

THE CITY OF SAN DIEGO

ADDENDUM TO MITIGATED NEGATIVE DECLARATION

WBS No. 20132, 20135
Addendum to MND No. 255100
SCH No. 2011091045

SUBJECT: Valencia Park Improvements 2: The Project proposes the installation of approximately 5,628 linear feet (LF) of new sewer main, the replacement of approximately 6,875 LF of existing sewer main, and the abandonment of approximately 5,870 LF of existing sewer main. The Project proposed the installation of approximately 4,009 LF of new water main, the replacement of approximately 6,565 LF of existing water main, and the abandonment of approximately 4,050 LF of existing water main. The Project would also include the installation of curb ramps, new laterals, lateral replumbs, manholes, cleanouts, water services, fire hydrants, valves, water meters, and other associated appurtenances.

I. SUMMARY OF ORIGINAL PROJECT

A Citywide Pipelines Projects Mitigated Negative Declaration (MND) No. 255100 was prepared by the City of San Diego's Development Services Department (DSD) and was adopted by the City Council on November 30, 2011 (Resolution No. 307122). The Citywide Pipelines Projects MND provides for the inclusion of subsequent pipeline projects that are located within the public right-of-way and would not result in any direct impacts to sensitive biological resources. Pursuant to the City of San Diego's Municipal Code Section 128.0306 and Section 15164(c) of State CEQA Guidelines addenda to environmental documents are not required to be circulated for public review.

II. SUMMARY OF PROPOSED PROJECT

The Project would include replacing approximately 6,875 LF of existing sewer main and approximately 6,565 LF of existing water main through open trenching methods, installing approximately 5,628 LF of new sewer main and approximately 4,009 LF of new water main via open trenching methods, and abandoning of approximately 5,870 LF of existing sewer main and approximately 4,050 LF of existing water main.

Additional improvements include the installation of approximately 3,009 LF of asphalt concrete (AC) street overlay and slurry seal improvements and the installation of curb ramps, new laterals, lateral replumbs, manholes, cleanouts, water services, fire hydrants, valves, water meters, and other associated appurtenances. The Project would include the installation of new bike lane striping along

Logan Avenue between S. Euclid Avenue and Jarrett Court, and along Euclid Avenue, between Logan Avenue and Cervantes Avenue. Project grading would range from approximately 3-14 feet, with an estimated grading of 35,128 cubic yards (CY).

Construction methods would include:

1. Open Trenching: The open trench method of construction would be used for replacement and installation portions of the Project. Trenches are typically 4 feet wide and are dug with excavators and similar large construction equipment.
2. Abandonment: Pipeline abandonment activities would cause minimum surface/subsurface disturbance at both ends of the mains. Disturbance would be limited to cutting and abandoning exposed pipe sections. This process may involve slurry or grout material injected into the abandoned lines via manhole access. The top portion of the manhole is then typically removed, and the remaining space is backfilled and paved over.
3. Potholing: Potholing would be used to verify utility crossings. These "potholes" are made by using vacuum-type equipment to open small holes into the street or pavement.
4. Point Repairs: Point repairs would include replacing a portion of a pipe segment by open trench excavation methods in which localized structural defects have been identified. Generally, point repairs are confined to an eight-foot section of pipe.

The Valencia Park Improvements 2 project is part of the City of San Diego's ongoing water and sewer main replacement program. The existing water and sewer mains are old and are nearing the end of their service life. Construction of the Project would reduce maintenance requirements, correct hydraulic deficiencies, improve reliability and accessibility, and bring the water and sewer main system up to current design standards.

The contractor would comply with all applicable requirements described in the latest edition of the Standard Specifications for Public Works Construction ("GREENBOOK") and the latest edition of the City of San Diego Standard Specifications for Public Works Construction ("WHITEBOOK"). A traffic control plan would be prepared and implemented in accordance with the California Manual on Uniform Traffic Control Devices (CA MUTCD). With respect to Storm Water, all projects would be reviewed for compliance with the most recent version of the City's Storm Water Standards Manual and Municipal Separate Storm Sewer System (MS4) Permit.

