1 INTRODUCTION

Ninyo & Moore was retained by HELIX Environmental Planning on behalf of Bridge West Group (herein referred to as the client) to perform a Phase I Environmental Site Assessment (ESA) of the property located at 11011 Torreyana Road in San Diego, California (hereinafter referred to as the site) and is identified by Accessor Parcel Number (APN) 340-010-2900. The following sections discuss the purpose, the involved parties, the scope of services, and the limitations and exceptions associated with the Phase I ESA.

1.1 Purpose

The objective of this ESA is to identify, to the extent feasible pursuant to the process described in ASTM E1527, recognized environmental conditions (RECs), which are defined by ASTM as "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment." Ninyo & Moore performed this ESA in conformance with the scope and limitations of ASTM E1527-13. This assessment also satisfies the requirements of ASTM E1527-21.

Identification of RECs fall into the following three categories: existing RECs (as defined above); Historical RECs (HRECs); or Controlled RECs (CRECs). HRECs and CRECs are defined as follows:

- HREC – An HREC is defined as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations [AULs], institutional controls, or engineering controls).” An HREC is an environmental condition, which in the past, would have been considered a recognized environmental condition, but currently may or may not be considered a recognized environmental condition. An example of an HREC may be a former gas station where a release of gasoline had occurred, but the site was cleaned up to an unrestricted land use standard.
- CREC – A CREC is defined as “recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by a regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, AULs, institutional controls, or engineering controls).” An example of a CREC could be a former gas station where a release of gasoline has been cleaned up to a commercial use standard, but does not meet unrestricted residential cleanup criteria.

1.2 Scope of Services

Ninyo & Moore's scope of services for this Phase I ESA included the activities listed below.

- Reviewed physical setting and background information.
- Performed a site reconnaissance.
- Reviewed federal, state, tribal, and local regulatory agency databases for the site and for properties located within a specified radius of the site.
- Reviewed reasonably ascertainable local regulatory agency files for the site, as applicable.
- Reviewed historical information for the site, such as historical aerial photographs, historical topographic maps, reverse street directories, and Sanborn fire insurance maps.
- Reviewed user-provided information, as available.
- Interviewed the property owner representative and tenant regarding the environmental status of the site.
- Performed a preliminary vapor encroachment screen to evaluate the potential for vapor encroachment conditions.
- Prepared this Phase I ESA report, summarizing findings and providing opinions and conclusions regarding RECs at the site.

1.3 Significant Assumptions

Ninyo & Moore assumes the information sources from the third-party environmental database vendor, regulatory agencies, and interviewees utilized for this report provided adequate and accurate information. No other significant assumptions were made during the preparation of this report.

1.4 Limitations and Exceptions

The environmental services described in this report have been conducted in general accordance with current regulatory guidelines and the standard of care exercised by environmental consultants performing similar work in the project area. No warranty, expressed or implied, is made regarding the professional opinions presented in this report.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Ninyo & Moore should be contacted if the reader requires any additional information or has questions regarding the content, interpretations presented, or completeness of this document.

The findings, opinions, and conclusions are based on an analysis of the observed site conditions and the referenced literature. It should be understood that the conditions of a site could change with time as a result of natural processes or human activities at the subject site or nearby sites. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this report may, therefore, be invalidated over time, in part or in whole, by changes over which Ninyo & Moore has no control. Ninyo & Moore cannot warrant or guarantee that not finding indicators of any particular hazardous material means that this particular hazardous material, or any other hazardous materials, do not exist on the site. Additional research, including invasive testing, can reduce the uncertainty, but no techniques now commonly employed can eliminate the uncertainty altogether.

1.5 Special Terms and Conditions

This study did not include an evaluation of geotechnical conditions or potential geologic hazards. In addition, unless otherwise indicated in this report, this Phase I ESA does not include analysis of the following, which is not intended to be all-inclusive: asbestos-containing materials, methane gas, radon, lead-based paint, lead-containing surfaces, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, or mold.

1.6 User Reliance

This report may be relied upon by, and is intended exclusively for, the client and its assigns. Any use or reuse of the findings, opinions, and/or conclusions of this report by parties other than the above-referenced client is undertaken at said parties' sole risk.

1.7 Involved Parties

Mr. Gabriel Haro, Staff Geologist, performed regulatory and historical research and conducted the site reconnaissance on December 13, 2022. Mr. Nathan Diem, Senior Project Geologist, performed project oversight. Mr. Stephan Beck, Environmental Manager, performed quality review.

2 SITE DESCRIPTION

The following table provides a general description of the subject site. Photographs taken during the site reconnaissance are provided in Appendix A.

Table 1 – General Site Setting

General Site Setting	Description
Location	The site is located east of the Torreyana Road terminus in the city of San Diego, California (Figure 1).
Assessor Parcel No. (APN)	340-010-2900 (County of San Diego)
Property Owner	Alliance Diversified Holdings, LLC
Size (approximate)	10.2 acres
Structures / Site Use / Occupants	The site is developed as a multi-tenant biosciences facility. The site use is light industrial and the building is currently occupied by BioDuro-Sundia (BioDuro), Becton, Dickinson and Company (BD), and Revelation Biosciences (Revelation).
Roads	Roads are not present on the site. Site access is from Torreyana Road, located west-adjacent to the site. Two driveways connect to Torreyana Road along the western edge of the site.
Heating and Cooling Systems	HVAC systems were observed along the eastern perimeter of the building.
Electricity and Natural Gas Provider	San Diego Gas and Electric (SDG&E)
Sewer Disposal Provider	City of San Diego
Potable Water Provider	City of San Diego
Site Vicinity Description	The site vicinity is primarily comprised of light industrial and commercial properties.

3 USER-PROVIDED INFORMATION

Mr. Evan Wilson, Senior Asset Manager with Bridge West Group, completed the User Questionnaire on December 20, 2022. The following table summarizes information provided by Mr. Wilson. A copy of the questionnaire is provided in Appendix B.

Table 2 – Summary of User-Provided Information

User's Responsibilities	User's Responses
Title Records	Title records were not provided to Ninyo & Moore.
Environmental Liens or Activity and Use Limitations (AULs)	Mr. Wilson stated that AULs are in place due to the sensitive habitat in the canyon on the eastern portion of the site.
Specialized Knowledge	None
Commonly Known or Reasonably Ascertainable Information	According to Mr. Wilson, the property has previously been used as lab and office space for biotech research.
Valuation Reduction for Environmental Issues	Not applicable
Reason for Performing Phase I ESA	Mr. Wilson stated the Phase I ESA is being performed for the potential development of the site.

4 RECORDS REVIEW

The following sections summarize records reviewed for the site.

4.1 Standard Environmental Record Source - Environmental Databases

A computerized, environmental information database search was performed by Environmental Data Resources, Inc. (EDR) on December 12, 2022. The search included federal, state, tribal, and local databases. A summary of the environmental databases searched, their corresponding search radii, and number of noted properties of potential environmental concern, is presented in the EDR report (Appendix C). The review was conducted to evaluate whether the site or properties within the site vicinity

have been documented as having experienced significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects.

4.1.1 Geocoded (Mapped) Listings

The site was listed in Hazardous Waste Tracking System (HWTS) and Hazardous Waste Information System (HAZNET) for the disposal of hazardous wastes such as waste oil, pharmaceutical waste, laboratory chemicals, organic solids, alkaline and aqueous solutions, paint sludge, and latex waste. The site was also listed in the Spills, Leaks, Investigation and Cleanup (SLIC) and San Diego County Site Assessment and Mitigation (SAM) databases due to three previously documented releases. Each case is discussed separately in Section 4.2.1. The site was listed in the Department of Toxic Substances Control (DTSC) EnviroStor Database associated with a Phase I Environmental Assessment questionnaire completed in 2002. This document is discussed in greater detail in Section 4.2.1.

