings. Known or suspected contaminants in soil and groundwater include heavy metals, polychlorinated biphenyls (PCB), volatile and semi-volatile organic compounds (VOC and SVOC), and petroleum products.

Remedial investigation has been on-going at SPAWAR-OTC since early 2000. Remedial investigation has been completed for IR Sites 2, 3, 4, 5, 7 and 9 in year 2009 and 2010. As of 2018, Installation Restoration (IR) Site I (PCB removal) and IR Sites 10 and 11 (VOCs in soil, groundwater, indoor air in Building 3) are still under remedial investigation and monitoring. Navy also plans to re-open the Taylor Street Site in 2019 with additional monitoring and investigation to seek for the closure of the site. Below is a summary of the project status of the active sites:

- IR Site 1 – The site is an approximately 2.2-acre area located along the entire eastern edge of the SPAWAR campus. It was historically used for railroad shipping and receiving a variety of raw material and finished products. Throughout the investigation in past years, PCBs, specifically Aroclor-1260 was identified as the primary contamination of concerns. In October 2016, soil excavation and off-site disposal were conducted and completed. A Draft Remedial Action Completion Report has been submitted to DTSC in July 2017. DTSC is currently resolving pending concerns with the Navy before providing concurrence the closure of the project.

- IR Sites 10 and 11 – The 60-acre Facility is located at 4297 Pacific Highway, alongside the Interstate 5 Freeway, approximately 3 miles north of the San Diego International Airport. It was a heavily VOC contaminated site with elevated trichloroethylene (TCE) and vinyl chloride detected in soil and shallow groundwater. Vapor intrusion with TCE exceeding the United States Environmental Protection Agency Region 9 Accelerated Response Action Level (ARAL) inside the office in Building 3 has been reported in 2014. The Navy has employed extensive cleanup procedure with soil vapor extraction and enhanced anaerobic bioremediation near the source area throughout last several years. In addition, efforts to block the VOC entry points of pathways and conduct a controlled depressurization to mitigate the indoor air intrusion has been applied. The Navy has submitted a Data Gap Investigation Work Plan and Sampling Plan to determine whether additional remedial actions are necessary to achieve remedial objectives. Soil vapor, groundwater monitoring and indoor air quality will be continuous monitoring.

- IR Site 100 (Taylor Street Site) – The Taylor Street Site is located at 4635 Pacific Highway in San Diego, CA. The site has four warehouse type structures. A site inspection (SI) was conducted in 2008 and followed with an extended site inspection (ESI) done in 2014. Only two rounds of groundwater sampling were conducted during the ESI, perchlorate concentrations were detected at 12.0 ug/L and 6.30 ug/L. DTSC has recommended additional site investigation to address data gaps and reduce uncertainties in site characterization and risk assessment. The Navy has indicated they would secure additional funding in next years to conduct additional investigation to fulfill DTSC and the San Diego Regional Water Quality Control Board's requests to complete the investigation.

Document Type:					Preliminary Endangerment Assessment Report	
Date Completed:					2/13/1997	
Comments:					A Preliminary Assessment/Site Inspection was performed at Site 4 in 1996. Field work was conducted in July 1996 using "Site Characterization and Analysis Penetrometer System (SCAPS), developed by NCCOSC. SCAPS used a 2 inch cone penetrometer housing a laser-induced fluorescence (LIF) detection devise and capable of grabbing soils and water samples. After drilling four 6-inch cores through the concrete, the SCAPS was pushed to groundwater. LIF measurements, soil samples and water samples were performed.

Waste Code Description:					THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	
Hazardous Waste Code:					F002	
Waste Code Description:					THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROETHYLENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	
Hazardous Waste Code:					F003	
Waste Code Description:					THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	
Hazardous Waste Code:					F005	
Waste Code Description:					THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code Details

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
Hazardous Waste Code: Waste Code Description:			121		Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)	
Hazardous Waste Code: Waste Code Description:			122		Alkaline solution without metals (pH > 12.5)	
Hazardous Waste Code: Waste Code Description:			123		Unspecified alkaline solution	
Hazardous Waste Code: Waste Code Description:			131		Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)	
Hazardous Waste Code: Waste Code Description:			132		Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)	
Hazardous Waste Code: Waste Code Description:			133		Aqueous solution with 10% or more total organic residues	
Hazardous Waste Code: Waste Code Description:			134		Aqueous solution with <10% total organic residues	
Hazardous Waste Code: Waste Code Description:			135		Unspecified aqueous solution	
Hazardous Waste Code: Waste Code Description:			141		Off-specification, aged, or surplus inorganics	
Hazardous Waste Code: Waste Code Description:			151		Asbestos-containing waste	
Hazardous Waste Code: Waste Code Description:			171		Metal sludge (see 121)	
Hazardous Waste Code: Waste Code Description:			172		Metal dust (see 121) and machining waste	
Hazardous Waste Code: Waste Code Description:			181		Other inorganic solid waste	
Hazardous Waste Code: Waste Code Description:			211		Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)	
Hazardous Waste Code: Waste Code Description:			212		Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)	
Hazardous Waste Code: Waste Code Description:			213		Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)	
Hazardous Waste Code: Waste Code Description:			214		Unspecified solvent mixture	
Hazardous Waste Code: Waste Code Description:			221		Waste oil and mixed oil	
Hazardous Waste Code: Waste Code Description:			222		Oil/water separation sludge	
Hazardous Waste Code: Waste Code Description:			223		Unspecified oil-containing waste	
Hazardous Waste Code: Waste Code Description:			231		Pesticide rinse water	
Hazardous Waste Code: Waste Code Description:			232		Pesticides and other waste associated with pesticide production	

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
Hazardous Waste Code: Waste Code Description:			241		Tank bottom waste	
Hazardous Waste Code: Waste Code Description:			251		Still bottoms with halogenated organics	
Hazardous Waste Code: Waste Code Description:			252		Other still bottom waste	
Hazardous Waste Code: Waste Code Description:			261		Polychlorinated biphenyls and material containing PCB's	
Hazardous Waste Code: Waste Code Description:			271		Organic monomer waste (includes unreacted resins)	
Hazardous Waste Code: Waste Code Description:			281		Adhesives	
Hazardous Waste Code: Waste Code Description:			291		Latex waste	
Hazardous Waste Code: Waste Code Description:			311		Pharmaceutical waste	
Hazardous Waste Code: Waste Code Description:			331		Off-specification, aged, or surplus organics	
Hazardous Waste Code: Waste Code Description:			341		Organic liquids (nonsolvents) with halogens	
Hazardous Waste Code: Waste Code Description:			342		Organic liquids with metals (see 121)	
Hazardous Waste Code: Waste Code Description:			343		Unspecified organic liquid mixture	
Hazardous Waste Code: Waste Code Description:			351		Organic solids with halogens	
Hazardous Waste Code: Waste Code Description:			352		Other organic solids	
Hazardous Waste Code: Waste Code Description:			411		Alum and gypsum sludge	
Hazardous Waste Code: Waste Code Description:			451		Degreasing sludge	
Hazardous Waste Code: Waste Code Description:			461		Degreasing sludge	
Hazardous Waste Code: Waste Code Description:			491		Unspecified sludge waste	
Hazardous Waste Code: Waste Code Description:			511		Empty pesticide containers 30 gallons or more	
Hazardous Waste Code: Waste Code Description:			512		Other empty containers 30 gallons or more	
Hazardous Waste Code: Waste Code Description:			513		Empty containers less than 30 gallons	
Hazardous Waste Code: Waste Code Description:			541		Photochemicals / photo processing waste	
Hazardous Waste Code: Waste Code Description:			551		Laboratory waste chemicals	

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
Hazardous Waste Code: Waste Code Description:			561		Detergent and soap	
Hazardous Waste Code: Waste Code Description:			611		Contaminated soil from site clean-ups	
Hazardous Waste Code: Waste Code Description:			614		Treated wood waste	
Hazardous Waste Code: Waste Code Description:			711		Liquids with cyanides > 1000 mg/l	
Hazardous Waste Code: Waste Code Description:			721		Liquids with arsenic > 500 mg/l	
Hazardous Waste Code: Waste Code Description:			722		Liquids with cadmium > 100 mg/l	
Hazardous Waste Code: Waste Code Description:			723		Liquids with chromium (VI) > 500 mg/l	
Hazardous Waste Code: Waste Code Description:			724		Liquids with lead > 500 mg/l	
Hazardous Waste Code: Waste Code Description:			725		Liquids with mercury > 20 mg/l	
Hazardous Waste Code: Waste Code Description:			726		Liquids with nickel > 134 mg/l	
Hazardous Waste Code: Waste Code Description:			727		Liquids with selenium > 100 mg/l	
Hazardous Waste Code: Waste Code Description:			728		Liquids with thallium > 130 mg/l	
Hazardous Waste Code: Waste Code Description:			731		Liquids with polychlorinated biphenyls > 50 mg/l	
Hazardous Waste Code: Waste Code Description:			741		Liquids with halogenated organic compounds > 1000 mg/l	
Hazardous Waste Code: Waste Code Description:			751		Solids or sludge with halogenated organic comp. > 1000 mg/kg	
Hazardous Waste Code: Waste Code Description:			791		Liquids with pH < 2	
Hazardous Waste Code: Waste Code Description:			792		Liquids with pH < 2 with metals	
Hazardous Waste Code: Waste Code Description:			801		Waste potentially containing dioxins	
Hazardous Waste Code: Waste Code Description:			D001		IGNITABLE WASTE	
Hazardous Waste Code: Waste Code Description:			D002		CORROSIVE WASTE	
Hazardous Waste Code: Waste Code Description:			D003		REACTIVE WASTE	
Hazardous Waste Code: Waste Code Description:			D004		ARSENIC	
Hazardous Waste Code: Waste Code Description:			D005		BARIUM

Hazardous Waste Code: Waste Code Description:					D042 2,4,6-TRICHLOROPHENOL	
Hazardous Waste Code: Waste Code Description:					D043 VINYL CHLORIDE	
Hazardous Waste Code: Waste Code Description:					F001 THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	
Hazardous Waste Code: Waste Code Description:					F002 THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	
Hazardous Waste Code: Waste Code Description:					F003 THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
Hazardous Waste Code: Waste Code Description:			F004		THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	
Hazardous Waste Code: Waste Code Description:			F005		THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	
Hazardous Waste Code: Waste Code Description:			F006		WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.	
Hazardous Waste Code: Waste Code Description:			F007		SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.	
Hazardous Waste Code: Waste Code Description:			F008		PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.	
Hazardous Waste Code: Waste Code Description:			F009		SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.	
Hazardous Waste Code: Waste Code Description:			F027		DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)	
Hazardous Waste Code: Waste Code Description:			P001		2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%	
Hazardous Waste Code: Waste Code Description:			P002		1-ACETYL-2-THIOUREA (OR) ACETAMIDE, N-(AMINOTHIOXOMETHYL)-	
Hazardous Waste Code: Waste Code Description:			P003		2-PROPENAL (OR) ACROLEIN	
Hazardous Waste Code: Waste Code Description:			P004		1,4,5,8-DIMETHANONAPHTHALENE, 1,2,3,4,10,10-HEXA-CHLORO-1,4,4A,5,8,8A,-HEXAHYDRO-, (1ALPHA, 4ALPHA, 4ABETA, 5ALPHA, 8ALPHA, 8ABETA)- (OR) ALDRIN	
Hazardous Waste Code: Waste Code Description:			P005		2-PROPEN-1-OL (OR) ALLYL ALCOHOL	
Hazardous Waste Code: Waste Code Description:			P006		ALUMINUM PHOSPHIDE (R,T)	
Hazardous Waste Code: Waste Code Description:			P007		3(2H)-ISOXAZOLONE, 5-(AMINOMETHYL)- (OR) 5-(AMINOMETHYL)-3-ISOXAZOLOL	
Hazardous Waste Code: Waste Code Description:			P008		4-AMINOPYRIDINE (OR) 4-PYRIDINAMINE	
Hazardous Waste Code: Waste Code Description:			P009		AMMONIUM PICRATE (R) (OR) PHENOL, 2,4,6-TRINITRO-, AMMONIUM SALT (R)

Waste Code Description:					2,4-DINITROTOLUENE (OR) BENZENE, 1-METHYL-2,4-DINITRO-	
Hazardous Waste Code:					U106	
Waste Code Description:					2,6-DINITROTOLUENE (OR) BENZENE, 2-METHYL-1,3-DINITRO-	
Hazardous Waste Code:					U107	
Waste Code Description:					1,2-BENZENEDICARBOXYLIC ACID, DIOCTYL ESTER (OR) DI-N-OCTYL PHTHALATE	
Hazardous Waste Code:					U108	
Waste Code Description:					1,4-DIETHYLENEOXIDE (OR) 1,4-DIOXANE	
Hazardous Waste Code:					U109	
Waste Code Description:					1,2-DIPHENYLHYDRAZINE (OR) HYDRAZINE, 1,2-DIPHENYL-	
Hazardous Waste Code:					U110	
Waste Code Description:					1-PROPANIMINE, N-PROPYL-(I) (OR) DIPROPYLAMINE (I)	
Hazardous Waste Code:					U111	
Waste Code Description:					1-PROPANAMINE, N-NITROSO-N-PROPYL- (OR) DI-N-PROPYLNITROSAMINE	
Hazardous Waste Code:					U112	
Waste Code Description:					ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)	
Hazardous Waste Code:					U113	

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
Waste Code Description:					2-PROPENOIC ACID, ETHYL ESTER (I) (OR) ETHYL ACRYLATE (I)	
Hazardous Waste Code:					U114	
Waste Code Description:					CARBAMODITHIOIC ACID, 1,2-ETHANEDIYLBIS-, SALTS & ESTERS (OR) ETHYLENEBISDITHIOCARBAMIC ACID, SALTS & ESTERS	
Hazardous Waste Code:					U115	
Waste Code Description:					ETHYLENE OXIDE (I,T) (OR) OXIRANE (I,T)	
Hazardous Waste Code:					U116	
Waste Code Description:					2-IMIDAZOLIDINETHIONE (OR) ETHYLENETHIOUREA	
Hazardous Waste Code:					U117	
Waste Code Description:					ETHANE, 1,1'-OXYBIS-(I) (OR) ETHYL ETHER (I)	
Hazardous Waste Code:					U118	
Waste Code Description:					2-PROPENOIC ACID, 2-METHYL-, ETHYL ESTER (OR) ETHYL METHACRYLATE	
Hazardous Waste Code:					U119	
Waste Code Description:					ETHYL METHANESULFONATE (OR) METHANESULFONIC ACID, ETHYL ESTER	
Hazardous Waste Code:					U120	
Waste Code Description:					FLUORANTHENE	
Hazardous Waste Code:					U121	
Waste Code Description:					METHANE, TRICHLOROFLUORO- (OR) TRICHLOROMONOFLUOROMETHANE	
Hazardous Waste Code:					U122	
Waste Code Description:					FORMALDEHYDE	
Hazardous Waste Code:					U123	
Waste Code Description:					FORMIC ACID (C,T)	
Hazardous Waste Code:					U124	
Waste Code Description:					FURAN (I) (OR) FURFURAN (I)	
Hazardous Waste Code:					U125	
Waste Code Description:					2-FURANCARBOXALDEHYDE (I) (OR) FURFURAL (I)	
Hazardous Waste Code:					U126	
Waste Code Description:					GLYCIDYLALDEHYDE (OR) OXIRANECARBOXYALDEHYDE	
Hazardous Waste Code:					U127	
Waste Code Description:					BENZENE, HEXACHLORO- (OR) HEXACHLOROBENZENE	
Hazardous Waste Code:					U128	
Waste Code Description:					1,3-BUTADIENE, 1,1,2,3,4,4-HEXACHLORO- (OR) HEXACHLOROBUTADIENE	
Hazardous Waste Code:					U129	
Waste Code Description:					CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE	
Hazardous Waste Code:					U130	
Waste Code Description:					1,3-CYCLOPENTADIENE, 1,2,3,4,5,5-HEXACHLORO- (OR) HEXACHLOROCYCLOPENTADIENE	
Hazardous Waste Code:					U131	
Waste Code Description:					ETHANE, HEXACHLORO- (OR) HEXACHLOROETHANE	
Hazardous Waste Code:					U132	
Waste Code Description:					HEXACHLOROPHENE (OR) PHENOL, 2,2'-METHYLENEBIS[3,4,6-TRICHLORO-	
Hazardous Waste Code:					U133	
Waste Code Description:					HYDRAZINE (R,T)	
Hazardous Waste Code:					U134	
Waste Code Description:					HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)	
Hazardous Waste Code:					U135

Hazardous Waste Handler Details

Sequence No: 3
Receive Date: 20190418
Handler Name: NIWC PACIFIC OLD TOWN CAMPUS (AF PLANT 19)
Federal Waste Generator Code: 1
Generator Code Description: Large Quantity Generator
Source Type: Notification

Waste Code Details

Hazardous Waste Code: 121
Waste Code Description: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

Hazardous Waste Code: 122
Waste Code Description: Alkaline solution without metals (pH > 12.5)

Hazardous Waste Code: 123
Waste Code Description: Unspecified alkaline solution

Hazardous Waste Code: 131
Waste Code Description: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

Hazardous Waste Code: 132
Waste Code Description: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

Hazardous Waste Code: 133
Waste Code Description: Aqueous solution with 10% or more total organic residues

Hazardous Waste Code: 134
Waste Code Description: Aqueous solution with <10% total organic residues

Hazardous Waste Code: 135
Waste Code Description: Unspecified aqueous solution

Hazardous Waste Code: 141
Waste Code Description: Off-specification, aged, or surplus inorganics

Hazardous Waste Code: 151
Waste Code Description: Asbestos-containing waste

Hazardous Waste Code: 171
Waste Code Description: Metal sludge (see 121)

