Exhibits and other materials to provide:
Exhibits and other project-related presentation materials (e.g. site plan, elevations, exhibits showing addition/remodel areas, etc.) although not required, are extremely helpful in informing the Advisory Board's review and understanding of a project. The following exhibits and materials are recommended and if provided by the applicant, will be attached to the agenda and posted to the City's website: https://www.sandiego.gov/planning/community/profiles/lajolla/pddoab for view by the public:

- All exhibits should be sized to 8 ½" X 11" format
- Exhibits, which can contain the following:
  A. A site plan showing the street, the property line on all sides, the setbacks on all sides, and the setbacks from the property lines to the neighboring building;
  B. Elevations for all sides;
  C. If the proposal is for a remodel, a clear delineation of what part of the proposed structure is new construction
  D. If the proposal is for a building with more than one story, show:
    - how the upper story sits on the story beneath it (setback of the upper story from the lower story);
    - the distance from the proposed upper story to comparable stories of the neighboring buildings; and
    - the height of neighboring buildings compared to the proposed structure's height.
- Any surveys that indicate similarities in floor area or architectural style in the surrounding neighborhood

- Personal contact information of the property owners of the project should not be included, unless they are the "owner/applicant" and they are the designated point of contact

The Advisory Board members are very keen to know that the neighbors in the immediate vicinity have been noticed and their views noted. Community conformity, setbacks, FAR, parking, view corridors, bulk & scale, and articulation are key discussion points on all projects. Action Items will be heard first.

Thank you,

Please return the information requested to no later than a week before the scheduled meeting date:

CONCRETE DESIGNS INC. - SPECIFICATIONS

SECTION 03450 - ARCHITECTURAL PRECAST CONCRETE - PLANT CAST

PART 1 - GENERAL

SUMMARY

This Section refers to architectural precast concrete units.
Architectural precast concrete includes the following:
Precast concrete units as defined in the architectural plans. Potentially includes wall caps, columns, balustrade, quoins, pavers, finials, moldings or any other decorative element designed to be cast out of concrete.
These are non-structural, self supporting units.

SUBMITTALS

Product data and instructions for manufactured materials and products.
Shop drawings prepared by CDI showing complete information concerning the precast concrete units. Indicate member dimensions and side view. Unless otherwise noted, anchors will be embedded in a standard configuration.
Samples - Submit samples of color options and texture options for selection process.

QUALITY ASSURANCE

Fabricator Qualifications: CDI has over 50 years of successful experience in fabrication of architectural precast concrete units. Fabricator has sufficient production capacity to produce, transport and deliver required units without causing delay in the project.

Design modifications will be made only as necessary to meet field conditions and to ensure proper fitting of the work and only as acceptable to the Architect or Project Manager. Maintain general design concept shown without increasing or decreasing sizes of members or altering profiles and alignment shown without architects approval. Modifications may need to be considered in view of budget constraints.

DELIVERY, STORAGE AND HANDLING

Deliver precast concrete units to project site in such quantities and at such times to assure continuity of installation. Schedules and priorities will be based on the information provided by the customer. Products to be packaged to protect the finish during transport. Precast may be a long lead time item and should be ordered accordingly.

PART 2 - PRODUCTS

REINFORCING MATERIALS

Rebar used in some product designs to insure safe handling.
Corrugated Wall Ties - Included in moldings as the mechanical fastener. 22 gauge mill galvanized steel - 7/8" x 7".
Threaded Inserts - Plastic inserts are included in very large castings such as large moldings, columns and stackable column components. These are for mechanical ties and not for lifting purposes.
Adhesives - Latex - modified mortar or equivalent used on a stable substrate in conjunction with the mechanical fastener should be used. White cement can be used to adjust the greenish color created by using the latex mortar.
Premium grade construction adhesives which come in tubes should be used for bonding columns and on flat surfaces where latex mortar cannot be used.

CONCRETE MATERIALS

Portland Cement: Type 1 Portland Cement Gray or Lehigh White
Use only one brand, type and source of supply of cement throughout the project, unless otherwise acceptable to Architect.
Coarse/Fine Aggregate - Sand and Gravel: Hard, durable, selected and graded; free of material that causes staining or reacting with cement.
Pigments: Nonfading, resistant to lime and other alkalies.
Water: Drinkable, free from foreign materials in amounts harmful to concrete and embedded steel.
Air-Entraining Admixture: Utilize standard mix designs incorporating admixtures which facilitate the workability, curing and strength of the mix.
Compressive Strength: 3500-5000 psi minimum at 28 days.

