Fax: (858) 492-5089

December 11, 2013

## 1. Overview

The City of San Diego's Asbestos and Lead Management Program (ALMP) was requested to perform an environmental inspection for the presence of asbestos and lead prior the relocation of the privately owned residences at 2544 Collier Ave. and 2746 Copley Ave., San Diego CA 92116. The inspection was performed October 22, and November 22, 2013.

## 2. Summary of Asbestos Containing Materials

Friable asbestos containing material and Category II asbestos containing materials must always be removed by an asbestos abatement contractor prior to demolition. ALMP recommends removal of all asbestos containing materials prior to any disturbance created by demolition activities. Asbestos containing materials likely to be disturbed by any structure relocation activities must also be removed.

This survey may not have included all materials concealed behind walls and hard ceilings. If suspect materials are found during demolition, renovation, or relocation activities that are not mentioned in this report then work must stop and ALMP must be notified.

In certain cases, materials are assumed to contain asbestos and not sampled. Asbestos cement vent pipes were found at the properties and identified by visual inspection only.

The summary below lists materials sampled for asbestos. Materials that were found positive for asbestos are shaded.

2544 COLLIER AVE				
Sample #	Material	Location	Condition	% Asbestos
6937a-01	Gray Stucco	Garage Exterior	Good	ND
6937a-02	Gray Stucco	Garage Exterior	Good	ND

### 3. Summary of Lead Paint

An inspection was performed using an XRF analyzer to determine which deteriorated painted surfaces had levels of lead that may pose a lead exposure risk during demolition. The threshold used was 0.10 mg/cm<sup>2</sup> because it has an established regulatory correlation with 600 ppm, which is the level of lead currently allowed in new paint.

All non-intact (loose, flaking) paint containing over 600 mg/Kg or 0.10 mg/cm<sup>2</sup> must be

December 11, 2013

removed by lead trained employees prior to activities which will disturb the painted surfaces.

All paint chips, regardless of their lead content, must be segregated from other waste and characterized as hazardous or nonhazardous (or assumed to be hazardous) prior to disposal.

The summary below lists the areas of non-intact paint with greater than 0.10 mg/cm<sup>2</sup>.

2544 Collier; XRF Sample #5: Exterior Garage Window Sills, Brown paint

2544 Collier; XRF Sample #8: Exterior Garage Eaves, Brown paint

2544 Collier; XRF Sample #9: Exterior Garage Eaves, Brown paint

2544 Collier; XRF Sample #23: Exterior House Window Sills, Brown paint

2544 Collier; XRF Sample #24: Exterior House Iron Bars, Black paint

2544 Collier; XRF Sample #66: Interior House Window Sills, White paint

2746 Copley; XRF Sample #72: Exterior Gate, Black paint

2746 Copley; XRF Sample #73: Exterior Window Bars, Black paint

2746 Copley; XRF Sample #78: Exterior Windows Casings, Blue/Green paint

2746 Copley; XRF Sample #79: Exterior Windows Casings, Blue/Green paint

2746 Copley; XRF Sample #80: Exterior Windows Casings, Blue/Green paint

All surfaces that will be disturbed during demolition, renovation, or relocation activities where paint containing over 1,000 mg/Kg or .5 mg/cm<sup>2</sup> must be contained using "lead safe work practices" as defined by the City of San Diego's lead paint ordinance.

## POLARIZED LIGHT MICROSCOPY (PLM) ANALYSIS REPORT - EPA-600/M4-82-020

**Analysis Number:** 132207-1**Customer Number:** 01**Classification:****Description:** Living Room, Plaster, White**Results:** Non-Asbestos: Non-Fibrous Pink Plaster**Analysis Number:** 132207-2**Customer Number:** 02**Classification:****Description:** Kitchen, Plaster, White**Results:**  
a. Non-Asbestos: Non-Fibrous White Skim Coat  
b. Non-Asbestos: 3% Synthetic Fibers in Gray Plaster**Analysis Number:** 132207-3**Customer Number:** 03**Classification:****Description:** Bed 1, Plaster, White**Results:**  
a. Non-Asbestos: Non-Fibrous Pink Skim Coat  
b. Non-Asbestos: Non-Fibrous Gray Plaster**Analysis Number:** 132207-4**Customer Number:** 04**Classification:****Description:** Kitchen, Linoleum, Brown**Results:**  
a. Non-Asbestos: 50% Cellulose Fibers and 40% Glass Fibers in Gray Paper Backing  
b. Non-Asbestos: Non-Fibrous White Floor Tile Mastic  
c. Non-Asbestos: Non-Fibrous Beige Floor Tile

- All samples tested as submitted to the lab. H.M. PITT LABS, INC. does not assume responsibility for the accuracy of the information submitted with the samples unless done by an employee of H.M. PITT LABS, INC.
- These test results relate only to the sample(s) identified above.
- This report may not be used to claim endorsement by NVLAP or any agency of the Federal Government.
- This report shall not be reproduced, except in full, without written approval of H.M. Pitt Labs, Inc.
- Samples are archived for 2 years from date of receipt and will be disposed of properly following this period.
- Quantitative value is based on PLM CVES (Calibrated Visual Estimates) with a detection limit of 1%.

**William Bradley Blondet**

Dear Certified Asbestos Consultant or Technician:

Enclosed is your certification card. **To maintain your certification, you must abide by the rules printed on the back of the certification card.**

Your certification is valid for a period of one year. If you wish to renew your certification, you must apply for renewal at least 60 days before the expiration date shown on your card. [8 CCR 341.15(h)(1)].

Please hold and do not send copies of your required AHERA refresher renewal certificates to our office until you apply for renewal of your certification.

Certificates must be kept current if you are actively working as a CAC or CSST. The grace period is only for those who are not actively working as an asbestos consultant or site surveillance technician.

Please contact our office at the above address, fax number or email; of any changes in your contact/mailling information within 15 days of the change.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeff Ferrell".

Jeff Ferrell  
Senior Safety Engineer

Renewal – Card Attached (Revised 10/24/2012)

State of California  
Division of Occupational Safety and Health  
**Certified Site Surveillance Technician**

**William Bradley Blondet**

Name \_\_\_\_\_  
Certification No. 99-2689  
Expires on 12/10/14

This certification was issued by the Division of Occupational Safety and Health as authorized by Sections 7180 et seq. of the Business and Professions Code

# *Certificate of Training*

*This is to certify that*

**William Blondet**

*has successfully completed 8 hours of formal training entitled*

## ***AHERA Contractor Supervisor Refresher***

*as approved by the California Division of Occupational Safety and Health  
and as certified by the Environmental Protection Agency and approved by AHERA under TSCA Title II*

*Presented by:*

***Design For Health Training Center***