Off-site properties within 1 mile of the site appeared on various regulatory agency databases. The following table lists ASTM standard environmental databases that were searched and the number of listings (excluding unmapped properties).

Table 3 – ASTM Standard Environmental Databases		
Database Name	Search Radius (mile)	Number of Listings
FEDERAL DATABASES		
NPL (National Priority List)	1	0
Proposed NPL	1	0
NPL LIENS (Federal Superfund Liens)	site	0
Delisted NPL	1	0
FEDERAL FACILITY (Federal Facility Site Information listing)	1	0
SEMS (Superfund Enterprise Management System; formerly Comprehensive Environmental Response Compensation and Liability Information System)	0.5	0
SEMS-ARCHIVE (Superfund Enterprise Management System Archive)	0.5	1
CORRACTS (facilities subject to Corrective action under RCRA)	1	0
RCRA-TSDF (hazardous waste treatment, storage, or disposal facilities)	0.5	0
RCRA-LQG (large quantity generator)	0.25	8
RCRA-SQG (small quantity generator)	0.25	16
RCRA-VSQG (very small quantity generator)	0.25	0
US ENGINEERING CONTROL (EC)	0.5	0
US INSTITUTIONAL CONTROL (IC)	0.5	0
ERNS (Emergency Notification System)	site	0
STATE/TRIBAL DATABASES		
RESPONSE (State Response Sites, State- and Tribal- equivalent NPL)	1	1
ENVIROSTOR (The DTSC's Site Mitigation and Brownfields Reuse Program; CERCLIS-equivalent)	1	11
SWF/LF (Solid Waste Information System)	0.5	0
San Diego County Site Assessment and Mitigation (SAM)	0.5	7
LUST (Geotracker's Leaking Underground Fuel Tank Report)	0.5	2
SLIC (Spills, Leaks, Investigation and Cleanup database by the California Regional Water Quality Control Board)	0.5	6
UST (registered underground storage tanks [USTs])	0.25	0
AST (registered aboveground storage tanks [ASTs])	0.25	5
FEMA UST (Underground Storage Tank Listing)	0.25	0
VCP (Voluntary Cleanup Program Properties)	0.5	0

Off-site properties/facilities listed in the database report were evaluated as to their potential to impact soil and/or groundwater at the site. To supplement the information in the EDR report, County of San Diego Department of Environmental Health and Quality (DEHQ) files were requested and reviewed, and the State Water Resources Control Board (SWRCB) GeoTracker and DTSC EnviroStor online databases were reviewed. Information from the EDR database report and supplemental sources is included in the facilities of potential concern summaries below. Supporting documentation is provided in Appendix D. The following properties/facilities were interpreted to represent a potential environmental concern to the site, based on their proximity to the site, the nature of the database on which they are listed, and/or the assumed direction of groundwater flow in the site vicinity (east).

Table 4 – Off-Site Facilities of Potential Concern

Facility Name / Address	Distance/ Direction from Site	Database	Summary
Foundation Medicine, Inc. 11010 Torreyana Road	Adjoining west	AST CERS CERS HAZ-WASTE CERS TANKS HAZNET HMMD HWTS RCRA NON-GEN	This property is listed in the AST database and CERS TANKS database for the presence of an 894-gallon diesel AST, 700-gallon diesel AST, and 555-gallon diesel AST. The ASTs are used to store fuel for three emergency generators. The property is also listed in the CERS database for routine compliance inspections which occurred from 2009 to 2022. According to DEHQ records, three violations were issued during the most recent inspection in June 2022 for the following reasons: inadequate employee training program, failure to update the hazardous materials business plan (HMBP), and failure to update CERS. In each instance, the violation was corrected and the facility returned to compliance later that month. Based on the lack of a reported release and ongoing regulatory oversight, this listing is not a REC.
Beckman Coulter, Inc. 11085 Torreyana Road	Adjoining north	CERS CERS HAZ-WASTE HAZNET HMMD HWTS RCRA NON-GEN	This property is listed in the HAZNET database for the disposal of the following types of wastes 1986 to 1996: solvent mixtures, laboratory chemicals, organic waste, aqueous solutions, and waste oil. The property is also listed in the CERS database for routine compliance inspections which occurred from 2018 to 2021. According to DEHQ records, four violations were issued during the most recent inspection in May 2021 for the following reasons: failure to update the HMBP and hazardous materials inventory, improper labelling of hazardous waste containers, and failure to submit an adequate site map. In each instance, the violation was corrected and the facility returned to compliance in June 2021. Based on the lack of a reported release and ongoing regulatory oversight, this listing is not a REC.

Table 4 – Off-Site Facilities of Potential Concern

Facility Name / Address	Distance/ Direction from Site	Database	Summary
<p>General Atomics 11222 Flintkote Avenue</p>	<p>Adjoining east</p>	<p>CIWQS HAZNET HMMD HWTS RCRA LQG SAM SLIC</p>	<p>This property is listed in the SLIC database associated with an open groundwater remediation case (T10000016916). According to records obtained from GeoTracker, Tetra Tech indicated elevated volatile organic compound (VOC) concentrations were present in five monitoring wells at the property during a 1998 groundwater sampling event (Tetra Tech, 1998). Trichloroethene (TCE) and tetrachloroethene (PCE) were detected up to 59,000 µg/l and 310 µg/l, respectively. A remediation case with RWQCB oversight was opened in March 2021 to implement and monitor a full-scale remediation via in-situ chemical oxidation. According to Geosyntec, five percent sodium permanganate would be introduced “to destroy [VOCs] and 1,4 dioxane in groundwater” (Geosyntec, 2021a). According to Geosyntec’s April 2021 groundwater monitoring report, “...the monitoring results indicate further reduction of the TCE, PCE and 1,4-dioxane contaminant plumes beneath Building 37 in the direction of groundwater flow, and, disappearance of the localized TCE, PCE and 1,4-dioxane contaminant hotspots in the south and west portions of Building 37” (Geosyntec, 2021b). Based on the distance between the site APN boundary to the mapped contamination plume, difference in elevation, and ongoing remediation activities, this listing is not a REC.</p>
<p>BD Biosciences 10975 Torreyana Road</p>	<p>328 feet southwest</p>	<p>CERS CERS HAZ-WASTE HMMD RCRA NON-GEN</p>	<p>This property is listed in the CERS database for routine compliance inspections which occurred from 2014 to 2022. Nine violations were issued following inspections in 2014, 2015, and 2019 for the following reasons: failure to keep hazardous waste containers closed and improper labelling procedures, inadequate employee training program, failure to renew United Program Facility Permit (UPFP), failure to update the HMBP, and improper waste accumulation procedures. In each instance, the violation was corrected and the facility returned to compliance. Based on the lack of a reported release and ongoing regulatory oversight, this listing is not a REC.</p>
<p>BD Point of Care 10865 Road to the Cure, Suite 200</p>	<p>477 feet south-southeast</p>	<p>CERS CERS HAZ-WASTE RCRA LQG</p>	<p>This property is listed in the RCRA LQG database as a large quantity generator of hazardous waste. The types of wastes produced include ignitable and corrosive waste, nonhalogenated solvents, and solvent mixtures. The property is also listed in the CERS database for routine compliance inspections which occurred from 2017 to 2022. Violations were not reported during this time. Based on the lack of a reported release and ongoing regulatory oversight, this listing is not a REC.</p>
<p>The Scripps Research Institute 3050 Science Park Road</p>	<p>621 feet southwest</p>	<p>AST CERS CERS HAZ-WASTE CERS TANKS HAZNET HMMD HWTS RCRA LQG</p>	<p>This property is listed in the RCRA LQG database as a large quantity generator of hazardous waste. The types of wastes produced include ignitable, corrosive, and reactive waste, silver, benzene, chloroform, methyl ethyl ketone, halogenated and nonhalogenated solvents, and solvent mixtures. The property is also listed in the CERS database for routine compliance inspections which occurred from 2013 to 2019. One violation was issued during the January 2016 inspection for failure to comply with satellite hazardous waste container regulations. The violation was corrected and the facility returned to compliance in February 2016. Based on the lack of a reported release and ongoing regulatory oversight, this listing is not a REC.</p>

