

General Development Plan

Design Concept

Set within the diverse cultural campus of Balboa Park at the eastern end of the Prado with views to Florida Canyon beyond, The Nat's location is uniquely well-suited to engage the wide range of Park visitors and demonstrate The Nat's Mission "...to promote understanding of the evolution and diversity of southern California and the peninsula of Baja California; and to inspire in all a respect for nature and the environment". The formal arrangement of Balboa Park's promenades and buildings among the meandering fingers of canyons and mesas makes a rich context for The Nat's message.

The Landscape Master Plan includes for gardens and outdoor gathering spaces located around The Nat building perimeter.

All new PAVING will be permeable Decomposed Granite (DG).
All Historically Significant Trees to Remain.
