Tolling Agreement Extending Processing Deadline

Date of Tolling Agreement: _____

As you know, the City must comply with all shot clock requirements for Wireless Communication

Facilities (WCFs) including Small Cell WCFs. The Shot Clock requires the City to process applications

within designated time periods. However, the Ruling states that the deadlines may be tolled by

mutual consent.

This is an agreement between _____, agent representing _____, and

the City of San Diego to extend the Shot Clock deadline. This agreement covers the following

development project application:

Project Name: _____

City Project Number: _____

City Project Manager: _____

Project Address: _____

Upon your consent, this shot clock tolling agreement extends the allowed City review time for this

type of application. This agreement does not toll to a date certain; however, it also does not waive

the permit expiration dates described in the Municipal Code.

If you consent to the above-described extension of the Shot Clock processing deadline, please date

and sign in the space provided on page 2 and include this in your submittal (or resubmittal).

Agreed to by:

CITY OF SAN DIEGO

_____   _____
Development Project Manager   Date
Development Services Department

_____

I hereby freely and voluntarily agree and consent to the extension of the processing deadline

described in this letter of agreement, and hereby represent and warrant that I am authorized to

execute and deliver this agreement to extend the processing deadline on behalf of

_____. I acknowledge that this tolling agreement applies only to

Spectrum Act timeframes and does not extend the City's Building Permit application expiration date.