Table 4 – Off-Site Facilities of Potential Concern

Facility Name / Address	Distance/ Direction from Site	Database	Summary
S Cubed 3030 Callan Drive	633 feet west	CERS HAZ-WASTE ECHO FINDS RCRA SQG	This property is listed in the RCRA SQG database as a small quantity generator of hazardous waste. The types of wastes produced were not reported, and no violations were found. Based on the lack of a reported release, this listing is not a REC.
Synthetic Genomics, Inc. 3020 Callan Road	679 feet west	CERS CORTESE HAZNET HIST CORTESE HMMD HWTS LUST NPDES SAM RCRA NON-GEN RCRA SQG	This property is listed in the LUST database associated with a closed unauthorized release case from 1993 (H23213-001). According to the DEHQ, approximately 80 gallons of mineral oil was released from a vertically oriented, 12" x 20' tank used to store radioactive source tubes. Analysis of the residual oil in the tank confirmed the oil was not radioactive. Therefore, the consultant concluded there were no life or health risks involved. The San Diego SAM division concurred and issued a no further action determination in November 1993. Based on the case closed status, this listing is not a REC.
Sanford Burnham Prebys Medical Discovery Institute 10905 Road to the Cure	742 feet south-southwest	CERS CERS HAZ-WASTE HMMD RCRA NON-GEN	This property is listed in the CERS database for routine compliance inspections which occurred from 2014 to 2021. A violation was issued following the November 2021 inspection for failure to comply with satellite hazardous waste container regulations. The violation was corrected and the facility returned to compliance in December 2021. Based on the lack of a reported release and ongoing regulatory oversight, this listing is not a REC.
Organogenesis, Inc. 3040 Science Park Road	880 feet southwest	CERS CERS HAZ-WASTE CIWQS ECHO ENVIROSTOR FINDS HAZNET HMMD HWTS NPDES RCRA NON-GEN	This property was listed in EnviroStor as a "tiered permit site;" however, a Phase I Environmental Assessment questionnaire was not available. According to the DEHQ, a Phase II ESA was prepared for the property in August 2019 by AECOM. The investigation included advancing one boring to 61 feet below ground surface (bgs) and another to 102 feet bgs. Soil and groundwater samples were analyzed for VOCs, semi-volatile organic compounds (SVOCs), organochlorine pesticides (OCPs), and metals. According to AECOM, "...no constituents of concern were present at or above [Environmental Screening Levels]. No further action is recommended at this time" (AECOM, 2019). Based on the lack of a reported release and results of the Phase II ESA, this listing is not a REC.

Notes:

- Distances and direction provided by EDR
- A complete description of each database is provided in the EDR Report (Appendix C).

It is our opinion that there is a low likelihood that the remaining listings for off-site properties appearing in the database report represent a REC to the site at the current time. This opinion is based on one or more of the following factors:

- The nature of the database(s) on which the property appears, and/or because the property did not appear on a database that reports unauthorized releases of hazardous substances;
- Reported regulatory agency status (e.g., case closed);
- Reported nature of the case (e.g., soil contamination only);

- Reported distance of the property from the site; and/or
- Location of the property in relation to the site with respect to topography or expected groundwater flow direction (east).

4.1.2 Orphan (Unmapped) Listings

This portion of the regulatory database report includes properties for which regulatory agencies did not report sufficient address information to be plotted by EDR. The listings were reviewed to evaluate their potential impact to the site, based on their interpreted distance/direction from the site, and/or the nature of the database in which they were listed. It is our opinion that there is a low likelihood that the orphan listings represent an environmental concern to the site at the current time.

4.2 Additional Environmental Record Sources

According to the ASTM Standard, “if the property or any of the adjoining properties is identified on one or more of the standard environmental record sources, pertinent regulatory files and/or records associated with the listing should be reviewed.” Regulatory agency files for properties of potential concern in the immediate site vicinity were reviewed and summarized in Table 4. The review of regulatory agency records for the site is discussed in the following sections. Regulatory records for the site are provided in Appendix D.

4.2.1 County of San Diego Department of Environmental Health and Quality

According to a representative of the DEHQ on December 12, 2022, compliance inspection reports, hazardous materials inventories, and files concerning documented releases were on file for the site. A total of three releases were discussed by Environmental Business Solutions (EBS) in their letter report dated November 30, 2005 (EBS, 2005).

Sentol Release – June 7, 1999

The first release occurred on June 7, 1999 when approximately five gallons of Sentol solution were spilled onto the asphalt near the utility area. The solution, which contained 37% phosphoric acid, flowed into a nearby storm drain. The storm drain was subsequently flushed with a constant flow of water for approximately one hour to remedy the situation. The pH readings of residual water within the storm drain indicated the water was neutral (approximately a pH of 5.5) prior to its release to the storm water system.

Hydraulic Oil Release – September 10, 1999

The second release occurred on September 10, 1999 when approximately 1.5 gallons of hydraulic oil were released in the delivery area, south of the main building. The oil reportedly spilled from a contractor's vehicle in the parking lot. The spill was controlled using ground corn cob absorbent and cleaned up by the contractor responsible for the release.

Mincare Release – October 31, 2002

The third release occurred on October 31, 2002 when approximately two gallons of Mincare solution were released in the delivery area south of the main building. The solution, which was 20% hydrogen peroxide and 4% peroxyacetic acid, was flushed with water into a nearby storm drain. The liquid travelled to the outfall east of the utility building where it was deposited into the soil. Approximately four 30-gallon containers of soil were excavated and disposed of off-site. Subsequent pH readings confirmed all impacted soil was removed.

The DEHQ reviewed the letter report prepared by EBS and determined cleanup goals for the site had been met. The case was closed in April 2006.

The site was also listed in the EnviroStor database associated with a Phase I Environmental Assessment questionnaire requested by the DTSC in 2002. A representative with IDEC Pharmaceuticals completed the questionnaire in December 2002 which indicated the site was treating approximately 35,000 gallons of water per day. A chemical inventory was also attached and included the maximum quantities of each that were stored at the site.

Compliance inspection reports were also on file from 1996 to 2022. According to a recent inspection report from August, 2022, 500 cubic feet of carbon dioxide, sharps containers, waste formaldehyde solution, and refrigerated liquid nitrogen were observed. A violation was issued because a drum containing solid laboratory waste observed on-site was not reported in CERS.

4.2.2 County of San Diego Department of Agriculture, Weights & Measures

According to a representative of the County of San Diego Department of Agriculture, Weights & Measures (AWM) on December 15, 2022, no records were found for the site.

4.2.3 San Diego County Air Pollution Control District

According to a representative of the San Diego County Air Pollution Control District (APCD) on December 12, 2022, permits to operate (PTO) various pieces of equipment were on file

for the site. PTOs were issued to several occupants to operate an emergency diesel-powered engine and steam boilers. A violation was issued in May 2000 for exceeding the maximum allowable limit for natural gas consumption associated with the steam boilers. IDEC Pharmaceuticals responded by upgrading to a more energy efficient boiler that will adhere to the APCD standards.

