OUTLINE FOR DETERMINING HIERARCHY OF WATER AND TURF REDUCTIONS

CIMIS Data

(California Irrigation Management Information System)

Since the beginning of the CIMIS weather station network in 1982, the primary purpose of CIMIS was to make available to the public, free of charge, information useful in estimating water use for irrigation scheduling.

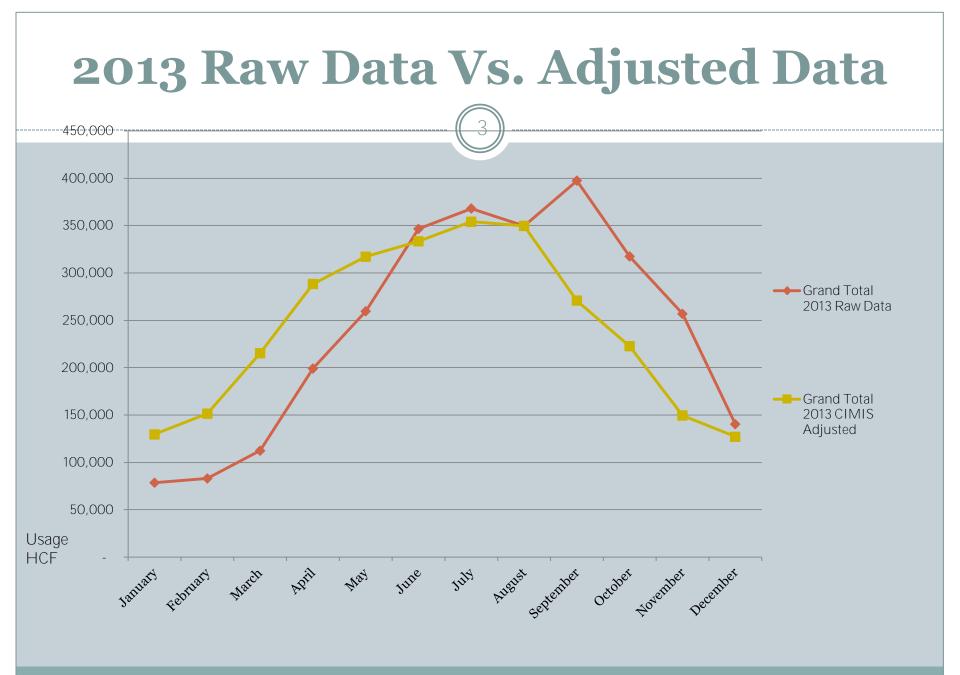

Evapotranspiration (ET)

Evapotranspiration (ET) is the loss of water to the atmosphere by the combined processes of evaporation (from soil and plant surfaces) and transpiration (from plant tissues).

DECOMMISSIONED TURF

- Staff will take five (5) photos of each turf area to be decommissioned. Photos should be taken before turf dies.
- Staff will not remove dead, or dying, turf unless there is a plan and funding for replacement. This will reduce erosion and landfill concerns.
- Staff will ensure that trees within decommissioned turf are irrigated as outlined above.

Proposed Amendments to City Drought Ordinance (SDMC)

Parks are <u>exempt</u> from watering time restrictions but <u>must comply</u> with targeted water use reductions.

(G) This division does not apply to areas serviced by the Park and Recreation **Department**, including public rights-of-way, street trees, or areas with significant public benefit requiring enhanced irrigation schedules, such as public parks, schools and federal monuments or reserves. The aforementioned areas shall be irrigated, operated and maintained according to a schedule set by the City Manager.
