- Takeaway DMMP is for resource protection

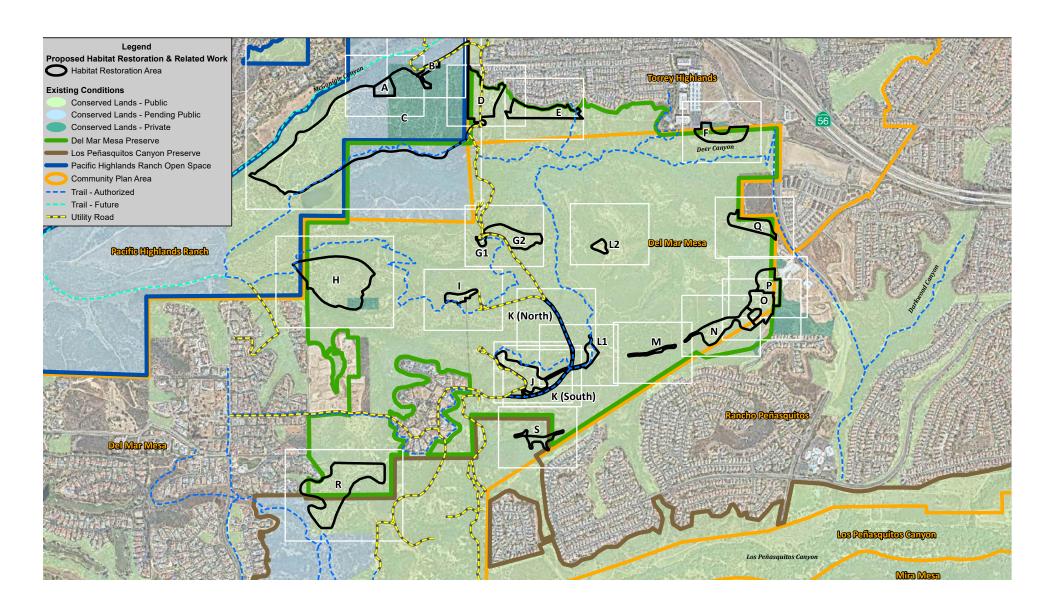

DRAFT

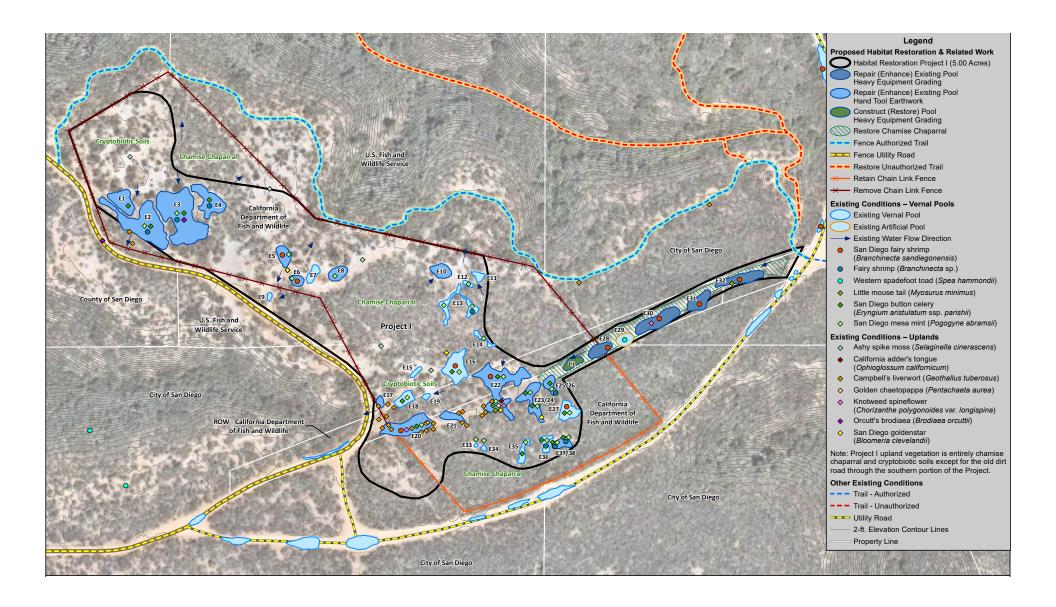

PROGRAMMATIC HABITAT RESTORATION AND MONITORING PLAN FOR THE DEL MAR MESA PRESERVE

February 2023