4.2.4 Regional Water Quality Control Board, San Diego Region

According to a representative of the Regional Water Quality Control Board (RWQCB) on December 15, 2022, records for the site included annual reports for stormwater discharge associated with industrial activities from 1993 to 2009. Water quality/physical characteristics, pH, and site conditions were discussed in each report. A violation was issued in October 2008 for failure to complete the annual report by the deadline. A notice of termination was filed by the recipient in 2009 declaring that they ceased operations in 2008. The RWQCB approved their request and ceased subsequent annual inspections.

4.2.5 City of San Diego Fire Department

According to a representative of the City of San Diego Fire Department (SDFD) on December 14, 2022, records for the site included various hazardous material permits for on-site helium, argon, nitrogen, diesel, and carbon dioxide tanks from 2000 to 2022. The most recent permit was issued in April 2022 for a 316-gallon diesel AST.

4.2.6 Online Regulatory Databases

Online regulatory databases were reviewed by Ninyo & Moore to supplement the environmental database search conducted by EDR. The following is a summary of pertinent information.

Table 5 – Online Regulatory Databases

Online Database/Website	Findings
DTSC EnviroStor	The site and one off-site property within 1,000 feet are listed. The site is listed as a “tiered permit site” following completion of the DTSC’s Phase I Environmental Assessment questionnaire in 2002. This document is discussed in Section 4.2.1. The off-site property listing (3040 Science Park Road) is discussed in Table 4 (Section 4.1.1).
SWRCB GeoTracker	The site and two off-site properties within 1,000 feet are listed. The site is associated with a closed case (H14775-002) involving three past releases that occurred during 1999 and 2002. These incidents are separately discussed in Section 4.2.1. The off-site property listings (11222 Flintkote Avenue and 3020 Callan Road) are discussed in Table 4 (Section 4.1.1).
California Department of Resources Recycling and Recovery (CalRecycle) Solid Waste Information System	Neither the site nor properties within 1,000 feet are listed.

Table 5 – Online Regulatory Databases

Online Database/Website	Findings
United States Pipeline and Hazardous Materials Safety Administration, National Pipeline Mapping System Map Viewer	Pipelines are not depicted on or adjoining the site.
US Army Corps of Engineers, Formerly Used Defense Sites (FUDS), Geographic Information System	FUDS listings are not depicted within 1,000 feet of the site.

4.3 Physical Setting

The following table summarizes topographic, geologic, and hydrogeologic conditions in the vicinity of the site, based upon the referenced documents review and/or our visual reconnaissance of the site.

Table 6 – Physical Setting

Physical Settings	Reference	Summary
Topography	A	The site is situated at an elevation of approximately 242 feet above mean sea level (MSL). The topography at the site and vicinity slopes to the east towards Los Peñasquitos Canyon.
Site Geology	B	The site is underlain by very old paralic deposits (middle to early Pleistocene), which are described as, “poorly sorted, moderately permeable, reddish-brown, interfingering strandline, beach, estuarine and colluvial deposits composed of siltstone, sandstone and conglomerate.”
Surface Water	A	Natural surface water bodies were not observed during the site reconnaissance. The nearest surface body of water is Peñasquitos Creek located approximately 1,500 feet northeast of the site. The site is located in the Miramar Reservoir Hydrologic Area (HA) and Peñasquitos Hydrological Unit. Groundwater within the Miramar Reservoir HA has existing beneficial uses for municipal, agricultural, and industrial service purposes.
Groundwater	C, D	According to information obtained from the SWRCB GeoTracker website, depth to groundwater was reported to be greater than 100 feet below ground surface (bgs). The groundwater flow direction in the site vicinity was reported to flow to the east, towards Peñasquitos Creek. The groundwater flow direction may vary due to hydrogeologic properties, such as soil porosity and permeability, groundwater extraction, recharge by irrigation and rainfall, and other factors.

4.4 Site Historical Use Information

Ninyo & Moore conducted a historical record search for the site. This included a review of city directories, historical fire insurance maps, historical aerial photographs, and topographic maps, as available. The following sections summarize information obtained from the historical sources utilized for this assessment.

4.4.1 City Directories

Available historical reverse street directories from 1980 through 2017 were provided by EDR and reviewed to evaluate facilities of potential concern, which may have been historically located at or near the site. The city directories are summarized in the table below. The EDR city directory report is provided in Appendix E.

Table 7 – Summary of City Directory Listings	
Year(s)	Listing
11011 Torreyana Road	
1984 – 1989	Jaycor Scientific Research & Development
1994 – 2000	IDEC Pharmaceuticals Corporation
2004	Terry Boose
2009	IDEC Pharmaceuticals Corporation
2014 – 2017	Formex LLC, Genlantis
2017	Crown Bio Sciences

4.4.2 Sanborn® Fire Insurance Maps

Sanborn® fire insurance maps were requested from EDR; however, according to EDR's Certified Sanborn Map Report, there is no map coverage in the site vicinity. The EDR Certified Sanborn Map Report is provided in Appendix E.

4.4.3 Historical Aerial Photographs and Topographic Maps

Historical aerial photographs and topographic maps were provided by EDR for select years from 1903 through 2020. Additionally, aerial photographs were reviewed online using Google Earth. A listing of the sources reviewed and summary of notable observations from the photograph review are provided in the table below. EDR-provided photographs and maps are included in Appendix E.

Table 8 – Aerial Photographs and Topographic Map Summary		
Date	Source	Summary
1903	B	The site and adjoining properties are undeveloped. An unmarked road and railroad are depicted to the east of the site.
1928		
1930		
1943	A, B	The site and adjoining properties are undeveloped. The site is mapped as a woodland in 1943 and then as a shrubland in 1953.
1949		
1953		
1964		
1966	A, B	A north-south trending trail is visible on the western portion of the site. The adjoining property to the east is developed with an industrial property. Flintkote Avenue to the east of the site is depicted in its current alignment.
1967		
1970		
1975	A, B	The western portion of the site appears to be recently graded. The adjoining properties to the north, west, and south also appear to be graded. Torreyana Road and Callan Road are present in their current alignment.
1979		
1985		
1989	A, B	The site and adjoining properties to the north, west, and south are developed with the buildings visible today.
1990		

Table 8 – Aerial Photographs and Topographic Map Summary		
Date	Source	Summary
1994	2015	
1996	2016	
2002	2018	The site appears similar to the previous photograph. The adjoining property to the east generally resembles its current configuration.
2005	2020	
2009	2021	
2012	2022	
Sources: A = EDR Aerial Photographs B = EDR Topographic Maps C = Google Earth		

4.5 Previous Reports

Ninyo & Moore was not provided copies of prior reports completed for the site.

4.6 Adjoining Property History

The adjoining properties remained undeveloped until the mid-1960s. The east-adjoining property was developed with an industrial property around 1964. The north-, west-, and south-adjoining properties were developed with industrial properties in the early 1980s. The land use is consistent with the current uses of the adjoining properties.

5 SITE RECONNAISSANCE

The objective of the site reconnaissance was to obtain information indicating the potential for RECs in connection with the site. Mr. Gabriel Haro conducted the reconnaissance on December 13, 2022. A site plan is provided as Figure 2 and photographic documentation is provided in Appendix A.

5.1 Methodology and Limiting Conditions

The site reconnaissance consisted of walking on the site and along public sidewalks (for viewing of adjoining/nearby properties). Limiting conditions included lack of access to the steep, vegetated slope on the eastern portion of the site and access to several labs, which were in use at the time; other limiting conditions were generally not encountered during the site reconnaissance.