III. ENVIRONMENTAL SETTING

The Valencia Park Improvements 2 Project is located within Council District 4 along portions of the following streets within the Encanto Neighborhoods Community Planning Area: Alpha Street, Bonita Drive, Cervantes Avenue, Coban Street, Euclid Avenue, Gina Place, Gwen Street, La Paz Drive, Logan Avenue, Magnus Way, Mann Avenue, North Belmont Avenue, North Clairmont Avenue, North Drexel Avenue, Olvera Avenue, Palin Street, Pelusa Street, Reynolds Street, Solola Avenue, South 49th Street, South 50th Street, South Willie James Jones Avenue, and Wyconda Way. See Attachment 1, Vicinity Map.

The Project would occur within urban developed areas, in the public right-of-way and public utility easements of previously disturbed private property within the City of San Diego. Surrounding land uses include existing residential and commercial developments. See attached MND for the environmental setting for the overall Citywide Pipeline Projects.

IV. ENVIRONMENTAL DETERMINATION

The City previously prepared and adopted the Citywide Pipelines Projects MND No. 255100/SCH No. 2011091045. Based on all available information in light of the entire record, the analysis in this Addendum, and pursuant to Section 15162 of the State CEQA Guidelines, the City has determined the following:

- There are no substantial changes proposed in the project that will require major revisions of the previous environmental document due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;
- Substantial changes have not occurred with respect to the circumstances under which the project is undertaken which will require major revisions of the previous environmental document due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or
- There is no new information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous environmental document was certified as complete or was adopted, shows any of the following:
 - a. The project will have one or more significant effects not discussed in the previous environmental document;
 - b. Significant effects previously examined will be substantially more severe than shown in the previous environmental document;
 - c. Mitigation measures or alternatives previously found not to be feasible would, in fact, be feasible, and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or
 - d. Mitigation measures or alternatives that are considerably different from those analyzed in the previous environmental document would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

Based upon a review of the current project, none of the situations described in Sections 15162 and 15164 of the State CEQA Guidelines apply. No changes in circumstances have occurred, and no new information of substantial importance has manifested, which would result in new significant or substantially increased adverse impacts as a result of the project. Therefore, this Addendum has

been prepared in accordance with Section 15164 of the CEQA State Guidelines. Public review of this Addendum is not required per CEQA.

V. IMPACT ANALYSIS

The following includes the project-specific environmental review pursuant to the CEQA. The analysis in this document evaluates the adequacy of the MND relative to the Project. As indicated in Table 1, the MND identifies the Project would have potential for significant impacts, and mitigation measures would ensure impacts would remain less than significant. The impact analysis discussion further details those issue areas identified as potentially significant in the MND: Historical Resources, Land Use, and Paleontological Resources.

Table 1: Impact Assessment Summary

Environmental Issues	Citywide Pipelines MND Significance	Proposed Project Significance	Proposed Project Mitigation
Aesthetics	LTSM	LTS	No
Agriculture and Forestry Resources	NI	LTS	No
Air Quality	LTS	LTS	No
Biological Resources	LTSM	LTS	No
Cultural Resources	LTSM	LTSM	Yes
Geology/Soils	LTS	LTS	No
Greenhouse Gas Emissions	LTS	LTS	No
Hazards and Hazardous Materials	LTS	LTS	No
Hydrology/Water Quality	NI	NI	No
Land Use/Planning	LTSM	LTS	No
Mineral Resources	NI	NI	No
Noise	LTS	LTS	No
Population/Housing	NI	NI	No
Public Services	NI	NI	No
Recreation	NI	NI	No
Transportation/Traffic	LTS	LTS	No
Utilities/Service Systems	LTS	LTS	No
Mandatory Findings Significance	LTSM	LTSM	Yes

NI = No Impact; LTS = Less than Significant; LTSM = Less than Significant with Mitigation

Based on the following analysis and information, there is no evidence that the project would require a major change to the Mitigated Negative Declaration. The project would not result in any new

significant impact, nor would a substantial increase in the severity of impacts from that described in the Mitigated Negative Declaration result.

Aesthetics

Citywide Pipelines Project MND

The Citywide Pipelines Project MND concluded that near-term or future projects may involve work that could affect street trees, historic buildings, or a state scenic highway. If located within a historic district, the project would be required to comply with mitigation measures to reduce impacts to scenic resources to below a level of significance.

Project

The Project would not impact any historical structures and is not located within a historic district or within or adjacent to a state scenic highway. No impact to aesthetic resources would occur, and no mitigation is required.