Hazardous Waste Code: 172

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Hazardous Waste Handler Details

Sequence No: 3
Receive Date: 20200710
Handler Name: NIWC PACIFIC OLD TOWN CAMPUS (AF PLANT 19)
Federal Waste Generator Code: 1
Generator Code Description: Large Quantity Generator
Source Type: Annual/Biennial Report update with Notification

Waste Code Details

Hazardous Waste Code: 121
Waste Code Description: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
Hazardous Waste Code: Waste Code Description:			122		Alkaline solution without metals (pH > 12.5)	
Hazardous Waste Code: Waste Code Description:			123		Unspecified alkaline solution	
Hazardous Waste Code: Waste Code Description:			131		Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)	
Hazardous Waste Code: Waste Code Description:			132		Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)	
Hazardous Waste Code: Waste Code Description:			133		Aqueous solution with 10% or more total organic residues	
Hazardous Waste Code: Waste Code Description:			134		Aqueous solution with <10% total organic residues	
Hazardous Waste Code: Waste Code Description:			135		Unspecified aqueous solution	
Hazardous Waste Code: Waste Code Description:			141		Off-specification, aged, or surplus inorganics	
Hazardous Waste Code: Waste Code Description:			151		Asbestos-containing waste	
Hazardous Waste Code: Waste Code Description:			171		Metal sludge (see 121)	
Hazardous Waste Code: Waste Code Description:			172		Metal dust (see 121) and machining waste	
Hazardous Waste Code: Waste Code Description:			181		Other inorganic solid waste	
Hazardous Waste Code: Waste Code Description:			211		Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)	
Hazardous Waste Code: Waste Code Description:			212		Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)	
Hazardous Waste Code: Waste Code Description:			213		Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)	
Hazardous Waste Code: Waste Code Description:			214		Unspecified solvent mixture	
Hazardous Waste Code: Waste Code Description:			221		Waste oil and mixed oil	
Hazardous Waste Code: Waste Code Description:			222		Oil/water separation sludge	
Hazardous Waste Code: Waste Code Description:			223		Unspecified oil-containing waste	
Hazardous Waste Code: Waste Code Description:			231		Pesticide rinse water	
Hazardous Waste Code: Waste Code Description:			232		Pesticides and other waste associated with pesticide production	
Hazardous Waste Code: Waste Code Description:			241		Tank bottom waste	
Hazardous Waste Code: Waste Code Description:			251		Still bottoms with halogenated organics	

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
Hazardous Waste Code: Waste Code Description:			252		Other still bottom waste	
Hazardous Waste Code: Waste Code Description:			261		Polychlorinated biphenyls and material containing PCB's	
Hazardous Waste Code: Waste Code Description:			271		Organic monomer waste (includes unreacted resins)	
Hazardous Waste Code: Waste Code Description:			281		Adhesives	
Hazardous Waste Code: Waste Code Description:			291		Latex waste	
Hazardous Waste Code: Waste Code Description:			311		Pharmaceutical waste	
Hazardous Waste Code: Waste Code Description:			331		Off-specification, aged, or surplus organics	
Hazardous Waste Code: Waste Code Description:			341		Organic liquids (nonsolvents) with halogens	
Hazardous Waste Code: Waste Code Description:			342		Organic liquids with metals (see 121)	
Hazardous Waste Code: Waste Code Description:			343		Unspecified organic liquid mixture	
Hazardous Waste Code: Waste Code Description:			351		Organic solids with halogens	
Hazardous Waste Code: Waste Code Description:			352		Other organic solids	
Hazardous Waste Code: Waste Code Description:			411		Alum and gypsum sludge	
Hazardous Waste Code: Waste Code Description:			451		Degreasing sludge	
Hazardous Waste Code: Waste Code Description:			461		Degreasing sludge	
Hazardous Waste Code: Waste Code Description:			491		Unspecified sludge waste	
Hazardous Waste Code: Waste Code Description:			511		Empty pesticide containers 30 gallons or more	
Hazardous Waste Code: Waste Code Description:			512		Other empty containers 30 gallons or more	
Hazardous Waste Code: Waste Code Description:			513		Empty containers less than 30 gallons	
Hazardous Waste Code: Waste Code Description:			541		Photochemicals / photo processing waste	
Hazardous Waste Code: Waste Code Description:			551		Laboratory waste chemicals	
Hazardous Waste Code: Waste Code Description:			561		Detergent and soap	
Hazardous Waste Code: Waste Code Description:			611		Contaminated soil from site clean-ups

DWR GW Subbasin Name:	Mission Valley (9-014)				
Disadvantaged Community:	Severely Disadvantaged Community				
Site History:					

San Diego Gas & Electric (SDG&E) submitted an application to the Voluntary Assistance Program (VAP) and was assigned case H28656-002, for a project to install a new electric transmission line that would connect the newly constructed Otay Mesa Generation Plant (OMGP) with the Sycamore Canyon Substation, and the installation of a second electric transmission line that connects OMGP with the existing Old Town Substation. The Department of Environmental Health (DEH) historical case H28656-001 is located on one specific parcel along the proposed route at 4370 Pacific Highway. The client requested that DEH use this address for the project application. The new project included the construction of both overhead and underground transmission lines. The project was broken up into five different sections or segments with different consultants screening and managing the impacted soil. Potentially impacted soil was identified by pre-construction Phase II investigations which included soil sampling, groundwater sampling, and soil vapor sampling. A Revised Hazardous Substance Control and Emergency Response Plan, prepared by Haley & Aldrich and dated November 10, 2005, was submitted with the VAP application. The plan was prepared to provide SDG&E's construction contractors direction in the event of a spill from their equipment and for the proper segregation and management of impacted soil or groundwater. Soil was proposed to be screened by visual observations of staining or discoloration, petroleum or other chemical odors, presence of other potential impacts such as debris or ash, and field meter photoionization detector (PID) measurements. If dewatering was necessary, groundwater would be removed from excavations and placed in temporary aboveground tanks for characterization prior to disposal. The Department of Environmental Health (DEH) approved the plan on November 21, 2005. Individual soil management reports were submitted to DEH by T N & Associates and Haley & Aldrich in 2007, and Sullivan in 2008 for the five segments for review. These five segments were where the electric transmission line was constructed underground via excavation and back fill of trenches. DEH requested a comprehensive report summarizing the individual reports. In 2014, a comprehensive report was prepared by Onside Total Integrated Enterprises (OTIE), and submitted to DEH. The report states that the handling of soil was in accordance with the Hazardous Substance Control and Emergency Response Plan. The deposition of impacted soil has been summarized as follows: (Cubic Yards) Facility Segment A: Old Town Station to West Vine Street 3/29/06 – 11/7/06 1,863 soil* TPS (Haley & Aldrich) Segment B: W. Vine to W. Harbor Drive 4/21/06 – 8/23/06 440 soil TPS (Sullivan International) 126 burn ash Kettleman Hills Segment 3: Sweetwater River to J Street 3/20/06 – 9/13/06 288 soil Otay, TPS (TN & Associates) 143 soil^ Kettleman Hills Segment 5A: Harbor Drive to 26th Street 9/27/06 – 1/18/07 911 soil Otay, TPS (TN & Associates) 1,258 burn ash Kettleman Hills South Bay Power Plant: 7/31/06 – 8/07/06 *Included with Segment A totals (Haley & Aldrich) ^ This includes 10 cubic yards of asbestos containing material The report did not mention any disposal of groundwater, so DEH is assuming that this did not occur. No confirmation soil samples were obtained from the bottom of the excavations, nor were they required. There is known soil and groundwater contamination still remaining in the areas where the line is located. Some of the soil sampling locations compiled in the summary tables do not have the laboratory results in the report, such as two sample results for the South Bay Power Plant (SBBP-01-0725/06). However, the Inspection Reports by Haley & Aldrich during the excavation in the area where the samples were taken state that soil was removed and sent to TPS Recycling. The VAP case was opened for review of soil management, and the manifests indicate that proper handling of impacted soil has been shown. Non- impacted soil was primarily transported to Hansen Aggregates in Mission Valley, SDG&E's Silver Gate backfill project in San Diego or was characterized and used as backfill in designated areas along the trench corridor.

Site History:						

The site consists of approximately 1.92 acres in the shape of a wedge located between Sports Arena Boulevard and Pacific Highway, approximately 500 feet northwest of their intersection. Pacifica Companies (now Pacific Groves LTD), entered the Department of Environmental Health (DEH), Voluntary Assistance Program (VAP) in January 2004 in anticipation of site redevelopment activities in areas where soil and groundwater impacts associated with underground storage tank (UST) cases H28826-001 and H28826-002 were known to exist. The VAP application indicated that the property owner intended to conduct a vapor risk evaluation and excavation of hydrocarbon-impacted soil at the site to alleviate any potential vapor risks. The majority of assessment activities related to VAP case H28826-003 were conducted under previous UST cases H28826-001 and H28826-002, which were closed in November 1991 and February 2007, respectively. The primary focus of this VAP case, H28826-003, was to evaluate vapor risk for the site, which had not been conducted in accordance with the Site Assessment and Mitigation Manual under the previous UST cases. Historically, the site was reportedly occupied by two large warehouse/storage facilities and one 550 gallon gasoline UST until the late 1980s. Prior to redevelopment to the existing configuration, the site was utilized as a Park-N-Ride facility with a single story garage. Currently the site is developed as a self storage center with three slab on grade structures and associated parking. Hydrocarbon-impacts observed at the subject site were primarily related to the property to the north, located at 4370 Pacific Highway, identified as unauthorized release case H28656-001. Hydrocarbon impacts, including liquid-phase hydrocarbons (LPH), migrated south impacting the subject site and were subsequently mitigated through excavation and groundwater pump and treat activities. These remedial activities significantly reduced hydrocarbon concentrations based on subsequent investigations, however soil vapor sampling indicated the presence of hydrocarbon impacts beneath the human occupied (office) portion of the existing storage facility. The detection of soil vapor impacts from soil vapor probes installed and sampled in 2005 and several insufficient vapor risk evaluations prompted DEH to request additional vapor risk evaluation be conducted. DEH staff ultimately completed the vapor risk evaluation utilizing default input values with the exception of the appropriate slab attenuation factor of 0.01. Taking a simple average of the most recent (2005) vapor risk data for benzene and ethylbenzene, collected from appropriate locations beneath or in close proximity to the existing human occupied portion of the building, the cumulative risk was calculated to be 7.73×10^{-7} , which is less than the 1×10^{-6} SAM risk threshold. The consultant concluded that the current site use as slab on grade commercial is protective of human health. It is the consultant's opinion that no further action is necessary at the site. Based on the provided data, the County of San Diego, Department of Environmental Health agrees with this conclusion.

Cleanup Oversight Agencies:	SAN DIEGO COUNTY LOP (LEAD) - CASE #: H28826-003 CASEWORKER: KEITH KEZER		

SAN DIEGO RWQCB (REGION 9) - CASE #: 9UT201

Site History:

The site consists of approximately 1.92 acres in the shape of a wedge located between Sports Arena Boulevard and Pacific Highway, approximately 500 feet northwest of their intersection. Pacifica Companies (now Pacific Groves LTD), entered the Department of Environmental Health (DEH), Voluntary Assistance Program (VAP) in January 2004 in anticipation of site redevelopment activities in areas where soil and groundwater impacts associated with underground storage tank (UST) cases H28826-001 and H28826-002 were known to exist. The VAP application indicated that the property owner intended to conduct a vapor risk evaluation and excavation of hydrocarbon-impacted soil at the site to alleviate any potential vapor risks. The majority of assessment activities related to VAP case H28826-003 were conducted under previous UST cases H28826-001 and H28826-002, which were closed in November 1991 and February 2007, respectively. The primary focus of this VAP case, H28826-003, was to evaluate vapor risk for the site, which had not been conducted in accordance with the Site Assessment and Mitigation Manual under the previous UST cases.

Historically, the site was reportedly occupied by two large warehouse/storage facilities and one 550 gallon gasoline UST until the late 1980s. Prior to redevelopment to the existing configuration, the site was utilized as a Park-N-Ride facility with a single story garage. Currently the site is developed as a self storage center with three slab on grade structures and associated parking.

Hydrocarbon-impacts observed at the subject site were primarily related to the property to the north, located at 4370 Pacific Highway, identified as unauthorized release case H28656-001. Hydrocarbon impacts, including liquid-phase hydrocarbons (LPH), migrated south impacting the subject site and were subsequently mitigated through excavation and groundwater pump and treat activities. These remedial activities significantly reduced hydrocarbon concentrations based on subsequent investigations, however soil vapor sampling indicated the presence of hydrocarbon impacts beneath the human occupied (office) portion of the existing storage facility. The detection of soil vapor impacts from soil vapor probes installed and sampled in 2005 and several insufficient vapor risk evaluations prompted DEH to request additional vapor risk evaluation be conducted. DEH staff ultimately completed the vapor risk evaluation utilizing default input values with the exception of the appropriate slab attenuation factor of 0.01. Taking a simple average of the most recent (2005) vapor risk data for benzene and ethylbenzene, collected from appropriate locations beneath or in close proximity to the existing human occupied portion of the building, the cumulative risk was calculated to be 7.73×10^{-7} , which is less than the 1×10^{-6} SAM risk threshold.

The consultant concluded that the current site use as slab on grade commercial is protective of human health. It is the consultant's opinion that no further action is necessary at the site. Based on the provided data, the County of San Diego, Department of Environmental Health agrees with this conclusion.

Document Type:	Site Screening
Date Completed:	2/8/1991
Comments:	The PA Report was reviewed by Region 4 staff. The property was purchased in the '70s by Wilber & Betty Hanger. In 1980 they built a commercial building with 4 small warehouses for rent. From 1980 to 1983, Sackett & Pendlebury Boat Builders rented office space. The boat building was done accross the street at Clark Custom Boats. No evidence of any handling of hazardous substances at the site. Staff recommends NFA.

Sub Area Link:
Document Type: Site Screening
Date Completed: 2/8/1991
Comments: PA report was reviewed by Region 4 staff. The site consists of a 15,000 sf bldg., a paved storage area, & a concrete loading dock. 99% of chemicals handled were detergent, wax and window cleaner. Presently, the bldg is used as an auto parts warehouse by Volks Parts. A driveby in 1983 by SDDHS reported that concrete was eroded outside the bldg. No sampling was done to determine if there is a hazard at the site. Staff recommends PEARM to determine if there is a hazard DTSC should address.

Potential Media Affected: OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL, SOIL VAPOR
Potential Contaminant of Concern:

TETRACHLOROETHYLENE (PCE)

Site History:

Introduction: This Workplan is for a soil gas investigation to be conducted for the Department of Toxic Substances Control (DTSC) by its site investigation (A&E) contractor, as part of a Site Screening Assessment (SSA). DTSC Project managers are conducting SSA on sites in San Diego and two other cities in Southern California. SSAs are a major component of DTSC's work under its Cooperative Agreement with the U.S. Environmental Protection Agency (EPA).

Site Location and Description: The Old Town Trolley site is located in an industrial area at 2105-2115 Kurtz Street. To the east, south and west are industrial and commercial facilities and to the north are the San Diego Trolley tracks and the Burlington Northern Santa Fe (BNSF) tracks. The site covers approximately 1.5 acres. The former Pacific Services Dry Cleaner had been in operation at 4085 Pacific Highway from 1960 to 1985 and is adjacent to the Old Town Trolley site, to the north and with the frontage road to Pacific Highway. This property is located across Coats Street and southeast of the Veterans Village site and occupies approximately a half acre lot. The Veterans Village site includes a business and residential complex and is located about 300 feet southwest from the Old Town Trolley site. The Veterans Village is a rehabilitation center that provides assistance to needy and homeless war veterans and their families.