5.2 General Site Setting

At the time of the site reconnaissance, the site was developed with an approximately 76,715 square foot (sf) two-story building containing office and lab spaces with a small basement, a two-story parking garage, and a separate single-story utility/storage building.

The main building appeared to be a metal-framed structure with a built-up roof. Dropped ceilings were apparently 2' x 4' acoustic ceiling panels, walls were apparently drywall, and the floor was apparently concrete with carpet or tile overlain, where present. The site was occupied by BioDuro, BD, and Revelation at the time of the site visit.

A variety of cleaning chemicals, paints, lubricants, and oils were observed in the janitorial and maintenance areas throughout the building. These materials were observed to be in good condition and stored in the upright position within secured rooms.

The lab spaces and separate utility/storage building contained a combination of hazardous materials and wastes. Satellite hazardous waste accumulation containers were observed throughout the lab spaces and the main hazardous waste storage area was observed in the utility/storage building. In either case, secondary containments were observed and no evidence of leaks or spills were noted. Hazardous waste is reportedly transported under manifest by Ingenium. Flammable materials closets and lab refrigerators were observed to contain an assortment of lab chemicals and reagents.

Topography at the site generally sloped east towards Los Peñasquitos Canyon. Surface drainage was expected to either percolate into the soil or run off into the stormwater system.

5.3 Adjoining Property Observations

Adjoining properties were observed from the site and from publicly accessible vantage points (e.g., streets, sidewalks) during the site reconnaissance. The properties adjoining to the site are as follows and as depicted on Figure 2:

- **North:** Multi-tenant industrial property (11085-11095 Torreyana Road).
- **East:** Industrial property (11222 Flintkote Avenue).
- **South:** Multi-tenant commercial property (10995 Torreyana Road).
- **West:** Multi-tenant industrial property (11010 Torreyana Road).

5.4 Site Observations

Ninyo & Moore evaluated the site for evidence of the following potential environmental concerns:

Table 9 – On-Site Observations

Conditions	Observed or Noted	Comments
Hazardous Substances/Petroleum Products	X	The following substances were observed: paint cans (6 x 1 gallon), paint buckets (3 x 5 gallons), WD-40 lubricant (1 x 12 ounces), thread sealant (1 x 16 ounces), floor sealer/finisher (6 X 1 gallon), motor oil (7 x 1 quart), vacuum pump oil (8 x 5 gallons), and compressed nitrogen (20 x 304 cubic-foot cylinders). The containers were observed in good condition and positioned upright where stored. Given the well-maintained storage conditions and clear labelling, this is considered a <i>de minimis</i> condition.
Waste Generation/Storage/Disposal	X	Hazardous waste generation occurred in the labs. Waste was stored in satellite waste containers before being moved to the main hazardous waste storage area. Hazardous waste is collected by Ingenium on a routine basis. In addition to the hazardous waste drums discussed below, 14 gallons of mixed flammable liquids were observed in the main hazardous waste storage area. This is not a REC.
ASTs	X	Three 715-gallon refrigerated nitrogen tanks were observed: Two were located adjacent to the utility room on the southern end of the building, and one was located along the northern end of the building. A 500-gallon neutralization tank was observed in the utility room. The tank was reportedly part of a waste water treatment system that is no longer in use today. A 300-gallon diesel tank was used to store emergency fuel at the generator along the southern site boundary. The generator appeared to be in good condition and was surrounded by a concrete secondary containment basin. The tanks do not constitute a REC.
Potential Evidence of USTs		Not observed
PCB-Containing Equipment	X	Three pad-mounted transformers were observed: one was located in the rear parking lot on the southern portion of the site and two were located along the western edge of the site. The pads appeared to be in good condition and leaks were not observed. This is not a REC.
Chemical/Petroleum Odors		Not observed
Concrete Patches/Pads		Not observed
Sewage Discharge Pipes		Not observed
Floor Drains/Sumps	X	Several floor drains were observed in janitorial closets, maintenance areas, and hallways on the first floor of the main building. Sumps were not observed.
Elevator	X	One hydraulic elevator was observed. The elevator equipment room was free of debris and elevator is routinely serviced by 24 Hour Elevator, Inc. This is not a REC.
Wells		Not observed
Drums	X	Six 55-gallon drums and one 30-gallon drum containing mixed hazardous waste were observed in the hazardous waste storage area. The hazardous materials storage area contained upwards of 70 drums ranging from 15 to 55 gallons in size. These drums contained hazardous chemicals such as dichloromethane, methanol, and chloroform among others. This is not a REC.
Unidentified Substance Containers		Not observed
Stained Soil or Pavement	X	Stained concrete was observed in the basement near the vacuum pump system and minor staining was observed in the parking lot. The concrete and asphalt appeared to be in good condition. Therefore, the minor staining observed is considered a <i>de minimis</i> condition.
Stressed Vegetation		Not observed
Pits, Ponds, or Lagoons		Not observed

Table 9 – On-Site Observations

Conditions	Observed or Noted	Comments
Wastewater Discharges Disposal Systems	X	A wastewater treatment system was observed in the utility room of the main building. According to the site operations manager, the treatment system is no longer in use today and only collects water following rain events. This is not a REC.
Septic Systems/Cesspools		Not observed
Municipal Solid Waste Disposal Areas	X	Portable trash and recycling dumpsters were observed on the northwest portion of the site near the parking garage. The dumpsters were closed and no leaks were observed. These are considered a <i>de minimis</i> condition.

6 VAPOR ENCROACHMENT/INTRUSION

The purpose of the preliminary vapor encroachment screen is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of potential contaminants of concern (COC) vapors in subsurface soils at the site caused by the release of vapors from contaminated soil or groundwater either on or near the site. The potential for VECs beneath the site was evaluated using a Vapor Encroachment Screening Matrix (VESM) in accordance with ASTM E 2600-15 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The VESM included performing a Search Distance Test to identify if there are any known or suspect contaminated properties surrounding or upgradient of the site within specific search radii, a COC Test (for those known or suspect contaminated sites identified within the Search Distance Test) to evaluate whether or not COCs are likely to be present, and a Critical Distance Test to evaluate whether or not COCs in a contaminated plume may be within the critical distance of the site (100 feet for non-petroleum hydrocarbon contaminants and 30 feet for petroleum hydrocarbon contaminants).

Based on the completion of the VESM, a VEC was not found and no further investigation is recommended at this time. A copy of the VESM is included in Appendix F.

7 INTERVIEWS

Interviews were conducted by Ninyo & Moore with the objective of obtaining information regarding potential RECs in connection with the site. Interviews with present owners, operators, and/or occupants of the site, as well as other knowledgeable parties as appropriate, is mandated by ASTM E 1527-13. A summary of the interviews conducted is provided in the table below.

Table 10 – Interviews

Representative	Summary
Property Owner	Mr. Evan Wilson completed the property background questionnaire on December 20, 2022. A copy of the questionnaire is provided in Appendix B. According to Mr. Wilson, the site has operated as lab and office space for biotech research since it was acquired in 2012. He stated the main building is approximately 76,715 sf and was constructed in 1980. According to Mr. Wilson’s records, the historical use of the developed site is consistent with the current use. He is unaware of any USTs or environmental issues at the site.
Occupant	The site operations manager who facilitated the in-person site reconnaissance was unaware of any past or present environmental issues at the site.
Past Owners	Past ownership entities were not made available to Ninyo & Moore during the preparation of this ESA. Therefore, interviews with past site owners were not conducted.