Elements of Habitat Restoration

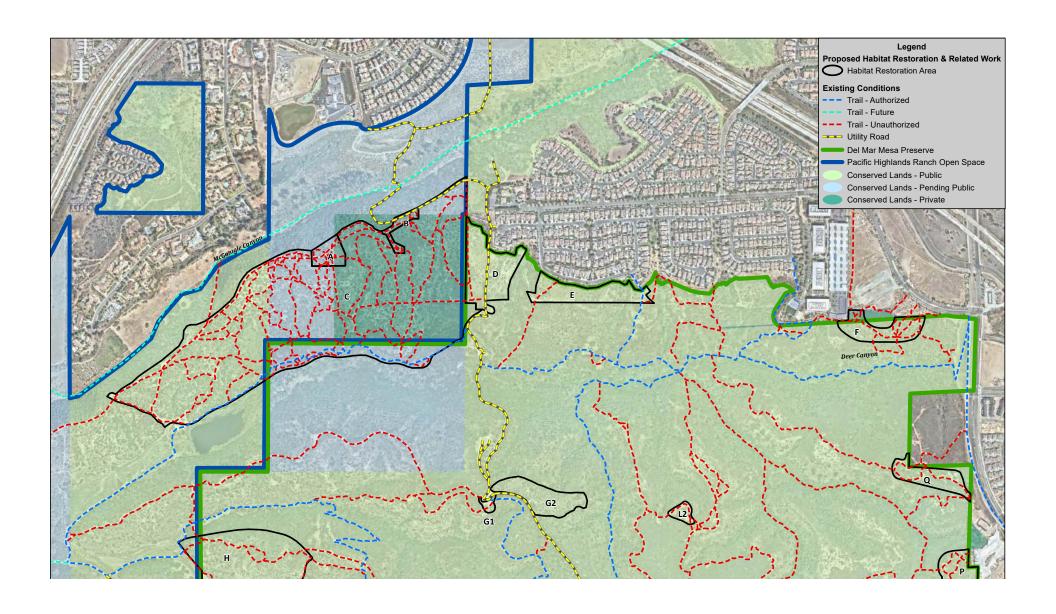

- Survey for existing resources
- Minimize impacts to existing resources
- Remove refuse
- Repair damaged terrain
- Restore and enhance damaged vegetation