Site History:			

On May 13, 2016 a fuel tanker truck overturned while exiting westbound on Interstate 8 onto northbound Morena Boulevard as the truck was entering Morena Boulevard. The rollover took place on the southern end of the approximately 420-long Morena Boulevard Bridge that crosses the San Diego River and Friars Road. A total of 3,700 gallons diesel fuel spilled on the north bound lane of the bridge and flowed north across the bridge to Linda Vista Road. The diesel fuel release impacted an approximately 950 foot long section of the Morena Boulevard including the bridge crossing the San Diego River and Friars Road. Diesel fuel from the release flowed from the tanker on the street surface to the intersection of Morena Boulevard and Linda Vista Road where it was intercepted before it could enter into a storm drain. As the diesel fuel flowed across the bridges eastern street surface and curb line, a portion of the flow was intercepted by both drainage ports and bridge expansion joints which drained into the underlying soils and the surface water of the San Diego River, Friars Road, and the eastern side north bridge embankment of Friars Road. The SOCO Group, the responsible party, immediately activated their emergency response contractor, NRC Environmental Services, to contain the release and to recover fuel and water in the initial stages of the release. Diesel/oil sorbent booms were installed in the San Diego River both up-gradient and down-gradient of the release. Within the initial 72 hours of the spill, emergency response teams recovered a mixture of approximately 21,000 gallons of diesel fuel and diesel fuel-contaminated water. The primary public agencies responding to and overseeing the emergency response action was the US-EPA, California Fish and Wildlife- Office of Spill Prevention and Response (OSPR), US Fish and Wildlife, California Highway Patrol, Caltrans, Army Corp of Engineers, San Diego County Environmental Health Emergency Response Team (DEH-ER) and San Diego County Environmental Health Site Assessment and Mitigation Voluntary Assistance Program (DEH-VAP). The emergency command was headed by California Fish and Wildlife-OSPR who focused on the containment of the spilled diesel fuel and the diesel impacted surface water from impacting the San Diego River estuary located downstream of the Morena Boulevard

bridge. DEH-ER assisted the response with technical assistance and logistics related to spill containment immediately following the spill to assisting in the assessment of soil impacts within the San Diego River floodplain and spill recovery. Following the immediate emergency, DEH-VAP program was brought in to provide further guidance related to the mitigation of both soil and groundwater for the protection of both the public (homeless) and the ecological receptors within the San Diego River, San Diego River floodplain, and the San Diego River estuary located downstream. In the initial stages of the emergency, DEH-ER established soil action levels using field instruments to be greater than 100 ppm. The general areas of Diesel impacted soil were observed in the underlying areas of the bridge. This area was divided into ten areas described as the northern bridge abutment and zones A through I. Each zone is defined by the pier supports of the bridge within the San Diego River floodplain. DEH-VAP, with the assistance of the RWQCB, developed site specific cleanup levels for both soil and groundwater to insure that the public and the ecological receptors are protected. It was also concluded that the field screening level of 100 ppm was a good field threshold to achieve the laboratory cleanup level of 1,000 mg/kg for the site. The RP's consultant developed a soil excavation work plan, which included surface water sampling (including background sampling for both soil and surface water). From May 14, 2016 to May 31, 2016, impacted soil was excavated to a concentration below 100 ppm or to the underlying groundwater (approximately three to four feet below ground surface). Following removal of the identified diesel impacted soils, verification soil samples were collected from the excavation side-walls and from the bottom of the excavations where groundwater was not intercepted. Once the soil verification sample results confirmed that the mitigation goals had been achieved, the excavations were backfilled with two to three feet of approved imported soils to restore the grade to a level approximately one foot lower than original grade. Following the initial 21,000 gallons of diesel fuel and diesel fuel-contaminated water being recovered during the initial days of the emergency, site cleanup included the removal of contaminated and/or damaged vegetation and contaminated soil. An estimated volume of 60 cubic-yards of contaminated vegetation and approximately 906 cubic-yards (1,406 tons) of contaminated soil was removed and disposed at a licensed disposal facility. Of the original 3,700 gallons of diesel fuel spilled the following is the estimated volume of diesel fuel that was recovered: Material Amount of Material Diesel Fuel Recovered Water/Fuel Mixture 21,000 gallons 327 gallons Soils 1,406 tons (906 cubic-yards) 2,565 gallons Contaminated Vegetation 60 cubic-yards Negligible TOTAL: 2,892 gallons This represents an estimated recovery of 78 percent of the original volume of diesel spilled. On June 13, 2016, GeoSyntec and DEH were on site and selected boring locations where verification hydropunch borings could be installed to obtain groundwater samples in the area of and adjacent to those areas where elevated groundwater impacts were identified during the soil excavation activities. A total of six hydropunch borings were installed and sampled on June 13, 2016. The sample results indicated that the groundwater mitigation goals had been achieved.

Site History:

On May 13, 2016 a fuel tanker truck overturned while exiting westbound on Interstate 8 onto northbound Morena Boulevard as the truck was entering Morena Boulevard. The rollover took place on the southern end of the approximately 420-long Morena Boulevard Bridge that crosses the San Diego River and Friars Road. A total of 3,700 gallons diesel fuel spilled on the north bound lane of the bridge and flowed north across the bridge to Linda Vista Road. The diesel fuel release impacted an approximately 950 foot long section of the Morena Boulevard including the bridge crossing the San Diego River and Friars Road.

Diesel fuel from the release flowed from the tanker on the street surface to the intersection of Morena Boulevard and Linda Vista Road where it was intercepted before it could enter into a storm drain. As the diesel fuel flowed across the bridges eastern street surface and curb line, a portion of the flow was intercepted by both drainage ports and bridge expansion joints which drained into the underlying soils and the surface water of the San Diego River, Friars Road, and the eastern side north bridge embankment of Friars Road.

The SOCO Group, the responsible party, immediately activated their emergency response contractor, NRC Environmental Services, to contain the release and to recover fuel and water in the initial stages of the release. Diesel/oil sorbent booms were installed in the San Diego River both up-gradient and down-gradient of the release. Within the initial 72 hours of the spill, emergency response teams recovered a mixture of approximately 21,000 gallons of diesel fuel and diesel fuel-contaminated water.

The primary public agencies responding to and overseeing the emergency response action was the US-EPA, California Fish and Wildlife- Office of Spill Prevention and Response (OSPR), US Fish and Wildlife, California Highway Patrol, Caltrans, Army Corp of Engineers, San Diego County Environmental Health Emergency Response Team (DEH-ER) and San Diego County Environmental Health Site Assessment and Mitigation Voluntary Assistance Program (DEH-VAP).

The emergency command was headed by California Fish and Wildlife-OSPR who focused on the containment of the spilled diesel fuel and the diesel impacted surface water from impacting the San Diego River estuary located downstream of the Morena Boulevard bridge. DEH-ER assisted the response with technical assistance and logistics related to spill containment immediately following the spill to assisting in the assessment of soil impacts within the San Diego River floodplain and spill recovery. Following the immediate emergency, DEH-VAP program was brought in to provide further guidance related to the mitigation of both soil and groundwater for the protection of both the public (homeless) and the ecological receptors within the

San Diego River, San Diego River floodplain, and the San Diego River estuary located downstream.

In the initial stages of the emergency, DEH-ER established soil action levels using field instruments to be greater than 100 ppm. The general areas of Diesel impacted soil were observed in the underlying areas of the bridge. This area was divided into ten areas described as the northern bridge abutment and zones A through I. Each zone is defined by the pier supports of the bridge within the San Diego River floodplain.

DEH-VAP, with the assistance of the RWQCB, developed site specific cleanup levels for both soil and groundwater to insure that the public and the ecological receptors are protected. It was also concluded that the field screening level of 100 ppm was a good field threshold to achieve the laboratory cleanup level of 1,000 mg/kg for the site. The RP's consultant developed a soil excavation work plan, which included surface water sampling (including background sampling for both soil and surface water).

From May 14, 2016 to May 31, 2016, impacted soil was excavated to a concentration below 100 ppm or to the underlying groundwater (approximately three to four feet below ground surface). Following removal of the identified diesel impacted soils, verification soil samples were collected from the excavation side-walls and from the bottom of the excavations where groundwater was not intercepted. Once the soil verification sample results confirmed that the mitigation goals had been achieved, the excavations were backfilled with two to three feet of approved imported soils to restore the grade to a level approximately one foot lower than original grade.

Following the initial 21,000 gallons of diesel fuel and diesel fuel-contaminated water being recovered during the initial days of the emergency, site cleanup included the removal of contaminated and/or damaged vegetation and contaminated soil. An estimated volume of 60 cubic-yards of contaminated vegetation and approximately 906 cubic-yards (1,406 tons) of contaminated soil was removed and disposed at a licensed disposal facility.

Of the original 3,700 gallons of diesel fuel spilled the following is the estimated volume of diesel fuel that was recovered:

Material Amount of Material Diesel Fuel Recovered
Water/Fuel Mixture 21,000 gallons 327 gallons
Soils 1,406 tons (906 cubic-yards) 2,565 gallons
Contaminated Vegetation 60 cubic-yards Negligible

TOTAL: 2,892 gallons

This represents an estimated recovery of 78 percent of the original volume of diesel spilled.

On June 13, 2016, GeoSyntec and DEH were on site and selected boring locations where verification hydropunch borings could be installed to obtain groundwater samples in the area of and adjacent to those areas where elevated groundwater impacts were identified during the soil excavation activities. A total of six hydropunch borings were installed and sampled on June 13, 2016. The sample results indicated that the groundwater mitigation goals had been achieved.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Facility Response Plan:

FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Mar 26, 2020

Formerly Utilized Sites Remedial Action Program:

DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List:

NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Feb 23, 2021

National Priority List - Proposed:

PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Feb 23, 2021

Deleted NPL:

DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Dec 30, 2020

SEMS List 8R Active Site Inventory:

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Jan 28, 2021

SEMS List 8R Archive Sites:

[SEMS ARCHIVE](#)

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Jan 28, 2021

Inventory of Open Dumps, June 1985:

[ODI](#)

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

Comprehensive Environmental Response, Compensation and Liability Information System -

[CERCLIS](#)

CERCLIS:

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands:

[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:

[RCRA CORRACTS](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 22, 2021

RCRA non-CORRACTS TSD Facilities:

[RCRA TSD](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Jan 22, 2021

RCRA Generator List:

[RCRA LQG](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 22, 2021

RCRA Small Quantity Generators List:

[RCRA SQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 22, 2021

RCRA Very Small Quantity Generators List:

[RCRA VSQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 22, 2021

RCRA Non-Generators:

[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 22, 2021

Federal Engineering Controls-ECs:

[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Aug 26, 2020

Federal Institutional Controls- ICs:

[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Aug 26, 2020

Land Use Control Information System:

[LUCIS](#)

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Emergency Response Notification System:

[ERNS 1982 TO 1986](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

[ERNS 1987 TO 1989](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

[ERNS](#)

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Nov 9, 2020

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

[FED BROWNFIELDS](#)

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 6, 2021

Historical Gas Stations:

[HIST GAS STATIONS](#)

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

FEMA Underground Storage Tank Listing:

[FEMA UST](#)

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Petroleum Refineries:

[REFN](#)

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Jul 10, 2020

Petroleum Product and Crude Oil Rail Terminals:

[BULK TERMINAL](#)

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Apr 28, 2020

LIEN on Property:

[SEMS LIEN](#)

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: Jan 28, 2021

Superfund Decision Documents:

[SUPERFUND ROD](#)

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Feb 23, 2021

State

State Response Sites:

RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Jan 13, 2021

EnviroStor Database:

ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Jan 13, 2021

Delisted State Response Sites:

DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Jan 13, 2021

Solid Waste Information System (SWIS):

SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Feb 8, 2021

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels:

SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

EnviroStor Hazardous Waste Facilities:

HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Jan 13, 2021

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report:

SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Land Disposal Sites:

LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Nov 16, 2020

Leaking Underground Fuel Tank Reports:

LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Nov 16, 2020

Delisted Leaking Storage Tanks:

DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Feb 2, 2021

Permitted Underground Storage Tank (UST) in GeoTracker:

UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Nov 16, 2020

Proposed Closure of Underground Storage Tank Cases:

[UST CLOSURE](#)

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: Feb 2, 2021

Historical Hazardous Substance Storage Information Database:

[HHSS](#)

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System:

[UST SWEEPS](#)

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks:

[AST](#)

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks:

[AST SWRCB](#)

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks:

[TANK OIL GAS](#)

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Feb 12, 2021

Delisted Storage Tanks:

[DELISTED TNK](#)

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Feb 12, 2021

California Environmental Reporting System (CERS) Tanks:

[CERS TANK](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Feb 9, 2021

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions:

[LUR](#)

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Jan 13, 2021

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions:

[HLUR](#)

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions:

DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Nov 16, 2020

Voluntary Cleanup Program:

VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Jan 13, 2021

GeoTracker Cleanup Program Sites:

CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Nov 16, 2020

Delisted County Records:

DELISTED COUNTY

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Mar 16, 2021

Delisted California Environmental Reporting System (CERS) Tanks:

DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Feb 9, 2021

Historical Hazardous Substance Storage Container Information - Facility Summary:

HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in the 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands:

INDIAN LUST

LUSTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Apr 8, 2020

Underground Storage Tanks (USTs) on Indian Lands:

INDIAN UST

USTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Apr 8, 2020

Delisted Tribal Leaking Storage Tanks:

DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

Government Publication Date: Apr 14, 2020

Delisted Tribal Underground Storage Tanks:

[DELISTED IUST](#)

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

Government Publication Date: Apr 14, 2020

County

San Diego County - Solid Waste Facility List:

[SANDIEGO SWF](#)

A list of open and closed Solid Waste Facilities in the County of San Diego. The County of San Diego Department of Environmental Health Solid Waste Local Enforcement Agency (LEA) is certified by the California Department of Resources Recycling and Recovery to enforce state solid waste laws and regulations in San Diego County, excluding the City of San Diego. The list is made available by San Diego County Department of Environmental Health.

Government Publication Date: Dec 2, 2020

San Diego County - Local Oversight Program List:

[SAN DIEGO LOP](#)

A list of Underground Storage Tank (UST) release sites in the County of San Diego. This list is made available by San Diego County Department of Environmental Health.

Government Publication Date: Jun 15, 2020

San Diego County - Hazardous Materials Management Division Database:

[SANDIEGO HAZ](#)

A list of facilities with Unified Program Facility Permit in San Diego County. This list has been made available by County of San Diego Environmental Health.

Government Publication Date: Jan 4, 2021

San Diego County - UST List:

[SANDIEGO UST](#)

A list of registered Underground Storage Tanks in the County of San Diego. The list is made available by the San Diego County Hazardous Materials Division.

Government Publication Date: Dec 9, 2020

San Diego County - Site Assessment and Mitigation Investigation Sites:

[SANDIEGO SAM](#)

List of sites which have undergone a Site Assessment and Mitigation investigation. This list is made available by the County of San Diego Department of Environmental Health.

Government Publication Date: Jun 30, 2020

Additional Environmental Record Sources

Federal

PFOA/PFOS Contaminated Sites:

[PFAS NPL](#)

List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Mar 1, 2021

Facility Registry Service/Facility Index:

[FINDS/FRS](#)

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Nov 2, 2020

Toxics Release Inventory (TRI) Program:

[TRIS](#)

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U. S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Releases:

[PFAS TRI](#)

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Water Quality:

[PFAS WATER](#)

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

Hazardous Materials Information Reporting System:

[HMIRS](#)

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs:

[NCDL](#)

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Oct 5, 2020

Toxic Substances Control Act:

[TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA:

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

[FTTS INSP](#)

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

[PRP](#)

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Dec 30, 2020

State Coalition for Remediation of Drycleaners Listing:

[SCRD DRYCLEANER](#)

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

[ICIS](#)

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Jan 6, 2021

Drycleaner Facilities:

[FED DRYCLEANERS](#)

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Feb 17, 2021

Delisted Drycleaner Facilities:

[DELISTED FED DRY](#)

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Feb 17, 2021

Formerly Used Defense Sites:

[FUDS](#)

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: Jan 28, 2020

Former Military Nike Missile Sites:

[FORMER NIKE](#)

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 1, 1984

PHMSA Pipeline Safety Flagged Incidents:

[PIPELINE INCIDENT](#)

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Jul 7, 2020

Material Licensing Tracking System (MLTS):

[MLTS](#)

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: Aug 5, 2020

Historic Material Licensing Tracking System (MLTS) sites:

[HIST MLTS](#)

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

MINES

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Nov 3, 2020

Surface Mining Control and Reclamation Act Sites:

SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Dec 18, 2020

Mineral Resource Data System:

MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2006

Uranium Mill Tailings Radiation Control Act Sites:

URANIUM

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

Government Publication Date: Mar 4, 2017

Alternative Fueling Stations:

ALT FUELS

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Jan 18, 2021

Registered Pesticide Establishments:

SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 31, 2020

Polychlorinated Biphenyl (PCB) Notifiers:

PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 19, 2020

State

Dry Cleaning Facilities:

DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Feb 22, 2021

Delisted Drycleaners:

[DELISTED DRYCLEANERS](#)

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Feb 22, 2021

Non-Toxic Dry Cleaning Incentive Program:

[DRYC GRANT](#)

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2018

Per- and Polyfluoroalkyl Substances (PFAS):

[PFAS](#)

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Nov 16, 2020

PFOA/PFOS Groundwater:

[PFAS GW](#)

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Oct 22, 2020

Hazardous Waste and Substances Site List - Site Cleanup:

[HWSS CLEANUP](#)

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Nov 10, 2020

List of Hazardous Waste Facilities Subject to Corrective Action:

[DTSC HWF](#)

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement:

[INSP COMP ENF](#)

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Oct 7, 2020

School Property Evaluation Program Sites:

[SCH](#)

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Jan 13, 2021

California Hazardous Material Incident Report System (CHMIRS):

[CHMIRS](#)

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 21, 2021

Hazardous Waste Manifest Data:

[HAZNET](#)

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Oct 24, 2016

Historical California Hazardous Material Incident Report System (CHMIRS):

[HIST CHMIRS](#)

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Historical Hazardous Waste Manifest Data:

[HIST MANIFEST](#)

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

Historical Cortese List:

[HIST CORTESE](#)

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders:

[CDO/CAO](#)

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Feb 16, 2012

California Environmental Reporting System (CERS) Hazardous Waste Sites:

[CERS HAZ](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Feb 9, 2021

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites:

[DELISTED HAZ](#)

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker:

[GEOTRACKER](#)

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Nov 16, 2020

Waste Discharge Requirements:

[WASTE DISCHG](#)

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Nov 16, 2020

Toxic Pollutant Emissions Facilities:

[EMISSIONS](#)

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2018

Clandestine Drug Lab Sites:

[CDL](#)

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/ clandestine drug laboratories.

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental databases were selected to be included in the search.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

RE: CITY DIRECTORY RESEARCH
Perry's Cafe Phase I
4620 Pacific Highway (Perry's Cafe) San Diego, CA

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

4550-4750 of Pacific Highway
4000-4010 of Taylor Street

Ms. Melba Muth
San Diego Trust and Savings Bank
P.O. Box X1013
San Diego, CA 92112

Dear Ms. Muth:

RE: UNAUTHORIZED RELEASE #T1012/H12810-001
4606 PACIFIC HWY, SAN DIEGO, CA

The reports prepared by Nachant Environmental, Inc. dated August 16, 1988 and Science Application International Corporation dated January 1989 regarding the above referenced site have been reviewed. The reports indicate the following:

1. One soil sample collected from the waste oil tank excavation was analyzed using EPA Method 8015. The laboratory results indicated non-detectable concentrations of total petroleum hydrocarbons (TPH).
2. Soil samples collected from the gasoline tank excavation and from two 50-cubic yard soil stockpiles had TPH concentrations (EPA Method 8015) ranging from non-detectable to 62 mg/kg.
3. A soil sample collected during the installation of monitoring well MW-1 had a TPH concentration (EPA Method 8015) of 6950 mg/kg.
4. Water samples collected from monitoring well MW-1 had concentrations of benzene (EPA Method 602) up to 5.5 mg/l.