8 FINDINGS

Based upon the results of this Phase I ESA, the following findings are provided.

- The site is comprised of one parcel totaling approximately 10.2 acres in size, located east of the northern Torreyana Road terminus in the city of San Diego, California.
- At the time of the site reconnaissance, the site was developed with an approximately 76,715 sf two-story building containing office and lab spaces with a small basement, a two-story parking garage, and a separate single-story utility/storage building. The main building appeared to be a metal-framed structure with a built-up roof. Dropped ceilings were apparently 2' x 4' acoustic ceiling panels, walls were apparently drywall, and the floor was apparently concrete with carpet or tile overlain, where present. The site was occupied by BioDuro, BD, and Revelation at the time of the site visit.
- A variety of cleaning chemicals, paints, lubricants, and oils were observed in the janitorial and maintenance areas throughout the building. These materials were observed to be in good condition and stored in the upright position within secured rooms. The lab spaces and separate utility/storage building contained a combination of hazardous materials and wastes. Satellite hazardous waste accumulation containers were observed throughout the lab spaces and the main hazardous waste storage area was observed in the utility/storage building. In either case, secondary containments were observed and no evidence of leaks or spills were noted. Hazardous waste is reportedly transported under manifest by Ingenium. Flammable materials closets and lab refrigerators were observed to contain an assortment of lab chemicals and reagents.
- Topography at the site generally sloped east towards Los Peñasquitos Canyon. Surface drainage was expected to either percolate into the soil or run off into the stormwater system.
- Based on a review of historical resources, the east-adjointing property was developed with an industrial property around 1964. The north-, west-, and south-adjointing properties were developed with industrial properties in the early 1980s. The site was developed with an industrial property in 1980. The land use has remained consistent with the current use of the site.
- Regulatory agency records were requested from the DEHQ, AWM, APCD, RWQCB, and SDFD. Available records indicated minor violations at the site and three documented releases associated with a closed case on GeoTracker. Environmental Business Solutions (EBS) discussed each release in their letter report dated November 30, 2005. The first release occurred on June 7, 1999 when approximately five gallons of Sentol solution were spilled onto the asphalt near the utility area. The solution was flushed out of the storm drain with copious amounts of water and subsequent pH readings indicated the water was neutral before it was

released into the stormwater system. The second release occurred on September 10, 1999 when approximately 1.5 gallons of hydraulic oil were released in the delivery area, south of the main building. The spill was controlled using ground corn cob absorbent and cleaned up by the contractor responsible. The third release occurred on October 31, 2002 when approximately two gallons of Mincare solution were released in the delivery area south of the main building. Approximately four 30-gallon containers of impacted soil were excavated and disposed of. The DEHQ reviewed the letter report prepared by EBS and determined cleanup goals for the site had been met. The case was closed in April 2006.

- The site was listed in HWTS and HAZNET for the disposal of hazardous wastes such as waste oil, pharmaceutical waste, laboratory chemicals, organic solids, alkaline and aqueous solutions, paint sludge, and latex waste. The site was also listed in the SLIC and San Diego County SAM databases due to three previously documented releases.
- Properties of potential concern in the site vicinity were researched and were not found to have the potential to adversely impact the site.
- Based on the completion of the VESM, a VEC was not found.

9 OPINIONS

The rationale for concluding whether the conditions listed in Section 8, above, represent RECs, HRECs, or CRECs (i.e., the presence or likely presence of hazardous substances or petroleum products on a property under conditions indicative of releases, past releases, or a material threat of a release of hazardous substances, pollutants, contaminants, and/or petroleum/petroleum products at the site) is provided below.

9.1 RECs

RECs were not identified during the preparation of this report.

9.2 CRECs

CRECs were not identified during the preparation of this report.

9.3 HRECs

HRECs were not identified during the preparation of this report.

9.4 De Minimis Conditions

The following *de minimis* conditions were identified during the preparation of this report:

- It is our opinion that the minor concrete and asphalt staining and municipal solid waste dumpsters are *de minimis* conditions that, if brought to the attention of an appropriate regulatory agency, would not result in an enforcement action.

9.5 Data Gaps

A data gap is a "lack of or inability to obtain data required by this practice despite good faith efforts to gather such data." Significant data gaps were not identified during the preparation of this report.

9.6 Additional Appropriate Investigation

It is our opinion that additional appropriate investigation to evaluate RECs at the site as part of the Phase I ESA is not required.

10 CONCLUSIONS

We have performed a Phase I ESA, in conformance with the scope and limitations of the ASTM Practice E 1527-13 and -21, of the property located at 11011 Torreyana Road in San Diego, California. Any exceptions to, or deletions from, this practice are described in Section 1.4 and in the body of this report. This assessment has revealed no evidence of RECs in connection with the property.

12 PROFESSIONAL STATEMENT

As required by 40 CFR §312.21(d) and Section 12.13 of ASTM 1527-13, the following statement is included:

