

Ensure your business has the correct recycling set up to join the City of San Diego's Commercial Food Scraps Composting Program

- Businesses must comply with the [Recycling Ordinance](#)
- Recycling containers must be clearly identified as "Recycling" and must display a list and/or pictures of the acceptable recyclable material

- Trash and recycling containers must be paired throughout the facility, including employee areas, kitchens and customer areas
- We recommend trash and recycling containers be color-coded: blue for recycling and black for trash