Cultural Resources

Citywide Pipelines Project MND

Historical – Built Environment

The Citywide Pipelines Project MND concluded that pipeline projects located within the public right-of-way and City easements could result in significant environmental impacts relating to historical resources. The MND included mitigation to reduce impacts to historical resources to below a level of significance. Associated street improvements, if located within a historic district, would be required to comply with the mitigation measures incorporated in the MND.

Archaeological Resources

The Citywide Pipelines Project MND concluded that pipeline projects located within the public right-of-way and City easements could result in significant environmental impacts relating to archaeological resources, which included mitigation to reduce impacts to archaeological resources to below a level of significance.

Paleontological Resources

The Citywide Pipelines Project MND concluded that pipeline projects may include work that is underlain by sensitive fossil-bearing formations that could result in significant environmental impacts relating to paleontological resources. Excavation within previously undisturbed formations at a depth of 10 or more feet would be monitored by a qualified paleontologist or paleontological monitor. Mitigation was incorporated into the MND to reduce impacts to paleontological resources to below a level of significance.

Project

Historical – Built Environment

The Project would not impact any historical structures and is not located within a historic district or within or adjacent to a state scenic highway. No impact to historical resources (built environment) would occur.

Archaeological Resources

Based on the location of the Project and proposed ground-disturbing activities, there would be a potential that subsurface cultural material could be present underneath the paved portions of the project alignment. Any excavation of previously undisturbed or disturbed native soil that has the potential to contain sensitive archaeological resources could result in a significant impact. Qualified City Staff (QCS) reviewed the project and determined that due to the sensitivity of the site, archeological and Native American monitoring would be required.

To reduce potential archaeological resource impacts to below a level of significance, all excavation and trenching activities occurring within or near previously recorded prehistoric cultural resources would be monitored by a qualified archaeologist or archaeological monitor and Native American monitor. Any significant archaeological resources encountered would be recovered and curated in accordance with the Mitigation Monitoring and Reporting Program (MMRP) detailed in Section VI.

Paleontological Resources

Grading is anticipated to exceed 1,000 CY and 10 ft deep in high-sensitivity formations. Therefore, paleontological monitoring is required. The Citywide Pipelines Project MND proposed paleontological monitoring as mitigation. After the adoption of the Citywide Pipelines MND, the City of San Diego updated the San Diego Municipal Code (SDMC), and section 142.0151, "Paleontological Resources Requirements for Grading Activities," became effective 4-21-2018. SDMC 142.0151 (a) states that Paleontological resources monitoring shall be required in accordance with the General Grading Guidelines for Paleontological Resources in the Land Development Manual for any of the following: (1) Grading that involves 1,000 cubic yards or greater, and 10 feet or greater in depth, in a High Resource Potential Geologic Deposit/Formation/Rock Unit." Therefore, the General Grading Guidelines for Paleontological Resources shall be placed on grading plans and implemented as required pursuant to LDC section 142.0151.

Biological Resources/Land Use (MSCP)

Citywide Pipelines Project MND

The Citywide Pipelines Project MND No. 255100 determined that future pipeline projects could involve replacing and installing utility infrastructure in proximity to the City's Multi-Habitat Planning Area (MHPA). Activities that occur within 100 feet of the MHPA would be required to implement the MHPA Land Use Adjacency Guidelines (LUAG). Measures to reduce potential indirect impacts to the City's MHPA have been included in the MMRP contained within Section V of the Citywide Pipelines MND. Impacts to biological resources and land use were determined to be less than significant with mitigation incorporated.

Project

The Project is not adjacent to the MHPA; therefore, the MHPA LUAG would not apply. Impacts would be less than significant, and no mitigation is required.