FABRICATION

General: Fabricate precast concrete units complying with manufacturing and testing procedures, quality control recommendations, and following dimensional tolerances, unless otherwise indicated.
Molds: Accurately construct molds mortar-tight and of sufficient strength to withstand pressures due to concrete placing operations and temperature changes. Maintain mold work to provide completed precast concrete units of shapes, lines and dimensions indicated, within specified fabrication tolerances.
Dimensional Tolerances of Finished Units: Ornamental architectural precast concrete, being tapered by design, is measured for length, width and thickness at the surface from which the mold is loaded maintaining plus or minus 1/16 of an inch tolerance. Overall height and width measured at face adjacent to mold at time of casting:
Surface Finish: Fabricate precast units and provide exposed surface finished as follows:
Traditional – smooth, relatively void free texture
Modern - Less voids than traditional but not typically void free.
Champagne – Lightly etched texture
Sonoran – Heavily etched texture exposing more aggregate.
Antique - High irregular, rusticated finish.
Color: Select from CDI color chart to minimize variations in color.

PART 3 - RECOMMENDED EXECUTION OF THE INSTALLATION

The successful installation requires experienced, knowledgeable installers in order to achieve a quality installation. Local building codes should be followed. Considerations for installation include:
Install precast concrete members plumb, level and in alignment. Provide temporary supports and bracing as required to maintain position, stability and alignment as members are being permanently connected.
Maintain horizontal and vertical joint alignment and uniform joint width as erection progresses.
Anchor units in final position by bolting, welding, grouting, or as otherwise indicated. Remove temporary shims, wedges and spacers as soon as possible after anchoring and grouting are completed.
Cleaning: Clean exposed facings to remove dirt and stains on units after erection and completion of joint treatments. Protect other work from damage due to cleaning operations. Do not use cleaning materials or processes that could change the character of exposed concrete finishes.

Part 4 – SETTING THE PIECES

Precast must be installed on a sound substrate with adequate adhesive applied to the bonding surface of each casting. Many substrates are suitable for application of CDI products provided they are clean and strong enough to support the weight of the castings. Fasteners, such as corrugated wall ties or threaded inserts, are included with most CDI products and should be used in conjunction with adhesives.
In addition to the fasteners, an adhesive should be used to bind the castings to substrate and to each other. Latex-modified mortar produces a strong, permanent bond, and the setting bed formed by the mortar allows for the adjustments needed for satisfying alignment. A recommended latex mortar adhesive is Custom Crete (Custom Building Product, 1-800-272-8786).
Premium-grade construction adhesives, packaged in tubes and applied with caulking guns, are recommended for bonding column halves and flat surfaces. Sikaflex-1a (Sika Corporation 1-800-933-7452) is widely available.

INSTALLING FULL-ROUND COLUMNS

Columns are manufactured and shipped in halves; they are usually installed around structural supports. Threaded inserts are cast into the columns and are used to mechanically attach the columns to the supports. The inserts should never be used to lift the columns. In Addition to the inserts, Adhesive (such as Sikaflex-1a) should be used to bond the two column haves. Nylon strap slings should be used to move the columns into place and to fold them together while the adhesive cures. Care should be taken to avoid marring the surface of the columns.
Solid grouting of the column cavities generally is not recommended as it can complicate the installation, particularly if wood supports are used. The moisture in the grout tends to cause the wood to swell and crack.
When selecting columns for applications which require structural supports, carefully view the cavity dimension to determine if the supports will fit.
The method chosen to install columns should conform to the local building codes and safe, reliable construction practices.

Part 5 - CLEAN UP AND SEALING

Precast concrete should be cleaned with masonry cleaners available from masonry specialty suppliers. At no time should acid be used.
The precast concrete should be treated as other concrete, depending on your local weather conditions. Sealer information is available from masonry product manufacturers. We suggest testing sealants an samples.

STORM WATER QUALITY NOTES CONSTRUCTION BMP'S:

THIS PROJECT SHALL COMPLY WITH ALL CURRENT REQUIREMENTS OF THE STATE PERMIT; CALIFORNIA REGIONAL QUALITY CONTROL BOARD (SDRWQCB), SAN DIEGO MUNICIPAL STORM WATER PERMIT, THE CITY OF SAN DIEGO LAND DEVELOPMENT CODE, AND THE STORM WATER STANDARDS MANUAL.

