South mously, and particularly on Sundays and holidays.

matter from eyery angle, and see if scaething cannot be done to receive telephone connection.

Tebrusykl2, 1923

Yours very truly,

Mr. Albert Scott, c/o Pacific Tel. & Tel. Co., San Diego, California.

WINTER

My dear Albert:

The matter of a telephone at the Torrey Pines Lodge has been taken up with you at various times; so far without success. I am writing this letter because I think perhaps you have not realized the extreme necessity of having a telephone at that point. Not only would it serve as a great and necessary convenience for the public, who will use the Lodge in great numbers, but it is a real necessity so far as safety is concerned. Many accidents have happened on the Torrey Pines Grade, one at least of which resulted fatally because assistance could not be secured in time.

The Torrey Pines Park will have to have efficient police protection at all times, both day and night, and you can readily realize the absolute necessity of a telephone at that point.

It occurs to me that inasmuch as the Gas Company has put electric light into the Lodge, that it might be possible for you to arrange to use the same poles. They have done this at heavy expense, realizing that this is a matter of a public nature, entirely different from the ordinary consumer, and I trust that you will consider it in the same regard.

It is going to be almost impossible for us to conduct a resort without telephone connections, as you can readily understand. The resort opens this week, and there is no question but what the public are going to use it to such an extent that there will be crowds there

Continuously, and particularly on Sundays and holidays.

I trsut that you will again review this entire matter from every angle, and see if something cannot be done to receive telephone connection.

Yours very truly,