VI. MITIGATION, MONITORING, AND REPORTING PROGRAM (MMRP) INCORPORATED INTO THE PROJECT

Cultural Resources (Archaeology)

I. Prior to Permit Issuance or Bid Opening/Bid Award

- A. Entitlements Plan Check
 - 1. Prior to permit issuance or Bid Opening/Bid Award, whichever is applicable, the Assistant Deputy Director (ADD) Environmental designee shall verify that the requirements for Archaeological Monitoring and Native American monitoring have been noted on the applicable construction documents through the plan check process.
- B. Letters of Qualification have been submitted to ADD
 - 1. Prior to Bid Award, the applicant shall submit a letter of verification to Mitigation Monitoring Coordination (MMC) identifying the Principal Investigator (PI) for the project and the names of all persons involved in the archaeological monitoring program, as defined in the City of San Diego Historical Resources Guidelines (HRG). If applicable, individuals involved in the archaeological monitoring program must have completed the 40-hour HAZWOPER training with certification documentation.
 - 2. MMC will provide a letter to the applicant confirming the qualifications of the PI and all persons involved in the archaeological monitoring of the project meet the qualifications established in the HRG.
 - 3. Prior to the start of work, the applicant must obtain written approval from MMC for any personnel changes associated with the monitoring program.

II. Prior to the Start of Construction

- A. Verification of Records Search
 - 1. The PI shall provide verification to MMC that a site-specific records search (1/4-mile radius) has been completed. Verification includes, but is not limited to, a copy of a confirmation letter from South Coastal Information Center, or, if the search was in-house, a letter of verification from the PI stating that the search was completed.
 - 2. The letter shall introduce any pertinent information concerning expectations and probabilities of discovery during trenching and/or grading activities.
 - 3. The PI may submit a detailed letter to MMC requesting a reduction to the ¼ mile radius.
- B. PI Shall Attend Precon Meetings
 - 1. Prior to beginning any work that requires monitoring; the Applicant shall arrange a Precon Meeting that shall include the PI, Native American consultant/monitor (where Native American resources may be impacted), Construction Manager (CM) and/or Grading Contractor, Resident Engineer (RE), Building Inspector (BI), if appropriate,

and MMC. The qualified Archaeologist and Native American Monitor shall attend any grading/excavation-related Precon Meetings to make comments and/or suggestions concerning the Archaeological Monitoring program with the Construction Manager and/or Grading Contractor.

- a. If the PI is unable to attend the Precon Meeting, the Applicant shall schedule a focused Precon Meeting with MMC, the PI, RE, CM or BI, if appropriate, prior to the start of any work that requires monitoring.
2. Acknowledgement of Responsibility for Curation (CIP or Other Public Projects)
The applicant shall submit a letter to MMC acknowledging their responsibility for the cost of curation associated with all phases of the archaeological monitoring program.
3. Identify Areas to be Monitored
 - a. Prior to the start of any work that requires monitoring, the PI shall submit an Archaeological Monitoring Exhibit (AME) (with verification that the AME has been reviewed and approved by the Native American consultant/monitor when Native American resources may be impacted) based on the appropriate construction documents (reduced to 11x17) to MMC identifying the areas to be monitored including the delineation of grading/excavation limits.
 - b. The AME shall be based on the results of a site-specific records search as well as information regarding the age of existing pipelines, laterals and associated appurtenances and/or any known soil conditions (native or formation).
 - c. MMC shall notify the PI that the AME has been approved.
4. When Monitoring Will Occur
 - a. Prior to the start of any work, the PI shall also submit a construction schedule to MMC through the RE indicating when and where monitoring will occur.
 - b. The PI may submit a detailed letter to MMC prior to the start of work or during construction requesting a modification to the monitoring program. This request shall be based on relevant information such as review of final construction documents which indicate conditions such as age of existing pipe to be replaced, depth of excavation and/or site graded to bedrock, etc., which may reduce or increase the potential for resources to be present.
5. Approval of AME and Construction Schedule
After approval of the AME by MMC, the PI shall submit to MMC written authorization of the AME and Construction Schedule from the CM.

III. During Construction

- A. Monitor Shall be Present During Grading/Excavation/Trenching
 1. The Archaeological Monitor shall be present full-time during all soil disturbing and grading/excavation/trenching activities that could result in impacts to archaeological resources as identified on the AME. **The Construction Manager is responsible for notifying the RE, PI, and MMC of changes to any construction activities such as in the case of a potential safety concern within the area being monitored. In certain circumstances, OSHA safety requirements may necessitate modification of the AME.**
 2. The Native American consultant/monitor shall determine the extent of their presence during soil disturbing and grading/excavation/trenching activities based on the AME and provide that information to the PI and MMC. If prehistoric resources are encountered during the Native American consultant/monitor's absence, work shall

stop, and the Discovery Notification Process detailed in Section III.B-C and IV.A-D shall commence.