NOTES BELOW REPRESENT KEY MINIMUM REQUIREMENTS FOR BMP'S.

1. ALL REQUIREMENTS OF THE CITY OF SAN DIEGO "STORM WATER STANDARDS MANUAL" MUST BE INCORPORATED INTO THE DESIGN AND CONSTRUCTION OF THE PROPOSED GRADING/IMPROVEMENTS CONSISTENT WITH THE APPROVED STORM WATER POLLUTION PREVENTION PLAN (SWPPP) AND/OR WATER POLLUTION CONTROL PLAN (WPCP) FOR CONSTRUCTION LEVEL BMPS AND, IF APPLICABLE, THE STORM WATER QUALITY MANAGEMENT PLAN (SWQMP) FOR POST-CONSTRUCTION BMPS.

2. THE CONTRACTOR SHALL INSTALL AND MAINTAIN ALL STORM DRAIN INLET PROTECTION. INLET PROTECTION IN THE PUBLIC RIGHT-OF-WAY MUST BE TEMPORARILY REMOVED PRIOR TO A RAIN EVENT TO ENSURE NO FLOODING OCCURS AND REINSTALLED AFTER RAIN IS OVER.

3. ALL CONSTRUCTION BMPS SHALL BE INSTALLED AND PROPERLY MAINTAINED THROUGHOUT THE DURATION OF CONSTRUCTION.

4. THE CONTRACTOR SHALL ONLY GRADE, INCLUDING CLEARING AND GRUBBING, AREAS FOR WHICH THE CONTRACTOR OR QUALIFIED CONTACT PERSON CAN PROVIDE EROSION AND SEDIMENT CONTROL MEASURES.

5. THE CONTRACTOR IS RESPONSIBLE FOR ENSURING THAT ALL SUB-CONTRACTORS AND SUPPLIERS ARE AWARE OF ALL STORM WATER BMPS AND IMPLEMENT SUCH MEASURES. FAILURE TO COMPLY WITH THE APPROVED SWPPP/WPCP WILL RESULT IN THE ISSUANCE OF CORRECTION NOTICE, CITATIONS, CIVIL PENALTIES, AND/OR STOP WORK NOTICE.

6. THE CONTRACTOR OR QUALIFIED CONTACT PERSON SHALL BE RESPONSIBLE FOR CLEANUP OF ALL DEBRIS, SILT, AND MUD ON AFFECTED AND ADJACENT STREET(S) AND WITHIN STORM DRAIN SYSTEM DUE TO CONSTRUCTION VEHICLES/EQUIPTMENT AND CONSTRUCTION ACTIVITY AT HE END OF EACH WORK DAY.

ADVISORY BOARD REVIEW

San Diego Municipal Code (SDMC) Section 1510.0201(d) requires a Site Development Permit (SDP) for development within the La Jolla Shores Planned District. However, this Section allows for minor additions to be approved through a building permit without obtaining an SDP. City staff will approve additions through a building permit if the addition does not increase floor area by over 10 percent.

This project proposes to increase floor area by approximately **17 percent**. This project must be reviewed by the La Jolla Shores Advisory Board to determine if this project is consistent with the requirements of the Planned District, and to allow for input concerning whether or not the Advisory Board believes the addition to be minor in scope, per SDMC 1510.0201(d).

Please contact Melissa Garcia to be placed on a future agenda of the La Jolla Shores Advisory Board:

After the La Jolla Shores Advisory Board has reviewed the project, please provide a copy of the applicable meeting minutes.

If it is ultimately determined by City staff that this project is not minor, then an SDP will be required. Submittal guidelines for Development Permits and Approvals, including Site Development Permits, can be found on the City's web site at the following address: https://www.sandiego.gov/sites/default/files/dsdpsm_sec_04.pdf

Alvin Lin

[Comment 00037 | Page | Closed]

The property located at **8811 Nottingham Pl** , **APN 344-182-0700**, is not an individually designated resource and is not located within a designated historic district. However, San Diego Municipal Code Section 143.0212 requires City staff to review all projects impacting a parcel that contains a structure 45 years old or older to determine whether a potentially significant historical resource exists on site prior to issuance of a permit. (Info Only, No Response Required.)

During this review buildings are evaluated for eligibility under local designation criteria. The designation criteria and guidelines for their application can be found on the City's website:
https://www.sandiego.gov/sites/default/files/dsd_hrb_designation_criteria_guidelines.pdf (Informational Only; No Response or Action Required.)

