

WHAT'S WRONG WITH THE STREETLIGHT?

When a streetlight is out, City electricians must troubleshoot the light and its power source to determine the cause and the fix, which are often complex issues.

HOW YOU CAN HELP

1

Report streetlight outage locations using the City of San Diego's **Get it Done** app (sandiego.gov/get-it-done).

2

Be specific! Provide an exact location, a photo, and identify the issue (lightbulb out, pole knocked down, damage to pole).

3

Don't plant vegetation or cover up streetlight infrastructure in your yard, so that City crews can find and fix the problem quickly.

4

Always call Underground Service Alert at **811** before you dig (call811.com).