Ms. Melba Muth

-2-

February 28, 1989

This site is located in the San Diego Mesa Hydrographic Subunit (8.2). This Subunit is designated by the San Diego Regional Water Quality Control Board (RWQCB) as having no existing or potential beneficial uses for groundwater, however, the site is located less than one-half mile from the San Diego River. The maximum allowable contamination level for soil at this site, as established by this Department and the RWQCB, is 1,000 mg/kg TPH. The maximum allowable contamination level for groundwater at this site depends on the local groundwater gradient.

Please submit an updated Unauthorized Release Report to this Department which addresses the following issues:

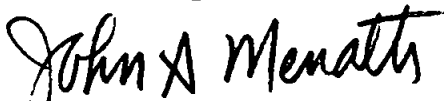

1. Determine if an unauthorized release has occurred in the waste oil tank excavation. This Department requires that a minimum of two soil samples, collected from the waste oil tank excavation in locations representative of worst possible contamination, be analyzed for the TPH using EPA Method 418.1. One of these soil samples, preferably corresponding to the highest TPH concentration, must also be analyzed using EPA Methods 8020, 8010, 8080, and California Department of Health Services Organic Lead Method.
2. Determine the extent of soils contaminated with TPH at concentrations greater than 1,000 mg/kg.
3. Determine the impact on ground water and the local ground water gradient.

Following an evaluation of the updated Unauthorized Release Report by this Department and the RWQCB, a determination will be made regarding future actions required at this site.

As a reminder, a copy of each manifest for the disposal of any hazardous waste generated as a result of site assessment activities must be included with the updated Unauthorized Release Report.

If you have any questions regarding this matter, please contact me at (619) 236-2222.

Sincerely,

JOHN A. MENATTI, Hazardous Material Specialist
Hazardous Materials Management Division

OFFICIAL NOTICE

January 3, 1989

Ms. Melba Muth
San Diego Trust & Savings Bank
P.O. Box X1013
San Diego, CA 92112

Dear Ms. Muth:

SUBJECT: UNAUTHORIZED RELEASE #T10 2/H12810
4606 PACIFIC HIGHWAY, SAN DIEGO, CA

The initial Unauthorized Release Report submitted for the site referenced above conforms to the reporting requirements, as prescribed in the California Health and Safety Code, Chapter 6.7 and the California Administrative Code, Title 23, Chapter 3, Subchapter 16, Article 5, Section 2652.

For the duration of the site mitigation process, you are required to provide periodic written supplemental reports to this Department to update the Unauthorized Release Report pursuant to the California Administrative Code, Title 23, Chapter 3, Subchapter 16, Article 5, Section 2652.

Please submit a written supplemental report to update the Unauthorized Release Report every 60 days. The report should include a summary of the investigation and mitigation progress accomplished to date, along with the projected accomplishments for the next reporting period. The update report is due by February 1, 1989. This office was advised that an August 1988 report may have been prepared for the site. A copy of this report has not been received.

If during the site mitigation process any significant situation is encountered that was not known nor anticipated at the time of the initial Unauthorized Release Report, please provide a written statement describing the situation in order to amend the Unauthorized Release Report.

As a reminder, a copy of each manifest for hauling any hazardous waste generated as a result of the site characterization and mitigation procedure must be included with the written supplemental reports.

If you have any questions on this matter please contact me at (619) 236-2222.

Sincerely,

VICKIE CHURCH

top - Bob with
Nachant witnessed
Some leaking pipes.
3 no holes seen -
leaked good - some
contamination in hole.
Waste out tank if
had several pipe size
holes towards sides
of each END of tank.

NOTICE: You are hereby notified that on 5/26/88 Judy Christ Hazardous Materials Specialist of County Department of Health Services, conducted an inspection for the removal and/or abandonment of underground storage tanks of hazardous substances. A summary of conditions found is noted as follows:

- No indication of soil or groundwater contamination apparent this date. Excavation may be backfilled.
- The conditions noted below must be reported and corrected in accordance with Chapters 6.5 and 6.7 of the California Health and Safety Code and Chapters 9 and 10 of the San Diego County Code.
- Hazardous substance/waste is ponded in the excavation. Immediately take steps to remove the ponded hazardous liquid from the excavation. This liquid is a hazardous waste that shall be properly transported, under manifest, by a licensed hazardous waste hauler to a licensed recycling or disposal facility.
- Contaminated soil and/or contaminated groundwater is suspected in the excavation. Determining the extent and impact of this contamination and completing any required clean-up is the responsibility of the tank owner/operator. Within 5 work days, the tank owner/operator or his agent must submit a written UNAUTHORIZED RELEASE REPORT to the Department of Health Services including all of the following information that is known at the time of filing the report:
 - a. Describe the type, quantity and concentration of the hazardous substance released.
 - b. Provide the results of all investigations completed at this time to determine the extent of soil, groundwater, or surface water contamination due to the release.
 - c. Describe the method of cleanup implemented to date, proposed cleanup actions, and approximate costs of actions taken to date.
 - d. Indicate the method and location of disposal of the released hazardous substance and any contaminated soils or groundwater or surface water. (If any contaminated soil/water is hauled off-site, include copies of the hazard waste manifests).
 - e. Include the tank operator's name and telephone number, the name and telephone number of any consultants retained, and a projection of proposed activity schedule.
 Subsequent mitigation actions will be discussed upon review of the submitted Report and consultation with other appropriate agencies.

Received by R.P. ISHAM
Phone # 233-6415

E. APPLICATION SUBMITTAL, PLAN APPROVAL, PERMIT ISSUANCE, AND REQUIRED INSPECTIONS:
Submit three (3) copies of this application package, including plan drawings, with the required fee to the Department of Health Services, Hazardous Materials Management Unit, Room 311, 1700 Pacific Highway, San Diego, CA 92101. Checks should be made payable to the County of San Diego.

A permit will be issued by the Department of Health Services (DHS) upon review and approval of the application and plans. The required fees must be submitted with the application package. Information in addition to that presented in this application package may be needed in order to obtain final approval. No work is to begin on the proposed project until a permit has been issued. The required inspections cannot be scheduled until a permit has been issued.

Once the permit has been issued, it is the permittee's responsibility to notify the DHS at least two (2) working days in advance to schedule each required inspection.

Construction stages at which inspections are required are indicated in each subpart of this application form (i.e., Part II, III and IV).

Hm 88-0602

F. Indicate the Company/Person you wish to have our plan check comments directed to by circling the appropriate section letter above or if different enter below.

Tank Manufacturer	NOT KNOWN	—————→		
Tank Presently in Use? (Yes-No)	NO	—————→		
Materials Stored in Tank	Material: Gasoline to	Material: Gasoline to	Material: Gasoline to	Material: Waste oil to
	Material: _____ to	Material: _____ to	Material: _____ to	Material: _____ to
Has Tank System Leaked? (Yes, No, Not Known)	NOT KNOWN	—————→		
Tank Piping		—————→		
Basis of determination (Inventory records, tank system testing/monitoring, environmental monitoring)				
Is any part of the system cathodically protected? (Yes-No-Not Known)	NOT KNOWN	—————→		
Tank				
Piping Lines				
Piping materials	Steel	—————→		

C. PREVIOUS OWNERS AND OPERATORS OF THE TANK(S):

Owner/Operator

Dates

D. Approximate depth to groundwater: 8'-10'
Basis of Determination: Previous Excav.

E. Proposed method of abandonment: Removal Destruction in place

NOTE: Removal of the tank(s) is the preferred method of abandonment. Destruction of the tank in place, for example, by filling with an inert substance, will only be considered in special cases upon submittal of additional information to determine risks and hazards of contamination. Additional information required includes rec tank testing results, soils data, special site characteristics and approval from local Fire Department.

F. Future use/disposal site of tank: SCRAP

G. ATTACH A PLOT PLAN ON 8-1/2" x 11" paper showing the following:

1. Property Lines, Site Address, Scale, North Arrow
2. Location of 100 year flood plain, if applicable
3. Location of all existing and proposed structures
4. Location of all existing and proposed underground storage tank facilities
5. Location of underground tank(s) to be abandoned (number tanks to correspond application)
6. Location of underground utility lines and vaults

H. REQUIRED INSPECTION - PERMIT TO ABANDON

A representative of the Department of Health Services (DHS) must be on site at the time the tank(s) is removed from the ground to evaluate the condition of the tank and the surrounding soil and/or groundwater. Any evidence of an unauthorized release of hazardous material from the tank will require the submittal of additional information by the permittee to the DHS.

When a permit has been issued by the DHS to destroy a tank in place, the DHS will inspect to verify that the tank has been properly emptied and purged of all hazardous materials immediately prior to filling with an approved inert substance.

I. I declare that to the best of my knowledge and belief the statements and information provided are correct and true. I understand that information in addition to the provided above may be needed in order to obtain final approval by the Department of Health Services.

I understand that tests and procedures that may be required by other departments or agencies to demonstrate adequate site safety or suitability for future development (e.g., soil compaction testing) are in addition to the requirements of the Department of Health Services.

I will notify the Department of Health Services at least two working days (48 hours) before work is to begin in order to schedule the required inspections. I understand that site and worker safety are solely the responsibility of the property owner or his agent and that this responsibility is not shared nor assumed by the County of San Diego.

HMMD Case # H12810/AT1205
San Diego Trust & Savings Bank property
4606 Pacific Highway, San Diego, California

SAIC Project No. 1-255-05-472-00

Dear Mr. Menatti:

At the request of San Diego Trust & Savings Bank, SAIC is sending herewith a copy of the above-referenced report for your information. This is the second report of a quarterly ground water sampling program authorized by San Diego Trust on August 2, 1990, and was conducted in accordance with our letter of understanding to you dated March 13, 1990. Another series of ground water sample collection and analysis has been initiated by SAIC, pursuant to authorization from San Diego Trust.

If we can be of any further assistance regarding this case, please call me at 458-2765 or Hunter Butler at 458-4939.

Very truly yours,
SCIENCE APPLICATIONS INTERNATIONAL CORPORATION

1.0 INTRODUCTION

Science Applications International Corporation (SAIC) has completed the second of four quarterly ground water sampling and testing reports for San Diego Trust & Savings Bank on the property addressed as 4606 Pacific Highway, San Diego, California. The purpose of this program was to implement the requirements of the San Diego County Department of Health Services for additional ground water testing on this property, as summarized in our confirming letter to the County DHS dated March 13, 1990. This testing program was conducted in accordance with SAIC Proposal No. 1-255-71-910-17 dated April 5, 1990, and approved by San Diego Trust & Savings Bank on August 2, 1990.

2.0 PROJECT SCOPE

The proposed scope of work outlined in SAIC Proposal No. 1-255-71-910-17 included the following activities:

- Purge and sample the four existing ground water monitoring wells on the subject property. Ground water samples were collected from each well. In addition, field blank, decontamination water and duplicate samples were collected for quality control purposes. Ground water elevations were measured at the time of sampling.
- Four ground water samples and three quality control samples were to be analyzed by an independent, State-certified laboratory for Total Extractable Hydrocarbons (TEH). A ground water sample from monitoring well MW-1 and one quality control sample were also to be analyzed for purgeable aromatic hydrocarbons.
- Provide a written report detailing the results of this study.

3.0 LIMITATIONS

SAIC's comments in this report reflect the interpretation of results obtained through the analysis of ground water samples obtained from the client's site as they existed at the time of this investigation, and only at the specific locations that were sampled and analyzed. Only those techniques, procedures and processes described in this report have been performed, and only those compounds and parameters listed herein were the objects of this investigation. We cannot comment on the potential liabilities associated with disposal of hazardous substances that may have been generated on the site. We cannot comment on the potential liabilities of off-site migration of contamination in soils or ground water underlying the site, or from contaminants from off-site sources flowing onto or into ground water underlying the site.

It should be emphasized that the investigation carried out by SAIC was not a full "environmental" or "health and safety" audit in the traditional meaning of these terms. SAIC personnel focused on current and previous practices, on-site and off-site, apparent from the data gathered under this contract or supplied by the client in developing the list of compounds and soils to be analyzed. Beyond the deficiencies or potential problems described in this report, it should be understood that other non-conformances, obligations or potential liabilities corresponding to regulatory nuances and interpretation may exist.

This report is provided to San Diego Trust & Savings Bank, and is intended solely for the client's information and benefit. Except as may be required by law, this report is not to be shown to any third party or quoted, in whole or in part, or otherwise relied upon by the client for any other purpose. **Under no circumstances may this report be distributed to or relied upon by anyone else without the prior consent of SAIC.**

4.0 BACKGROUND

4.1 Description

The subject site consists of an irregular shaped parcel designated by the San Diego County Assessors Office No. 442-740-03. The site is currently addressed as 4606 Pacific Highway and located in the Old Town district, north of the San Diego metropolitan area. The site is located on the northwest corner of the intersection of Pacific Highway and Rosecrans Street (see Figure 1). The current owner of the site is listed as San Diego Trust & Savings Bank. The site had been fully developed at one time as an automotive service station. The building structure has since been removed and remainder of the site was vacant and utilized for parking at the time of this investigation. The area surrounding the site has been commercially and industrially developed and bordered on the west by Interstate Highway 5 and a restaurant to the north. A detailed layout of the property is provided in Figure 2. The site is located at an elevation of approximately 10 feet above mean sea level.

4.2 Background

The site was originally the subject of a preliminary site investigation conducted by Nachant Environmental, Inc. in the summer of 1988 following the removal of three underground fuel storage tanks and one waste oil storage tank. The scope of that investigation included the initial tankpit sampling for both the fuel storage and waste oil tanks, sampling of three soil borings and installation and sampling of one ground water monitoring well. The results of that investigation, presented in a report dated August 16, 1988, indicated that elevated levels of hydrocarbons were present in the soil samples obtained from the tank pit and the single monitoring well. The report also indicated elevated levels of purgeable aromatics in one of the two ground water samples obtained from this same monitoring well. The soil sample taken from beneath the waste oil tank showed no measurable hydrocarbon concentrations. The report went on to recommend additional borings to further "determine the lateral extent of migrated hydrocarbons".

Further investigation at this location was performed in December 1988 by SAIC to confirm the results presented in the August 1988 report and address the sampling of the soils stockpiled on site for a disposition concerning disposal. The report for this investigation defined the apparent limits of hydrocarbon impact to the side walls of the fuel storage tank pit, confirmed the elevated levels of aromatics in the ground water and quantified the hydrocarbon concentrations in the stockpiled soils. Based upon the laboratory results obtained for the stockpiled soils from this investigation, these soils were utilized to backfill the fuel tank pit excavation. This report recommended that additional investigation be conducted to determine ground water gradient and flow characteristics and concentrations of contaminants both upgradient and down gradient of the site for potential source identification and migration potential.

In February 1989 both of these reports were reviewed by the San Diego County Department of Health Services Hazardous Materials Management Division (HMMD). In a letter dated February 28, 1989, the HMMD-determined the maximum soil contaminant level for this location at 1000

mg/kg Total Petroleum Hydrocarbons (TPH). The HMMD requested that additional sampling be done in the area of the waste oil tank pit to verify results of the limited sampling conducted in that location. The HMMD also requested a determination of impact on ground water and a quantitative measurement of the local ground water gradient.

An SAIC report dated October 24, 1989 presents the results of the additional testing requested by the HMMD. Analysis of soil samples from two borings completed in the area of the waste oil tank pit indicated total petroleum hydrocarbons concentrations to be well below 1000 mg/kg, and no detectable concentrations were found for purgeable halogenated and aromatic hydrocarbons, PCBs or organic lead. Three additional monitoring wells were installed during this phase of the investigation. Sampling of all four of the ground water monitoring wells found no free floating product. Concentrations of dissolved hydrocarbons were detected in ground water samples from the wells in the south and east areas of the property, but not in the ground water analyzed from wells located north and west. Ground water elevations indicated a gradient trending southwest, towards an area of nonbeneficial ground water use.

The October 24, 1989 report was provided to the SDCDHS for review and comment. In December 1989 the HMMD case specialist contacted SAIC with comments and recommendations for additional ground water monitoring at this location. Documentation of these DHS recommendations were formalized and submitted to the DHS in January 1990. Final comments and submission of the recommendations were completed and approved by the DHS in April 1990. The final recommendations requested a quarterly monitoring and sampling of all four monitoring wells at this location for a period of one year. Ground water elevations were to be measured for each well prior to sampling for a calculation of ground water gradient and apparent direction of ground water flow. Each of the four wells were to be sampled for Total Extractable Hydrocarbons by EPA 8015 (CDOHS Modified). Additional testing of MW-1 was requested for analysis of aromatic volatile organics by EPA Method 8020. A copy of the final documentation of the recommended monitoring plan is included in the Appendix. Approval and authorization to complete the sampling plan was granted to SAIC by San Diego Trust & Savings in August 1990.

An SAIC report dated November 21, 1990 presents the results of the first round of quarterly ground water sampling proposed in the DHS sampling program. The laboratory results for this initial round of sampling indicated no detectable amounts of Total Extractable Hydrocarbons (TEH) in monitoring wells MW-2 and MW-4. Monitoring well MW-3 had a TEH concentration of 2.4 mg/l (approximately equivalent to parts per million (ppm)). Analytical results from duplicate sampling of MW-1 indicated a highest concentration of TEH at 36 mg/l, benzene at 8.9 mg/l, toluene at 4.2 mg/l, ethylbenzene at 1.0 mg/l, and total xylenes at 4.4 mg/l. The direction of apparent ground water flow at that time was to the southeast with a gradient value of approximately .0003. This report recommended continuation of the quarterly sampling program requested by the regulatory agencies.