More information regarding this review process can be found in Information Bulletin 580:
https://www.sandiego.gov/sites/default/files/dsdib580.pdf (Informational Only; No Response or Action Required.)

If City staff determines after review of these documents that no potentially significant historical resource exists on site, the parcel will be exempt from further historical review for five years from this date unless new information is provided that speaks to the building's eligibility for designation. (Informational Only; No Response or Action Required.)

If City staff determines that a potentially significant historical resource exists on the site, all modifications and additions will be evaluated to determine consistency with the Secretary of the Interior's Standards for Treatment of Historic Properties (Standards). If the proposed project is consistent with the Standards, the permit process may proceed and the parcel will require additional review for all future modifications. If the proposed project is not consistent with the Standards, the applicant may redesign the project or prepare a historic report that evaluates the building's integrity and eligibility under all designation criteria. (Informational Only; No Response or Action Required.)

Staff has reviewed the photos, Assessor's Building Record, water and sewer records and considered all other information received from the applicant as well as any input received through applicable public noticing and outreach and have made the following determination:

THE CITY OF SAN DIEGO
Development Services Department
1222 1st Avenue, San Diego, CA 92101

The property does not meet local designation criteria as an individually significant resource under any adopted Historical Resources Board Criteria. Therefore, no historical research report required at this time. This determination is good for 5 years from this date unless new information is provided that speaks to the building's eligibility for designation. Any applications made after 5 years will be subject to review for potential historic resources, consistent with Municipal Code requirements. (Info Only, No Response Required.)

Because the property is not eligible for designation, the plans have not been stamped by Plan-Historic staff. No Plan-Historic stamps are required for permit issuance. Should you have any questions regarding this review, please contact the "Reviewer" listed at the top of this cycle issues report. (Info Only, No Response Required.)

Plans require corrections as listed on the plan review Issue Report before a building permit can be issued. To facilitate rechecking, please provide a response for each issue and identify the sheet number of the plans upon which the issue has been addressed.

For your review to be completed in a timely manner, please review the Accela system-generated e-mail informing the applicant that a “Recheck is Required” and follow the instructions provided for the next steps. During the process of uploading documents required for the next review, the recheck, please ensure that the selected document name in Accela matches the document name indicated on the Accela Communications of the portal. Otherwise, the Accela Workflow will not advance, and a delay in plan rechecks will occur.

The project is subject to the payment of school fees. The fee amounts are calculated by and paid to the appropriate school district(s). The school district(s) will need a City of San Diego Approval Report which documents the chargeable square footage. This Approval Report may be printed from the Permit approval on-line through OpenDSD. At the time of Permit Issuance you will need to submit a receipt or Certificate of Compliance from the respective school district(s). See Information Bulletin 146 for additional information.

When required, all sheets of construction plans and the first sheet of calculations must be signed by a registered civil engineer or a licensed architect certified by the State of California. The civil engineer must stamp the above and note the date signed; architects must note the license number and renewal date. (Business and Professions Code Sections

STORM WATER QUALITY NOTES CONSTRUCTION BMP'S:

THIS PROJECT SHALL COMPLY WITH ALL CURRENT REQUIREMENTS OF THE STATE PERMIT; CALIFORNIA REGIONAL QUALITY CONTROL BOARD (SDRWQCB), SAN DIEGO MUNICIPAL STORM WATER PERMIT, THE CITY OF SAN DIEGO LAND DEVELOPMENT CODE, AND THE STORM WATER STANDARDS MANUAL.

NOTES BELOW REPRESENT KEY MINIMUM REQUIREMENTS FOR BMP'S.

1. ALL REQUIREMENTS OF THE CITY OF SAN DIEGO "STORM WATER STANDARDS MANUAL" MUST BE INCORPORATED INTO THE DESIGN AND CONSTRUCTION OF THE PROPOSED GRADING/IMPROVEMENTS CONSISTENT WITH THE APPROVED STORM WATER POLLUTION PREVENTION PLAN (SWPPP) AND/OR WATER POLLUTION CONTROL PLAN (WPCP) FOR CONSTRUCTION LEVEL BMPS AND, IF APPLICABLE, THE STORM WATER QUALITY MANAGEMENT PLAN (SWQMP) FOR POST-CONSTRUCTION BMPS.

2. THE CONTRACTOR SHALL INSTALL AND MAINTAIN ALL STORM DRAIN INLET PROTECTION. INLET PROTECTION IN THE PUBLIC RIGHT-OF-WAY MUST BE TEMPORARILY REMOVED PRIOR TO A RAIN EVENT TO ENSURE NO FLOODING OCCURS AND REINSTALLED AFTER RAIN IS OVER.