3. The PI may submit a detailed letter to MMC during construction requesting a modification to the monitoring program when a field condition such as modern disturbance post-dating the previous grading/trenching activities, presence of fossil formations, or when native soils are encountered that may reduce or increase the potential for resources to be present.
 4. The archaeological and Native American consultant/monitor shall document field activity via the Consultant Site Visit Record (CSVR). The CSVRS shall be faxed by the CM to the RE on the first day of monitoring, the last day of monitoring, monthly **(Notification of Monitoring Completion)**, and in the case of ANY discoveries. The RE shall forward copies to MMC.
- B. Discovery Notification Process
1. In the event of a discovery, the Archaeological Monitor shall direct the contractor to temporarily divert all soil-disturbing activities, including but not limited to digging, trenching, excavating or grading activities in the area of discovery and in the area reasonably suspected to overlay adjacent resources and immediately notify the RE or BI, as appropriate.
 2. The Monitor shall immediately notify the PI (unless the Monitor is the PI) of the discovery.
 3. The PI shall immediately notify MMC by phone of the discovery, and shall also submit written documentation to MMC within 24 hours by fax or email with photos of the resource in context, if possible.
 4. No soil shall be exported off-site until a determination can be made regarding the significance of the resource specifically if Native American resources are encountered.
- C. Determination of Significance
1. The PI and Native American consultant/monitor, where Native American resources are discovered shall evaluate the significance of the resource. If Human Remains are involved, follow the protocol in Section IV below.
 - a. The PI shall immediately notify MMC by phone to discuss significance determination and shall also submit a letter to MMC indicating whether additional mitigation is required.
 - b. If the resource is significant, the PI shall submit an Archaeological Data Recovery Program (ADRP) and obtain written approval of the program from MMC, CM and RE. ADRP and any mitigation must be approved by MMC, RE and/or CM before ground-disturbing activities in the area of discovery will be allowed to resume.
Note: If a unique archaeological site is also an historical resource as defined in CEQA Section 15064.5, then the limits on the amount(s) that a project applicant may be required to pay to cover mitigation costs as indicated in CEQA Section 21083.2 shall not apply.
 - (1). Note: For pipeline trenching and other linear projects in the public Right-of-Way, the PI shall implement the Discovery Process for Pipeline Trenching projects identified below under "D."
 - c. If the resource is not significant, the PI shall submit a letter to MMC indicating that artifacts will be collected, curated, and documented in the Final Monitoring Report. The letter shall also indicate that no further work is required.

- (1). Note: For Pipeline Trenching and other linear projects in the public right-of-way, if the deposit is limited in size, both in length and depth; the information value is limited and is not associated with any other resource; and there are no unique features/artifacts associated with the deposit, the discovery should be considered not significant.
 - (2). Note, for Pipeline Trenching and other linear projects in the public right-of-way, if significance can not be determined, the Final Monitoring Report and Site Record (DPR Form 523A/B) shall identify the discovery as Potentially Significant.
- D. Discovery Process for Significant Resources - Pipeline Trenching and other Linear Projects in the Public Right-of-Way
- The following procedure constitutes adequate mitigation of a significant discovery encountered during pipeline trenching activities or for other linear project types within the Public Right-of-Way including but not limited to excavation for jacking pits, receiving pits, laterals, and manholes to reduce impacts to below a level of significance:
- 1. Procedures for documentation, curation and reporting
 - a. One hundred percent of the artifacts within the trench alignment and width shall be documented in situ, to include photographic records, plan view of the trench and profiles of side walls, recovered, photographed after cleaning and analyzed and curated. The remainder of the deposit within the limits of excavation (trench walls) shall be left intact.
 - b. The PI shall prepare a Draft Monitoring Report and submit it to MMC via the RE as indicated in Section VI-A.
 - c. The PI shall be responsible for recording (on the appropriate State of California Department of Park and Recreation forms-DPR 523 A/B) the resource(s) encountered during the Archaeological Monitoring Program in accordance with the City's Historical Resources Guidelines. The DPR forms shall be submitted to the South Coastal Information Center for either a Primary Record or SDI Number and included in the Final Monitoring Report.
 - d. The Final Monitoring Report shall include a recommendation for monitoring of any future work in the vicinity of the resource.