4.3 Geology

The site is located regionally upon sedimentary rocks of predominantly Eocene, Pliocene, Pleistocene and Holocene age deposited unconformably upon units of Late Cretaceous age forming a northwest trending basin defined as the San Diego Embayment. The site is locally underlain by elements of the Pacific Beach Syncline that are truncated one quarter mile east of the site by the related faults of the Rose Canyon Fault Zone.

Site specific geology has been designated as artificial fill materials derived from many sources. Soils previously examined on site primarily consisted of fine grained moderately sorted silty sands and sandy silts, moderate brown to olive gray in color.

4.4 Hydrogeology

The site is located at the base of a marine cut terrace one half mile south of the San Diego River channel and near the intersection of two separate and distinct water drainage systems. The south drainage complex is designated as the San Diego Mesa Hydrographic Subunit 8.20 with no existing or potential beneficial ground water uses. The northern drainage complex is designated as the Lower San Diego Hydrographic Subunit, Subarea 7.11. This area is part of the San Diego River complex and has fully developed and extensive existing and potential beneficial uses for both ground water and surface waters.

In a letter dated February 28, 1989, the HMMD formally determined that the site is located in the San Diego Mesa Hydrographic Subunit 8.20. Limited documented information has been recorded on ground water characteristics in this area. Previous measurements in the four wells located on site indicated a ground water elevation of approximately 2 feet above mean sea level, with a gentle ground water gradient of approximately .0003 in a southeasterly direction, away from the San Diego River.

4.5 Hydrology

The area surrounding the property has been fully developed commercially for some years. This site has been almost completely covered with concrete and asphalt paving. Small portions of the site have remained uncovered where the main building, tank pits and pump islands were located and removed. Site specific drainage is eastward across the concrete and paving to the existing curb and gutter which directs the runoff north to the nearest storm drain.

5.0 FIELD OPERATIONS

Prior to the commencement of all daily field activities, a site safety meeting was held for all personnel to outline the activities for the day, site safety plan and practices, required protective equipment and emergency response procedures. Air quality in the work area was continuously monitored for volatile organics with an HNu Photoionization Detector.

5.1 Monitoring Well Purging & Sampling

On January 10 and 11, 1991, SAIC personnel were on-site to conduct the purging and sampling of the four wells (MW-1 to MW-4) related to this investigation. Each of the four wells was to be measured for depth to ground water and then purged and sampled as recommended by the DHS.

All four ground water monitoring wells were purged prior to well sampling to provide a fresh representative sample of formation ground water. The monitoring wells were purged using a centrifugal pump and a flexible reinforced PVC hose equipped with a check valve to prevent cross contamination. Approximately four well volumes of water were purged from wells MW-2, 3, and 4 with the centrifugal pump. Prior to pumping each well, the exterior of the hose was thoroughly washed with a solution of Alconox and fresh water. A solution of Alconox and fresh water was also circulated through the interior of the hose and pump assembly under normal operating conditions to clean any internal residuals. As a final rinse step, the exterior of the hose and the interior of pump and hose assembly were then rinsed twice with fresh water prior to purging each well. Monitoring well MW-1 exhibited a much lower recharge rate than the remaining three wells. Due to these flow characteristics, MW-1 was purged with a 3.5 inch PVC bailer repeatedly lowered into well until at least one well volume had been removed from the well and the well had been bailed dry. The bailer was cleaned prior to use with a solution of Alconox and fresh water. The bailer was then rinsed with distilled water, laboratory grade methanol and a final rinse with distilled water just prior to use.

Each of the four wells was sampled within 2 hours of purging with a 1.75" diameter teflon bailer equipped with check valves and a bottom-emptying device. Prior to sampling each well, the bailer was disassembled, and washed inside and out with a solution of Alconox and fresh water. The sampler was then rinsed with distilled water, laboratory grade methanol and a final rinse with distilled water just prior to use. Once the filled bailer was removed from the well, water samples were directed from the bailer into duplicate 40 ml glass vials or appropriately prepared containers provided by the certified laboratory. All of the 40 ml glass vials were equipped with a teflon septum seal in the cap to reduce headspace for improved volatile preservation. In addition, the certified laboratory prepared each vial with a premixed solution of hydrochloric acid as a preservative for the ground water samples.

During the course of the ground water sampling program, field blank, decontamination rinsate, and duplicate water samples were obtained for quality control. A field blank sample is prepared using distilled water placed directly into the 40 ml glass vials at the same time and under the

same field conditions that the ground water samples are obtained. This sample is then handled in the same manner as the ground water samples. This field blank is then utilized as a quality control for the identification of any potential environmentally induced constituents that may impact the ground water samples during the sampling process. Final decontamination rinsate water used in cleaning the teflon bailer was sampled in the same manner as collection of ground water as an indicator of decontamination procedure effectiveness. Duplicate ground water samples were obtained from well MW-1, as a check on the reproducibility of the sampling and analytical methods.

Once the samples were collected, the vials were placed in insulated ice chests, refrigerated and transported under chain of custody procedures to the certified laboratory for analysis. Each sample was labeled with the date of sampling, sample identification number, project number and sampler's initials. Purge and sampling data can be found in Figures 4 and 5, and copies of the chain of custody documents can be found in the Appendix.

As per San Diego County DHS sampling requirements, ground water samples from all four monitoring wells were analyzed for Total Extractable Hydrocarbons by EPA Method 8015 (CDOHS Modified), and MW-1 was also tested for aromatic volatile organics by EPA Method 8020.

6.0 TEST RESULTS

6.1 Ground Water Samples

The laboratory results for the ground water samples taken from monitoring wells MW-2 and MW-4, located in the west and north areas of the site, indicated no detectable concentrations of total extractable hydrocarbons (TEH).

The TEH results for MW-3 and the decontamination sample showed an initial concentration of "not detected" and 1.7 mg/l, respectively. These results were questioned for validity based upon previous sampling results for MW-3 and quality assurance analyses completed on the decontamination sample. Previous sampling of MW-3 had established the presence of measurable amounts of TEH in the ground water, at that location, at that time. A "not detectable" concentration of TEH in this well did not match the previous concentration trends in the ground water for this well. Likewise, the measurable amount of TEH in the decontamination sample did not correlate to the results expected for the ASTM II grade distilled water utilized for the sample. The TEH concentrations measured in this decontamination sample were identified by the analytical laboratory as C6-C12 hydrocarbons against a gasoline standard. However, the distilled water from this same decontamination rinsate sample indicated no detectable concentrations of benzene, toluene, xylene and/or ethylbenzene in analysis by EPA 8020.

A quality assurance review examined well sampling protocols, sample handling and transportation methods to attempt to verify these sample results. In addition, the analytical laboratory was requested to examine its handling and analyses of these samples to confirm these sample results. No deficiencies were identified in well sampling, sample handling or transportation. Upon review, the analytical laboratory indicated that the analytical results for these two samples had been transposed in the original sampling report. The corrected analytical results for these two samples were then provided to replace those in the original report. This corrected analytical report was then utilized for compiling this report.

Duplicate ground water samples were obtained from monitoring well MW-1. Total extractable hydrocarbon concentrations in both of these samples were 23 mg/l. Benzene was detected in both duplicate samples at concentrations of 7.1 mg/l, toluene in both duplicate samples at 3.1 mg/l, ethylbenzene at 0.65 mg/l and 0.63 mg/l, and total xylenes at 2.9 mg/l and 2.8 mg/l.

Field blank water samples contained no detected concentrations of any contaminants for which analyses were performed. The corrected decontamination water sample results reports indicated no detectable amounts of TEH. The decontamination water sample also indicated no detectable concentrations of benzene, toluene, xylene or ethylbenzene. Results for duplicate samples from monitoring well MW-1 are generally within the range of expected sampling variability. A complete listing of ground water testing results for this investigation is given in Table 1. Copies of laboratory reports are included in the Appendix.

In summary, no free product was observed in any of the four wells sampled during this investigation, and no dissolved hydrocarbons were detected in the north and west areas of the site. The presence of dissolved hydrocarbon contaminants was detected in ground water samples obtained from the south and east areas of the site.

6.2 Ground Water Gradient

A measurement of the depth to ground water was recorded prior to sampling of each monitoring well. The ground water depth measurement for each well was then correlated to an elevation for the top of each respective well casing, previously established by a licensed land surveyor. During the course of the site survey, the land surveyor also established horizontal distances between each well for use in determining the ground water gradient for this location.

The ground water elevations measured at the time of sampling suggested a gradient direction trending in a southeast direction, away from the San Diego River Channel. The measure of the gradient was calculated at approximately .0006. It should be noted that the elongated shape of the property limits placement of wells. Consequently, the north-south component of the gradient can be determined more accurately than the east-west component. Given these parameters, the direction of ground water flow is deduced only as an approximation. Land survey information is shown on Figure 6, and ground water elevations and gradient results are shown on Table 3 and Figure 7, respectively.

7.0 DISCUSSION

Results of ground water testing obtained during this investigation are generally consistent with those previously reported by SAIC for this location on October 24, 1989 and November 10, 1990. No free product has been detected to date in the four monitoring wells on the site. The presence of dissolved hydrocarbon contaminants was indicated in ground water samples from wells located in the south and east areas of the site, but not in the north and west areas. Measurements of ground water elevations during both testing programs indicate the direction of ground water flow is generally south-southeast, away from the San Diego River.

A comparison of ground water sample analysis results for samples obtained in July 1989, August 1990 and January 1991 is shown on Table 2. A slight decrease in hydrocarbon contaminant concentrations is apparent from the analytical results for MW-1 and MW-3. No hydrocarbon contaminants have been detected in samples from wells MW-2 and MW-4.

Analysis of, and the corrected results for, the sample of decontamination water indicated no measurable concentrations of hydrocarbons were detected in the quality assurance samples used to identify any potential cross-contamination between sampling locations. Field blank samples also had no detectable concentrations of hydrocarbons. The duplicate samples from MW-1 showed nearly identical results, indicating acceptable levels of reproducibility of laboratory analysis.

Ground water elevation measurements show a continuing decrease in water levels across the entire site from previous measurements. This decrease ranges from -0.09 feet for MW-4, to -0.23 feet for MW-2. Comparison of ground water elevations measured in July 1989, August 1990 and January 1991 continues to indicate an apparent gradient direction to the south-southeast. Ground water elevations are shown in Table 3 and respective gradient maps are shown in Figure 7 (January 1991), Figure 8 (August 1990) and Figure 9 (July 1989).

<u>Date</u>	<u>MW-1</u>	<u>MW-2</u>	<u>MW-3</u>	<u>MW-4</u>
7-89	1.94'	1.96'	1.95'	2.15'
8-90	1.68'	1.79'	1.76'	2.00'
1-91	1.50'	1.59'	1.60'	1.91'

*Ground water elevations (expressed as elevation above mean sea level (MSL)) referenced to City of San Diego Brass Plug at the intersection of Rosecrans Street and Pacific Highway. Well survey conducted by Hunsaker & Associates, 8-11-89.

8.0 CONCLUSIONS

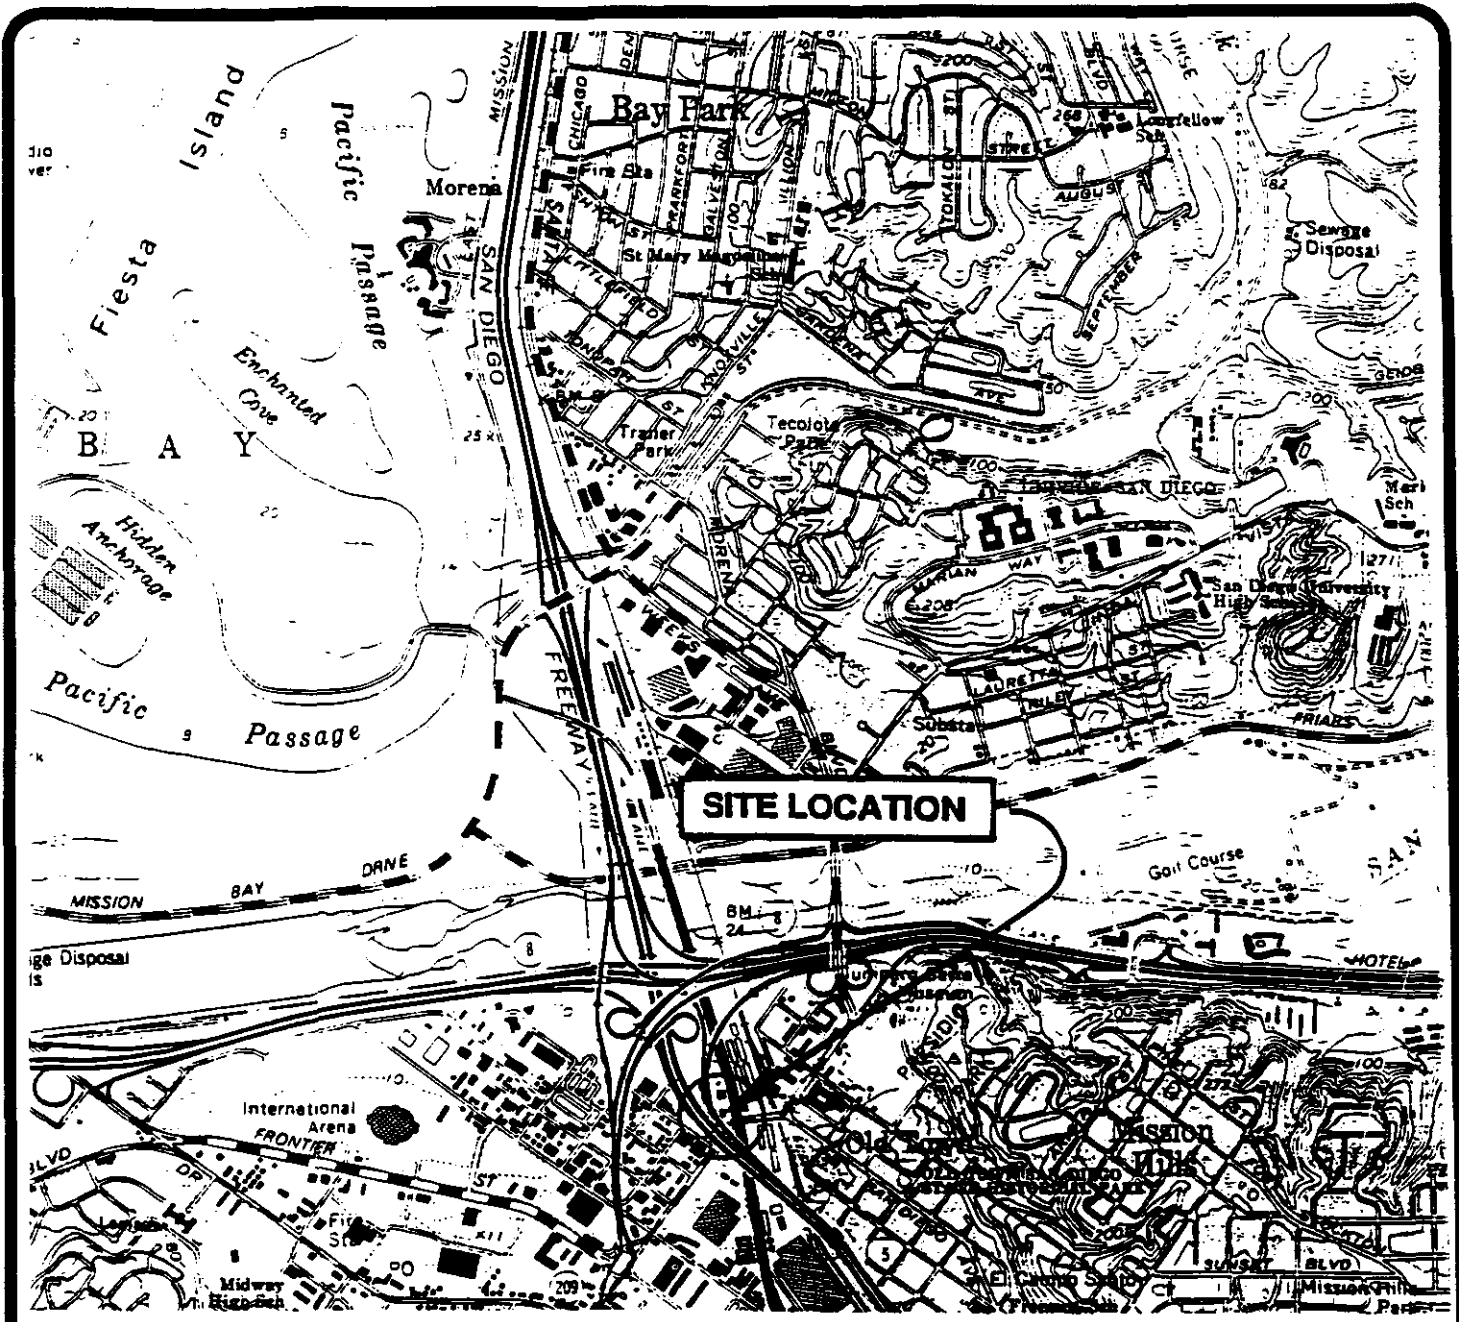

On the basis of the information gathered within the scope of this investigation, the ground water at this location has been affected by hydrocarbon constituents of uncertain source. Measurements of ground water elevations from each of the four wells installed at this location have indicated that the local ground water gradient flows away from the San Diego River, most likely towards the south-southeast, toward an area designated as having no beneficial uses for ground water. Previous regulatory agency response action levels for nonbeneficial ground water use areas has been to address the removal of any free product measured on the ground water.