3. ALL CONSTRUCTION BMPS SHALL BE INSTALLED AND PROPERLY MAINTAINED THROUGHOUT THE DURATION OF CONSTRUCTION.

4. THE CONTRACTOR SHALL ONLY GRADE, INCLUDING CLEARING AND GRUBBING, AREAS FOR WHICH THE CONTRACTOR OR QUALIFIED CONTACT PERSON CAN PROVIDE EROSION AND SEDIMENT CONTROL MEASURES.

5. THE CONTRACTOR IS RESPONSIBLE FOR ENSURING THAT ALL SUB-CONTRACTORS AND SUPPLIERS ARE AWARE OF ALL STORM WATER BMPS AND IMPLEMENT SUCH MEASURES. FAILURE TO COMPLY WITH THE APPROVED SWPPP/WPCP WILL RESULT IN THE ISSUANCE OF CORRECTION NOTICE, CITATIONS, CIVIL PENALTIES, AND/OR STOP WORK NOTICE.

6. THE CONTRACTOR OR QUALIFIED CONTACT PERSON SHALL BE RESPONSIBLE FOR CLEANUP OF ALL DEBRIS, SILT, AND MUD ON AFFECTED AND ADJACENT STREET(S) AND WITHIN STORM DRAIN SYSTEM DUE TO CONSTRUCTION VEHICLES/EQUIPTMENT AND CONSTRUCTION ACTIVITY AT HE END OF EACH WORK DAY.

7. THE CONTRACTOR SHALL PROTECT NEW AND EXISTING STORM WATER CONVEYANCE SYSTEMS FROM SEDIMENTATION, CONCRETE RINSE, OR OTHER CONSTRUCTION-RELATED DEBRIS AND DISCHARGES WITH THE APPROPRIATE BMPS THAT ARE ACCEPTABLE TO THE CITY RESIDENT ENGINEER AND AS INDICATED IN THE SWPPP/WPCP

8. THE CONTRACTOR OR QUALIFIED CONTACT PERSON SHALL CLEAR DEBRIS, SILT, AND MUD FROM ALL DITCHED AND SWALES PRIOR TO AND WITHIN 3 BUSINESS DAYS AFTER EACH RAIN EVENT OR PRIOR TO THE NEXT RAIN EVENT, WHICHEVER IS SOONER.

9. IF A NON-STORM WATER DISCHARGE LEAVES THE SITE, THE CONTRACTOR SHALL IMMEDIATELY STOP THE ACTIVITY AND REPAIR THE DAMAGES. THE CONTRACTOR SHALL NOTIFY THE CITY RESIDENT ENGINEER OF THE DISCHARGE, PRIOR TO RESUMING CONSTRUCTION ACTIVITY. ANY AND ALL WASTE MATERIAL, SEDIMENT, AND DEBRIS FROM EACH NON-STORM WATER DISCHARGE SHALL BE REMOVED FROM THE STORM DRAIN CONVEYANCE SYSTEM AND PROPERLY DISPOSED OF BY THE CONTRACTOR.

10. EQUIPMENT AND WORKERS FOR EMERGENCY WORK SHALL BE MADE AVAILABLE AT ALL TIMES. ALL NECESSARY MATERIALS SHALL BE STOCKPILED ONSITE AT CONVENIENT LOCATIONS TO FACILITATE RAPID DEPLOYMENT OF CONSTRUCTION BMPS WHEN RAIN IS IMMINENT.

11. THE CONTRACTOR SHALL RESTORE AND MAINTAIN ALL EROSION AND SEDIMENT CONTROL BMPS TO WORKING ORDER YEAR-ROUND.

12. THE CONTRACTOR SHALL INSTALL ADDITIONAL EROSION AND SEDIMENT CONTROL MEASURES DUE TO UNFORESEEN CIRCUMSTANCES TO PREVENT NON-STORM WATER AND SEDIMENT-LADEN DISCHARGES.

13. THE CONTRACTOR SHALL BE RESPONSIBLE AND SHALL TAKE NECESSARY PRECAUTIONS TO PREVENT PUBLIC TRESPASS ONTO AREAS WHERE IMPOUNDED WATERS CREATE A HAZARDOUS CONDITION.