IV. Discovery of Human Remains

If human remains are discovered, work shall halt in that area and no soil shall be exported off-site until a determination can be made regarding the provenance of the human remains; and the following procedures as set forth in CEQA Section 15064.5(e), the California Public Resources Code (Sec. 5097.98) and State Health and Safety Code (Sec. 7050.5) shall be undertaken:

- A. Notification
 - 1. Archaeological Monitor shall notify the RE or BI, as appropriate, MMC, and the PI, if the Monitor is not qualified as a PI. MMC will notify the appropriate Senior Planner in the Environmental Analysis Section (EAS) of the Development Services Department to assist with the discovery notification process.
 - 2. The PI shall notify the Medical Examiner after consultation with the RE, either in person or via telephone.
- B. Isolate discovery site

1. Work shall be directed away from the location of the discovery and any nearby area reasonably suspected to overlay adjacent human remains until a determination can be made by the Medical Examiner in consultation with the PI concerning the provenience of the remains.
 2. The Medical Examiner, in consultation with the PI, will determine the need for a field examination to determine the provenience.
 3. If a field examination is not warranted, the Medical Examiner will determine with input from the PI, if the remains are or are most likely to be of Native American origin.
- C. If Human Remains **ARE** determined to be Native American
1. The Medical Examiner will notify the Native American Heritage Commission (NAHC) within 24 hours. By law, **ONLY** the Medical Examiner can make this call.
 2. NAHC will immediately identify the person or persons determined to be the Most Likely Descendent (MLD) and provide contact information.
 3. The MLD will contact the PI within 24 hours or sooner after the Medical Examiner has completed coordination, to begin the consultation process in accordance with CEQA Section 15064.5(e), the California Public Resources and Health & Safety Codes.
 4. The MLD will have 48 hours to make recommendations to the property owner or representative for the treatment or disposition with proper dignity of the human remains and associated grave goods.
 5. Disposition of Native American Human Remains will be determined between the MLD and the PI, and, if:
 - a. The NAHC is unable to identify the MLD, OR the MLD failed to make a recommendation within 48 hours after being notified by the Commission, OR;
 - b. The landowner or authorized representative rejects the recommendation of the MLD and mediation in accordance with PRC 5097.94 (k) by the NAHC fails to provide measures acceptable to the landowner, THEN
 - c. To protect these sites, the landowner shall do one or more of the following:
 - (1) Record the site with the NAHC;
 - (2) Record an open space or conservation easement; or
 - (3) Record a document with the County.
 - d. Upon the discovery of multiple Native American human remains during a ground-disturbing land development activity, the landowner may agree that additional conferral with descendants is necessary to consider culturally appropriate treatment of multiple Native American human remains. Culturally appropriate treatment of such a discovery may be ascertained from a review of the site utilizing cultural and archaeological standards. Where the parties are unable to agree on the appropriate treatment measures the human remains and items associated and buried with Native American human remains shall be reinterred with appropriate dignity, pursuant to Section 5.c., above.
- D. If Human Remains are **NOT** Native American
1. The PI shall contact the Medical Examiner and notify them of the historic era context of the burial.
 2. The Medical Examiner will determine the appropriate course of action with the PI and City staff (PRC 5097.98).
 3. If the remains are of historic origin, they shall be appropriately removed and conveyed to the San Diego Museum of Man for analysis. The decision for the

internment of the human remains shall be made in consultation with MMC, EAS, the applicant/landowner, any known descendant group, and the San Diego Museum of Man.

V. Night and/or Weekend Work

- A. If night and/or weekend work is included in the contract
 - 1. When night and/or weekend work is included in the contract package, the extent and timing shall be presented and discussed at the precon meeting.
 - 2. The following procedures shall be followed.
 - a. No Discoveries
In the event that no discoveries were encountered during night and/or weekend work, the PI shall record the information on the CSVR and submit it to MMC via fax by 8 a.m. of the next business day.
 - b. Discoveries
All discoveries shall be processed and documented using the existing procedures detailed in Sections III - During Construction, and IV - Discovery of Human Remains. The discovery of human remains shall always be treated as a significant discovery.
 - c. Potentially Significant Discoveries
If the PI determines that a potentially significant discovery has been made, the procedures detailed under Section III - During Construction and IV - Discovery of Human Remains shall be followed.
 - d. The PI shall immediately contact the RE and MMC, or by 8 a.m. of the next business day to report and discuss the findings as indicated in Section III-B, unless other specific arrangements have been made.
- B. If night and/or weekend work becomes necessary during the course of construction
 - 1. The Construction Manager shall notify the RE, or BI, as appropriate, a minimum of 24 hours before the work is to begin.
 - 2. The RE, or BI, as appropriate, shall notify MMC immediately.
- C. All other procedures described above shall apply, as appropriate.