A comparison of ground water sample analysis results from July 1989, August 1990 and January 1991 indicates no observable amounts of free product in any of the four wells. Dissolved hydrocarbon contaminants have not been detected in MW-4(north) and MW-2(west) locations. The concentration of dissolved hydrocarbons detected in MW-1(south) and MW-3(east) showed an apparent decrease from previous measurements. Measurements of ground water elevations show a consistent decreasing trend in ground water levels. Apparent ground water flow appears to continue to the south-southeast, with an estimated gradient of .0006.

It is recommended that the quarterly monitoring program requested by the regulatory agencies be continued and that San Diego Trust & Savings Bank provide copies of this report to the San Diego County Department of Health Services, and the San Diego office of the State Regional Water Quality Control Board for their review and comment.

The findings of this investigation are based upon the interpretation of the visual inspection of the subject property, ground water measurements and sampling by SAIC personnel, and analysis of selected water samples by an independent State-certified laboratory. No warranty is expressed or implied.

Subject: HIMMD Response and Revisions to the Recommended HIMMD/RWQCB Ground Water Monitoring Program outlined December 27, 1989
HIMMD Case #1112810/AT1205
4606 Pacific Highway
San Diego, California

SAIC Project No. I-255-05-009-00

Dear Mr. Menatti:

Thank you for response concerning the site investigation conducted by SAIC for the above referenced location. This letter is to formally document our conversation of February 27, 1990 regarding the status of the ground water monitoring program recommended for this location.

In that conversation you had indicated that the Ground Water Monitoring Program outlined by you December 27, 1989 and presented for your approval January 26, 1990 had been reviewed by you, representing the HIMMD, and representatives of the RWQCB. Your review of that letter, with clarification of the data presented, indicated that the monitoring plan presented was acceptable in part to the HIMMD and the RWQCB. Based upon your review of the plan, the HIMMD and the RWQCB have recommended the following changes to the monitoring program documented in the letter of January 26, 1990. The original text has been italicized for clarity and your current revisions have been underlined. The revised monitoring program is as follows:

- *The soils currently stored on site are all below the established soil's action level of 1000 ppm Total Petroleum Hydrocarbons and may remain on site if handled and secured in a manner to preclude accessibility. Burial of these soils within the existing tankpit excavation was considered by you an acceptable means of handling and securing these soils. If these soils are to remain on site, a site map is to be provided showing the location and depth of the placement of these soils. If off site disposal is desired, than additional analytical testing would be required for hazard characterization prior to disposal.*
- *Current regulatory requirements call for the disposal of ground water containing hydrocarbons with in 90 days of generation. The HIMMD is requesting documentation of the proper disposal of the ground water stored on site.*

- *The HMMMD, in conjunction with the RWQCB, are requesting additional ground water monitoring and sampling of ground water monitoring wells MW-1, 2, 3 & 4 for a period of one year. The following parameters have been established for the completion of this program:*
 - *Ground water sampling is to be conducted quarterly, with the first round of sampling initiated in April 1990.*
 - *Ground water elevations are to be measured in each of the four wells at the time of sampling. A ground water gradient map is to be generated from this information and submitted with the sampling data for that quarter.*
 - *Ground water samples for analysis will be obtained from all four wells. Ground water samples are to be obtained at the completion of purging after recharge of 80% of the initial depth to ground water, and/or no later than two hours after completion of purging. The ground water samples from all four wells will be analyzed for Total Petroleum Hydrocarbons (TPH) by EPA Method 8015 and MW-1 will also be analyzed for Purgeable Aromatics by EPA 602.*
 - *The gradient and sampling information is to be submitted to the HMMMD and the RWQCB for review. You had indicated that the documentation for the disposal and/or handling of the barreled soils and ground water mentioned above may be included in the initial sampling report of April 1990.*
- *The HMMMD in conjunction with the RWQCB have suggested that if the quarterly monitoring of the four wells continues to indicated a ground water gradient to the southeast, no free product is observed in any of the four wells during monitoring and analytical results of the ground water samples from MW-1 indicates a decrease in Benzene concentration for any two consecutive quarters, then the HMMMD case file for this location will be reviewed for consideration of site closure. A letter will be provided by the HMMMD to property owners at that time indicating the status of the case file for this location.*

If the above conditions have not been met at the completion of one year of sampling, additional monitoring may be required. Changes in the direction of the ground water gradient and/or the discovery of free product in any of the four wells would be cause for review and modification of the monitoring program.

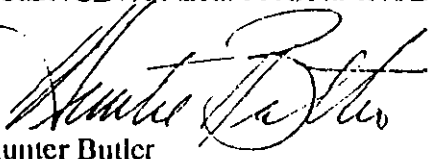

The details listed above covers the content of our conversation concerning the revisions requested by you for the additional monitoring required by the HMMMD and the RWQCB at this time at this location. Should you or representatives of the RWQCB disagree with, or wish to further clarify, the information presented above, please respond by April 1, 1990. If no indications of changes or clarification are received by SAIC or representatives of San Diego Trust and Savings Bank by that date, the above information will be considered to be the course of action approved by the HMMMD and the RWQCB for the continued monitoring of this location.

As per your request, I will provide copies of this information to representatives of San Diego Trust and Savings Bank and Jim Munch of the RWQCB. Thank you for your time and efforts in handling this matter.

SAC

If we can be of any further assistance regarding this case file, please contact us at 458-4939.

Very truly yours,
SCIENCE APPLICATIONS INTERNATIONAL CORPORATION

Hunter Butler
Staff Geologist

Mr. Delbert McGue
San Diego Trust and Savings
530 Broadway Ave.
San Diego, CA 92101

Dear Mr. McGue:

RE: UNAUTHORIZED RELEASE #T1012/PH12810-001(T83)
4606 PACIFIC HWY., SAN DIEGO, CA

The site remediation information submitted to this agency by Science Applications International Corporation (SAIC), summarizing the site characterization and mitigation activities at the above referenced location, has been reviewed. With the provision that the information provided to this agency was accurate and representative of existing conditions, it is the position of this office that no further action is required at this time.

This information has also been discussed with staff of the Regional Water Quality Control Board (RWQCB). Based on the information submitted and current requirements, the RWQCB concurs with the determination of this agency that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present, or future operations at the site. Nor does it relieve you of the responsibility to clean up existing, additional or previously unidentified conditions at the site which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

Additionally, be advised that changes in the present or proposed use of the site may require further site characterization and mitigation activity. It is the property owner's responsibility to notify this agency of any changes in report content, future contamination findings, or site usage.

Thank you for your efforts in resolving this matter. Please contact Jim Schuck of the Hazardous Materials Management Division at 338-2908, if you require additional assistance.

Sincerely,

VICTORIA L. GALLAGHER, Chief
Hazardous Materials Management Division

DISPOSAL AND REMEDIATION

CAUSE AND TYPE OF RELEASE: Gasoline and Waste Oil Release from USTs

QTY OF WASTE DISPOSED: Waste Oil Contaminated Soil -- 450 lbs. (1-55 gal. drum) manifested to U.S. Ecology, a Class I Landfill in Beatty, NV.

CLEAN-UP LEVELS ESTABLISHED: Soil -- 1000 mg/kg Total Petroleum Hydrocarbons (TPH)
Groundwater -- no free product

TYPE OF REMEDIATION USED AT SITE: Gasoline contaminated soil was excavated, subsequently sampled and found to be below site clean-up level, and placed back into the tank excavation. Waste oil contaminated soil was excavated and disposed off-site.

MAXIMUM CONCENTRATIONS REMAINING ON SITE: Soil -- 210 mg/kg TRPH
 -- 62 mg/kg TPH
 Grd. Water -- no free product

HALOGENATED ORG.	TOTAL B,T,X & E	VOLATILE ORG.
Waste Oil Contaminated Soil <0.1 mg/kg	Waste Oil Contaminated Soil <0.025 mg/kg Gasoline Contaminated Soil 4.03 mg/kg Groundwater in MW-1 15.9 mg/l	

SEMIVOLATILE ORG.	PCBs	8015/DHS - TPH
	Waste Oil Contaminated Soil <0.10 mg/kg	Gasoline Contaminated Soil 62 mg/kg Groundwater in MW-1 32 mg/l

ORGANIC LEAD	418.1 - TRPH	
Waste Oil Contaminated Soil <0.1 mg/kg Gasoline Contaminated Soil <0.1 mg/kg Groundwater in MW-1 <0.1 mg/l	Waste Oil Contaminated Soil 210 mg/kg	

ADDITIONAL COMMENTS:

Four underground storage tanks (2-5K gasoline, 1-8K gasoline, and 1-500 gal. waste oil) were removed on 5-26-88. Two excavations onsite: 1) former waste oil tank location & 2) former location of the three gas tanks. An estimated 100 yards of gasoline contaminated soil was excavated, sampled, and analyzed and found to contain <100 mg/kg TPH. This soil was used to backfill the site excavations. Three (3) groundwater MWs installed onsite and monitored for one year ^{following contaminated soil excavation} indicated no free product, stable TPH & BTEX concentrations, and groundwater flow direction was consistently calculated to flow towards the south/southeast (0.0003 feet/foot) towards a nonbeneficial groundwater use area and away from the San Diego River.

APPENDIX 7

Environmental Professional and Site Assessor Qualifications

Tyler Steimel
Staff Scientist 2

Mr. Steimel is a Staff Scientist for Apex Companies. Mr. Steimel's experience has focused on Phase 1 and Phase 2 Environmental Site Assessments, sub-surface site investigations and remediation, and industrial and construction stormwater compliance. He received a degree in Biology from Occidental College.

EDUCATION/CERTIFICATIONS

B.S., Biology, Occidental College, Los Angeles, CA, 2014
Qualified Industrial Stormwater Practitioner (QISP)
Qualified SWPPP Practitioner (QSP)
Certified Inspector of Sediment and Erosion Control (CISEC)
40 Hour Hazwoper Training

GENERAL EXPERIENCE

2015 – Present **Staff Scientist 2, Apex Companies, LLC**

Conduct Phase 1 and Phase 2 Environmental Site Assessments. Assist in the planning and execution of sub-surface site investigations and remediation work. Experience collecting groundwater, soil, soil-vapor, sub-slab vapor, and ambient air samples. Familiar with direct push, hollow stem, and sonic drilling methods. Ability to operate XRF and PID meters, multi-parameter water meters, groundwater sampling pumps, and concrete coring machines. Prepare health and safety plans and job-safety analyses. Prepare construction and industrial stormwater pollution prevention plans (SWPPPs). Duties also include stormwater sampling, reporting, permitting, and providing scoping and management assistance for stormwater and wastewater maintenance projects. Perform a variety of industrial health compliance inspections throughout California.

2015 **Downstream Services**

Managed the stormwater maintenance department at Downstream Services. The work we conducted included maintaining and repairing stormwater and wastewater utilities. My duties primarily focused on job scoping, proposal development, and deliverable preparation. Managed a team of approximately 15 field technicians. Clients included retail stores, property management companies, and public entities.

2014 **Waves Environmental, San Diego, CA**

Worked as an Environmental Management Specialist at Waves Environmental specializing in storm water management. My duties included performing construction and industrial stormwater BMP inspections, and preparing construction and industrial Stormwater Pollution Prevention Plans (SWPPPs). Was able to take the following Ciseinc.org/Envirocert/CASQA certification classes: QSD/QSP, CPESC, CPSWQ, CISEC, CMS4S. Clients that I performed work for included EDCO recycling, ActivCare Living, the San Diego Urban Corps, and Mar-Con Products.

2014 **Occidental College Biology Research Student, Los Angeles, CA**

Performed research under Dr. Beth Braker. Work focused on "characterizing microhabitat use by two species of lizards (western fence and side-blotched lizards) in urban habitats in the southwestern U.S." The research intended to determine how these lizards adjust their thermoregulatory behavior in response to temperature change in their microhabitat. The long-term objective of this study was to determine how lizards respond to urban landscapes, and whether different landscape features influence thermoregulatory behavior.

Ronald J. Kofron
Environmental Geologist and Program Manager

Senior environmental professional with over 35 years of site assessment and remediation experience. Mr. Kofron is a Professional Geologist and Certified Engineering Geologist and has personally performed or directly managed thousands of environmental site assessment and remedial actions. Mr. Kofron applies his experience to provide a pragmatic and sensible approach to solve his client's environmental challenges.

EDUCATION

- M.S. Geology, San Diego State University, 1985
- B.S. Geology, San Diego State University, 1982

PROFESSIONAL REGISTRATIONS/ CERTIFICATION/ TRAINING

- Registered Geologist, 1990, California, #4884
- Certified Engineering Geologist, 1990, California, #1527
- 40-hour OSHA Hazardous Waste Health and Safety Training (29 CFR 1910.120), 1987
- 8-Hour Annual OSHA Hazardous Waste Health and Safety Refresher, annually since 1987
- 8-Hour Annual OSHA Hazardous Waste Supervisor's Health and Safety Training, 2015

GENERAL EXPERIENCE

2010 – Present Program Manager, Apex Companies, LLC San Diego, California.

As a Program Manager, Mr. Kofron serves as the primary point of contact and client manager for the the nation's largest REIT and operator of shopping malls.

As a senior project manager, Mr. Kofron has primary responsibility for managing all Phase I environmental site assessments, subsurface investigations and remediation projects. Mr. Kofron's experience includes comprehensive environmental due diligence on real estate transactions and development projects, soil, soil vapor and groundwater investigations and risk evaluations ranging from small spills to CERCLA Remedial Investigations and Feasibility Studies. His experience also includes remediation of contaminated sites affected with PCBs, metals, petroleum, volatile organic compounds (including dry cleaning chemicals), and perchlorates.

2007-2010 Senior Associate, DPRA Inc., Escondido, California.

Senior project manager on complex projects requiring special expertise or knowledge. Met with attorneys to outline strategies; developed expert opinions and lines of evidence. Managed a team of professionals to conduct research, extract, compile and interpret data in support of expert witness opinions by a nationally known environmental forensics expert in multi-million-dollar litigation projects. Managed and executed projects from a personal client base developed over the years consisting of public and private sector entities. Responsible for business development in the "seller/doer" model. Pursued site assessment and remediation projects, prepared and presented proposals to new clients outside of DPRA's normal realm.

1999-2007 Sr. Project Manager/Manager, Geocon Consultants, Inc., San Diego, California.

Responsible for all aspects of daily operation and managing a ten-person office with \$1.8 million in annual revenue. Serve clients in the public and private sector. Coached, trained and mentored junior staff, and furthered the careers of senior staff. Direct and execute projects, responsible for QA/QC, and for ensuring profitability. Responsible for marketing and business development. Reported to the President, and accountable to the Board of Directors.

1991 – 1999 Associate/Manager, Alton Geoscience, San Diego, California (acquired by TRC 1999). Responsible for marketing, fiscal performance and managing people and resources focused on client service, profitability and technical quality. Direct supervision of site assessment, remediation and risk evaluation projects. Responsible as the operations manager of a 19-person branch office including staffing, profit and loss, marketing, resource allocation, senior technical review and direction.

1986-1991 Project Geologist, Kleinfelder, Inc., San Diego, California. Staff Engineering Geologist, November 1986 to March 1990: Responsible for planning and performing environmental site assessments and remediation. Coordinated field investigations and supervised field personnel and subcontractors. Analyzed soil and groundwater data, compiled laboratory data, created graphic representation of data, prepared written reports, work plans, estimates and proposals.

1986 Staff Engineering Geologist, Geotechnical Exploration, Inc., San Diego, California. Performed forensic soil engineering investigations of damage to structures caused by soil conditions. Planned, conducted and reported on field investigations.

1985 Soil Engineering Technician, Geocon, Inc., San Diego, California. Responsible for observation, testing and reporting conformance of contractor's performance to recommendations of the soil engineer.

SELECT PROJECT EXPERIENCE

DUE DILIGENCE PORTFOLIO OF 10 PHASE I ENVIRONMENTAL SITE ASSESSMENTS, SOUTHERN CALIFORNIA

Mr. Kofron has supervised or reviewed hundreds of ASTM E-1527 Phase I ESAs performed on commercial, industrial, agricultural and residential properties in southern California. Clients have included publicly-traded Real Estate Investment Trusts (REITS), a public utility (the Imperial Irrigation District), nation-wide multi-family housing developers, oil-field service companies, nation-wide operators of auto salvage yards, non-profit organizations, alternate energy providers, financial institutions, and five-star luxury hotel operators. Mr. Kofron draws upon his extensive experience as a consultant to evaluate the evidence and formulate conclusions and opinions that consider the known and potential risks based on the client's risk tolerance and intended use of the site.

In 2019, Mr. Kofron managed a portfolio of ten sites in southern California for a nationwide REIT client who specializes in the ownership of convenience, necessity and experience-oriented retail real estate. The major grocery store-anchored sites all had a history of one or more dry cleaners at each site, with 8 of them still active. Dry cleaners present a special risk to a purchaser, and all appropriate caution is advised. Apex worked closely with the client's experience environmental counsel to evaluate the potential risk and financial exposure of each site based on all of the data provided by the seller. Apex also tailored a specific scope of investigations designed to address the existing data gaps to further refine the financial risks of acquiring these sites. The seller would not permit the investigation of any of the sites, and unable to complete due diligence to their satisfaction to evaluate significant potential downsides, our client elected to pass on the deal.

IMPERIAL IRRIGATION DISTRICT, Coachella and Imperial Valleys, California. *PCB Audit of Nine Former Substations:* The Imperial Irrigation District entered into a Consent Agreement and Final Order (CAFO) with the USEPA that required the assessment of nine former electrical substations for the potential presence of PCBs in soil. Mr. Kofron was selected by the IID as the auditor, and as required by the CAFO, he was approved by the USEPA to conduct the audit on behalf of the IID. The nine sites were evaluated over a 7-month period. Two former substations exhibited PCB concentrations that triggered a requirement to prepare a cleanup plan for each site.