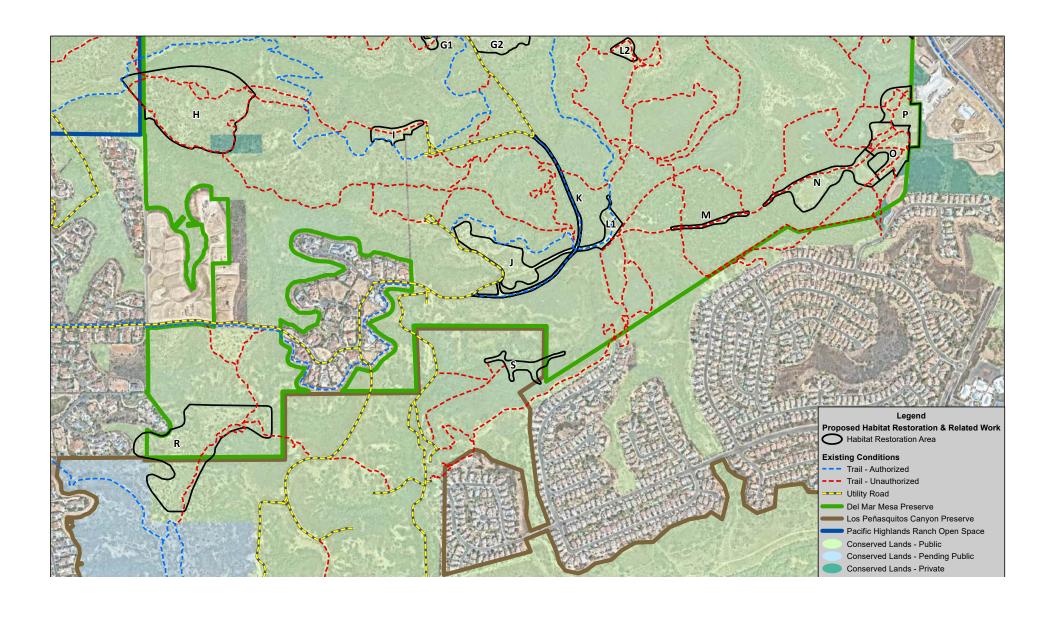

Elements of Habitat Restoration

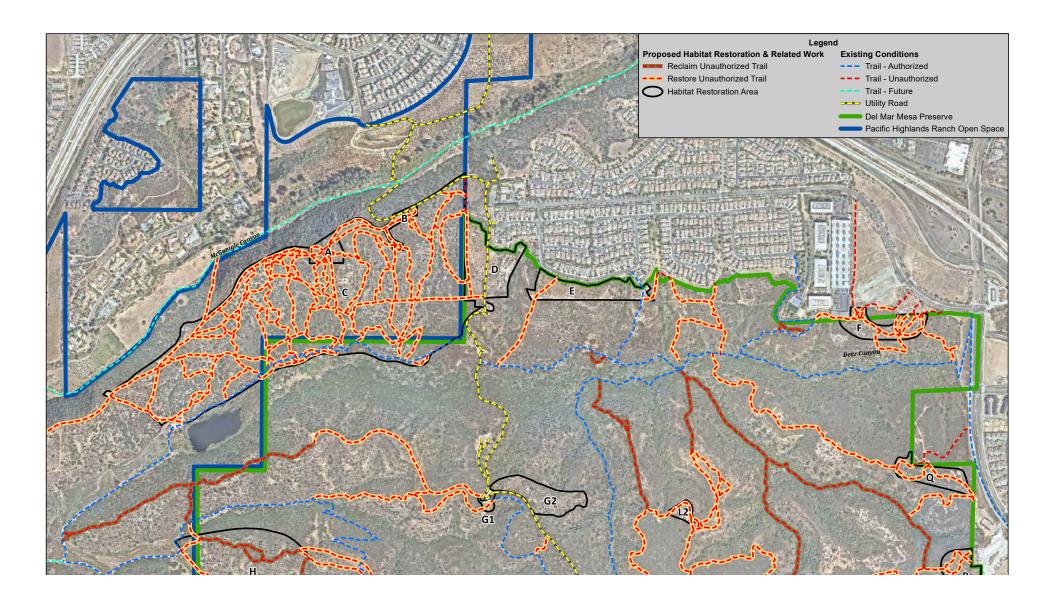

- Replace non-native vegetation with natives
- Benefit native resident and migratory birds
- Benefit other native animals
- Control invasive non-native plants
- Increase populations of rare plants