VI. Post Construction

- A. Submittal of Draft Monitoring Report
 - 1. The PI shall submit two copies of the Draft Monitoring Report (even if negative), prepared in accordance with the Historical Resources Guidelines (Appendix C/D) which describes the results, analysis, and conclusions of all phases of the Archaeological Monitoring Program (with appropriate graphics) to MMC via the RE for review and approval within 90 days following the completion of monitoring. **It should be noted that if the PI is unable to submit the Draft Monitoring Report within the allotted 90-day timeframe as a result of delays with analysis, special study results or other complex issues, a schedule shall be submitted to MMC establishing agreed due dates and the provision for submittal of monthly status reports until this measure can be met.**
 - a. For significant archaeological resources encountered during monitoring, the Archaeological Data Recovery Program or Pipeline Trenching Discovery Process shall be included in the Draft Monitoring Report.
 - b. Recording Sites with State of California Department of Parks and Recreation

- The PI shall be responsible for recording (on the appropriate State of California Department of Park and Recreation forms-DPR 523 A/B) any significant or potentially significant resources encountered during the Archaeological Monitoring Program in accordance with the City's Historical Resources Guidelines, and submittal of such forms to the South Coastal Information Center with the Final Monitoring Report.
2. MMC shall return the Draft Monitoring Report to the PI via the RE for revision or, for preparation of the Final Report.
 3. The PI shall submit a revised Draft Monitoring Report to MMC via the RE for approval.
 4. MMC shall provide written verification to the PI of the approved report.
 5. MMC shall notify the RE or BI, as appropriate, of receipt of all Draft Monitoring Report submittals and approvals.
- B. Handling of Artifacts
1. The PI shall be responsible for ensuring that all cultural remains collected are cleaned and cataloged
 2. The PI shall be responsible for ensuring that all artifacts are analyzed to identify function and chronology as they relate to the history of the area, that faunal material is identified as to species, and that specialty studies are completed, as appropriate.
- C. Curation of artifacts: Accession Agreement and Acceptance Verification
1. The PI shall be responsible for ensuring that all artifacts associated with the survey, testing and/or data recovery for this project are permanently curated with an appropriate institution. This shall be completed in consultation with MMC and the Native American representative, as applicable.
 2. When applicable to the situation, the PI shall include written verification from the Native American consultant/monitor indicating that Native American resources were treated in accordance with state law and/or applicable agreements. If the resources were reinterred, verification shall be provided to show what protective measures were taken to ensure no further disturbance occurs in accordance with Section IV – Discovery of Human Remains, Subsection C.
 3. The PI shall submit the Accession Agreement and catalog record(s) to the RE or BI, as appropriate for donor signature, with a copy submitted to MMC.
 4. The RE or BI, as appropriate, shall obtain a signature on the Accession Agreement and shall return to PI with a copy submitted to MMC.
 5. The PI shall include the Acceptance Verification from the curation institution in the Final Monitoring Report submitted to the RE or BI and MMC.
- D. Final Monitoring Report(s)
1. The PI shall submit one copy of the approved Final Monitoring Report to the RE or BI, as appropriate, and one copy to MMC (even if negative), within 90 days after notification from MMC of the approved report.
 2. The RE shall, in no case, issue the Notice of Completion until receiving a copy of the approved Final Monitoring Report from MMC that includes the Acceptance Verification from the curation institution.

VII. SIGNIFICANCE IMPACT

The MND identified that all impacts would be mitigated to below a level of significance through mitigation. This Addendum also identifies that all significant Project impacts would be mitigated to below a level of significance, consistent with the previously certified MND.

VIII. CERTIFICATION

Copies of the addendum, the adopted MND, the MMRP, and associated project-specific technical appendices, if any, may be accessed on the City's CEQA webpage at <https://www.sandiego.gov/ceqa/final>.