The cleanup plans were prepared and submitted to the EPA proposing to remove all soil from the site exhibiting PCB concentrations above 240 parts per billion (residential screening value). The former Indio substation was remediated in September 2015. Over 2,400 tons of soil were excavated from the site. Confirmation samples were analyzed for PCBs to verify that the cleanup was achieved. The excavation

was backfilled with clean soil imported from a nearby commercial sand and gravel pit. The former Coachella Substation cleanup plan was implemented March 2016. Over 680 tons of soil were excavated and transported offsite. The USEPA concurred that both sites were remediated to their satisfaction for unrestricted future site use and declared that the audit was complete in May 2016.

FORMER PLATING FACILITY, LOS ANGELES, CALIFORNIA. *Facility Investigation, Corrective Measures Study, Supplemental Investigation, SVE Pilot Test* : Apex was retained by AIG to complete a comprehensive Facility Site Investigation including a human health risk assessment at a former plating facility to evaluate soil, soil gas and groundwater impacts resulting from former plating operations. Contaminants of concern included Under Mr. Kofron's direction and direct participation, Apex meticulously conducted a detailed investigation of the lateral and vertical extent of volatile organic compounds (PCE, TCE and carbon tetrachloride) in soil, soil vapor, and groundwater. Apex prepared a work plan for the installation of a soil vapor extraction system and conducting an extended pilot test for up to one year before the presumed remedy can be declared the final remedy and full-scale implementation occurs. All work is performed under the supervision of the California Environmental Protection Agency (CalEPA) – Department of Toxic Substances Control (DTSC).

CONFIDENTIAL CITY, CALIFORNIA. *Unidentified Source Area of TCE*: Investigations conducted in 2007 by the USEPA at the peripheral upgradient edge of a Superfund site revealed an additional but independent source of TCE in soil and groundwater. The City was approached by the USEPA to investigate two parcels (owned by the City) of the three identified as the source area. The City entered into a Voluntary Cleanup Agreement (VCA) with the State of California's Department of Toxic Substances Control (DTSC). The City retained Apex to conduct extensive historical background research to identify potential uses on the City-owned parcels as well as the adjacent northern parcel owned by a third-party. Apex conducted research to establish the ownership and use of the three parcels since the 1920s by a thorough review of historical sources. Apex has conducted two phases of comprehensive site investigation for the City identifying the extent of TCE in soil, soil gas and groundwater onsite.

FORMER DRY CLEANER, CODDINGTOWN MALL, SANTA ROSA, CALIFORNIA. *Facility Investigations/Remedial Workplans/Remedial Pilot Testing*: The presence of former dry cleaner that had operated at the mall from about 1976 to 1990 was revealed during a routine Phase I ESA during refinancing of the mall. The potential presence of dry-cleaning chemicals was detected using sub-slab soil gas probes in the former dry cleaner space, now occupied by a fast-casual restaurant. With Apex's assistance, the client enrolled in a voluntary cleanup program for regulatory oversight by the North Coast Regional Water Quality Control Board. Since 2014, Apex has conducted 5 phases of investigation to assess the lateral and vertical extent of tetrachloroethene in multiple water bearing zones. The PCE plume is approximately 350 feet long and 170 feet wide and has affected the three uppermost water bearing zones to a depth of 30 feet. The plume underlies all of "Building B" which has been renovated in several stages to attract popular retailers and modernize the mall. Apex also evaluated the potential for vapor intrusion along the length of the groundwater plume in the uppermost water-bearing zone to protect public health.

Apex prepared a workplan to conduct pilot testing of an in-situ enhanced bioremediation approach using emulsified soybean oil and dechlorinating bacteria. Apex has completed three sets of injections into the upper three water bearing zones at the west end of Building B prior to the complete reconstruction of that portion of the mall. Current monitoring data show that PCE and TCE have been nearly eliminated in and around Building B in two years since the first injections took place. The area around space 342B (closer to the source area) has also shown substantial reductions in PCE and TCE in 16 months. Apex will continue to conduct quarterly monitoring of the progress of the reduction of the plume.

CITY OF COLTON, California. *Perchlorate Contamination of Drinking Water Aquifer*: Project Manager over a CERCLA-compliant investigation of the nature and extent of perchlorate in the municipal groundwater supply within the Rialto-Colton Basin. The municipalities of Rialto and Colton filed suit against 40+ defendants to recover cost of investigating and removing perchlorate from public drinking water. PRPs included aerospace defense contractors, fireworks and pyrotechnics manufacturers and distributors, and the County of San Bernardino. Performed a Preliminary Assessment (PA), a Site Inspection (SI) and initiated a Remedial Investigation/Feasibility Study (RI/FS) pursuant to the National

Contingency Plan (NCP). Supervised the installation of two deep (800 feet) multi-port Westbay monitoring wells using mud rotary drilling methods at key locations near the downgradient edge of a six-mile-long plume. Worked closely with the legal team to ensure integrity and quality of the investigation to preserve all legal remedies to the client. Prepared and submitted PA and SI reports to the California Regional Water Quality Control Board. DPRAs investigation prompted PRPs to enter into settlement negotiations with the City of Colton. Embarked upon RI/FS activity which was shelved by the temporary dismissal of the lawsuit.

Settlement negotiations stalled and broke down, prompting the USEPA to intervene and list the largest single site (the B.F. Goodrich 160 Acre site) on the NPL. DPRAs cooperated with the USEPA on Colton's behalf by providing groundwater elevation and chemistry data for wells in and near the City water supply wells. Despite USEPA intervention in the northern portion of the basin, the City continues to bear the cost of treating the contaminated groundwater to meet its obligation to deliver water to its citizens.

CITY OF CALEXICO, California. Assessment and Remediation of Lead-Contaminated Soil: The Horacio Luna Memorial Gun Club has been operated as a pistol and rifle range for at least 38 years. A Phase I environmental site assessment was performed by another consultant, and a Phase II was recommended to evaluate the potential presence of copper and lead in the soil. DPRAs was awarded the competitively-bid contract to conduct the Phase II. Soil samples were collected at over 70 locations, located using GPS, and analyzed onsite using X-ray fluorescence. Soil samples were submitted to an analytical laboratory for additional testing for solubility for waste characteristic profiling. The lateral and vertical extent of the lead in soil was achieved in one day on the 3-acre site. Recommendations for remediation were provided to the client. Provided oversight of the remediation contractor on behalf of the City for compliance with approved removal action work plans and redevelopment goals for the site. Work was completed in late 2013 with the opening of the new Gran Plaza outlet mall.

ANGELES v. MCKESSON, Santa Fe Springs, California. Litigation Support: Provided close support to DPRAs expert witness in a major environmental litigation focusing on responsibility for a release of chlorinated solvents from a bulk repackaging facility. Managed a team of researchers to review 2 million pages of documentation produced during discovery, including deposition testimony, RI/FS reports, Five Year Reviews, internal memoranda, expert reports, regulatory correspondence, and other technical information. Collaborated with DPRAs GIS analysts in the creation of a GIS platform to display historical soil, soil vapor and groundwater data over time. Identified key weaknesses in defendant's case previously unnoticed by prior experts. Assisted in the production of the expert witness reports within 120 days of being retained on the case.

IMPERIAL IRRIGATION DISTRICT, Brawley, California. Assessment and Remediation of PCB Contaminated Soil: The Rio Vista electrical substation is situated in a residential neighborhood adjacent to an elementary school. Following decommissioning, PCBs were detected in soil surrounding the former equipment. Site assessment activities identified concentrations of PCBs in soil to as deep as 4 feet that exceeded 50 ppm. The IID entered a voluntary cleanup program with DTSC to remediate the site. The USEPA entered into the case as the lead agency to oversee the remediation. A remedial action plan was prepared and submitted to the EPA proposing to remove all soil from the site exhibiting PCB concentrations above 89 parts per billion (California Residential screening value). Public notification was made to the elementary school and nearby residents. Over 2,000 tons of soil were excavated from the site. Confirmation samples were also analyzed for PCB congeners and dioxin-like compounds. The excavation was backfilled with clean soil imported from a nearby construction project. All import soil was screened for a wide range of contaminants before approved by the EPA and DTSC. Following receipt of closure of the case, the IID donated the site to the elementary school district.

UNIVERSITY OF CALIFORNIA AT SAN DIEGO MEDICAL CENTER, San Diego, California. Site Assessment, Pilot Scale Remediation Testing and Corrective Action Planning: Conducted extensive site characterization of a release of diesel and gasoline. Multiple perching layers beneath the site complicated efforts to establish the hydraulic character of the site. The presence of free product necessitated manual recovery. The presence of a steep canyon with protected habitat to the west posed challenges to the assessment. A new phase of construction in spring 2008 provided an opportunity to assess the release during construction. Hydrocarbons in soil were discovered during the excavation of a keyway at the base

of a fill slope, over 120 feet away from the point of origin. Oversaw all aspects of field operations including the drilling of 13 new monitoring wells on hillside terrain using a track-mounted 16-inch diameter auger rig. Constructed nested wells with 2 casings per borehole to assess highly variable and unpredictable perched groundwater conditions. Prepared a comprehensive site assessment report. Dual phase pilot testing indicates that a conventional soil vapor extraction system is adequate to remediate the site, and the formal recommendations were approved in a revised Corrective Action Plan April 2013 by the DEH upon completion of the public notification program. Apex is currently preparing the design for the proposed remedial system.

MAJOR SHOPPING CENTERS, California. *Vapor Intrusion Evaluations:* A national client of Apex intended to acquire shopping centers with major grocery store anchors in Lancaster and Fairfield California. Both shopping centers were occupied by active dry cleaners with a long-term historical use of PCE. The scopes of work included subslab vapor sampling and analysis, soil and groundwater sampling and analysis and indoor air sampling. Sample data from one site indicated that human health screening levels were exceeded, and mitigation was warranted. A subslab depressurization system is being designed for installation.

IMPERIAL IRRIGATION DISTRICT, Westmorland, California. *Emergency Pesticide Cleanup:* An illicit landfill containing over 100 pesticide containers were unearthed during a multimillion-dollar pipeline construction project within 1 mile of the Salton Sea, and 100 yards from the New River. The discovery of the cache shut down construction and drew media attention to the case after construction workers became ill and were hospitalized. The event also coincided with one of frequent fish kills in the Salton Sea which further raised the media profile of the discovery and created a public relations challenge for the client. Organized an emergency response team to minimize delay to construction project. Supervised excavation, removal and classification of containers, characterized and mitigated soil and groundwater. Extreme desert temperatures in early September and the need for Level B/C PPE required working at night. Assisted CAL EPA and Regional Water Quality Control Board investigators in evidence collection for criminal investigation.

CALIFORNIA DEPARTMENT OF TRANSPORTATION, Southern California, Site Assessment Contract. Managed the southern region of a statewide site assessment contract for Caltrans providing \$2.5 million in revenue over 5 years. Provided service to four Caltrans District offices covering 7 southern California counties. Responsible for all aspects administering Task Orders, managing personnel and resources to execute multiple projects covering large geographic areas simultaneously. The project types ranged from underground storage tank assessments, aerially deposited lead investigations, remedial action and feasibility studies, and lead and asbestos evaluations. Continually met the challenges of servicing over 20 different project managers each with urgent timelines and exacting contract and Task Order requirements.

CITY OF SAN DIEGO, ENVIRONMENTAL SERVICES DEPARTMENT, San Diego, California, Site Assessment and Remediation. Managed 25 underground storage tank sites for the City of San Diego including fire stations, lifeguard stations, city maintenance facilities and police facilities from 2000 to 2007. Conducted site assessments, prepared Corrective Action Plans and assisted with the preparation of reimbursement claims for the State Underground Storage Tank Cleanup Fund. Also assisted the City with Phase I ESAs for new facilities including libraries, sewer trunk alignments and fire stations.

HEBER AND CALEXICO ELEMENTARY SCHOOL DISTRICTS, IMPERIAL COUNTY, CALIFORNIA. *Preliminary Endangerment Assessments:* Conducted Preliminary Endangerment Assessments (PEAs) to locate elementary school sites as required by California Department of Education. Worked closely with California Department of Toxic Substances Control (DTSC) to develop a scope of work to address concerns at this site. Prepared a PEA Work Plan and conducted the PEA. Prepared Community Participation Plan and conducted Public Notification program. Conducted sampling and analysis program to assess risk from organochlorine pesticide residue. Performed human health risk screening and prepared final PEA Report recommending no further action.

PROJECT EXPERIENCE:

AIG - Former Gene's Plating: Performed site investigation and remediation activities at a former metal plating shop in Vernon, CA. The work involved using a sonic drill rig to install 3 groundwater monitoring wells with co-constructed multiple-depth soil gas probes in the same borehole. Drilling was conducted indoors and outdoors, with limited site access. Groundwater was encountered at approximately 200' below ground surface (bgs). The soil, soil gas, and groundwater samples collected from these wells were used to design the SVE system that is currently operating at the site.

Simon Property Group – Coddington Mall: Performed site investigation and remediation work at the Coddington Mall in Santa Rosa, CA. Site investigation activities revealed that groundwater was impacted by chlorinated solvents associated with previous dry cleaning operations at the site. A pilot study was implemented to assess the feasibility of injecting a substrate composed of EOS PRO (emulsified food-grade and USDA-certified vegetable oil) and laboratory cultured microbes (*Dehalococcoides mccartyi*) used to stimulate anaerobic bioremediation of chlorinated solvents in the contaminated groundwater. A total of 147 vertical substrate injection borings and 7 angled injection borings were drilled in 3 separate locations in the mall.

Simon Property Group – Sears Brea Mall-: Conducted a Phase 2 ESA at the former Sears Auto Center at the Brea Mall in Brea, CA. Approximately 30 soil borings were drilled in the vicinity of the environmental areas of concern (floor drains, former tank location, and hydraulic lifts) using direct push drilling methods.

Carlyle Group / Oakmont Industrial – Kadota Avenue Warehouse-: Performed a site investigation at an industrial site that was first developed in 1928 in Montclair, CA. Approximately 21 soil borings were drilled using a hollow-stem drilling methods. Following soil sample collection, temporary multi-depth soil gas probes were installed in each of the 21 soil borings. Additionally, a set of indoor and outdoor ambient air samples were collected at the site. Results from the site investigation led to the issuance of a No Further Action Letter (NFA) in accordance with a Land Use Covenant (LUC). The site is currently re-developed with a new warehouse facility.

Legacy Partners – 4th and J-: Assisted in the remediation of a former lumber and coal storage facility in downtown San Diego that operated from the 1800's to the 1920's. Soil, soil gas, and groundwater sampling results indicated an elevated concentration of lead present in the shallow fill beneath the site. Based on the Voluntary Assistance Program (VAP) agreement with the San Diego County Department of Environmental Health (DEH), the contaminated shallow fill was to be removed prior to the commencement of grading activities. The shallow fill was screened using a XRF Meter. Based on XRF readings, soil was disposed offsite or sampled for laboratory analysis. The site is now developed with a 5-story luxury apartment building.

Centerpoint Properties – Phase 2 ESA: Conducted a Phase 2 ESA at an industrial property in Compton, CA. Collected 6 sub-slab soil gas samples, and collected groundwater grab samples and soil samples in 6 locations.

Talons Capital – Phase 2 ESA: Conducted a Phase 2 ESA at an active dry cleaning facility in Long Beach, CA. Collected 6 sub-slab soil gas samples inside and outside the dry cleaner. Based on the results of the samples, we returned and collected groundwater grab samples and soil samples in 6 additional locations.

Kimco Realty – Chino Town Square: Performed multiple site investigations at a shopping center in Chino, CA. Previous site investigations revealed that former dry cleaning operations impacted the site. The site entered into a Voluntary Cleanup Program (VCP) with DTSC. Assisted in the installation of an additional 10 sets of nested soil gas monitoring wells. Collected sub-slab soil gas, soil gas, soil, and indoor air samples to help further delineate the extent of contamination.

First Washington Realty – BUD Portfolio-: Assisted in the preparation of 10 Phase 1 ESAs in concurrence with the potential acquisition of 10 grocery-anchored strip malls throughout Southern California. The majority of the properties had previously identified environmental impacts from former dry cleaning operations, so we prepared proposals for the future investigation work and ongoing remediation for each of the 10 properties.

Rule 1166 Construction Grading Monitoring-: Performed South Coast Air Quality Management District (SCAQMD) Rule 1166 construction grading monitoring for 2 construction projects located in Montclair, CA and Fontana, CA. Using a PID meter, I would continuously screen the soil during grading activities. If PID readings were above a certain threshold, I would direct the grading contractor to excavate and stockpile the impacted soil. The impacted soil was sampled and sent offsite for disposal.

Goodyear Tire and Rubber – Combined Phase 1 & Phase 2 ESAs-: Performed multiple combined Phase 1 and Phase 2 ESAs at Goodyear Tire and Rubber locations throughout San Diego. The scope of work included collecting soil samples near environmental areas of concern (floor drains, tank locations, hydraulic lifts, etc.).

Imperial Irrigation District – Former Electrical Substation: Assisted in the removal of approximately 16 tons of PCB contaminated soil from a former electrical substation. Collected confirmation samples and helped manage the excavation and disposal subcontractors.

Ronald J. Kofron
Environmental Geologist and Program Manager

Senior environmental professional with over 35 years of site assessment and remediation experience. Mr. Kofron is a Professional Geologist and Certified Engineering Geologist and has personally performed or directly managed thousands of environmental site assessment and remedial actions. Mr. Kofron applies his experience to provide a pragmatic and sensible approach to solve his client's environmental challenges.