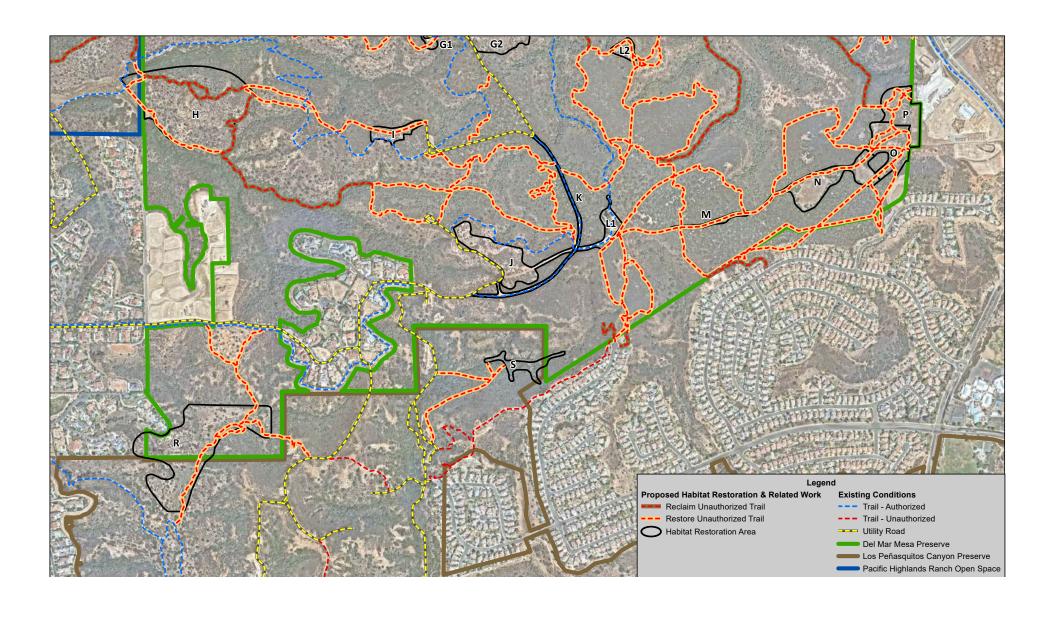

Elements of Habitat Restoration

- Improve demarcation of legitimate authorized trails and utility roads
- Remove unauthorized trails
- Educate visitors
- Monitor, document, and report results

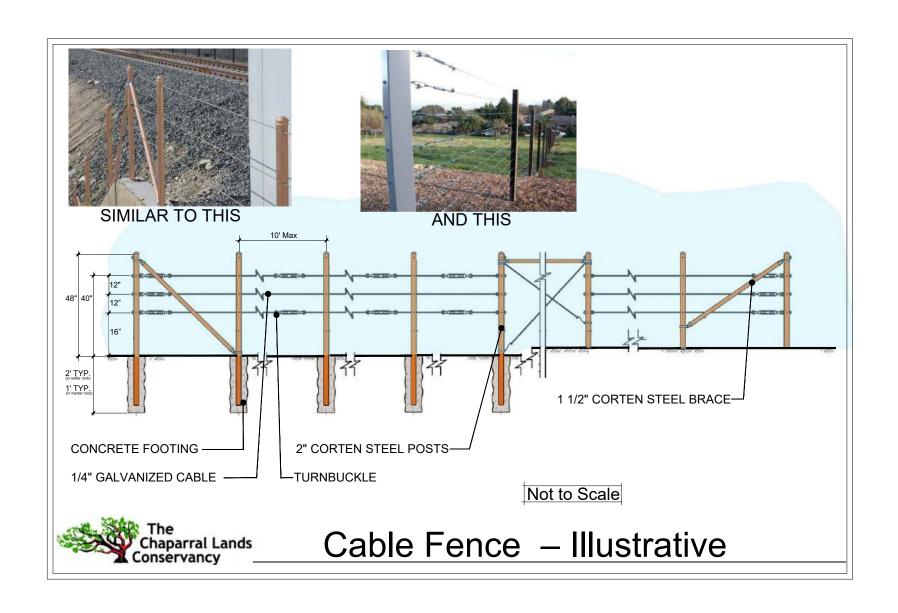

Partnership with City

- City provides entry permits, review and approval of restoration plans, and grading permits as appropriate
- Conservancy conducts planning, design, permitting, fundraising, implementation, and monitoring.