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Stephan A. Beck

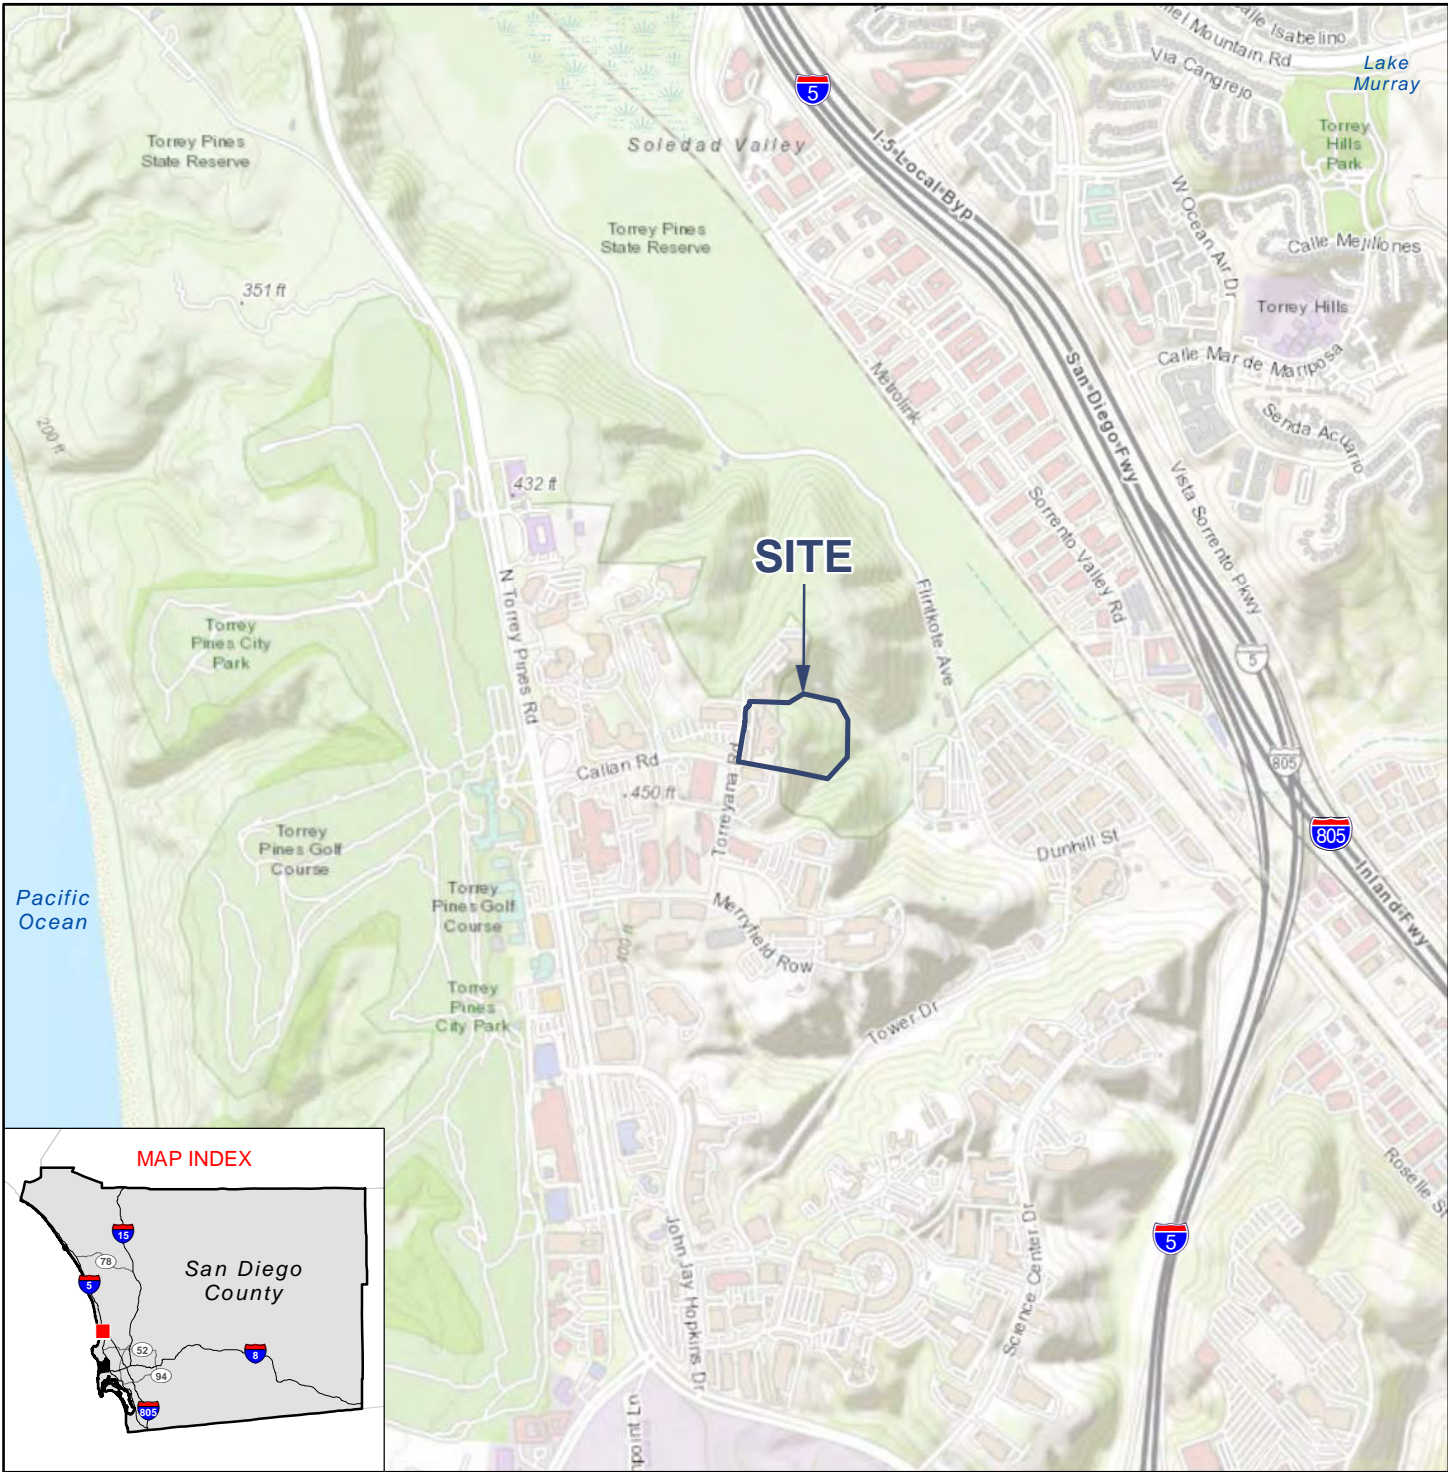

Manager, Environmental Sciences Division

13 QUALIFICATIONS OF THE ENVIRONMENTAL PROFESSIONALS

Resumes, which document the professional qualifications, pursuant to 40 CFR §312.10(b)(2), of the persons that prepared and reviewed this report are provided as Appendix G.

APPENDIX B

User and Property Owner Provided Information

USER QUESTIONNAIRE

Property Address: 11011 Torreyana Road
San Diego, California 92121
APN: 340-010-2900

Please respond to all of the following questions to the best of your knowledge. The purpose of this questionnaire is to assist the user (the client or party seeking to use the Phase I ESA) and the environmental professional in gathering information from the user that may be material to documenting Recognized Environmental Conditions (RECs) at the site. Please note that the user of the Phase I ESA (the client), if seeking protection from CERCLA liability, must adhere to a set of user responsibilities as defined by the ASTM International (ASTM) Standard Practice E1527-13 and the United States Environmental Protection Agency (EPA) 40 Code of Federal Regulations Part 312 titled "Standards and Practices for all Appropriate Inquiries (AAI)". Failure to provide this information could result in a determination that AAI is not complete.

Per Section 6 of ASTM Standard E1527-13 and 40 CFR Part 312 of the AAI rule, the user's responsibilities include, but are not limited to, the following:

- review reasonably ascertainable land title records, lien records, and/or judicial records to search for environmental cleanup liens or activity and use limitations (AULs) against the site filed or recorded under federal, tribal, state, or local law, or engage a title company to review such records. Evidence of environmental liens and/or activity and use limitations on the site, if discovered, must be provided to the environmental consultant;
- report to the environmental professional specialized knowledge or experience material to RECs in connection with the property;
- report to the environmental professional knowledge of environmental liens or AULs encumbering or in connection with the property;
- consider the relationship of the purchase price of the property to its fair market value and whether a lower purchase price is related to potential contamination;
- report to the environmental professional commonly known or reasonably ascertainable information material to RECs; and
- report to the environmental professional the reason for conducting the Phase I ESA.

User responsibilities, CERCLA liability relief, and AAI components are discussed in the AAI rule and in the ASTM E1527-13 standard.

1) Environmental cleanup liens that are filed or recorded against the property (40 CFR 312.25).

Did a search of recorded land title records (or judicial records where appropriate) identify environmental liens filed or recorded against the property under federal, tribal, state or local law?

Yes No

2) Activity and use limitations (AULs) that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi)).

Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls, that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Yes No

(Sensitive habitat in the canyon)

3) Specialized knowledge or experience of the person seeking to qualify for the liability protections (40 CFR 312.28).

As the user of this Phase I ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes No If yes, please describe:

4) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

a) Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

Yes No Not applicable (No Property Purchase Involved)

b) If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes No Not applicable

c) If there is a price difference, please describe:

5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as the user,

a) Do you know the past uses of the property?

Yes No If yes, please describe: lab/office for Biotech research

b) Do you know of specific chemicals that are present or once were present at the property?

Yes No If yes, please describe:

c) Do you know of spills or other chemical releases that have taken place at the property?

Yes No If yes, please describe:

d) Do you know of any environmental cleanups that have taken place at the property?

Yes No If yes, please describe:

6) The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Yes No If yes, please describe:

7) What is the reason for having the Phase I ESA performed (ASTM 1527-13, Section 6.8)?