EDUCATION

- M.S. Geology, San Diego State University, 1985
- B.S. Geology, San Diego State University, 1982

PROFESSIONAL REGISTRATIONS/ CERTIFICATION/ TRAINING

- Registered Geologist, 1990, California, #4884
- Certified Engineering Geologist, 1990, California, #1527
- 40-hour OSHA Hazardous Waste Health and Safety Training (29 CFR 1910.120), 1987
- 8-Hour Annual OSHA Hazardous Waste Health and Safety Refresher, annually since 1987
- 8-Hour Annual OSHA Hazardous Waste Supervisor's Health and Safety Training, 2015

GENERAL EXPERIENCE

2010 – Present Program Manager, Apex Companies, LLC San Diego, California.

As a Program Manager, Mr. Kofron serves as the primary point of contact and client manager for the the nation's largest REIT and operator of shopping malls.

As a senior project manager, Mr. Kofron has primary responsibility for managing all Phase I environmental site assessments, subsurface investigations and remediation projects. Mr. Kofron's experience includes comprehensive environmental due diligence on real estate transactions and development projects, soil, soil vapor and groundwater investigations and risk evaluations ranging from small spills to CERCLA Remedial Investigations and Feasibility Studies. His experience also includes remediation of contaminated sites affected with PCBs, metals, petroleum, volatile organic compounds (including dry cleaning chemicals), and perchlorates.

2007-2010 Senior Associate, DPRA Inc., Escondido, California.

Senior project manager on complex projects requiring special expertise or knowledge. Met with attorneys to outline strategies; developed expert opinions and lines of evidence. Managed a team of professionals to conduct research, extract, compile and interpret data in support of expert witness opinions by a nationally known environmental forensics expert in multi-million-dollar litigation projects. Managed and executed projects from a personal client base developed over the years consisting of public and private sector entities. Responsible for business development in the "seller/doer" model. Pursued site assessment and remediation projects, prepared and presented proposals to new clients outside of DPRA's normal realm.

1999-2007 Sr. Project Manager/Manager, Geocon Consultants, Inc., San Diego, California.

Responsible for all aspects of daily operation and managing a ten-person office with \$1.8 million in annual revenue. Serve clients in the public and private sector. Coached, trained and mentored junior staff, and furthered the careers of senior staff. Direct and execute projects, responsible for QA/QC, and for ensuring profitability. Responsible for marketing and business development. Reported to the President, and accountable to the Board of Directors.

1991 – 1999 Associate/Manager, Alton Geoscience, San Diego, California (acquired by TRC 1999). Responsible for marketing, fiscal performance and managing people and resources focused on client service, profitability and technical quality. Direct supervision of site assessment, remediation and risk evaluation projects. Responsible as the operations manager of a 19-person branch office including staffing, profit and loss, marketing, resource allocation, senior technical review and direction.

1986-1991 Project Geologist, Kleinfelder, Inc., San Diego, California. Staff Engineering Geologist, November 1986 to March 1990: Responsible for planning and performing environmental site assessments and remediation. Coordinated field investigations and supervised field personnel and subcontractors. Analyzed soil and groundwater data, compiled laboratory data, created graphic representation of data, prepared written reports, work plans, estimates and proposals.

1986 Staff Engineering Geologist, Geotechnical Exploration, Inc., San Diego, California. Performed forensic soil engineering investigations of damage to structures caused by soil conditions. Planned, conducted and reported on field investigations.

1985 Soil Engineering Technician, Geocon, Inc., San Diego, California. Responsible for observation, testing and reporting conformance of contractor's performance to recommendations of the soil engineer.

SELECT PROJECT EXPERIENCE

DUE DILIGENCE PORTFOLIO OF 10 PHASE I ENVIRONMENTAL SITE ASSESSMENTS, SOUTHERN CALIFORNIA

Mr. Kofron has supervised or reviewed hundreds of ASTM E-1527 Phase I ESAs performed on commercial, industrial, agricultural and residential properties in southern California. Clients have included publicly-traded Real Estate Investment Trusts (REITS), a public utility (the Imperial Irrigation District), nation-wide multi-family housing developers, oil-field service companies, nation-wide operators of auto salvage yards, non-profit organizations, alternate energy providers, financial institutions, and five-star luxury hotel operators. Mr. Kofron draws upon his extensive experience as a consultant to evaluate the evidence and formulate conclusions and opinions that consider the known and potential risks based on the client's risk tolerance and intended use of the site.

In 2019, Mr. Kofron managed a portfolio of ten sites in southern California for a nationwide REIT client who specializes in the ownership of convenience, necessity and experience-oriented retail real estate. The major grocery store-anchored sites all had a history of one or more dry cleaners at each site, with 8 of them still active. Dry cleaners present a special risk to a purchaser, and all appropriate caution is advised. Apex worked closely with the client's experience environmental counsel to evaluate the potential risk and financial exposure of each site based on all of the data provided by the seller. Apex also tailored a specific scope of investigations designed to address the existing data gaps to further refine the financial risks of acquiring these sites. The seller would not permit the investigation of any of the sites, and unable to complete due diligence to their satisfaction to evaluate significant potential downsides, our client elected to pass on the deal.

IMPERIAL IRRIGATION DISTRICT, Coachella and Imperial Valleys, California. *PCB Audit of Nine Former Substations:* The Imperial Irrigation District entered into a Consent Agreement and Final Order (CAFO) with the USEPA that required the assessment of nine former electrical substations for the potential presence of PCBs in soil. Mr. Kofron was selected by the IID as the auditor, and as required by the CAFO, he was approved by the USEPA to conduct the audit on behalf of the IID. The nine sites were evaluated over a 7-month period. Two former substations exhibited PCB concentrations that triggered a requirement to prepare a cleanup plan for each site.

The cleanup plans were prepared and submitted to the EPA proposing to remove all soil from the site exhibiting PCB concentrations above 240 parts per billion (residential screening value). The former Indio substation was remediated in September 2015. Over 2,400 tons of soil were excavated from the site. Confirmation samples were analyzed for PCBs to verify that the cleanup was achieved. The excavation

was backfilled with clean soil imported from a nearby commercial sand and gravel pit. The former Coachella Substation cleanup plan was implemented March 2016. Over 680 tons of soil were excavated and transported offsite. The USEPA concurred that both sites were remediated to their satisfaction for unrestricted future site use and declared that the audit was complete in May 2016.

FORMER PLATING FACILITY, LOS ANGELES, CALIFORNIA. *Facility Investigation, Corrective Measures Study, Supplemental Investigation, SVE Pilot Test* : Apex was retained by AIG to complete a comprehensive Facility Site Investigation including a human health risk assessment at a former plating facility to evaluate soil, soil gas and groundwater impacts resulting from former plating operations. Contaminants of concern included Under Mr. Kofron's direction and direct participation, Apex meticulously conducted a detailed investigation of the lateral and vertical extent of volatile organic compounds (PCE, TCE and carbon tetrachloride) in soil, soil vapor, and groundwater. Apex prepared a work plan for the installation of a soil vapor extraction system and conducting an extended pilot test for up to one year before the presumed remedy can be declared the final remedy and full-scale implementation occurs. All work is performed under the supervision of the California Environmental Protection Agency (CalEPA) – Department of Toxic Substances Control (DTSC).

CONFIDENTIAL CITY, CALIFORNIA. *Unidentified Source Area of TCE*: Investigations conducted in 2007 by the USEPA at the peripheral upgradient edge of a Superfund site revealed an additional but independent source of TCE in soil and groundwater. The City was approached by the USEPA to investigate two parcels (owned by the City) of the three identified as the source area. The City entered into a Voluntary Cleanup Agreement (VCA) with the State of California's Department of Toxic Substances Control (DTSC). The City retained Apex to conduct extensive historical background research to identify potential uses on the City-owned parcels as well as the adjacent northern parcel owned by a third-party. Apex conducted research to establish the ownership and use of the three parcels since the 1920s by a thorough review of historical sources. Apex has conducted two phases of comprehensive site investigation for the City identifying the extent of TCE in soil, soil gas and groundwater onsite.

FORMER DRY CLEANER, CODDINGTOWN MALL, SANTA ROSA, CALIFORNIA. *Facility Investigations/Remedial Workplans/Remedial Pilot Testing*: The presence of former dry cleaner that had operated at the mall from about 1976 to 1990 was revealed during a routine Phase I ESA during refinancing of the mall. The potential presence of dry-cleaning chemicals was detected using sub-slab soil gas probes in the former dry cleaner space, now occupied by a fast-casual restaurant. With Apex's assistance, the client enrolled in a voluntary cleanup program for regulatory oversight by the North Coast Regional Water Quality Control Board. Since 2014, Apex has conducted 5 phases of investigation to assess the lateral and vertical extent of tetrachloroethene in multiple water bearing zones. The PCE plume is approximately 350 feet long and 170 feet wide and has affected the three uppermost water bearing zones to a depth of 30 feet. The plume underlies all of "Building B" which has been renovated in several stages to attract popular retailers and modernize the mall. Apex also evaluated the potential for vapor intrusion along the length of the groundwater plume in the uppermost water-bearing zone to protect public health.

Apex prepared a workplan to conduct pilot testing of an in-situ enhanced bioremediation approach using emulsified soybean oil and dechlorinating bacteria. Apex has completed three sets of injections into the upper three water bearing zones at the west end of Building B prior to the complete reconstruction of that portion of the mall. Current monitoring data show that PCE and TCE have been nearly eliminated in and around Building B in two years since the first injections took place. The area around space 342B (closer to the source area) has also shown substantial reductions in PCE and TCE in 16 months. Apex will continue to conduct quarterly monitoring of the progress of the reduction of the plume.

CITY OF COLTON, California. *Perchlorate Contamination of Drinking Water Aquifer*: Project Manager over a CERCLA-compliant investigation of the nature and extent of perchlorate in the municipal groundwater supply within the Rialto-Colton Basin. The municipalities of Rialto and Colton filed suit against 40+ defendants to recover cost of investigating and removing perchlorate from public drinking water. PRPs included aerospace defense contractors, fireworks and pyrotechnics manufacturers and distributors, and the County of San Bernardino. Performed a Preliminary Assessment (PA), a Site Inspection (SI) and initiated a Remedial Investigation/Feasibility Study (RI/FS) pursuant to the National

Contingency Plan (NCP). Supervised the installation of two deep (800 feet) multi-port Westbay monitoring wells using mud rotary drilling methods at key locations near the downgradient edge of a six-mile-long plume. Worked closely with the legal team to ensure integrity and quality of the investigation to preserve all legal remedies to the client. Prepared and submitted PA and SI reports to the California Regional Water Quality Control Board. DPRAs investigation prompted PRPs to enter into settlement negotiations with the City of Colton. Embarked upon RI/FS activity which was shelved by the temporary dismissal of the lawsuit.

Settlement negotiations stalled and broke down, prompting the USEPA to intervene and list the largest single site (the B.F. Goodrich 160 Acre site) on the NPL. DPRAs cooperated with the USEPA on Colton's behalf by providing groundwater elevation and chemistry data for wells in and near the City water supply wells. Despite USEPA intervention in the northern portion of the basin, the City continues to bear the cost of treating the contaminated groundwater to meet its obligation to deliver water to its citizens.

CITY OF CALEXICO, California. Assessment and Remediation of Lead-Contaminated Soil: The Horacio Luna Memorial Gun Club has been operated as a pistol and rifle range for at least 38 years. A Phase I environmental site assessment was performed by another consultant, and a Phase II was recommended to evaluate the potential presence of copper and lead in the soil. DPRAs was awarded the competitively-bid contract to conduct the Phase II. Soil samples were collected at over 70 locations, located using GPS, and analyzed onsite using X-ray fluorescence. Soil samples were submitted to an analytical laboratory for additional testing for solubility for waste characteristic profiling. The lateral and vertical extent of the lead in soil was achieved in one day on the 3-acre site. Recommendations for remediation were provided to the client. Provided oversight of the remediation contractor on behalf of the City for compliance with approved removal action work plans and redevelopment goals for the site. Work was completed in late 2013 with the opening of the new Gran Plaza outlet mall.

ANGELES v. MCKESSON, Santa Fe Springs, California. Litigation Support: Provided close support to DPRAs expert witness in a major environmental litigation focusing on responsibility for a release of chlorinated solvents from a bulk repackaging facility. Managed a team of researchers to review 2 million pages of documentation produced during discovery, including deposition testimony, RI/FS reports, Five Year Reviews, internal memoranda, expert reports, regulatory correspondence, and other technical information. Collaborated with DPRAs GIS analysts in the creation of a GIS platform to display historical soil, soil vapor and groundwater data over time. Identified key weaknesses in defendant's case previously unnoticed by prior experts. Assisted in the production of the expert witness reports within 120 days of being retained on the case.

IMPERIAL IRRIGATION DISTRICT, Brawley, California. Assessment and Remediation of PCB Contaminated Soil: The Rio Vista electrical substation is situated in a residential neighborhood adjacent to an elementary school. Following decommissioning, PCBs were detected in soil surrounding the former equipment. Site assessment activities identified concentrations of PCBs in soil to as deep as 4 feet that exceeded 50 ppm. The IID entered a voluntary cleanup program with DTSC to remediate the site. The USEPA entered into the case as the lead agency to oversee the remediation. A remedial action plan was prepared and submitted to the EPA proposing to remove all soil from the site exhibiting PCB concentrations above 89 parts per billion (California Residential screening value). Public notification was made to the elementary school and nearby residents. Over 2,000 tons of soil were excavated from the site. Confirmation samples were also analyzed for PCB congeners and dioxin-like compounds. The excavation was backfilled with clean soil imported from a nearby construction project. All import soil was screened for a wide range of contaminants before approved by the EPA and DTSC. Following receipt of closure of the case, the IID donated the site to the elementary school district.

UNIVERSITY OF CALIFORNIA AT SAN DIEGO MEDICAL CENTER, San Diego, California. Site Assessment, Pilot Scale Remediation Testing and Corrective Action Planning: Conducted extensive site characterization of a release of diesel and gasoline. Multiple perching layers beneath the site complicated efforts to establish the hydraulic character of the site. The presence of free product necessitated manual recovery. The presence of a steep canyon with protected habitat to the west posed challenges to the assessment. A new phase of construction in spring 2008 provided an opportunity to assess the release during construction. Hydrocarbons in soil were discovered during the excavation of a keyway at the base

of a fill slope, over 120 feet away from the point of origin. Oversaw all aspects of field operations including the drilling of 13 new monitoring wells on hillside terrain using a track-mounted 16-inch diameter auger rig. Constructed nested wells with 2 casings per borehole to assess highly variable and unpredictable perched groundwater conditions. Prepared a comprehensive site assessment report. Dual phase pilot testing indicates that a conventional soil vapor extraction system is adequate to remediate the site, and the formal recommendations were approved in a revised Corrective Action Plan April 2013 by the DEH upon completion of the public notification program. Apex is currently preparing the design for the proposed remedial system.

MAJOR SHOPPING CENTERS, California. *Vapor Intrusion Evaluations:* A national client of Apex intended to acquire shopping centers with major grocery store anchors in Lancaster and Fairfield California. Both shopping centers were occupied by active dry cleaners with a long-term historical use of PCE. The scopes of work included subslab vapor sampling and analysis, soil and groundwater sampling and analysis and indoor air sampling. Sample data from one site indicated that human health screening levels were exceeded, and mitigation was warranted. A subslab depressurization system is being designed for installation.

IMPERIAL IRRIGATION DISTRICT, Westmorland, California. *Emergency Pesticide Cleanup:* An illicit landfill containing over 100 pesticide containers were unearthed during a multimillion-dollar pipeline construction project within 1 mile of the Salton Sea, and 100 yards from the New River. The discovery of the cache shut down construction and drew media attention to the case after construction workers became ill and were hospitalized. The event also coincided with one of frequent fish kills in the Salton Sea which further raised the media profile of the discovery and created a public relations challenge for the client. Organized an emergency response team to minimize delay to construction project. Supervised excavation, removal and classification of containers, characterized and mitigated soil and groundwater. Extreme desert temperatures in early September and the need for Level B/C PPE required working at night. Assisted CAL EPA and Regional Water Quality Control Board investigators in evidence collection for criminal investigation.

CALIFORNIA DEPARTMENT OF TRANSPORTATION, Southern California, *Site Assessment Contract.* Managed the southern region of a statewide site assessment contract for Caltrans providing \$2.5 million in revenue over 5 years. Provided service to four Caltrans District offices covering 7 southern California counties. Responsible for all aspects administering Task Orders, managing personnel and resources to execute multiple projects covering large geographic areas simultaneously. The project types ranged from underground storage tank assessments, aerially deposited lead investigations, remedial action and feasibility studies, and lead and asbestos evaluations. Continually met the challenges of servicing over 20 different project managers each with urgent timelines and exacting contract and Task Order requirements.

CITY OF SAN DIEGO, ENVIRONMENTAL SERVICES DEPARTMENT, San Diego, California, *Site Assessment and Remediation.* Managed 25 underground storage tank sites for the City of San Diego including fire stations, lifeguard stations, city maintenance facilities and police facilities from 2000 to 2007. Conducted site assessments, prepared Corrective Action Plans and assisted with the preparation of reimbursement claims for the State Underground Storage Tank Cleanup Fund. Also assisted the City with Phase I ESAs for new facilities including libraries, sewer trunk alignments and fire stations.

HEBER AND CALEXICO ELEMENTARY SCHOOL DISTRICTS, IMPERIAL COUNTY, CALIFORNIA. *Preliminary Endangerment Assessments:* Conducted Preliminary Endangerment Assessments (PEAs) to locate elementary school sites as required by California Department of Education. Worked closely with California Department of Toxic Substances Control (DTSC) to develop a scope of work to address concerns at this site. Prepared a PEA Work Plan and conducted the PEA. Prepared Community Participation Plan and conducted Public Notification program. Conducted sampling and analysis program to assess risk from organochlorine pesticide residue. Performed human health risk screening and prepared final PEA Report recommending no further action.