14. ALL EROSION AND SEDIMENT CONTROL MEASURES PROVIDED PER THE APPROVED SWPPP/WPCP SHALL BE INSTALLED AND MAINTAINED. ALL EROSION AND SEDIMENT CONTROLS FOR INTERIM CONDITIONS SHALL BE PROPERLY DOCUMENTED AND INSTALLED TO THE SATISFACTION OF THE CITY RESIDENT ENGINEER.

15. AS NECESSARY, THE CITY RESIDENT ENGINEER SHALL SCHEDULE MEETINGS FOR THE PROJECT TEAM (GENERAL CONTRACTOR, QUALIFIED CONTACT PERSON, EROSION CONTROL SUBCONTRACTOR IF ANY, ENGINEER OF WORK, OWNER/DEVELOPER, AND THE CITY RESIDENT ENGINEER) TO EVALUATE THE ADEQUACY OF THE EROSION AND SEDIMENT CONTROL MEASURES AND OTHER BMPS RELATIVE TO ANTICIPATED CONSTRUCTION ACTIVITIES.

16. THE CONTRACTOR OR QUALIFIED CONTACT PERSON SHALL CONDUCT VISUAL INSPECTIONS AND MAINTAIN ALL BMPS DAILY AND AS NEEDED. VISUAL INSPECTIONS AND MAINTENANCE OF ALL BMPS SHALL BE CONDUCTED BEFORE, DURING, AND AFTER EVERY RAIN EVENT AND EVERY 24 HOURS DURING ANY PROLONGED RAIN EVENT. THE CONTRACTOR SHALL MAINTAIN AND REPAIR ALL BMPS AS SOON AS POSSIBLE AS SAFETY ALLOWS.

17. CONSTRUCTION ENTRANCE AND EXIT AREA. TEMPORARY CONSTRUCTION ENTRANCE AND EXITS SHALL BE CONSTRUCTED IN ACCORDANCE WITH CASQA FACT SHEET TC-10R CALTRANS FACT SHEET TC-01 TO PREVENT TRACKING OF SEDIMENT AND OTHER POTENTIAL POLLUTANTS ONTO PAVED SURFACES AND TRAVELED WAYS. WIDTH SHALL BE 10' OR THE MINIMUM NECESSARY TO ACCOMMODATE VEHICLES AND EQUIPMENT WITHOUT BY-PASSING THE ENTRANCE. (a) NON-STORM WATER DISCHARGE SHALL BE EFFECTIVELY MANAGED PER THE SAN DIEGO MUNICIPAL CODE CHAPTER 4, ARTICLE 3, DIVISION 3 "STORM WATER MANAGEMENT AND DISCHARGE CONTROL".

NOTES

1. PROVIDE BUILDING ADDRESS NUMBERS VISIBLE AND LEGIBLE FRONT THE STREET OR ROAD FRONTING THE PROPERTY PER FHPS POLICY P-00-6 (UFC 901.4.4)
2. THIS PROJECT MUST COMPLY WITH THE MUNICIPAL CODE REQUIREMENTS FOR MAXIMUM HEIGHT OF THE STRUCTURE NOT TO EXCEED 30 FEET (SDMC, SECTIONS 131.0444 AND 132.0505) HIGHEST POINT ON ROOF EQUIPMENT, PIPE, VENT, ANTENNA OR OTHER PROJECTION SHALL NOT EXCEED 30 FEET ABOVE GRADE.
3. EXISTING SITE DRAINAGE PATTERN TO REMAIN. NO ADDITIONAL RUNOFF TO PUBLIC RIGHT OF WAY
4. LIGHTING SHALL BE UNOBTRUSIVE AND SHIELDED SO AS NOT TO FALL EXCESSIVELY ON ADJACENT PROPERTIES.
5. ALL OF THE PROPERTY NOT USED OR OCCUPIED BY STRUCTURES, UNPLANTED RECREATIONAL AREAS, WALKS AND DRIVEWAYS SHALL BE LANDSCAPED AND MAY INCLUDE NATIVE MATERIALS, AND IN NO CASE SHALL THIS LANDSCAPED AREA BE LESS THAN 30 PERCENT OF THE TOTAL PARCEL AREA
6. STORM WATER FROM DOWNSPOUTS AND IMPERVIOUS AREAS MUST BE ROUTED TO EITHER LANDSCAPE AREAS OR PLANTER BOXES PRIOR TO REACHING THE PUBLIC DRAIN SYSTEM.
7. ALL EXISTING AND PROPOSED EASEMENT HAVE BEEN SHOWN ON THE SITE PLAN, NO EXISTING EASEMENTS