The potential to redevelop the site

8) Are you aware of any previously prepared documentation for the site, such as:

- previous Phase I ESA or Phase II ESA reports
- environmental sampling, compliance audit, or assessment reports
- environmental permits
- registrations for aboveground or underground storage tanks
- registrations for underground injections systems
- material safety data sheets (MSDS)
- community right-to-know plans,
- safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans
- geotechnical or hydrogeologic reports
- storm water documents
- risk assessments
- hazardous waste generator notices

Yes No If yes, please describe:

There was a preliminary Geotech report done

PROPERTY BACKGROUND QUESTIONNAIRE

Property Address: 11011 Torreyana Road
San Diego, California 92121
APN: 340-010-2900

**Please answer in good faith and to the best of your ability and elaborate as much as possible on any question answered "yes."*

General Information

- 1) Describe the current uses of the site. How long has the site been used for these purposes?

Since it was acquired in 2012

- 2) Describe the structures previously present at the site and their usage/occupants and age.

76, 715 (approx.) Biotech lab/office 1980
Constructors

- 3) When were the structures constructed, if known?

1980

- 4) What is the historical land use of the site? Describe the past uses, owners, and operators of the site. (Be as detailed as possible and note approximate time periods, if known.)

Always same use, from my records

- 5) Are there currently, or were there previously any underground storage tanks (USTs) at the site? If so, please describe their capacities and contents.

not that I am aware of

- 6) Have all USTs been removed from the site? If so, when?

n/a

- 7) Was associated underground piping associated with the USTs removed?

n/a

- 8) Was soil and/or groundwater sampling conducted at the time of UST removal? If so, please describe.

n/a

- 9) Are you aware of any environmental issues associated with the site or of potential soil and/or groundwater contamination?

Yes No

10) Have fill soils been brought to the property?

Yes No Unknown

11) Has there been storage of hazardous materials or wastes on the property?

Yes No Unknown

12) Have any of the following items been stored on the site in containers greater than 5 gallons?

Paint Yes No Unknown
Chemicals Yes No Unknown
Pesticides/Herbicides Yes No Unknown
Automotive-Related Oils/Fuels Yes No Unknown

13) Have there been any spills or releases of chemicals, hazardous substances, or wastes on the property?

Yes No Unknown

14) Have any hazardous substances, petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or other waste materials been dumped aboveground, buried, or burned on the site?

Yes No Unknown

15) Is the site hooked up to a municipal sanitary sewer system or is there a septic tank/system?

Sanitary Sewer Septic

16) Are/were there any subsurface wastewater features, such as sumps, clarifiers, discharge systems, at the site?

Yes No Unknown

17) Does the site discharge wastewater, other than domestic wastewater or storm water, into the sewer or onto another property?

Yes No Unknown

18) Other than permission for domestic hookup, have any city, county, or other permits for wastewater discharge been issued to the site?

Yes No Unknown

19) Is there a transformer, capacitor, or other equipment that may contain PCBs on the site?

Yes No Unknown

20) Other than small quantities of legal pesticides used for landscape maintenance (e.g., Roundup), have pesticides, herbicides, or insecticides been applied on the site?

Yes No Unknown

21) Are/were there any wells on the site (e.g., water supply wells, groundwater monitoring wells, etc.)

Yes No Unknown

22) Are there currently, or were there previously, any pits, ponds, or lagoons on the site?

Yes No Unknown

23) Are there currently, or were there previously, areas on the site with stained soil?

Yes No Unknown

24) To your knowledge, have adjoining properties been used for industrial activities, such the following? (Please note that an adjoining property is a property that is contiguous with, or directly across the street from the site.)

Gasoline Station Yes No Unknown
Printing Facility Yes No Unknown
Metal Plating/Manufacturing Yes No Unknown
Landfill Yes No Unknown
Auto Repair Facility Yes No Unknown
Dry Cleaners Yes No Unknown
Junkyard Yes No Unknown
Waste or Wastewater Treatment Yes No Unknown
Storage, Disposal, or Recycling Facility Yes No Unknown

25) Are there any known issues related to spills/contamination with adjoining or nearby properties?

Yes No Unknown

26) Are you aware of any previously prepared documentation for the site, such as:

- environmental sampling, compliance audit, or assessment reports
- environmental permits
- registrations for aboveground or underground storage tanks
- material safety data sheets (MSDS)
- community right-to-know plans
- safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans
- geotechnical or hydrogeologic reports
- storm water documents
- risk assessments

(If so, are they available for review?)

I will request Geotech report from my architect.

Legal/Activity and Use Limitations

27) Are you aware of any environmental cleanup liens or activity and use limitations such as engineering controls, land use or deed restrictions or institutional controls associated with the site that are filed or recorded under federal, tribal, state, or local law?

Yes No

28) Are you aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?

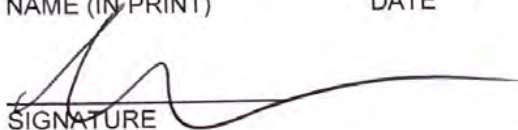

Yes No

29) Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?

Yes No

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/27/2022 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 6 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 16 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there is 1 CA RESPONSE site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal

EXECUTIVE SUMMARY

Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 07/25/2022 has revealed that there are 10 CA ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal leaking storage tanks

CA SAN DIEGO CO. SAM: The listing contains all underground tank release cases and projects pertaining to properties contaminated with hazardous substances that are actively under review by the Site Assessment and Mitigation Program.

A review of the CA SAN DIEGO CO. SAM list, as provided by EDR, and dated 03/23/2010 has revealed that there are 5 CA SAN DIEGO CO. SAM sites within approximately 0.5 miles of the target property.

CA LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA LUST list, as provided by EDR, has revealed that there are 2 CA LUST sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CA HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the CA HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 CA HIST Cal-Sites site within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/21/2022 has revealed that

EXECUTIVE SUMMARY

there are 173 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 01/03/2022 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F004
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: P003
Waste Description: 2-PROPENAL (OR) ACRYLALDEHYDE

Waste Code: P018
Waste Description: BRUCINE (OR) STRYCHNIDIN-10-ONE, 2,3-DIMETHOXY-

demonstrate the length of time that the universal waste has been accumulated from the date it became a waste or was received. The universal waste handler may make this demonstration by: 1) Placing the universal waste in a container and marking or labeling the container with the earliest date that any universal waste in the container became a waste or was received; 2) Marking or labeling the individual item of universal waste (e.g., each battery or thermostat) with the date it became a waste or was received; 3) Maintaining an inventory system onsite that identifies the date the universal waste being accumulated became a waste or was received; 4) Maintaining an inventory system onsite that identifies the earliest date that any universal waste in a group of items of universal waste or a group of containers of universal waste became a waste or was received; 5) Placing the universal waste in a specific accumulation area and marking or labeling the area to identify the earliest date that any universal waste in the area became a waste or was received; or 6) Any other method which clearly demonstrates the length of time that the universal waste has been accumulated from the date it became a waste or was received.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D011
Waste Description: SILVER

Waste Code: D018
Waste Description: BENZENE

Waste Code: D022
Waste Description: CHLOROFORM

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste Description: MERCURY

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: P005
Waste Description: 2-PROPEN-1-OL (OR) ALLYL ALCOHOL

Waste Code: P030
Waste Description: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Waste Code: P087
Waste Description: OSMIUM OXIDE OSO4, (T-4)- (OR) OSMIUM TETROXIDE

Waste Code: U031
Waste Description: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Description: Chapter 12, Section(s) 66262.40(a)
Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.

Violation Notes: Returned to compliance on 12/09/2016.

Violation Division: San Diego County Department of Env Health

Violation Program: HW

Violation Source: CERS,

Site ID: 614285

Site Name: LabSimply, Inc.

Violation Date: 12-02-2016

Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 12/09/2016.
